Re: *Application of Bluegrass Wireless LLC for Issuance of a Certificate of Public Convenience and Necessity to Construct a Cell Site (Whitley West) in Rural Service Area #6 (Casey) of the Commonwealth of Kentucky, Kentucky Public Service Commission Case No. 2009-00145*

Dear Mr. Derouen:

Pursuant to the order of the Public Service Commission of the Commonwealth of Kentucky dated June 24, 2009 and its letter of July 2, 2009 in regard to the above-referenced case, enclosed for filing please find six (6) copies each of the responses of Bluegrass Wireless LLC to the letters of concern of (1) Dale and Sherry Hensley; (2) Shane A. Romines, Esq., legal counsel to Keith and Charlotte Barnett and Darrell and Kim Barnet; (3) John and LaDonna Dopel; (4) Ricky and Katrina Davis; and (5) Ray and Justine Young. Please file-stamp one copy, and return it to our courier.

Thank you, and if you have any questions, please call me.

Sincerely,

DINSMORE & SHOHL LLP

Re: *Application of Bluegrass Wireless LLC for Issuance of a Certificate of Public Convenience and Necessity to Construct a Cell Site (Whitley West) in Rural Service Area #6 (Casey) of the Commonwealth of Kentucky, Kentucky Public Service Commission Case No. 2009-00145*

Dear Mr. and Mrs. Hensley:

We are legal counsel to Bluegrass Wireless LLC ("Bluegrass Wireless"). In that capacity, we are responding to your letter dated June 26, 2009, addressed to the Public Service Commission of the Commonwealth of Kentucky (the "Commission") regarding your concerns with respect to the proposed construction of a cell tower facility to be located at 351 Ernest Alsip Road, Corbin, Kentucky, 40701.

Bluegrass Wireless proposes to construct this cell tower facility in Whitley County in order to provide enhanced wireless communication services in the area. The proposed cell tower facility will accommodate the citizens of Whitley County and individuals traveling along U.S. Highway 25. The proposed cell tower facility will also accommodate emergency medical services and other emergency response services, such as 911, that are vital to all communities. To date, there have been no objections to this proposed cell tower facility from any local or other governmental agencies and officials.

The proposed location of the cell tower facility is the most suitable location in this area of the county due to: (1) its elevation; (2) the nature of the terrain in the surrounding area; (3) its proximity to U.S. Highway 25; and (4) its proximity to the existing Bluegrass Wireless cellular tower located in Whitley County that the proposed cellular tower will work in conjunction with for optimum coverage purposes. The proposed cell tower facility may accommodate other carriers in the future which will eliminate additional cell tower facilities being constructed near your property as well as others in the vicinity. The site for the proposed cell tower facility was selected by radio frequency engineers, on behalf of Bluegrass Wireless, who used their expertise and applicable propagation prediction tools and determined that this site is the optimum site in terms of location to provide the best quality service to customers in the service area.

Dale and Sherry Hensley
July 14, 2009
Page 2

Bluegrass Wireless, as well as all other wireless carriers, is required to adhere to stringent Federal Communications Commission and Federal Aviation Administration rules governing cell tower construction, maintenance and safety. A typical cell tower in a suburban or rural area emits 150 to 350 watts of power or less. In contrast, a television tower emits up to 5 million watts while a commercial radio station tower operates at up to 1 million watts. Local police and fire department towers produce up to 500 watts of power. In any event, the Federal Telecommunications Act of 1996 prohibits local governments from establishing local safety or environmental standards for human exposure to radio frequency emissions.

Finally, during the construction process of the proposed tower, there will be vehicular and foot traffic at the proposed cell site. Thereafter, vehicular and foot traffic to and from the cell site will generally consist of one maintenance visit per month, or less.

I hope that this letter satisfactorily addresses your concerns.

Thank you.

Very truly yours,

DINSMORE & SHOHL LLP
