To the Executive Director,

Re: Case No. 2009-00453

Re: East Kentucky Network, LLC d/b/a Appalachian Wireless proposal to build a cellular telecommunications tower with antennas and equipment shelter.

I have land next to the proposed construction site. The site (where I have been told) and the existing road to the proposed site **does not match the site shown on the map I received.**

I reserve my rights to intervene in this matter for the following reasons:

The map site is wrong and I do not know just where the tower is to be built.

I tried to get to the site *where I have been told it is to be built*, but I could not drive to the site.

The map shows **two Hilltop Roads**. I am not aware of two Hilltop Roads. The proposed site shown on the map does not exist *as far as I know*. **Hilltop Road runs from Route 1559 to Route 23** and this is where I own property. This is where Bill Clay owns land adjacent to mine. It is on his land that the tower is to be built. I need to know the truth about the location.

I want to know how close to my property it will be and how my property value will be affected by it.

This is my request for intervention.

Sincerely,

Fredrick Burchett
