Name: Cathy Snyder

Address: 8908 Collingwood

Case: 2010-00426

COMMENTS: Hopefully PSC has copies of transcripts
from the Public Hearing Nov 28 2007. Continued
violations over decades are documented.

In 2009 there was a complete collapse of a line
EASTER weekend that blew the cap off the manhole cover
in our backyard shooting raw sewage into the yard
which flowed directly into the creek. Never were
the residents downstream advised of the danger nor
are they ever.

Twice in the last couple of months has the plant gone
dead & stayed that way for days. It has not been
operational since at least Thursday March 17th and still
was not as of 5pm today when we left for this meeting.

Again MSD is ready to take over & can connect
anytime. The plant has been ordered by DOW
to cease operation & connect to the municipality provided
line.

This has been a cash cow for Hillridge taking
all the payments without reinvesting any funds. !!!

The DOW has our photos of the raw sewage also I
have letters from Resident downstream stating they have
seen fecal matter & hygiene products floating downstream.
