CASE # 2010 00476

I have a small business in Clinton, Ky,
as of right now we pay around \$85.00 dollars a
month for our water and sewer.

We are only open for breakfast and lunch
five days a week and just breakfast on Saturday.
We try to keep our prices as low as we can
to accommodate the people in Clinton, with the
prices of everything going up we are barely
making our bills now, and now you want to
raise the water "AGAIN". What are the people of
Clinton to do?

If you would check out the wages in
this area and then look at the grocery
and gasoline prices and the cost of
living here you would not let this raise
on the water bill go through.

Peggy Howell
