1.b. A copy of the supplier's notice of the changed rate showing the effective date of the increase is attached as Exhibit 1.
2. Twelve-month period upon which the purchased water adjustment is based. (This twelve-month period must end within 90 days of this filing).

From January 2009 through December 2009
3. Statement of water purchases. Where water is purchased from more than one supplier, purchases from each supplier must be shown separately. If water is purchased through a decling block rate schedule, purchases for each month must be shown. Attach an additional sheet if necessary.

Supplier(s)
Logan Todd Regional Water Comm. TOTAL PURCHASES

Gallons Purchased
during 12 month period
$139,675,000$
4. Total sales for the 12 month period $116,498,000$.
5. Increased water cost $\$ 3.75$.

The increased water cost is the cost difference between purchases at base (current rate) and purchases at new rate.
6. Purchased water adjustment factor 0.53 .
7. The purchased water adjustment factor is obtained by dividing the increased cost of water by the total gallons sold.

Note: The purchased water adjustment factor is added to each thousand gallons sold. If the minimum usage is 2,000 gallons then the purchased water adjustment factor would be added to the minimum bill twice. Revised tariff sheets must be attached showing the rate to be charged by the utility and the effective date of the increased rates.
