Re: *Application of Cumberland Cellular Partnership d/b/a Bluegrass Cellular for Issuance of a Certificate of Public Convenience and Necessity to Construct a Cell Site (Burkesville II) in Rural Service Area #5 (Cumberland County) of the Commonwealth of Kentucky, Kentucky Public Service Commission Case No. 2010-00044*

Dear Mr. Jones:

We are legal counsel to Cumberland Cellular Partnership d/b/a Bluegrass Cellular ("Cumberland Cellular"). In that capacity, we are responding to your letter dated April 7, 2010, addressed to the Public Service Commission of the Commonwealth of Kentucky (the "Commission") regarding your concerns with respect to the proposed construction of a cell tower facility to be located at 5451 Celina Road, Burkesville, Kentucky, 42717.

Pursuant to 807 KAR 5:063 § 1 (l), you were sent notice of the construction of the proposed cell tower facility because you own property within 500 feet of the location of the proposed cell tower facility. The location of the proposed cell tower facility will not result in any restrictions on your use of your property. In addition, and pursuant to 807 KAR 5:063 § 1 (k), the map which was sent to you, along with a copy of the notice of the proposed cell tower facility, identifies all structures and every owner of real estate within 500 feet of the proposed cell tower.

The proposed cell tower facility is compactly constructed, and very few existing trees or other foliage will be adversely impacted during the construction of the facility on the property upon which it will be located. In any event, Cumberland Cellular does not plan nor intend to remove any trees or other foliage on any adjacent property.

Cumberland Cellular proposes to construct this cell tower facility in Cumberland County in order to provide enhanced wireless communication services in the area. The proposed cell tower facility will accommodate the citizens of Cumberland County and individuals traveling along State Roads 61 and 449 and in the vicinity. The proposed cell tower facility will also accommodate emergency medical services and other emergency response services, such as 911,

Mr. Dennis Jones
April 29, 2010
Page 2

that are vital to all communities. To date, there have been no objections to this proposed cell tower facility from any local or other governmental agencies and officials.

The proposed location of the cell tower facility is the most suitable location in this area of the county due to: (1) its elevation; (2) the nature of the terrain in the surrounding area; and (3) its proximity to State Roads 61 and 449. The proposed cell tower facility will accommodate other carriers in the future which will eliminate additional cell tower facilities being constructed near your property as well as others in the vicinity. The site for the proposed cell tower facility was selected by radio frequency engineers, on behalf of Cumberland Cellular, who used their expertise and applicable propagation prediction tools to determine that this site is the optimum site in terms of location to provide the best quality service to customers in the service area.

Cumberland Cellular, as well as all other wireless carriers, is required to adhere to stringent Federal Communications Commission and Federal Aviation Administration rules governing cell tower construction, maintenance and safety. A typical cell tower in a suburban or rural area emits 150 to 350 watts of power or less. In contrast, a television tower emits up to 5 million watts while a commercial radio station tower operates at up to 1 million watts. Local police and fire department towers produce up to 500 watts of power. In any event, the Federal Telecommunications Act of 1996 prohibits local governments from establishing local safety or environmental standards for human exposure to radio frequency emissions.

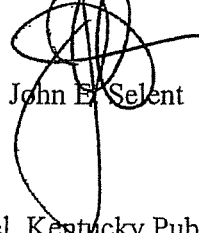

Finally, the cell tower and related equipment will not generate any noise during normal daily operation. However, in the event of electrical power failure, the onsite generator will automatically engage in order to keep the cell site operational until electrical power is restored. Also, the onsite generator will engage once a week, for approximately 10 minutes, for maintenance purposes.

I hope that this letter satisfactorily addresses your concerns.

Thank you.

Very truly yours,

DINSMORE & SHOHL LLP

John E. Selent
