West Liberty, KY. 41472

To Whom It May Concern:

I can't speak for all of the 16 co-op's, but I can for Grayson and LVRECC. If you take a look at what was charged customers during the last year it seems totally unfair. To most of people served by these Co-op's. God help those who are on fixed income. I think we can understand weather factors and the rising cost of maintained. We the working people are not getting raises to off set this cost and other cost of living expenses. I urge you to reconsider and not join the rank's of others like OIL COMPANY, HOSPITALS, INSURANCE COMPANY and PHARMACY'S who just take what they want from us and leave us at their mercy with no help from the government. How are we going to survive in the future? I hope we still have the freedom of speech in this country and not to held against us.

Sincerely,

Bill Havens
