RESPONSES TO COMMISSION STAFF'S FIRST INFORMATION REQUEST TO GRAYSON RURAL ELECTRIC COOPERATIVE CORPORATION DATED JULY 15, 2010

GRAYSON RURAL ELECTRIC COOPERATIVE CORPORATION PSC CASE NO. 2010-00174 FIRST INFORMATION REQUEST RESPONSE

COMMISSION STAFF'S FIRST INFORMATION REQUEST DATED 07/15/10 REQUEST 1

RESPONSIBLE PERSON:

Ann F. Wood

COMPANY:

Grayson Rural Electric Cooperative Corporation

Request 1. Provide the workpapers, spreadsheets, etc. which show the calculation of the increase, by individual wholesale rate schedule, in Grayson's cost of power from East Kentucky Power Cooperative, Inc. that Grayson is proposing to flow through to its customers. Provide the information in hard copy as well as electronic format with the formulas intact and unprotected. Include a brief narrative description of the data being provided.

Response 1. The work papers showing the calculation of the increase by individual wholesale rate schedule for each Member Cooperative served by EKPC are provided on pages 2 through 20 of this response and also on the enclosed CD. The allocation of the EKPC increase was spread among the member systems using a proportional approach. To achieve this, EKPC analyzed each member system's calendar year 2009 billing units by rate class. This analysis enabled EKPC to determine the ratio of each member system's billing units to the total of those for all members. That ratio was then applied to EKPC's 2011 budgeted billing units, then multiplied by the wholesale total proposed revenue increase to determine that member system's share of the increase.

GRAYSON RURAL ELECTRIC COOPERATIVE CORPORATION PSC CASE NO. 2010-00174 FIRST INFORMATION REQUEST RESPONSE

COMMISSION STAFF'S FIRST INFORMATION REQUEST DATED 07/15/10

REQUEST 2

RESPONSIBLE PERSON: Ann F. Wood

COMPANY: Grayson Rural Electric Cooperative Corporation

Request 2. Refer to Exhibit 3 of the application.

Request 2a. Provide this exhibit in electronic format with the formulas intact and

unprotected.

Response 2a. Please see the attached CD for Grayson Application Exhibit 3 with formulas intact and unprotected.

Request 2b. The billing analysis show various rate schedules with escalation percentages applied to the billing determinants. Provide workpapers, spreadsheets, etc. for the calculation of the percentages, as well as a narrative explanation of how the percentages were determined.

Response 2b. Please see page 3 of this response for information regarding the escalation percentages.

Refer to pages 1 and 6 of 6. Explain why schedule 5, Street Lighting Service, found on page 6 is not included in the Lighting totals on page 1. If a correction is necessary, file a copy of all schedules that would require updating as a result.

Response 2c. A revised schedule is included on page 4 of this response. The revision is listed in bold print.

Refer to page 3 of 6, Schedule ETS. Grayson's ETS tariff includes on-peak and off-peak rates. Explain why only the off-peak rate is included on page 3. If the on-peak rate is included on the Farm and Home Schedule on page 2 of 6, explain whether the customer charges for the ETS customers are included twice, in both Farm and Home and ETS schedules.

Response 2d. The information on page 3 of 6, Schedule ETS, includes only off-peak information. The on-peak information is included in Schedule 1, Domestic Farm and Home Service. Therefore, ETS customers are not included twice.

Refer to page 6 of 6. Explain why fuel adjustment clause and environmental surcharge revenue is not included in Schedule 6, Outdoor Lighting Service.

Response 2e. Fuel adjustment clause and environmental surcharge revenue associated with Outdoor Lighting Service has not been isolated. Rather, those revenues are combined with the class of customer using the outdoor lighting, such as farm and home customers.

61 Grayson Escalation

		Custo	mers			Demand			
·	Residential Customers	Small Commercial Customers	Large Commercial Customers	Street Light / Other Customers	Residential Energy	Small Commercial Energy	Large Commercial Energy	Street Light / Other Energy	WNCP
2009	14,386	1,290			184,913	56,889	18,883		80.3
2011	14,517	1,300			187,832	57,799	19,491		80.4
	0.91%	0.78%			1.58%	1.60%	3.22%		0.12%

The escalation calculations are based upon 2009 actual customers, energy and demand, and 2011 projected customers, energy and demand. The actual customers and energy are based upon RUS Form 7 data. The actual demand is based upon the winter season peak demand. The projected customers, energy and demands are based upon the preliminary 2010 load forecast. At the time of this analysis, the 2010 load forecast process was not complete. Member system visits to discuss the preliminary projections had not taken place.

To calculate the escalations, the same formula is used for customers, energy and demand:

Escalation Percentage = ((Projected - Actual) / Actual) *100

Note: In order to appropriately match retail rates to the forecasted test year used for wholesale rates, an escalation factor was applied to each member system's 2009 actual billing determinants. The escalation factors used in this proceeding were an outcome of preliminary load forecast projections.
