To Whom It May Concern - Public Service
Commission.

I am writing about Louisville Gas and Electric
Environmental Surcharge application increase.

Question, with so many customers, out of
work, working two jobs or more to make ends
meet. Many people living on social security
benefits and running out of money for groceries
and medications for long periods of time,
how can the Louisville Gas and Electric
Company come up with an increase to
be added to their billing. Monthly increase
of \$1.96 during 2012 with the maximum
monthly increase expected to be \$16.33
during 2016.

How do you expect the customers to pay
this increase? Due without food and medications.
This increase is to be used Mill Creek Sewerline Station
and installing a Particulate Matter Control System on
Unit 1 at the Trimble County Sewerline Station -
Because of Federal Law - Clean Air Act and
other current and proposed environmental
laws and regulations.

It is time, for Public Service Commission,
to think about Customers needs of food,
medications, providing a place for their children
to ~~live~~ live, a place to sleep, not on park benches,
in their cars etc.

clean air is nice to have, but at this time,
there are more important things to consider and
from the looks of things, they are going to get
worse.
