Case: 2011 00162 (Rate Increases)

COMMENTS: What We Are Concerned  
about is the increase in  
costs passed on to citizens  
who are on "Fixed Income,"  
and those who are "unemployed"  
sure  
As I am you are aware, Congress  
is planning to cut the  
Food Income Assistance Program in 2012  
by 50%. That would mean  
I that in Kentucky we  
would receive \$30 million as  
opposed to the \$60M we have  
received in the past. This  
would certainly lead to  
an increase in hospital stays  
will lead to more medical emergencies  
Will there be a decrease in  
CEO salaries? If not, then  
you need to consider that part  
of these increases. I would be  
apart of their natural business  
costs. We all have a right to  
clean air! We also have a problem

for  
more  
with  
Respiratory  
problems

with people who homes  
should be retrofitted! And  
also repaired! Insulated  
with <sup>1990</sup> Green products!
