PUBLIC SERVICE
COMMISSION

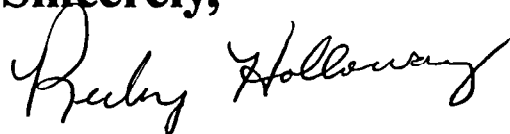

Dear Mr. Melnykovich,

**Please include this information in Case # 2012-
00428**

**We do not want to participate in the smart grid or
any other agenda associated with radiating or
spying on us!**

**Our utility meters work just fine and we wish to
support the economy by allowing meter readers to
keep their jobs which in turn allows us to maintain
our health and rights to privacy and freedom!**

Sincerely,

Ruby Holloway

Dear Andrew Melnykovich,

Re: **H.R. 2685: Smart Grid Advancement Act of 2013**

WE ARE BEGGING YOU TO PLEASE VOTE NO TO INSTALLING THESE DEATH METERS AND GRIDS ON AND AROUND OUR HOMES!!

I have spent the last year writing to multiple utility companies, environmental agencies, health departments, congressmen, governors, attorneys, etc...

Myself, family, friends, pets, and clients have all been exposed to these meters and either had to move (or got lucky, and some utility companies removed them) to escape the detrimental effects. They turn your home into a microwave and the illnesses and death start!

According to Declassified Army Document entitled "The Bioeffects of Selected Non-Lethal Weapons" and dated 12/13/2006, the government is **WELL AWARE** of the deadly effects of these meters, the system and the emf they emit.

I would also state that these meters **Do KILL** even though they claim they are non-lethal.

President O'Bama included free installation of these meters in his stimulus package which I did not vote for nor did I agree with!

These meters are deadly and it should be considered "Malice" with "Intent to Kill" if they are allowed to proceed with their plans to install these "Death Meters".

I am asking that you stop any and all attempts to push this Smart Meter Agenda on our nation.!

Please See Attached Letters for more details regarding effects of these meters.

Sincerely

Ruby Holloway

Re: 3401 Gingertree Circle Lexington, Kentucky 40502

**NOTICE OF NO CONSENT TO TRESPASS, CAUSE ILLNESS AND
SURVEILLANCE, NOTICE OF LIABILITY**

Dear Governor Steve Beshear and President , agents, officers, employees, contractors and interested parties of Kentucky Utilities, Kentucky American Water, and Kentucky Public Service Commission.

On 11/20/ 12 I spoke with your company and I also mailed you a certified letter informing you that I refuse to allow you to install the "Smart Meter" (which due to my experience I will label a "death meter") on my home.

I have already had 3 separate experiences being exposed to these meters as well as hearing and speaking with others exposed to these meters.

I have never been so sick or watched others, including animals, get so sick after these meters were installed. These illnesses included watering eyes, blurred vision, headaches, heart palpitations, difficulty breathing, joint pain, menstrual cycles stopping, gray hair occurring, thyroid deficiency, electricity poisoning, cancer, vomiting, dizziness, and just overall a lousy feeling with cloudy thinking and severe fatigue.

Some of the symptoms came on gradually, and others were immediately noticeable within a few minutes of entering the home. They were very severe during early morning hours and late evening hours and were non stop on the weekends. I watched in horror as my family, friends, and their pets were made sick by these "DEATH METERS"!

It didn't take me long to notice the pattern of symptoms increased in the morning when everyone was getting ready for work, in the evening when everyone arrived home from work, and on the weekends when everyone was home.

I felt during these times as if someone was bathing me in radiation or putting me into a microwave and cooking me on high. I felt the majority of the above symptoms at one time or another and the only time they were relieved was when I left the homes or went back to my house where I do not have a meter.

I am reminding you once again that you are not allowed to install one of those "DEATH METERS" on my home and I have posted no trespassing signs on my property.

Your meter reader may continue to "read" my meter and this will help him and the economy because he will keep his job. He is more then welcome!

However, if you come on my property for any reason other than to "read" my analog meter, you are in violation and can expect to be prosecuted as allowed by law!

You do not have the right to make me sick, and you can not claim ignorance because you have been informed!

Sincerely,

Ruby Holloway

Dear Mr. Andrew Melnykovich,
Director of Communications at PSC,

Re: Case 2012-00428

I am e-mailing, writing, and faxing you a copy of multiple letters which I have sent regarding my exposure to smart meters and my request and demand that I will not allow one to be installed on my home.

Presently, my daughter has spoken with Mr. Howard at Rate Intervention and we have made it clear that we are willing to testify regarding this case as we both became ill after being exposed to these meters. My daughter also lost several pets and friends after these meters were installed. These meters are deadly and it should be considered "Malice" with "Intent to Kill" if they are allowed to proceed with their plans to install these "Death Meters".

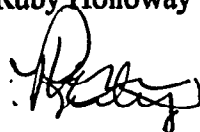

Mr. Howard has put our letters up on the case file, but I want to make sure you see this information personally as I know how things can get brushed over and covered up!

Please do not hesitate to request our presence at the hearings!

Sincerely,

Ruby Holloway

Attached Hereto: 3 letters sent to Gas, Water, Electric, Public Service Commission, All State and Local Representatives, and Rate Intervention.

Citizen rights

It is within a citizen's right and ultimately their power to choose a wired meter over a wireless smart meter. The right decision means a decrease in the exposure to dangerous RF radiation and the risks that come with that exposure.
