RE: Case No. 2012-00221 – Opposition to Unjust Allocations to Residential Monthly Service Charges

Dear Commissioners:

I am a residential customer of KU with a farm meter and several residence meters. I also am part owner of a small business on KU service. I write to oppose increasing revenue to KU by increasing service or meter charges. I have invested heavily in energy efficiency projects and even renewable energy. I feel that by proposing to disproportionately raise service charges instead of the electric rate that KU is undermining and being unfair to those who are trying to do the right thing. I can not tell that KU is doing one thing extra on meters or services and I would rather let them raise rates.

KU's proposed allocation would seem to encourage energy use and waste, just what our country and the world does not need. Please act to encourage sustainable practices.

Sincerely,

Dr. Frances Lockwood, Ph. D., P. E.
