Questions for Kentucky Utilities

When KU replaces the coal fired production or units with natural fire gas production or units; How much capital cost on the coal handling equipment will KU still have on the books as assets (Long term depths) ?

How does KU plan to liquate those assets or depths?

- A. Sell them
- B. Mark them down and off the books

Since natural gas does not require the labor force that coal handling does, what will be the labor cost saving be from the natural gas production or units?

In other words where are the saving (\$ amount) to the rate payers or customers
