PUBLIC SERVICE
COMMISSION

Dear Sirs:

I am writing to object not only to the LG & E increase (the previous rise in 2010 was 70%), but because the bulk of the increase is based on the monthly base-service-charge, not the unit-of-energy price (kWh).

This is totally unfair, as it penalizes those of us who are determined to use energy sparingly. Basing the 53% increase, if indeed one is warranted, on a monthly base-service-charge, is a poor business practice.

You are aware of the current pinch that most people feel due to the economy. Please reconsider charging us for use based on the unit-of-energy price (kWh). I would appreciate a reply, as many patrons feel as our family does - this anticipated way of charging customers is unfair!

Yours truly,

Judith Crismon
