PUBLIC SERVICE  
COMMISSION

Concerning: Middletown Waste Disposal Inc, 20% increase in sewage processing cost.

From: Owners of English Station Mini Storage and the property at 508 N. English Station Rd.  
In Louisville, Ky 40223

Dear Agents of the Commission,

As business owners we are in disbelief at the owners of Middletown Waste Disposals request for a 20% increase in our cost to operate their water treatment plant. Being at the mercy of a private utility, this type of increase is unacceptable.

When there is no competition to drive this cost down, we the consumers need to be treated fairly and justly by any utility, private or public. A 20 % increase is by no means is fair and just.

Since 90% of our water usage never gets put down the drain; because the water is used to clean storage units, water plants or to wash rental trucks. Our only resolve here, if this increase is allowed and continue will be to disconnect from the sewer line and go back to our sewage tanks that are still intact.

At least we have the option of choosing who picks up the sewage and can keep our cost at a minimum.

Sincerely Yours,

Andrew J. Schmitt

## NOTICE

Middletown Waste Disposal, Inc. has filed an application with the Public Service Commission to increase its rates for sewer service. Middletown is proposing a 20% rate increase to be effective this year, and another 5% increase to be effective one year after the first increase takes effect. Middletown believes it could justify a higher rate increase than is proposed, but is requesting the smaller increase to reduce the burden upon its customers. The proposed increases are required because Middletown Waste Disposal's electricity and other operating costs are increasing. Electricity is Middletown Waste Disposal's largest expense, and the price of electricity alone will increase by at least 18% - and possibly by 25% - in the next few years. The proposed effective date of the Phase 1 increase is September 30, 2012.
