PUBLIC SERVICE
COMMISSION

I'm writing in regard to the Kenegy Bills going up by 25⁰⁰ to reg residents. People like me that live on a set amount and have no help from anyone is going to be the type people that it hurts the most. My limited income doesn't allow for another 25⁰⁰ each month. I barely get by now. I have tried every way to winterize my rental mobile home but it is old and hard to heat.

Adding another 25⁰⁰ per month means less food. With gas (auto) being high as it is and Medical Bills, Dr appointments etc. I'm already living mostly on Cereal and Peanut Butter. I'm 53 no family & this is very disturbing to think that the poor have to pay more because you have lost clients.

Myself & others on limit income need help with ideas on how to cut our electric to make up for the 25⁰⁰ your add. Please consider giving us some kind of way to get these bills down.
