To Whom It May Concern:

I do not understand why Kenergy needs to raise rates 25%!!! They just got a 16% raise a couple months ago they said the bill wouldn't go up over \$15-\$20 but mine went up over \$40.00 & I am a single father raising a 8 year old son. My mothers went up over \$60.00 & she lives alone & my fathers went up over \$30.00 a month. So if Kenergy goes up 25% & they say that our bill will only go up \$20-\$30 a month I feel as if that IS a LIE!!! There is NO REASON for them to raise rates again. I have not had a raise in over 5 years & my parents are on a fixed income. We feel that there is NO REASON for Kenergy to raise rates. Instead of building new buildings & giving bonus to employees or anyone they need to cut back like everyone has had to do & is having to do to PAY their electric bill!!!! Instead of RAISING RATES THEY NEED TO CUT BACK. There was 5 people living in my house in 2011 & I got divorced so I know that my son & I don't use more electricity now than we did in 2011 with 5 people living in the house. But according to Kenergy we do, there is a problem somewhere cause we use the new light bulbs & only have a light on in the room we are in. I have an outside wood burning stove to help save money & heat my water with it in the winter. Once again WE DO NOT SEE ANY REASON FOR KENERGY TO RAISE RATES!!!!

Thank You Very Much,

Chief Brent McDowell
