Case No. 2013-00393

12-10-13

To: Public Service Commission of Kentucky

On 12-9-13 I received a certified mail letter from East Kentucky Network, stating they were going to construct a 300 foot tower with an equipment shelter. This would be built on property I own.

I was never ask or told anything about it until the letter. No one has ever approached me to buy or lease a parcel of land from me. I'm not sure if I will let them buy or lease a parcel of my land until I get some answers.

Is it safe? Does it attract lightening? Will they do any other damage to my property? (Road) Will that decrease the value of my property? How and why did they select my property? Why didn't they contact me before now?

My land has been in my ~~family~~ family for 5 generations. I have lived in peace here for many years. I really do not want people on my land or able to have access to the back side of my place. Thieves are bad here in Martin County. There are a lot of concerns I have about this.

Their letter gives me the feeling they are going on with the construction and I can intervene in this matter. I do not want them on my land until my questions and concerns are settled and I am compensated for my part. This is still America and this is my land and I have say what goes on here. They or noone else has the right to come in on my land without permission.

Please let me know what is going on. Their letter said to contact you. My case number 2013-00393.

Thank you,
Glen Blevins
