RECEIVED

APR 24 2013

PUBLIC SERVICE  
COMMISSION

I am writing in response to case no. 2013-00076. Since our first letter in 2006, we have been very receptive to the commission's request and welcome recommendations. In your letter you state you can't find a difference between Bright's Propane and our system pursuant to KRS 278.010 (3). There are over 100 propane companies in the state of Kentucky and each one would be called a Utility according to KRS278.010(3). Bright's Propane is jurisdictional giving the customers in that area no choice if they want to use propane but to use their service. I have contacted Bright's location and have found this is not the case. A visit to the Bright's location would prove what has happen. They have customers in that subdivision using other suppliers due to the extra cost they have incurred. With the increase expenses incurred thru all the regulations from PSC, it has caused our competitors to offer services for less leaving Bright's with no chance of recovering their huge investment. Ameri Gas (Heritage & Brights) has informed me that they are going to abandon the system due to these causes. We have done a good job over the years to supply all but two customers with our service. I have enclosed letters from developers praising our service.

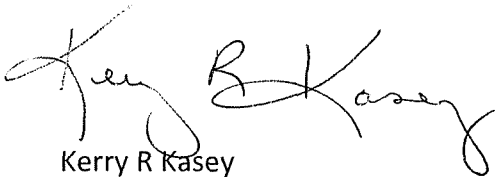

Irvington Gas Company does not have any Jurisdiction in any subdivision. Any company has the right to supply any customer in any of our systems. The only reason for a customer to choose Irvington Gas over Ameri -- Gas, Ferrell Gas, Empire Gas, Southern States, United Propane Gas, Shelby Co-op, Lyon's Gas, Bennett's Gas or Miles Propane in our service area is our service and our price. Any customer can stop using our meter service and purchase service from any of the above companies at any time. I have attached a copy of a picture that shows another company supplying a customer in one of our areas.

Irvington Gas Company is providing people with a quality service at a competitive price. Our approach to each potential customer is that we our family owned since 1938, we support our

local foundations, we provide a choice for a meter to have a monthly bill, we provide programs to pre-purchase your gas and budget billing. We sell appliances and service anything we sell.

You are requesting us to appear on May 7, 2013 four years since our last meeting. Is the meeting to discuss the same issues or something new? I have attached a few written statements from developers to confirm my case. We strongly agree and appreciate the Public Service Commission viewing our services for safety. This is a public service but to require us to send you quarterly rate adjustments etc. would not be a public service causing increasing cost and starting unfair competition with the many over suppliers that would be unregulated.

Sincerely,

A handwritten signature in black ink that reads "Kerry R. Kasey". The signature is written in a cursive style with a large, stylized "K" and "R".

Whom it might Concern:

I am the developer of Brightside and Cowley Crossing Subdivisions located off old 31w in Elizabethtown. I have had a relationship with Irvington Gas Company for over 15 years. I have homes built using propane tanks before but like the idea of no tank and having a better appearance for my subdivisions. I give my customer's an option for utilities and appliances. I will not lose a sell because a customer chooses something different. I take pride in our homes and have a reputation for good quality homes at reasonable prices. My advertising is from my existing homeowners so I am to please. Irvington Gas has informed me that their rates would increase if they become rate regulated. I have offered the meter system to my homeowners as a public service. If it becomes too costly, I will recommend other alternatives. It is disturbing to here this news and hope Irvington Gas can continue serving my needs in the same manner as they have for the past 15 years.

Sincerely

Jimmy Howard

Public Service Commission

I am the developer of the Orchards subdivision located off St. John's Road in Elizabethtown. I chose Irvington Gas Company to pipe my subdivision to provide my customers with a choice to have gas and not have a propane tank setting in their backyard. They do have a choice. My homeowners have chosen the meter system because they have found it less expensive, aesthetically pleasing and Irvington Gas provides provides fantastic and timely service.

I have been informed that if they become rate regulated that my homeowners will have more expensive bills due to the extra cost involved. I am happy with the current way Irvington Gas Company does business and want to continue in the same manner in the future.

I appreciate your consideration.

Sincerely

A handwritten signature in black ink, appearing to read "John C. O'Bryan", with a horizontal line extending to the right. The signature is written over the printed name below it.

*I inquired about the underground propane system because I had seen it in the Howard's subdivision. I like the idea of being able to offer every source of energy underground. It enhances the beauty of the area. What sells' lots and homes for me is the appearance and what my subdivision has to offer. I am not under any contract with Irvington Gas Company but have done business with them for many years. I appreciate the relationship we have had over the years and hope to continue in the same manner.*

*Sincerely*
