Livingston, KY 40445

To whomever will help / ^{Customer} Mary Jackson
I am writing in concern of the proposed rate increase of water usage for the people who are customers of Eastern Rockcastle Water Association. I along with several other customers feel we are cheated and deprived of with what we already pay for our bills. We go for extended periods without water due to the fact that whomever is over the funds already can't seem to keep a budget and be ready with parts, equipment, not enough knowledge of how to run a pump station in the first place. Where I live they use 2 pumps to get the water to the top of the hill, (Sand Hill) when if they really had any knowledge there would have been a holding tank placed somewhere up here. This would make it so much easier on those pumps at the bottom of the hill. Sand Hill all together is probably not even a 10 mile stretch anyway and I am very concerned and curious as to where our money goes any way. NOW THEY WANT MORE!
