COMMONWEALTH OF KENTUCKY

BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

APPLICATION OF BULLITT UTILITIES, INC. FOR A)	
CERTIFICATE OF CONVENIENCE AND NECESSITY)	CASE NO.
AND SURCHARGE FOR SAME)	2014-00255

ORDER

On June 9, 2015, the Commission held a formal hearing in the above-styled matter. During the Hearing, Bullitt Utilities, Inc. ("Bullitt Utilities") offered into evidence numerous exhibits. There were contemporaneous objections to the admission of the exhibits. Through this Order, the Commission rules on the admissibility of the exhibits.

DISCUSSION

On May 15, 2015, the Commission ordered that a formal hearing in this matter be held on June 9, 2015.¹ Each party was required, among other things, to provide the names and title of each witness the party intended to call at the June 9, 2015 hearing.² Each party was also required to file a list of all documents that it intended to offer as exhibits. For any document that had not previously been filed with the Commission in this proceeding, the party offering the exhibit was required to file ten single-sided copies of the document. The items required by the May 15, 2015 Order were to be filed no later than June 2, 2015.³ On May 22, 2015, the Commission ordered that each party

¹ Order (Ky. PSC May 15, 2015) at 1.

² Id.

³ *Id*.

presenting witnesses at the June 9, 2015 hearing file the pre-filed testimony of its witnesses no later than June 2, 2015.⁴

On June 4, 2015, Bullitt Utilities filed a witness list. Bullitt Utilities stated that it would call Chris Crumpton, Christopher Cogan, and Lawrence W. Smither to testify on its behalf at the June 9, 2015 hearing. On June 5, 2015, Bullitt Utilities filed an exhibit list for the June 9, 2015 hearing, the pre-filed testimony of Chris Crumpton, and the pre-filed testimony of Christopher Cogan. Bullitt Utilities also filed, on June 5, 2015, a motion for extension of time, until after June 2, 2015, in which to make the filings.

The Bullitt Utilities exhibit list filed on June 5, 2015, identified 41 items consecutively numbered from 1 to 41. Bullitt Utilities cross-referenced 38 of the items to previously filed documents in this case or to documents filed in Case No. 2014-00163.⁵ The three exhibit items that were not cross-referenced as having previously been filed into the record in this proceeding or in Case No. 2014-00163 were the notice of formal hearing that was published on May 27, 2015, invoices from "Masters," and "miscellaneous invoices."

During the June 9, 2015 hearing, Bullitt Utilities submitted a Supplement Exhibit List of Bullitt Utilities, Inc., which identified an additional five exhibit items, Items 42–46, for the formal hearing. Bullitt Utilities stated at the Hearing that it no longer

⁴ Order (Ky. PSC May 22, 2015) at 1.

⁵ Case No. 2014-00163, *An Investigation of Existing and Future Service of Bullitt Utilities, Inc.* (Ky. PSC May 22, 2014). Bullitt Utilities filed a motion on June 5, 2015, to incorporate or to allow reference to the testimony and exhibits filed in Case No. 2014-00163 in the instant proceeding. The motion was granted by an Order entered June 8, 2015.

⁶ These were identified as Items 34, 40, and 41, respectively.

sought admission of Items 34, 40, and 41 from its June 5, 2015 Exhibit List.⁷ The Commission also determined that the admission of Items 42 and 43 from the supplemental exhibit list would be handled separately, because they were pre-filed testimony.⁸ The pre-filed testimony of Christopher Cogan, Item 42, was admitted during the hearing. As will be discussed more fully in a subsequent section of this Order, during the hearing, the Commission sustained an objection to the admission of the pre-filed testimony of Chris Crumpton, Item 43.

The Commission ruled during the June 9, 2015 hearing that with the exception of Item 43, Commission Staff and the Attorney General of the Commonwealth of Kentucky, by and through his Office of Rate Intervention ("AG"), would have seven days to object to the admission of the exhibits tendered by Bullitt Utilities during the hearing. Seven days have passed, and no objection has been filed to the admission of the exhibits tendered by Bullitt Utilities.⁹ Therefore, the Commission finds that all items introduced by Bullitt Utilities during the June 9, 2015 Hearing, other than Item 43, should be admitted into evidence.

Bullitt Utilities filed the pre-filed testimony of Chris Crumpton on June 5, 2015. The pre-filed testimony included, as an attachment, an investigation report concerning the cause of the failure of the Hunters Hollow wastewater treatment plant.¹⁰ Chris

⁷ Video Recording of the June 9, 2015 Hearing at 10:50:59–10:52:20.

⁸ *Id.* Item 42 was the pre-filed testimony of Christopher Cogan. Item 43 was the pre-filed testimony of Chris Crumpton.

⁹ The exhibits tendered by Bullitt Utilities at the June 9, 2015 Hearing are attached as the Appendix to this Order.

¹⁰ On June 4, 2015, Bullitt Utilities filed Mr. Crumpton's investigation report in response to the AG's Second Request for Information, Item 6. Mr. Crumpton's investigation report remains a part of the record as a response to a request for information.

Crumpton did not appear and testify at the June 9, 2015 Hearing, and, at the Hearing, Bullitt Utilities could not explain Mr. Crumpton's absence. The AG objected to the introduction of Mr. Crumpton's pre-filed testimony, citing due process and a lack of the ability to cross-examine Mr. Crumpton. The Commission sustained the AG's objection, 11 but stated that it would allow Bullitt Utilities seven days to file a motion regarding the testimony.

On June 16, 2015, Bullitt Utilities filed a motion to introduce testimony of Chris Crumpton. In an Affidavit of Chris Crumpton attached to the motion, Mr. Crumpton acknowledges that he was requested to keep the date of June 9, 2015, open so that he would be available to testify. Mr. Crumpton stated that he misunderstood counsel for Bullitt Utilities and that he believed that he "did not have to attend the June 9, 2015 Formal Hearing." Mr. Crumpton stated that his failure to appear at the June 9, 2015 Hearing was "inadvertent and due to a misunderstanding." In support of its motion, Bullitt Utilities states, "Mr. Crumpton's testimony is critical to enabling the Commission to have a comprehensive understanding of the failure of the Hunters Hollow WWTP, and support the granting of the requested surcharge." Bullitt Utilities asks that it be allowed to present Mr. Crumpton for cross-examination at a hearing scheduled before

¹¹ Video Recording of the June 9, 2015 Hearing at 12:08:58–12:13:39 and 12:32:56–12:33:27. The objection to the exhibits (attachments) to Chris Crumpton's testimony was sustained in the Video Recording of the June 9, 2015 Hearing at 12:10:15–12:10:35.

¹² Motion to Introduce Testimony of Chris Crumpton, Affidavit of Chris Crumpton at 2, filed June 16, 2015.

¹³ Id. at 2-3.

¹⁴ Motion to introduce testimony of Chris Crumpton at 3.

the Commission, a hearing before a hearing officer appointed by the Commission, or through a deposition.¹⁵

On June 22, 2015, the AG filed a reply and requested that the Commission deny Bullitt Utilities' June 16, 2015 motion. The AG states that Bullitt Utilities failed to provide a legal argument to allow Mr. Crumpton's testimony and attachment into the record. The AG states, "Bullitt Utilities merely failed to successfully communicate to Mr. Crumpton that his presence was expected at the [June 9, 2015] hearing." The AG also states that an additional hearing or deposition would unnecessarily delay the conclusion of this matter.

The Commission finds that Mr. Crumpton's failure to attend the June 9, 2015 Hearing, is solely attributable to a lack of clear communication between Bullitt Utilities and Mr. Crumpton. No intervening causes beyond the control or Mr. Crumpton prevented his attendance at the June 9, 2015 Hearing. The Commission further finds that Mr. Crumpton's testimony does not address the amount or duration of the surcharge proposal, and Bullitt Utilities fails to demonstrate how Mr. Crumpton's testimony has any bearing on the amount or duration of the surcharge proposal, the issues now before the Commission through this application. Bullitt Utilities has failed to provide grounds to change the ruling made during the June 9, 2015 Hearing and failed to demonstrate the need for further proceedings with respect to Mr. Crumpton's testimony.

¹⁵ Id

¹⁶ AG's Reply to Bullitt Utilities' motion to introduce testimony at 2.

The Commission, on its own motion, notes that in Bullitt Utilities' filing of February 23, 2015, Exhibit C and Item 19 of its exhibit list for the June 9, 2015 Hearing each contain personal information within the meaning of 807 KAR 5:001, Section 4(10). The Commission finds that the personal information should be encrypted or redacted so that the personal information cannot be read.

SUMMARY

The Commission finds that Items 34, 40, and 41 from Bullitt Utilities exhibit list have not been offered into evidence; therefore, it is not necessary to rule on their admissibility. The Commission sustained the AG's objection, and Item 43, Mr. Crumpton's testimony, was not admitted into evidence during the June 9, 2015 Hearing. The Commission finds that Bullitt Utilities has not demonstrated legal grounds to change the prior ruling regarding Mr. Crumpton's testimony. The Commission finds that the remaining exhibits from Bullitt Utilities' exhibit list and supplemental exhibit list that were tendered during the June 9, 2015 Hearing should be admitted. The Commission finds that the personal information contained in Item 19 of the exhibit list should be encrypted or redacted so that the personal information cannot be read. The Commission finds that Exhibit C of Bullitt Utilities' filing on February 23, 2015, should be encrypted or redacted so that the personal information cannot be read.

IT IS THEREFORE ORDERED that:

- Items 1–33 and 35–39 from Bullitt Utilities' June 5, 2015 Exhibit List are admitted into the record.
- 2. Items 34, 40, and 41 from Bullitt Utilities' June 5, 2015 Exhibit List are not admitted into the record.

- 3. The Commission's Division of Filings shall encrypt or redact the personal information contained in Item 19 so that it cannot be read.
- 4. Items 44, 45, and 46 from Bullitt Utilities' June 9, 2015 Supplemental Exhibit List are admitted into the record.
- 5. Bullitt Utilities motion to introduce Item 43, the testimony of Chris Crumpton, is denied.
- 6. The Commission's Division of Filings shall encrypt or redact the personal information contained in Exhibit C of Bullitt Utilities' filing on February 23, 2015, so that it cannot be read.

KPDES No.: KY0038610

AI No.: 448

Bullitt County, Kentucky

Dear Mr. Cogan:

Enclosed is the Kentucky Pollutant Discharge Elimination System (KPDES) permit for the above-referenced facility. This action constitutes a final permit issuance under 401 KAR 5:075, pursuant to KRS 224.16-050.

This permit will become effective on the date indicated in the attached permit provided that no request for adjudication is granted. All provisions of the permit will be effective and enforceable in accordance with 401 KAR 5:075, unless stayed by the Hearing Officer under Sections 11 and 13.

Any demand for a hearing on the permit shall be filed in accordance with the procedures specified in KRS 224.10-420, 224.10-440, 224.10-470 and any regulations promulgated thereto. Any person aggrieved by the issuance of a permit final decision may demand a hearing, pursuant to KRS 224.10-420(2), within thirty (30) days from the date of the issuance of this letter. Two (2) copies of request for hearing should be submitted in writing to the Energy and Environment Cabinet, Office of Administrative Hearings, 35-36 Fountain Place, Frankfort, Kentucky 40601 and the Commonwealth of Kentucky, Energy and Environment Cabinet, Division of Water, 200 Fair Oaks Lane, 4th Floor, Frankfort, Kentucky 40601. For your record keeping purposes, it is recommended that these requests be sent by certified mail. The written request must conform to the appropriate statutes referenced above.

If you have any questions regarding the KPDES decision, please contact Dan Juett, Operational Permits Section, Surface Water Permits Branch, at (502) 564-8158, extension 4849.

Further information on procedures and legal matters pertaining to the hearing request may be obtained by contacting the Office of Administrative Hearings at (502) 564-7312.

AI NO :

448

AUTHORIZATION TO DISCHARGE UNDER THE KENTUCKY POLLUTANT DISCHARGE ELIMINATION SYSTEM

Pursuant to Authority in KRS 224,

Carroll F. Cogan Bullitt Utilities dba Hunters Hollow 1706 Bardstown Road Louisville, Kentucky 40205

is authorized to discharge from a facility located at

Hunters Hollow Subdivision Blue Lick Road Louisville, Bullitt County, Kentucky

to receiving waters named

Unnamed tributary at mile point 1.15 to Brooks Run at mile point 4.05.

in accordance with effluent limitations, monitoring requirements and other conditions set forth in Parts I, II, and III hereof. The permit consists of this cover sheet, and Part I 2 pages, Part II 6 pages, and Part III 1 page.

This permit shall become effective on December 1, 2008.

This permit and the authorization to discharge shall expire at midnight, November 30, 2013.

October 24, 2008 Date Signed

Sandra L. Gruzesky, Acting Director Division of Water

Permit No.: KY0038610

AI NO.: 448

A1. EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

During the period beginning on the effective date of this permit and lasting through the term of this permit, the permittee is authorized to discharge from Outfall serial number: 001 - Sanitary Wastewater (Design Flow = 0.250 MGD)

Such discharges shall be limited and monitored by the permittee as specified below:

EFFLUENT CHARACTERISTICS	DISCHARGE LIMITATIONS			MONITORING REQUIREMENTS		
	(lbs/c Monthly Avg.	day) Daily Max.	Other Units (S Monthly _Avg.	pecify) Daily Max.	Measurement Frequency	Sample Type
Flow (MGD)	Report	Report	N/A	N/A	Continuous	Recorder
CBOD ₅ (mg/l)	31.3	46.9	15	22.5	1/Week	24 Hr Composite
TSS (mg/l)	62.6	93.8	30	45	1/Week	24 Hr Composite
Ammonia Nitrogen (as mg/1 N) May 1 - October 31 November 1 - April 30	8.34	12.5 31.3	4.0	6.0 15.0	1/Week 1/Week	24 Hr Composite 24 Hr Composite
Escherichia Coli (N/100 ml) Dissolved Oxygen (mg/l) (minimum) pH (standard units) Total Residual Chlorine (mg/l) Total Phosphorus (mg/l) Total Nitrogen (mg/l)	N/A N/A N/A N/A N/A	N/A N/A N/A N/A N/A	130 Not less than 6.0 (min) 0.011 1.0 Report	240 7.0 9.0 (max) 0.019 Report Report	1/Week 1/Week 1/Week 1/Week 1/Week	Grab Grab Grab Grab 24 Hr Composite 24 Hr Composite

The abbreviation CBOD₅ means Carbonaceous Biochemical Oxygen Demand (5-day).

The abbreviation TSS means Total Suspended Solids.

The abbreviation N/A means Not Applicable.

The effluent limitations for $CBOD_5$ and TSS are Monthly (30 day) and Weekly (7 day) Averages.

The effluent limitations for Escherichia Coli are thirty (30) day and seven (7) day Geometric Means.

Total Nitrogen is to be reported as the summation of the analytical results for Total Nitrates, Total Nitrites, and Total Kjeldahl Nitrogen.

There shall be no discharge of floating solids or visible foam or sheen in other than trace amounts.

Samples taken in compliance with the monitoring requirements specified above shall be taken at the following location: nearest accessible point prior to discharge to or mixing with the receiving waters or wastestreams from other outfalls.

PARI I Page I-2 Permit No.: KY0038610

448 AI No .:

SCHEDULE OF COMPLIANCE B.

The permittee shall achieve compliance with all requirements on the effective date of this permit.

Permit No.: KY0038610

AI NO.:

STANDARD CONDITIONS FOR KPDES PERMIT

This permit has been issued under the provisions of KRS Chapter 224 and regulations promulgated pursuant thereto. Issuance of this permit does not relieve the permittee from the responsibility of obtaining any other permits or licenses required by this Cabinet and other state, federal, and local agencies.

It is the responsibility of the permittee to demonstrate compliance with permit parameter limitations by utilization of sufficiently sensitive analytical methods.

The following KPDES permit conditions apply to all discharges authorized by this permit pursuant to 401 KAR 5:065, Section 1.

(1) Duty to comply.

(a) General requirement.

The permittee shall comply with all conditions of this permit. Any permit noncompliance shall constitute a violation of KRS Chapter 224, among which shall be the following remedies: enforcement action, permit revocation, revocation and reissuance, or modification; or denial of a permit renewal application.

(b) Specific duties.

- 1. The permittee shall comply with effluent standards or prohibitions established under 40 CFR Part 129 as of July 1, 2001, as adopted without change, within the time provided in the federal regulations that establish these standards or prohibitions,
- even if the permit has not yet been modified to incorporate the requirement.

 2. Any person who violates a permit condition as set forth in the KPDES administrative regulations shall be subject to penalties under KRS 224.99-010(1) and (4).

(2) Duty to reapply.

If the permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the permittee shall apply for and obtain a new permit as required in 401 KAR 5:060, Section 1.

(3) Need to halt or reduce activity not a defense.

It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

(4) Duty to mitigate.

The permittee shall take all reasonable steps to minimize or prevent any discharge in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

(5) Proper operation and maintenance.

The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control and related appurtenances which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance also shall include adequate laboratory controls, and appropriate quality assurance procedures. This provision shall require the operation of back-up or auxiliary facilities or similar systems which are installed by a permittee only if the operation is necessary to achieve compliance with the conditions of the permit.

Permit No .: KY0038610

AI NO .: 448

(6) Permit actions.

The permit may be modified, revoked and reissued, or revoked for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or a notification of planned changes or anticipated noncompliance, shall not stay any permit condition.

(7) Property rights.

This permit shall not convey any property rights of any kind, or any exclusive privilege.

(8) Duty to provide information.

The permittee shall furnish to the cabinet, within a reasonable time, any information which the cabinet may request to determine whether cause exists for modifying, revoking and reissuing, or revoking this permit, or to determine compliance with this permit. The permittee shall also furnish to the cabinet, upon request, copies of records required to be kept by this permit.

(9) Inspection and entry.

The permittee shall allow the cabinet, or an authorized representative, upon the presentation of credentials and other documents as may be required by law, to:

- (a) Enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records pertinent to the KPDES program are or may be kept;
- (b) Have access to and copy, at reasonable times, any records that are required to be kept under the conditions of this permit;
- (c) Inspect at reasonable times any facilities, equipment, including monitoring and control equipment, practices, or operations regulated or required under this permit;
- (d) Sample or monitor at reasonable times, for the purposes of assuring KPDES program compliance or as otherwise authorized by KRS Chapter 224, any substances or parameters at any location.

(10) Monitoring and records.

(a) Samples and measurements taken for the purpose of monitoring shall be

representative of the monitored activity.

(b) The permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports required by this permit, and records of all data used to complete the application for this permit, for a period of at least three (3) years from the date of the sample, measurement, report, or application. This period may be extended by request of the cabinet at any time.

(c) Records of monitoring information shall include:

- 1. The date, exact place, and time of sampling or measurements; 2. The individuals who performed the sampling or measurements;

3. The dates analyses were performed;

- 4. The individuals who performed the analyses;
- 5. The analytical techniques or methods used; and

6. The results of the analyses.

(d) Monitoring shall be conducted according to test procedures approved under 40 CFR Part 136, unless other test procedures have been specified in the permit.

(e) Any person who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required to be maintained under the permit shall, upon conviction, be subject to penalties under KRS 224.99-010(4).

Permit No.: KY0038610

AI NO.: 448

(11) Signatory requirement.

All applications, reports, or information submitted to the cabinet shall be signed and certified as indicated in 401 KAR 5:060, Section 9. Any person who knowingly makes any false statement, representation, or certification in any record or other document submitted or required to be maintained under this permit, including monitoring reports or reports of compliance or noncompliance shall, upon conviction, be subject to penalties under KRS 224.99-010(4).

(12) Reporting requirements.

(a) Planned changes.

The permittee shall give notice to the cabinet as soon as possible of any planned physical alteration or additions to the permitted facility. Notice shall be required only if:

- 1. The alteration or addition to a permitted facility may meet one (1) of the criteria for determining whether a facility is a new source in 401 KAR 5:080, Section
- 2. The alteration or addition could significantly change the nature or increase the quantity of pollutants discharged. This notification only applies to pollutants which are subject either to effluent limitations in the permit, or to notification requirements under 401 KAR 5:080, Section 5.

(b) Anticipated noncompliance.

The permittee shall give advance notice to the cabinet of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements.

(c) Transfers.

The permit shall not be transferable to any person except after notice to the cabinet. The cabinet may require modification or revocation and reissuance of the permit to change the name of the permittee and incorporate other requirements as may be necessary under KRS Chapter 224.

(d) Monitoring reports.

Monitoring results shall be reported at the intervals specified in the permit. Monitoring results shall be reported as follows:

1. Monitoring results shall be reported on a Discharge Monitoring Report (DMR).

2. If the permittee monitors any pollutant more frequently than required by the permit, using test procedures approved under 40 CFR Part 136 or as specified in the permit, the results of this monitoring shall be included in the calculation and reporting of the data submitted in the DMR.

3. Calculations for all limitations which require averaging of measurements shall utilize an arithmetic mean unless otherwise specified by the cabinet in the permit.

(e) Compliance schedules.

Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than fourteen (14) days following each schedule date.

Permit No .: KY0038610

AI NO .: 448

(f) Twenty-four (24) hour reporting.

The permittee shall follow the provisions of 401 KAR 5:015 and shall orally report any noncompliance which may endanger health or the environment, within twenty-four (24) hours from the time the permittee becomes aware of the circumstances. This report shall be in addition to and not in lieu of any other reporting requirement applicable to the noncompliance. A written submission shall also be provided within five (5) days of the time the permittee becomes aware of the circumstances. The written submission shall contain a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent recurrence of the noncompliance. The cabinet may waive the written report on a case-by-case basis if the oral report has been received within twenty-four (24) hours. The following shall be included as events which shall be reported within twenty-four (24) hours: 1. Any unanticipated bypass which exceeds any effluent limitation in the permit, as

indicated in subsection (13) of this section.

2. Any upset which exceeds any effluent limitation in the permit.

3. Violation of a maximum daily discharge limitation for any of the pollutants listed by the cabinet in the permit to be reported within twenty-four (24) hours, as indicated in Section 2(7) of this administrative regulation.

(g) Other noncompliance.

The permittee shall report all instances of noncompliance not reported under paragraphs (d), (e), and (f) of this subsection, when monitoring reports are submitted. The reports shall contain the information listed in paragraph (f) of this subsection.

(h) Other information.

Where the permittee becomes aware that it failed to submit any relevant fact in a permit application, or submitted incorrect information in a permit application or in any report to the cabinet, it shall promptly submit these facts or information.

- (13) Occurrence of a bypass.
- (a) Bypass not exceeding limitations.

The permittee may allow any bypass to occur which does not cause effluent limitations to be exceeded, but only if it also is for essential maintenance to assure efficient operation. This type of bypass shall not be subject to the provisions of paragraphs (b) and (c) of this subsection.

- (b) Notice.
- 1. Anticipated bypass.

If the permittee knows in advance of the need for a bypass, it shall submit prior notice, if possible at least ten (10) days before the date of the bypass. Compliance with this requirement constitutes compliance with 401 KAR 5:015, Section 1.

2. Unanticipated bypass. The permittee shall submit notice of an unanticipated bypass as required in subsection (12)(f) of this section, twenty-four (24) hour notice. Compliance with this requirement constitutes compliance with 401 KAR 5:015, Section 4.

Permit No.: KY0038610

AI NO.: 448

(c) Prohibition of a bypass.

1. Bypassing shall be prohibited, and the cabinet may take enforcement action against a permittee for bypass, unless:

a. The bypass was unavoidable to prevent loss of life, personal injury, or severe

property damage;

b. There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition shall not be satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance; and

c. The permittee submitted notices as required under paragraph (b) of this

subsection.

2. The cabinet may approve an anticipated bypass, after considering its adverse effects, if the cabinet determines that it will meet the three (3) conditions listed in subparagraph 1a, b, and c of this paragraph.

(14) Occurrence of an upset.

(a) Effect of an upset.

An upset constitutes an affirmative defense to an action brought for noncompliance with technology-based permit effluent limitations if the requirements of paragraph (b) of this subsection are met.

(b) Conditions necessary for a demonstration of an upset.

- A permittee who wishes to establish the affirmative defense of upset shall demonstrate through properly signed, contemporaneous operating logs, or other relevant evidence that:
- 1. An upset occurred and that the permittee can identify the causes of the upset;

2. The permitted facility was at the time being properly operated;

- 3. The permittee submitted notice of the upset as required in subsection (12)(f) of this section; and
- 4. The permittee complied with any remedial measures required under subsection (4) of this section.

(c) Burden of proof.

In any enforcement proceeding, the permittee seeking to establish the occurrence of an upset shall have the burden of proof.

PART II Page II-6 KY0038610 Permit No .: AI NO .:

- (15) Additional conditions applicable to specified categories of KPDES permits. The following conditions, in addition to others set forth in this administrative regulation, shall apply to all KPDES permits within the categories specified below:
- (a) Existing manufacturing, commercial, mining, and silvicultural dischargers. In addition to the reporting requirements under subsections (12), (13), and (14) of this section, any existing manufacturing, commercial, mining, and silvicultural discharger shall notify the cabinet as soon as it knows or has reason to know: 1. That any activity has occurred or will occur which would result in the discharge on a routine or frequent basis, of any toxic pollutant which is not limited in the permit, if that discharge will exceed the highest of the following "notification levels:'

a. 100 micrograms per liter (100 $\mu g/l$); b. 200 micrograms per liter (200 $\mu g/l$) for acrolein and acrylonitrile; 500 micrograms per liter (500 µg/1) for 2,4-dinitrophenol and for 2-methyl-4,6-dinitrophenol; and one (1) milligram per liter (1 mg/1) for antimony;

c. Five (5) times the maximum concentration value reported for that pollutant in the permit application in accordance with 401 KAR 5:060, Section 2(7);

d. The level established by the cabinet in accordance with Section 2(6) of this

administrative regulation.

2. That any activity has occurred or will occur which would result in any discharge, on a nonroutine or infrequent basis, of a toxic pollutant which is not limited in the permit, if that discharge will exceed the highest of the following "notification levels:"

a. 500 micrograms per liter (500 µg/l);

b. One (1) milligram per liter (1 mg/l) for antimony;

c. Ten (10) times the maximum concentration value reported for that pollutant in the permit application in accordance with 401 KAR 5:060, Section 2(7); or d. The level established by the cabinet in accordance with Section 2(6) of this administrative regulation.

(b) POTWs.

1. POTWs shall provide adequate notice to the cabinet of the following: a. Any new introduction of pollutants into that POTW from an indirect discharger which would be subject to the KPDES administrative regulations if it were directly discharging those pollutants; or

b. Any substantial change in the volume or character of pollutants being introduced into that POTW by a source introducing pollutants into the POTW at the time of

issuance of the permit.

2. For purposes of this paragraph, adequate notice shall include information on the quality and quantity of effluent introduced into the POTWs and any anticipated impact of the change on the quantity or quality of effluent to be discharged from the POTW.

Permit No.: KY0038610 AI NO.: 448

PART III

OTHER REQUIREMENTS

A. Reporting of Monitoring Results

Monitoring results obtained during each monitoring period must be reported on a preprinted Discharge Monitoring Report (DMR) Form that will be mailed to you. The completed DMR for each monitoring period must be sent to the Division of Water at the address listed below (with a copy to the appropriate Regional Office) postmarked no later than the 28th day of the month following the monitoring period for which monitoring results were obtained.

Division of Water Louisville Regional Office 9116 Leesgate Road Louisville, Kentucky 40222-5084 ATTN: Supervisor

Energy and Environment Cabinet Dept. for Environmental Protection Division of Water/Surface Water Permits Branch 200 Fair Oaks Lane, 4th Floor Frankfort, Kentucky 40601

B. Reopener Clause

This permit shall be modified, or alternatively revoked and reissued, to comply with any applicable effluent standard or limitation issued or approved under 401 KAR 5:050 through 5:086, if the effluent standard or limitation so issued or approved:

- Contains different conditions or is otherwise more stringent than any effluent limitation in the permit; or
- 2. Controls any pollutant not limited in the permit.

The permit as modified or reissued under this paragraph shall also contain any other requirements of KRS Chapter 224 when applicable.

C. Disposal of Non-Domestic Wastes

The pass through or non-treatment by the wastewater treatment plant of chemicals or compounds which may injure, be chronically or acutely toxic to or produce adverse physiological or behavioral responses in humans, animals, fish and other aquatic life is not desirable. Materials such as acids, caustics, herbicides, household chemicals or cleansers, insecticides, lawn chemicals, non-biodegradable products, paints, pesticides, pharmaceuticals, and petroleum based products may not be treatable by the wastewater treatment plant and should not be introduced and other environmentally sound methods for disposal should be utilized. The permittee should educate users of its system that introduction of such chemicals or compounds could result in an adverse environmental impact and provide the users with alternative disposal measures.

D. Certified Operators

This wastewater system shall be operated under the supervision of a Class II Kentucky Certified Operator who shall be reasonably available at all times. All other operators employed by the system shall hold a Kentucky Certificate or shall be in the process of obtaining a Kentucky Certificate. The certificates of each operator shall be prominently displayed on the wall of the system office.

E. Outfall Signage

The permittee shall post a permanent marker at all discharge locations and/or monitoring points. The marker shall be at least 2 feet by 2 feet in size and a minimum of 3 feet above ground level with the Permittee Name and KPDES permit and outfall numbers in 2 inch letters. For internal monitoring points the marker shall be of sufficient size to include the outfall number in 2 inch letters and shall be posted as near as possible to the actual sampling location.

FACT SHEET

KENTUCKY POLLUTANT DISCHARGE ELIMINATION SYSTEM PERMIT TO DISCHARGE TREATED WASTEWATER INTO WATERS OF THE COMMONWEALTH

KPDES No .:

1..

KY0038610

Permit Writer: Dan Juett

Date: October 24, 2008

AI No :

448

SYNOPSIS OF APPLICATION

Name and Address of Applicant

Carroll F. Cogan Bullitt Utilities dba Hunters Hollow 1706 Bardstown Road Louisville, Kentucky 40205

b. Facility Location

> Hunters Hollow Subdivision Blue Lick Road Louisville, Bullitt County, Kentucky

Description of Applicant's Operation C ..

A private owned wastewater treatment plant servicing a subdivision by treating the domestic waste of the residential units thereof.

d. Design Capacity

0.25 MGD

Description of Existing Pollution Abatement Facilities

Treatment consists of an extended aeration plant, chlorine disinfection, dechlorination, and post aeration. Sludge is pumped and hauled by Headden Septic & Environmental Services to Advanced Filtration Technology for treatment with decant going to MSD sewer and sludge to compost facility.

f. Permitting Action

> This is a reissuance of a minor KPDES permit for a private owned wastewater treatment plant serving a subdivision.

KPDES No.: KY0038610 AI No.: 448

Fact Sheet Page 2

RECEIVING WATER

a. Name/Mile Point

Facility discharges to an unnamed tributary at mile point 1.15 to Brooks Run at mile point 4.05.

b. Stream Segment Use Classification

Pursuant to 401 KAR 5:026, Section 5, the unnamed tributary at mile point 1.15 to Brooks Run at mile point 4.05 carries the following classifications: warm water aquatic habitat, primary contact recreation, secondary contact recreation, and domestic water supply.

c. Stream Segment Categorization

The unnamed tributary to Brooks Run is listed on the final 2008 305(b) Report for nonsupport of aquatic life and swimming due to: organic enrichment/low DO, nutrients, and pathogens. The suspected sources are municipal point sources, urban runoff/storm sewers, and agriculture activities.

d. Stream Low Flow Condition

The 7-day, 10-year low flow and harmonic mean conditions of the unnamed tributary at mile point 1.15 to Brooks Run at mile point 4.05 are 0.1 and 0.1cfs, respectively.

KPDES No.: KY0038610

AI No.: 448 Fact Sheet Page 4

3. REPORTED DISCHARGE AND PROPOSED LIMITS - SANITARY FACILTY

Serial Number 001 - Sanitary Wastewater (Design Flow = 0.25 MGD)

Effluent Characteristics	Reported Dis Monthly Average	charge Daily Maximum	Proposed I Monthly Average	Cimits Daily Maximum	Applicable Water Quality Criteria and/or Effluent Guidelines
Total Residual Chlorine (mg/l)	0.006	0.01	0.011	0.019	401 KAR 5:031, Section 4(k)
Total Phosphorus (mg/l)	2.39	4.34	1.0	Report	401 KAR 5:065, Section 2(8) 401 KAR 5:080, Section 1(2)(c)2
Total Nitrogen (mg/l)	N/A	N/A	Report	Report	401 KAR 5:065, Section 2(8)

The data contained under the reported discharge columns is not from the renewal application, but rather from the analysis of the DMR data that has been reported during the term of the previous permit.

The abbreviation CBOD₅ means Carbonaceous Biochemical Oxygen Demand (5-day).

The abbreviation TSS means Total Suspended Solids.

The abbreviation TMDL means Total Maximum Daily Loads.

The abbreviation N/A means not applicable.

The abbreviation NR means not reported on the Discharge Monitoring Report (DMR).

The effluent limitations for $CBOD_5$ and TSS are Monthly (30 day) and Weekly (7 day) Averages.

The effluent limitations for Escherichia Coli are thirty (30) day and seven (7) day Geometric Means.

Total Nitrogen is to be reported as the summation of the analytical results for Total Nitrates, Total Nitrites, and Total Kjeldahl Nitrogen.

KPDES No.: KY0038610 AI No.: 448

Fact Sheet Page 5

4. METHODOLOGY USED IN DETERMINING LIMITATIONS

a. Serial Number

Outfall 001 Sanitary Wastewater (Design Flow = 0.25 MGD)

b. Effluent Characteristics

Flow, CBOD₅, TSS, Fecal Coliform Bacteria, *Escherichia Coli*, pH, Ammonia Nitrogen, Dissolved Oxygen, Total Residual Chlorine (TRC), Total Phosphorus, and Total Nitrogen.

c. Pertinent Factors

Wastewater treatment plant is private owned and treats sanitary wastewater for a subdivision.

d. Monitoring Requirements

Flow monitoring shall be conducted continuously by recorder

 ${\rm CBOD}_5$, TSS, Ammonia Nitrogen, Total Phosphorus and Total Nitrogen shall be monitored once per week by 24 hour composite sampling.

Escherichia Coli, pH, Dissolved Oxygen and Total Residual Chlorine shall be monitored once per week by grab sample.

e. Justification of Conditions

The Kentucky regulations cited below have been duly promulgated pursuant to the requirements of Chapter 224 of the Kentucky Revised Statutes.

Escherichia Coli and Fecal Coliform Bacteria
The limits for Escherichia Coli are consistent with the requirements of 401
KAR 5:031, Section 7, 401 KAR 5:045 Section 4 and 401 KAR 5:080, Section 1(2)(c) 2. The removal of Fecal Coliform Bacteria is consistent with the requirements of 401 KAR 5:080k Section 1 (2) (c)2. Although Fecal Coliform Bacteria has been used as an indicator of fecal contamination, it does contain other species that are not necessarily fecal in origin. EPA recommends Escherichia Coli, which is specific to fecal material from warm-blooded animals, as the best indicator of health risk from contact with recreational waters. Therefore, it is the "Best Professional Judgment "BPJ" of the Division of Water that Escherichia Coli replace Fecal Coliform Bacteria on this permit.

Flow

The monitoring requirements for this parameter are consistent with the requirements of 401 KAR 5:065, Section 2(8).

CBOD₅, Ammonia Nitrogen, and Dissolved Oxygen
The limits for these parameters are consistent with the requirements of 401
KAR 5:031, Section 4, and 401 KAR 5:045, Sections 3 and 5. Section 4 of
5:031 establishes water quality criteria for the protection of Kentucky's
waters. Section 5 of 5:045 requires biochemically degradable wastewaters
to receive treatment in excess of secondary treatment if the Cabinet
determines that the receiving water would not satisfy applicable water
quality standards as a result of a facility discharge or discharges from
multiple facilities

Total Suspended Solids
The limits for this parameter are consistent with the requirements of 401
KAR 5:031, Section 4 and 5:045, Sections 2 and 3. Section 4 of 5:031
establishes water quality criteria for the protection of Kentucky's waters.
Sections 2 and 3 of 5:045 require biochemically degradable wastewaters to receive secondary treatment.

KPDES No.: KY0038610 AI No.: 448 Fact Sheet Page 6

The limits for these parameters are consistent with the requirements of 401 KAR 5:031, Section 4 and 5:045, Section 4. Section 4 of 5:031 establishes water quality criteria for the protection of Kentucky's waters. Section 4 of 5:045 establishes the acceptable levels of these parameters for biochemically degradable wastewaters.

Total Residual Chlorine
The limits for these parameters are consistent with the requirements of 401 KAR 5:031, Section 4:

Total Phosphorus
The concentration limits for this parameter are consistent with the requirements of 401 KAR 5:031, Section 1. The loading limitations are consistent with 40 CFR 130.7 - Total Maximum Daily Loads (TMDL) and individual water quality based effluent limitations.

Iotal Nitrogen
The monitoring requirements for this parameter are consistent with the requirements of 401 KAR 5:065, Section 2(8)(a). Total Nitrogen is TKN (as N) and nitrate/nitrite (as N).

ANTIDEGRADATION

The conditions of 401 KAR 5:029, Section 1 have been satisfied by this permit action. Since this permit action involves reissuance of an existing permit, and does not propose an expanded discharge, a review under 401 KAR 5:030 Section 1 is not applicable.

6. PROPOSED COMPLIANCE SCHEDULE FOR ATTAINING EFFLUENT LIMITATIONS

The permittee will comply with all effluent limitations by the effective date of the permit.

7. PROPOSED SPECIAL CONDITIONS WHICH WILL HAVE A SIGNIFICANT IMPACT ON THE DISCHARGE

Disposal of Non-Domestic Wastes

The pass through or non-treatment by the wastewater treatment plant of chemicals or compounds which may injure, be chronically or acutely toxic to or produce adverse physiological or behavioral responses in humans, animals, fish and other aquatic life is not desirable. Materials such as acids, caustics, herbicides, household chemicals or cleansers, insecticides, lawn chemicals, non-biodegradable products, paints, pesticides, pharmaceuticals, and petroleum based products may not be treatable by the wastewater treatment plant and should not be introduced and other environmentally sound methods for disposal should be utilized. The permittee should educate users of its system that introduction of such chemicals or compounds could result in an adverse environmental impact and provide the users with alternative disposal measures. This requirement is consistent with the requirements of 401 KAR 5:065, Section 1(5) and 401 KAR 5:080, Section 1(c)(2)c.

Outfall Signage

As a member of ORSANCO (Ohio River Valley Sanitation Commission) the Commonwealth of Kentucky through the Division of Water implements a requirement that the permittee post a permanent marker at each discharge point to the Ohio River. It is the Best Professional Judgment of the Division of Water, 401 KAR 5:080, Section 1(2)(c)2, that all permittees post a marker at all discharge locations and/or monitoring points. The ORSANCO requirements for the marker specify it to be at least 2 feet by 2 feet in size and a minimum of 3 feet above ground level with the Permittee Name and KPDES permit and outfall numbers in 2 inch letters. For internal monitoring points the marker shall be of sufficient size to include the outfall number in 2 inch letters and is to be posted as near as possible to the actual sampling location.

KPDES No.: KY0038610

AI No.: 448 Fact Sheet Page 7

7. PROPOSED SPECIAL CONDITIONS WHICH WILL HAVE A SIGNIFICANT IMPACT ON THE DISCHARGE

Certified Operators

Pursuant to 401 KAR 5:010, Section 2(1) wastewater systems shall be operated under the supervision of a certified operator who holds a Kentucky Certificate equivalent to the class of system being supervised. All other operators employed by the system shall hold a Kentucky Certificate or shall be in the process of obtaining a Kentucky Certificate.

Pursuant to 401 KAR 5:010, Section 8 wastewater systems shall be classified as follows:

- Class I: Systems with a design capacity of less than or equal to 50,000 gpd
- Class II: Systems with a design capacity of more than 50,000 gpd but less than or equal to 2.0 MGD
- Class III: Systems with a design capacity of more than 2.0 MGD but less than or equal to 7.5 MGD
- Class IV: Systems with a design capacity of more than 7.5 MGD

Section 2(2) of 401 KAR 5:010 require the certified operator to be reasonably available if not physically present while the system is operating.

Section 2(3) of 401 KAR 5:010 require the Kentucky Certificate shall be displayed on the wall of wastewater system office.

8. PERMIT DURATION

Five (5) years. This facility is in the Salt/Licking Basin Management Unit as per the Kentucky Watershed Management Framework.

9 PERMIT INFORMATION

The application, draft permit, fact sheet, public notice, comments received, and additional information is available from the Division of Water at 200 Fair Oaks Road, Frankfort Office Park, Frankfort, Kentucky 40601.

10. REFERENCES AND CITED DOCUMENTS

All material and documents referenced or cited in this fact sheet are a part of the permit information as described above and are readily available at the Division of Water Central Office. Information regarding these materials may be obtained from the person listed below.

11. CONTACT

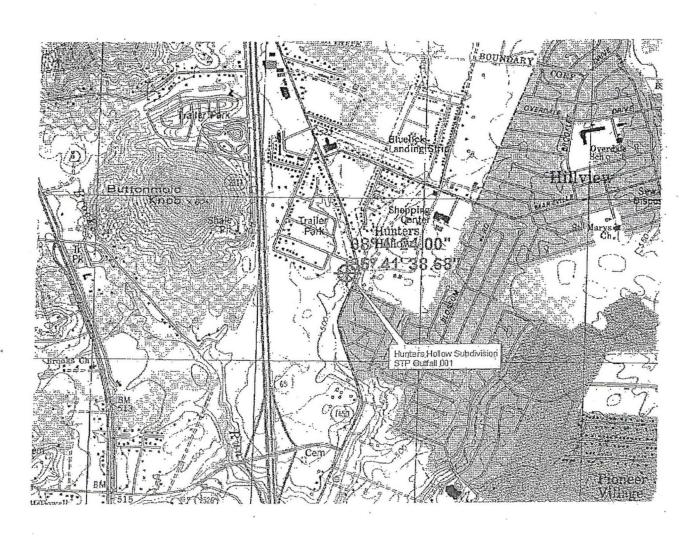

For further information on the draft permit or comment process, contact the individual identified on the Public Notice or the Permit Writer - Dan Juett at (502) 564-8158, extension 593, or email Dan Juett@ky.gov.

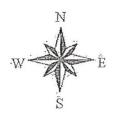

12. PUBLIC NOTICE INFORMATION

Please refer to the attached Public Notice for details regarding the procedures for a final decision, deadline for comments and other information required by 401 KAR 5:075, Section 4(2)(e).

RE: MOBILE WASTEWATER TREATMENT PLANT

Mr. Cogan;

I have priced resources that we believe should be adequate to mobilize, set-up, and operate a mobile wastewater treatment plant. The scope of work will be based on these assumptions:

ASSUMPTIONS:

- The services will be performed 24 hrs per day.
- The site is located in Shepherdsville, Kentucky.
- A pad will need to be constructed for frac-tanks and equipment.
- The waste to be treated is from a residential area.

SCOPE OF ENVIRONMENTAL SERVICES:

- Mobilize equipment and personnel to the site.
- Construct gravel pad to stage frac-tanks and equipment.
- Set up all applicable frac-tanks, hoses, and pumps.
- Operate the mobile wastewater treatment plant 24hrs/Day to allow normal operation.
- Demobilize all equipment and pumps.

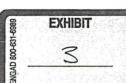

SCHEDULE OF PRICES:

Mobilization and set up of the mobile wastewater treatment plant.

Lump Sum

\$21,719.00

Emergency Response (24/7) • Site Cleanup and Remédiation • Cleaning of Tanks, Pits and Containments • Waste Dispos
 Vac-Truck and Tanker Services • Demolition/Site Closure • Land Clearing • Confined Space/Chémical Exposure Projects
 Hydro Blasting & Pressure Washing • Drum Pickup Service • Frac Tank & Rolloff Box Rental

Construct a graveled pad.

Lump Sum

\$8,331.00

 Daily operation of the wastewater plant including supplies, personnel, and rental of equipment. (Does not include sludge removal)

Per Day

\$3,532.00

 Daily Operation of wastewater plant including supplies and equipment only. (Does not include sludge removal)

Per Day

\$2,500.00

· Demobilization and cleaning of all equipment and supplies.

Lump Sum

\$16,704.00

TERMS AND CONDITIONS:

Where changes to the original scope become necessary, PECCO will promptly notify the customer and obtain the necessary authorization to proceed. In doing so, a revised price will be established in order to complete the project as originally scoped.

This quote is contingent on the customer providing reasonable access to the site and that the Customer represents and warrants to PECCO that they will have the legal right, title and interest necessary to provide access to the site. In addition, the Customer warrants that it has supplied PECCO with complete and accurate information regarding documentation and/or information concerning the scope of work.

PECCO guarantees to hold these prices for ninety (90) days from the date of the quotation and payment terms of net thirty (30) days.

PECCO will initiate this project upon receipt of a signed Service Agreement or a purchase order.

Work interruptions or delays caused by acts or omissions out of the control of PECCO will be charged to the customer.

If you accept this quote, please sign and return to PECCO.

Thank you for your consideration of PECCO, INC. for this project.

Energy and Environment Cabinet Department for Environmental Protection Division of Water Wastewater Inspection Report

AI ID: 448 AI Type: RESIDENCE-Subdivision (nec)

AI Name: Hunters Hollow Subd

AI Address: Blue Lick Rd

City: Louisville, State: Kentucky Zip: 40218

County: Bullitt Regional Office: Louisville Regional Office

Latitude: 38.073611 Longitude: -85.694444

Site Contact: Larry Smither

Title: Operator Phone #: 502-241-4809

Inspection Type: Incident Investigation Activity #: CIV20140001

Incident IDs: 2376131

Inspection Start Date: March 29, 2014 Time: 08:00 PM End Date: March 30, 2014 Time: 04:00 PM

Site/Permit ID: KY0038610

Lead DEP Investigator: Charlie Roth Other DEP Investigators: Kevin Strohmeier External Investigators: Mike Phillips

Persons Interviewed: Jerry Kennedy; Shaun Ford; Charlie Raisor

General Comments: At approximately 5:00pm on Saturday March 29, 2014, the steel aeration tank at the Hunters Hollow WWTP suffered a catastrophic failure spilling its entire contents onto the ground and into an unnamed tributary to Brooks Run. There was an unknown quantity of material remaining in the still standing sludge digester and clarifier. The plant is designed to treat 250,000 gallons of sewage per day. With the recent rain event the plant was operating at approximately 400,000 gallons per day at the time of the rupture. The WWTP is a complete loss, with the 250,000-400,000 gpd of untreated influent currently going directly into the unnamed tributary. The plant serves about 670 customers, approximately 600 of whom are residential. The affected area includes Hunters Hollow, hunters Hollow #2, majestic Acres, Triangle Drive Apartments and the industrial park along I-65 just north of the Brooks exit. This facility is permitted to Carroll F. Cogan under Bullitt Utilities dba Hunters Hollow.

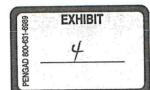

On Sunday March 30, 2014, KY DEP Environmental responder, Kevin Strohmeier and I met with the operators and representatives of the owner of the Hunters Hollow WWTP; officials from the Bullitt County Sanitation District and other local government officials to discuss possible strategies to end the discharge of untreated sewage into the unnamed tributary to Brooks Run. The owner of the facility is expected to consult with a contractor regarding the construction and operation of a temporary treatment facility on the site, while a permanent solution is sought. In the meantime, local residents and businesses in the affected area will be asked to conserve water. Residents will be requested to avoid contact with the water in the unnamed tributary and in Brooks Run downstream of the plant.

Samples were collected at this time from the unnamed tributary immediately above and below the discharge as well as from the discharge itself.

Overall Compliance Status: Out of Compliance-NOV

Investigation Results

SI: AI00448

SI Description:			
Inspector Comment:			
Requirement: Did the facility provide a minimum of second	ndary treatment?. [401 KAR 5:045 Section 1]		
Compliance Status: V-Out of Compliance-NOV			
	Comment: Failure to provide secondary treatment to an influent that is biochemically degradable and discharges into		
waters of the Commonwealth. A catastrophic failure of the	treatment facility components has resulted in the loss of all		
treatment capability.

Incident IDs: 2376131

Inspection Start Date: April 3, 2014 Time: 11:00 AM End Date: April 3, 2014 Time: 01:00 PM

Site/Permit ID: KY0038610

Lead DEP Investigator: Charlie Roth Other DEP Investigators: Brad Trivette

External Investigators:

Persons Interviewed: Jeff Stipe; Scotty Purdue

General Comments: On 04/03/2014, Brad Trivette and I conducted a Routine Inspection on the temporary wastewater treatment system installed by PECCO at the site of the collapsed Hunters Hollow WWTP. Influent is pumped via a gas portable pump, from the wet well to the first of a series of three aeration tanks, each 21,000 gallons in capacity. The pump rate at the influent wet well is manually regulated to compensate for the variation in flow to the plant due to I/I in the collection system. Air is provided by a portable diesel blower at a rate of 375 cfin, through a perforated PVC pipe system lining the bottom of each tank. From the aeration tanks flow is taken to a series of two clarifiers, each 18,000 gallons in capacity. Return sludge from these units is pumped to the initial aeration tank. From the clarifiers flow goes to a 9,000 gallon chorine contact tank with an approximate 30 minute contact time. From the chlorine contact tank flow passes through the dechlorination unit and then is discharge via pvc pipe to the UT to Brooks Run at the approximate location of the previous Hunters Hollow discharge point. Chlorination is provided through the use of Calcium Hypochlorite tablets and dechlorination through Sodium Sulfite tablets. Currently flow is measured by using the timed bucket method.

According to Scotty Purdue of PECCO, the current setup of this plant has the clarifiers in series. This configuration can take about 105 GPM (151,200 GPD) with a max flow of 120 GPM (172,800 GPD). If the clarifiers were arranged in parallel the flow rate could be up to 190 GPM (273,600 GPD).

According to Scotty Purdue, the temporary plant started taking flow at 4:00pm on 4/2/14 and started discharging at 1:00am 4/3/14.

Overall Compliance Status: Out of Comp-Viol documented

SI Description:

Inspector Comment: The temporary emergency plant has been switched to a parallel operation and is treating 205,000 gallons/day at this time. The final effluent is very clear. The temporary plant still cannot handle all of the raw sewage flow comong to the wet well.

The wet well is no longer overflowing.

Raw sewage from the plants influent pipe is still flowing over the ground and directly into the stream.

The emergency pipe line from the plant wet well to the Sanitation District's pump station is in place now. However, it is not being used yet. Jerry Kennedy said this is due to a pump being out of service in the pump station wet well. They are working on getting a replacement pump for the pump station.

Requirement: Does the facility hold the proper KPDES permit?. [401 KAR 5:055 Section 2]

Compliance Status: D-Out of Compliance-Violations Documented

Comment: The facility does not hold an active KPDES permit. The current permit KY0038610 expired 11/30/2013.

An application for renewal was submitted 9/13/2013 and is under review by the Division.

Site/Permit ID: KY0038610

Lead DEP Investigator: Charlie Roth Other DEP Investigators: Casey Doyle

External Investigators:

Persons Interviewed: Jeff Stipe; Shawn Ford

General Comments: Routine inspection of the temporary treatment plant showed the effluent from this facility appeared clear. Jeff Stipe of Pecco, Inc. who was operating the temporary plant at this time indicated that they were averaging 200,000-210,000 GPD. Their measurements for DO indicated the level was running between 1.0 and 3.0 mg/l in the aeration tanks and around 7.2 mg/l in the chlorine contact tank. There were some floating solids on the surface of the clarifiers that will be skimmed off.

The Hunters Hollow WWTP was still pumping raw influent to the head of the collapsed plant. This sewage

was still running over the ground and into the stream.

Shawn Ford of Bullitt Utilities was onsite at the time. He indicted that there were three pumps in the Hunters Hollow WWTP wet well. Two pumps alternated taking flow to the head of the plant during normal flow. The third pump was connected to a pipe the also took flow to the head of the plant in times of high flows due to wet weather. He also indicated that if these three pumps could not handle the flow, then Bullitt Utilities would drop a submersible pump into the wet well and pump influent to the ground which would lead to the stream. He indicated this would be reported as a bypass.

The pipe to the Bullitt County Sanitation District lift station was completed on Sunday April 6th, however there is still no flow being taken to this station apparently due to a broken pump in the lift station that has not yet been repaired.

Solids are starting to appear in the stream below the Hunters Hollow WWTP.

Overall Compliance Status: Out of Comp-Viol documented

SI Description:

Inspector Comment:

Requirement: Does the facility hold the proper KPDES permit?. [401 KAR 5:055 Section 2]

Compliance Status: D-Out of Compliance-Violations Documented

Comment: The facility does not hold an active KPDES permit. The permit expired 11/30/2013. An application for renewal was submitted 9/13/2013 and is under review by the Division.

Requirement: Is the facility being operated under the supervision of a properly certified operator? [40] KAR 5.010	J
Section I]. [401 KAR 5:010 Section 1]	
Compliance Status: C-No Violations observed	
Comment: Jeff Stipe and James Wilkerson of PECCO are operating the temporary plant. They are not certified	
operators, however, Larry Smither of Hunters Hollow is certified WW Treatment II, #13390, expires 6/30/2015.	
Requirement: Is the collection system under the primary responsibility of an individual who holds an	
active collection system certification at the level appropriate for the size of the treatment facility receiving the waste?	
[401 KAR 5:010 Section 2]. [401 KAR 5:010 Section 2]	
Compliance Status: C-No Violations observed	
Comment: Shawn Ford, WW Collections II, #21343, expires 6/30/2015.	
Requirement: Is the facility being properly operated and maintained as specified in regulation 5:065? This includes	3:
(a) proper operation and maintenance of all facilities, systems of treatment and control, and related appurtenances	
which are installed or used by the permittee to achieve compliance with permit conditions;	
(b) proper operation and maintenance also includes adequate laboratory controls, and appropriate quality assurance	
procedures; (c) this provision also requires the	e
operation of back-up or auxiliary facilities or similar systems which are installed by a permittee only when the	
operation is necessary to achieve compliance with the conditions of the permit. [401 KAR 5:065 Section 2(1)]. [401	
KAR 5:065 Section 2(1)]	
Compliance Status: D-Out of Compliance-Violations Documented	
Comment: The facility is not being properly operated and maintained as required. The temporary treatment plant is	
only capable of treating part of the total flow the Hunters Hollow WWTP. At the time of this inspection, there was	18
raw influent being discharged from Hunters Hollow to the receiving stream.	
The effluent from the temporary plant appeared clear.	
•	
The pipe from the Huners Hollow wet well to the BCSD lift station was completed on April 6th, however it is still not	t
in use due to pump issues in the lift station.	
Requirement: Are the disinfection unit(s) maintained and operated properly to allow for compliance with permit	
conditions? [401 KAR 5:005 Section 11]. [401 KAR 5:005 Section 11]	
Compliance Status: C-No Violations observed	
Comment: The temporary plant has a chlorination and dechlorination system set up.	
Requirement: Have pollutants entered the waters of the Commonwealth? [KRS 224.70-110]. [KRS 224.70-110]	
Compliance Status: D-Out of Compliance-Violations Documented	
Comment: Pollutants have entered and contributed to the pollution of the waters of the Commonwealth. The	
temporary treatment plant is only capable of treating part of the flow from the Huntes Hollow system. At the time of	
this inspection there was raw sewage from the Hunters Hollow influent being discharged onto the ground where it ran	i
into the stream.	
There are sludge solids now becoming visible on the stream bottom below the Hunters Hollow plant, from the raw	
sewage discharge.	
The temporary plant is producing a clear effluent at this time.	
Requirement: Have surface waters been aesthetically or otherwise degraded? [401 KAR 10:031 Section 2]. [401	
KAR 10:031 Section 2]	
Compliance Status: D-Out of Compliance-Violations Documented	
Comment: The waters of the Commonwealth have been degraded. The temporary treatment plant is only capable of	
treating part of the flow from the Huntes Hollow system. At the time of this inspection there was raw sewage from the	e
Hunters Hollow influent being discharged onto the ground where it ran into the stream.	
There are sludge solids now becoming visible on the stream bottom below the Huntes Hollow plant, from the raw	
sewage discharge.	
The temporary plant is producing a clear effluent at this time.

SI Description:

Inspector Comment: It has rained recently. There is once again heavy overflow of raw sewage entering the stream. The temporary emergency plant has been switched to a parallel operation and is treating 200,000 gallons/day at this time. The final effluent is very clear. The temporary plant still cannot handle all of the raw sewage flow comong to the wet well.

The wet well is not overflowing. They were pumping directly out of the wet well yesterday. The discharge was being pumped onto the ground. From there it ran into the stream

Raw sewage from the plants influent pipe is still flowing over the ground and directly into the stream.

The emergency pipe line from the plant wet well to the Sanitation District's pump station is in place now. However, it is not being used yet. Jerry Kennedy said this is due to a pump being out of service in the pump station wet well. They are working on getting a replacement pump for the pump station.

Requirement: Does the facility hold the proper KPDES permit?. [401 KAR 5:055 Section 2]

Compliance Status: D-Out of Compliance-Violations Documented

Comment: The facility does not hold an active KPDES permit. The current permit KY0038610 expired 11/30/2013.

An application for renewal was submitted 9/13/2013 and is under review by the Division.

Requirement: Is the facility being operated under the supervision of a properly certified operator? [401 KAR 5:010 Section 1]. [401 KAR 5:010 Section 1]

Compliance Status: C-No Violations observed

Comment: Jeff Stipe and James Wilkerson of PECCO, are runing the temporary plant at this time. They are not certified operators, however Larry Smither of Hunters Hollow is certified WW Treatment II, #13390 expires 6/30/2015.

Requirement: Is the collection system under the primary responsibility of an individual who holds an active collection system certification at the level appropriate for the size of the treatment facility receiving the waste? [401 KAR 5:010 Section 2]. [401 KAR 5:010 Section 2]

Compliance Status: C-No violations observed
Comment: Shawn Ford, WW Collections II, #21343, expires 6/30/2015.
Requirement: Is the facility being properly operated and maintained as specified in regulation 5:065? This includes: (a) proper operation and maintenance of all facilities, systems of treatment and control, and related appurtenances which are installed or used by the permittee to achieve compliance with permit conditions;
(b) proper operation and maintenance also includes adequate laboratory controls, and appropriate quality assurance procedures; (c) this provision also requires the operation of back-up or auxiliary facilities or similar systems which are installed by a permittee only when the
operation is necessary to achieve compliance with the conditions of the permit. [401 KAR 5:065 Section 2(1)]. [401 KAR 5:065 Section 2(1)]
Compliance Status: D-Out of Compliance-Violations Documented Comment: The facility is not being properly operated and maintained as required. The temporary treatment plant is
only capable of treating part of the total wet weather flow. At the time of this inspection there was raw sewage from the plants influent pipe being discharged onto the ground were it ran into the stream.
The temporary emergency plant has been switched to a parallel operation and is treating 205,000 gallons at this time. The final effluent is very clear.
The pipe line from the plant wet well to the Sanitation District's pump station is place now. However is not being used yet.
Requirement: Are the disinfection unit(s) maintained and operated properly to allow for compliance with permit conditions? [401 KAR 5:005 Section 11]. [401 KAR 5:005 Section 11] Compliance Status: C-No Violations observed
Comment: The temporary system has a chlorination and dechlorination system set up.
Requirement: Have pollutants entered the waters of the Commonwealth? [KRS 224.70-110]. [KRS 224.70-110]
Compliance Status: D-Out of Compliance-Violations Documented
Comment: Pollutants have entered and contributed to the pollution of the waters of the Commonwealth. The temporary treatment plant is only capable of treating part of the total wet weather flow. At the time of this inspection
there was raw sewage from the plants influent pipe being discharged onto the ground were it ran into the stream. The temporary emergency plant is producing a very clear final effluent. The stream is starting to slow down now and the muddy water is clearing. Sludge solids are now becoming visible on the stream bottom.
Requirement: Have surface waters been aesthetically or otherwise degraded? [401 KAR 10:031 Section 2]. [401 KAR 10:031 Section 2]
Compliance Status: D-Out of Compliance-Violations Documented
Comment: The waters of the Commonwealth have been degraded. The temporary treatment plant is only capable of treating part of the total wet weather flow. At the time of this inspection there was raw sewage form the plants
influent pipe being discharged onto the ground were it ran into the stream. The temporary emergency plant is producing a very clear final effluent. The stream is starting to slow down now and the muddy water is clearing. Sludge solids are now becoming visible on the stream bottom.

SI Description:

Inspector Comment: It has rained recently. There is once again heavy overflow of raw sewage entering the stream. The temporary emergency plant has been switched to a parallel operation and is treating 200,000 gallons/day at this time. The final effluent is very clear. The temporary plant still cannot handle all of the raw sewage flow comong to

The wet well is not overflowing. They were pumping directly out of the wet well yesterday. The discharge was being pumped onto the ground. From there it ran into the stream

Raw sewage from the plants influent pipe is still flowing over the ground and directly into the stream.

The emergency pipe line from the plant wet well to the Sanitation District's pump station is in place now. However, it is not being used yet. Jerry Kennedy said this is due to a pump being out of service in the pump station wet well. They are working on getting a replacement pump for the pump station.

Site/Permit ID: KY0038610

Lead DEP Investigator: Charlie Roth

Other DEP Investigators: External Investigators:

Persons Interviewed: Jeff Stipe

General Comments: Routine inspection of Hunters Hollow site as well as the Pecco, Inc. temporary treatment plant. Jeff Stipe of Pecco Inc. who was operating the temporary plant at this time indicated it was averaging around 200,000 GPD. The effluent has just a slight tint in color at the time. Bullitt Utilities had spread lime around the site of the Hunters Hollow WWTP earlier that morning. There was still a discharge of influent from the Hunters Hollow plant onto the ground and into the tributary to Brooks Run. Solids were evident in the stream from the runoff of this influent. Bullitt Utilities had placed a hose in the wet well to bypass sewage to the ground. This was apparently put into place last week during the heavy rain event. There were still sewage solids on the ground at the base of the old plant from the original collapse of the facility.

AI ID: 448 AI Type: RESIDENCE- Subdivision (nec)

AI Name: Hunters Hollow Subd

Al Address: Blue Lick Rd

City: Louisville, State: Kentucky Zip: 40218

County: Bullitt Regional Office: Louisville Regional Office

Latitude: 38.073611 Longitude: -85,694444

Site Contact: Larry Smither

Inspection Type: WW Routine-Min Nmun Activity #: CIN20140017

Incident IDs: 2376131

Inspection Start Date: May 21, 2014 Time: 03:00 PM End Date: May 21, 2014 Time: 04:00 PM

Site/Permit ID: KY0038610

Lead DEP Investigator: Brad Trivette

Other DEP Investigators: External Investigators:

Persons Interviewed: Jeff Sipe

General Comments: KY0038610 - HUNTERS HOLLOW SUBD Overall Compliance Status: Out of Comp-Viol documented

Investigation Results

SI: AIOO448 SI Description:

Inspector Comment: The tempoary plant is still at 200,000 gallons/day. Raw sewage overflow is still going into the stream. The stream is very cloudy just below the outfall. The area is very odorous.

Requirement: Does the facility hold the proper KPDES permit?, [401 KAR 5:055 Section 2]

Compliance Status: D-Out of Compliance-Violations Documented

Comment: The facility does not hold an active KPDES permit. The current permit KY0038610 expired 11/30/2013.

An application for renewal was submitted 9/13/2013 and is under review by the Division.

Requirement: Is the facility being operated under the supervision of a properly certified operator? [401 KAR 5:010 Section 1]. [401 KAR 5:010 Section 1]

Compliance Status: C-No Violations observed

Comment: Jeff Stipe and James Wilkerson of PECCO, are runing the temporary plant at this time. They are not certified operators, however Larry Smither of Hunters Hollow is certified WW Treatment II, #13390 expires 6/30/2015.

Requirement: Is the collection system under the primary responsibility of an individual who holds an active collection system certification at the level appropriate for the size of the treatment facility receiving the waste? [401 KAR 5:010 Section 2]. [401 KAR 5:010 Section 2]

Compliance Status: C-No Violations observed

Comment: Shawn Ford, WW Collections II, #21343, expires 6/30/2015.

Requirement: Is the facility being properly operated and maintained as specified in regulation 5:065? This includes: (a) proper operation and maintenance of all facilities, systems of treatment and control, and related appurtenances which are installed or used by the permittee to achieve compliance with permit conditions;

(b) proper operation and maintenance also includes adequate laboratory controls, and appropriate quality assurance procedures;

(c) this provision also requires the

operation of back-up or auxiliary facilities or similar systems which are installed by a permittee only when the operation is necessary to achieve compliance with the conditions of the permit. [401 KAR 5:065 Section 2(1)]. [401

KAR 5:065 Section 2(1)]	in Demonstral

Site/Permit ID: KY0038610

Lead DEP Investigator: Charlie Roth

Other DEP Investigators: External Investigators:

Persons Interviewed: Larry Smither, Jeff Stipe

General Comments: Jeff Stipe, PECC and Larry Smither, Bullitt Utilities were onsite. PECCO plant still running at around 200,000 gpd. When I arrived there was a discharge from the old Hunters Hollow influent pipe to the ground. There were two streams of raw sewage running on the ground and into the stream behind the plant. By the time I was ready to leave the bypass appeared to have ceased as well as the flow of raw sewage to the steam. Samples for E. coli, BOD, TSS and ammonia were collected from the temporary PECCO plant effluent as well as instream immediately below the plant. Flow in the stream appeared normal and clear above the plant. The outfall from the PECCO plant was murky. The stream below the plant was grey in color with visible sewage solids and a sewage odor. Sample results for E. coli showed 99,999 col/100ml from the effluent and 99,999 col/100ml from the stream immediately below the site.

The Veolia Actiflow plant was still not setup. According to Veolia, Bullitt Utilities is responsible for the cost of installing the piping and for running electricity to their plant. They estimate the once completed it will take an additional three weeks for this system to be operational.

Headdon Septic was onsite cleaning sewage from the concrete pad of the old Hunters Hollow Plant. Larry Smither indicated that engineers were to be onsite later to check the pad for suitability in use for a possible permanent new plant. In addition, Arrow Electric was onsite checking the needs for running electricity to the Veolia plant.

Overall Compliance Status: Out of Compliance-NOV

Al Address: Blue Lick Rd

City: Louisville, State: Kentucky Zip: 40218

County: Bullitt Regional Office: Louisville Regional Office

Latitude: 38.073611 Longitude: -85.694444

Site Contact: Larry Smither

Inspection Type: WW Routine-Min Nmun Activity #: CIN20140022

Inspection Start Date: June 21, 2014 Time: 12:00 AM End Date: June 21, 2014 Time: 12:00 AM

r endelte fe

Site/Permit ID: KY0038610

Lead DEP Investigator: Brad Trivette

Other DEP Investigators: External Investigators: Persons Interviewed:

General Comments:

Overall Compliance Status: Out of Comp-Viol documented

Investigation Results

SI: AIOO448

SI Description:

Inspector Comment: The PECCO plant tanks have been cleaned out since the inspection on the 18th. The effluent is much clearer today.

The Yeolia Actiflow plant is still not in operation. Still waiting for the Cogans to get the electric wired up for the plant. The pipeing is in.

Requirement: Does the facility hold the proper KPDES permit?. [401 KAR 5:055 Section 2]

Compliance Status: D-Out of Compliance-Violations Documented

Comment: The facility does not hold an active KPDES permit.

Requirement: Is the facility being operated under the supervision of a properly certified operator? [401 KAR 5:010

Section 1]. [401 KAR 5:010 Section 1]

Compliance Status: C-No Violations observed

Comment:

Requirement: Is the collection system under the primary responsibility of an individual who holds an active collection system certification at the level appropriate for the size of the treatment facility receiving the waste? [401 KAR 5:010 Section 2]. [401 KAR 5:010 Section 2]

Compliance Status: C-No Violations observed

Comment: Shawn Ford is the collection system operator.

Requirement: Is the facility being properly operated and maintained as specified in regulation 5:065? This includes: (a) proper operation and maintenance of all facilities, systems of treatment and control, and related appurtenances which are installed or used by the permittee to achieve compliance with permit conditions;

(b) proper operation and maintenance also includes adequate laboratory controls, and appropriate quality assurance (c) this provision also requires the procedures:

operation of back-up or auxiliary facilities or similar systems which are installed by a permittee only when the operation is necessary to achieve compliance with the conditions of the permit. [401 KAR 5:065 Section 2(1)]. [401 KAR 5:065 Section 2(1)]

Compliance Status: D-Out of Compliance-Violations Documented

Comment: The facility is not being properly operated and maintained as required. There is still a heavy overflow of raw sewage entering the stream. The stream is very dark, has a strong odor and a heavy load of visible sewer solids.		
Requirement: Are the disinfection unit(s) maintained and operated properly to allow for compliance with permit conditions? [401 KAR 5:005 Section 11]. [401 KAR 5:005 Section 11] Compliance Status: E-Not Evaluated		
Comment:		
Requirement: Have pollutants entered the waters of the Commonwealth? [KRS 224.70-110]. [KRS 224.70-110] Compliance Status: D-Out of Compliance-Violations Documented Comment: Pollutants have entered and contributed to the pollution of the waters of the Commonwealth. There is still a heavy overflow of raw sewage entering the stream. The stream is very dark, has a strong odor and a heavy load of visible sewer solids.		
Requirement: Have surface waters been aesthetically or otherwise degraded? [401 KAR 10:031 Section 2]. [401 KAR 10:031 Section 2]. [401 Compliance Status: D-Out of Compliance-Violations Documented Comment: The waters of the Commonwealth have been degraded. There is still a heavy overflow of raw sewage entering the stream. The stream is very dark, has a strong odor and a heavy load of visible sewer solids.

Incident IDs: 2376131

Inspection Start Date: July 16, 2014 Time: 12:45 PM End Date: July 16, 2014 Time: 02:00 PM

Site/Permit ID: KY0038610

Lead DEP Investigator: Charlie Roth

Other DEP Investigators: External Investigators:

Persons Interviewed: Jeff Stipe; Tim Schaeffer

General Comments: The Hunters Hollow plant was bypassing influent to the ground at the time of this inspection. The stream was grey in color with deposits of sludge and a sewage odor. The piping has been completed from the PECCO plant to the Veolia plant. They were filling the second frank tank in anticipation of taking flow to the Veolia plant. The original wood storage shed for the chemical totes would not work, so PECCO brought in three metal storage bins. Each bin contained either a tote for Liquichlor, Ferric Chloride or Bisulfite. The feed lines and metering pumps for these totes were being installed at the time. Anticipate start-up of the Veolia plant on the 17th.

7/17/2014. Follow-up site visit. The Veolia plant was started at around 10:00am. All flow was routed from the PECCO plant to the Veolia plant around 11:00am and the discharge line from the PECCO plant was disconnected. This pipe will be used to take any wet weather flow from the wet well of the Hunters Hollow plant to the Veolia plant. At normal flow it takes about 2.5 hours to fill the frack tanks in order to run a batch flow to the Veolia plant. At 300 gpm it will take about 1 hour to run a batch through.

Site/Permit ID: KY0038610

Lead DEP Investigator: Charlie Roth

Other DEP Investigators: External Investigators:

Persons Interviewed: Ken Buzek

General Comments: The Veolia plant at Hunters Hollow was refilling and was not discharging at the time of my arrival. However, at around 11:50am the plant was started up and began discharging about 15 minutes later. Mr. Ken Buzek, Veolia engineer, was onsite at the time. He indicated that when discharging the flow was 150 gpm or around 230,000 gpd with 70,000 gallons recycled to the holding tank. Mr. Buzek indicated that it was taking approximately 2-3 hours to refill the holing tank between run times. The stream appeared clearer, with the exception of a reddish color below the outfall. Mr. Buzek indicated that due to fluctuating levels of turbidity, especially at the start of a running cycle it takes some time to adjust the ferric chloride coagulant feed resulting in some overfeeding. Hunters Hollow still has a gas pump set up at the wet well with visible indication of debris at the end of the hose from a possible bypass. The Veolia plant is capable of treating all flow from the Hunters Hollow collection system, therefore it would seem that a bypass from the wet well should not be necessary. Sufficient pumping capacity should be established to take all flow from the wet well to the Veolia plant.

Lead DEP Investigator: Charlie Roth

Other DEP Investigators: External Investigators:

Persons Interviewed: Michael Giffen

General Comments: The Veolia plant is running about 4 hours on with 1-1.5 hours off to refill the holding tanks. The stream substrate at the outfall still is reddish in color from the ferric chloride coagulant, but water clarity is better. The wet well at Hunters Hollow appears to have overflowed. The debris seems to have been confined to the ground in the vicinity of the wet well. The Veolia plant is capable of treating all flow from the Hunters Hollow system. Therefore there should not be a need for a bypass from the wet well. Hunters Hollow should provide sufficient pumping capability to take all flow from the wet well to the Veolia plant.

Other DEP Investigators: External Investigators:

Persons Interviewed: Ken Buzek

General Comments: The Veolia plant started discharging at 7:30am. It is currently running for about 8-9 hours before shutting off to allow tanks to refill. Discharging at 220GPM, Sludge was pumped from the sludge tank on 8/21/14. The influent filters to the Veolia plant are to be cleaned today. The gas pump at the Hunters Hollow wet well has been valved into the influent line to the Veolia plant. There was still some staining of the stream bed from the Ferric Chloride, evident below the discharge. The water clarity of the effluent and stream looked good at the time of this inspection.

Overall Compliance Status: Out of Comp-Viol documented

General Comments: The Veolia plant was running at 235 GPM. The area had a 2 inch rain event on Wednesday 8/27. As a result the wet well at the Hunters Hollow WWTP was overflowing to the stream. This overflow was reported to the Division on 8/29/14 at 5:40pm. The gas pump at the wet well was running, however it was not taking all of the influent to the Veolia plant. Apparently there was a lack of communication between Bullitt Utilities and Veolia concerning the need to anticipate increased flow during wet weather and the need to make the necessary adjustments to the Actiflow system to account for the additional influent flow. Larry Smither and Shaun Ford were onsite meeting with Mike Shaw on Veolia to work out the plan for handling wet weather flows during future rain events. The overflow from the wet well was reported to have ended at 1:15 pm on 8/29. Sludge was hauled on Thursday 8/28. The effluent from the Veolia plant appeared clear. The stream at the outfall looked clear, however there was grey water entering the stream from the wet well overflow.

PM

Site/Permit ID: KY0038610

Lead DEP Investigator: Charlie Roth

Other DEP Investigators: External Investigators:

Persons Interviewed: Ron Guidry

General Comments: The Veolia plant was not discharging at the time of the inspection. When running it is operating at about 230 GPM. Currently there is about 1.5 hours between run times. The filter was changed that morning, they are getting about 3 days of use between filter changes. Sludge is being hauled 1/week at this time. The effluent from the Veolia plant looked clear. The stream appeared clear with little indication of previous staining from Ferric Chloride. There was still some indication of sludge on a portion of the stream bank from the previous overflow event on 8/29/14.

The current treatment process consists of a series of 7 portable frac tanks trailers. Five are used for aeration and two are use for storage of influent prior to treatment trough the Veolia Actiflow system. There are three skids for chemical storage and treatment, Ferric Chloride as a coagulant, Hypochlorite for disinfection and Bisulfite for dechlorination.

On 3/29/14 the Hunters Hollow WWTP suffered a catastrophic failure. The 250,000 GPD plant collapsed. On 4/2/14 PECCO had installed a temporary treatment system consisting of a series of portable frac tanks. This system could treat only dry weather flow. Therefore, during wet weather there was frequent releases of untreated sewage to the stream. On 7/17/14 the Veolia Actiflow system started up. Veolia indicated this design was capable of treating all flow including wet weather from the Hunters Hollow system.

Overall Compliance Status: Out of Comp-Viol documented

Investigation Results

SI: AIOO448 SI Description:

Inspector Comment:

Requirement: Does the facility hold the proper KPDES permit? [401 KAR 5:055 Section 2]

Compliance Status: D-Out of Compliance-Violations Documented

Comment: KY0038610. The facility does not hold an active KPDES permit. The permit expired on 11/30/13. The

renewal application was received on 9/13/13 and is under review by the Division. The permit was continued effective 12/1/13.

Requirement: Have all required permits been obtained from the Division of Water prior to the construction or modification of the facility? [401 KAR 5:005 Section 1]

Compliance Status: C-No Violations observed

Comment:

Requirement: Is the facility being operated under the supervision of a properly certified operator? [401 KAR 5:010 Section 1]

Compliance Status: C-No Violations observed

Comment: Veolia personnel are not certified, but are operating under the license of Larry Smither of Bullitt Utilities, Inc. # 13390, expires 6/30/15.

Requirement: Is the collection system under the primary responsibility of an individual who holds an active collection system certification at the level appropriate for the size of the treatment facility receiving the waste? [401 KAR 5:010 Section 2]

Compliance Status: C-No Violations observed

Comment: Shawn Ford, WW Collections, #21343, expires 6/30/15.

Requirement: Does the permittee retain records of all monitoring information including: the date, exact place, and time of sampling or measurements; the name of the individual who performed the sampling or measurements; the dates and times analyses were performed; the name of the individual who performed the analyses; the analytical techniques or methods used; the results of the analyses; all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation; copies of all reports required by this permit; and records of all data used to complete the application for this permit, for the period required by the cabinet and at a minimum of at least three (3) years from the date of the sample, measurement, report, or application? [401 KAR 5:065 Section 2(1)]

Compliance Status: C-No Violations observed

Comment: Records maintained by Bullitt Utilites and Veolia.

Requirement: Is the facility required to prepare and implement a groundwater protection plan (GPP) as specified in regulation 401 KAR 5:037? If yes, does the facility have a GPP? [401 KAR 5:037 Section 3]

Compliance Status: E-Not Evaluated

Comment:

Requirement: Is the permittee reporting monitoring results to the cabinet at the intervals specified in the permit? [401 KAR 5:065 Section 2(1)]

Compliance Status: I-No Violations obs-but impending viol trends obs

Comment: DMR review for 7/1/13-7/31/14 showed DMRs submitted late for Aug 2013.

Requirement: Are the monitoring results reported to the cabinet on a Discharge Monitoring Report (DMR)? [401 KAR 5:065 Section 2(1)]

Compliance Status: C-No Violations observed Comment: DMRs submitted via NetDMR

Requirement: If the permittee monitors any pollutant more frequently than required by the permit, using test procedures approved under 40 CFR Part 136 or as specified in the permit, are the results of this monitoring included in the calculation and reporting of the data submitted in the DMR? [401 KAR 5:065 Section 2(1)]

Compliance Status: E-Not Evaluated

Comment:

Requirement: Are the calculations for all limitations which require averaging of measurements utilizing an arithmetic mean unless otherwise specified by the Cabinet in the permit? [401 KAR 5:065 Section 2(1)]

Compliance Status: E-Not Evaluated

Comment:

Requirement: Is the permittee in compliance for the reporting of spills, bypasses, and non-compliance according 401 KAR 5:065 Section 2(1)

Compliance Status: D-Out of Compliance-Violations Documented

Comment: The facility has failed to report spills, bypasses and/or non-compliance as required by 401 KAR 5:065 Section 2(1). Spills are normally reported to the Louisville Regional Office via fax. Records show there were two NOVs issued (07/02/13 and 11/12/13) for failure to notify.

Requirement: Did the facility notify the Division of Water by the most rapid means available whenever, by reason of emergency or accident, a spill or discharge occurs which results in pollution of the waters of the Commonwealth? [401 KAR 5:015 Section 2]

Compliance Status: D-Out of Compliance-Violations Documented

Comment: The responsible party/permittee has failed to report the spill or discharge to the Division of Water as required. Spills are normally reported to the Louisville Regional Office via fax. Records show there were two NOVs issued (07/02/13 and 11/12/13) for failure to notify.

Requirement: Is the facility being properly operated and maintained as specified in regulation 5:065? This includes: (a) proper operation and maintenance of all facilities, systems of treatment and control, and related appurtenances which are installed or used by the permittee to achieve compliance with permit conditions;

(b) proper operation and maintenance also includes adequate laboratory controls, and appropriate quality assurance procedures;

(c) this provision also requires the

operation of back-up or auxiliary facilities or similar systems which are installed by a permittee only when the operation is necessary to achieve compliance with the conditions of the permit. [401 KAR 5:065 Section 2(1)]

Compliance Status: D-Out of Compliance-Violations Documented

Comment: The facility is not being properly operated and maintained as required. The previous plant showed numeric permit violations and instances of stream degradation. Since the collapse of the original Hunters Hollow WWTP there continued to be instance of stream degradation due to operations of the system. The current Veolia plant appears to be producing a clearer effluent. There have still been instances of stream degradation due to overflows from the wet well at the Hunters Hollow site.

Requirement: Are the disinfection unit(s) maintained and operated properly to allow for compliance with permit conditions? [401 KAR 5:005 Section 11]

Compliance Status: C-No Violations observed

Comment: Hypochorite utilized for disinfection in the current Veolia Actiflow system.

Requirement: Does the flow measuring device measure all flow received at the WWTP? For large wastewater facilities (average daily design capacity >50,000 gpd), is flow measured by an indicating, recording, and totalizing flow measuring device? [401 KAR 5:005 Section 12]

Compliance Status: C-No Violations observed

Comment: Flow is measured through the Veolia system.

Requirement: Is a source of water provided for cleanup? If potable water is used, is a backflow preventor installed to protect the water supply? [401 KAR 5:005 Section 10(6)]

Compliance Status: C-No Violations observed

Comment.

Requirement: Has fencing with a lockable gate been installed around the wastewater treatment plant? [401 KAR 5:005 Section 10(7)]

Compliance Status: I-No Violations obs-but impending viol trends obs

Comment: There is no fencing around the current system, however it is manned 24 hours.

Requirement: Has an all-weather access road been installed to allow access to the wastewater treatment plant? Is the road adequately maintained to allow access to the facility for operation and maintenance activity? [401 KAR 5:005 Section 10(8)]

Compliance Status: C-No Violations observed Comment: Gravel road to Actiflow system.

Requirement: Sewage sludge. Did the facility meet the requirements governing the disposal of sewage sludge from publicly owned treatment works, in accordance with 40 CFR Part 503? [401 KAR 5:065 Section 2(4)]

Compliance Status: C-No Violations observed

Comment: Sludge is currently hauled weekly by septic hauler.

Requirement: Is the effluent in compliance with KPDES permit limitations? Do the Discharge Monitoring Reports indicate KPDES permit violations? [401 KAR 5:065 Section 2(1)]. [401 KAR 5:065 Section 2(1)]

Compliance Status: D-Out of Compliance-Violations Documented

Comment: The facility has failed to comply with the effluent limitations contained in the permit. DMR review for 7/1/13-7/31/14 showed permit limits exceeded for: Dissolved Oxygen (DO) 9/13, 10/13 and 4/14. Total Suspended Solids (TSS) 12/13, 1/14, 4/14, 6/14 and 7/14. Total Ammonia Nitrogen (TAN) 9/13, 10/13, 5/14, 6/14 and 7/14. Total Phosphorus 8/13, 9/13, 11/13, 12/13, 1/14, 2/14, 4/14, 5/14, 6/14 and 7/14. Total Residual Chlorine 1/14. E. coli. 9/13, 10/13, 12/13, 1/14, 4/14, 5/14, 6/14, 11/13, 1/14, 4/14, 5/14, 6/14, and 7/14. An NOV was issued by the Division of Enforcement on 7/25/14 for permit limit violations.

Requirement: Are samples taken in compliance with the monitoring requirements and taken at the following location(s): nearest accessible point after final treatment, but prior to actual discharge or mixing with receiving waters? Are the samples representative of plant flow? Are flow proportioned samples obtained when required by the KPDES

	ES permit requirements? Are composite samples collected
and analyzed according to the KPDES permit conditions?	Are samples collected according to KPDES permit

Solutions & Technologies

Veolia Water Solutions & Technologies North America, Inc. Vandalia, Ohio

MOBILE WATER SERVICE AGREEMENT

This agreement ("Agreement") is entered into and is effective as of **01 June 2014 – 31 July 2014** between **Veolia Water Solutions & Technologies North America**, **Inc.**, **Vandalia**, **Ohio**, **North America** (hereinafter called "Provider") and **Bullitt Utilities**, **Inc.** (hereinafter called "Customer").

AGREEMENT

NOW, THEREFORE, in exchange for mutual promises and good valuable consideration, receipt of which is hereby acknowledged, the parties hereto agree as follows:

1 TERM

- 1.1 Provider shall provide to Customer water treatment services (as such term is defined in Section 3.1) at Customer's facility located at 169 Octagon Ave, Hunters Hollow, KY 40229 from 19 May 2014 (the "In tial Term") and thereafter for successive three (3) month periods ("Renewal"), unless and until terminated by either party at the end of the Initial Term of any Renewal upon not less than twenty eight (28) days prior written notice. The agreement pricing terms are as follows:
 - \$35,000 per month for Actiflo™Turbo mobile equipment rental
 - \$19,250 per month for Ancillary equipment, forwarding pump, filter press, sludge thickener tank, air diaphragm transfer pumps
 - \$35,000 one-time fee for mobilization/demobilization
 - \$54,250 refundable security deposit at termination of rental period and upon 3rd party damage assessment after return of trailer to Veolia Water
 - \$60.00/hr. for labor for eight (8) hour shift, five (5) days per week
 - \$90.00/hr. for labor for time and one half on Saturday's
 - \$120.00/hr. for labor for double time on Sunday's and holidays
 - \$1,600/per day + expenses +15% for engineering, supervision, management consulting
 - HYDREX chemistries are purchased price per lb. but separate from mobile contract.

In the event this Agreement is cancelled prior to the expiration of the Initial Term either 1) by Provider as a result of Customer's incurred material default or 2) by Customer for any reason, except for a material incurred default by Provider, then Customer shall pay to Provider, as liquidated damages for such cancellation and not as a penalty, with the remaining period of the Initial Term being prorated as follows: 60% at 2 weeks, 40% at 4 weeks and 20% at 8 weeks or 30 days notice given to Provider of cancellation to avoid liquidated damages.

In the event of cancellation and / or if stated specifically elsewhere in this agreement, all freight and logistics charges will be billed to the customer at cost plus 15%.

Veolia Water Solutions & Technologies North America, Inc.

- 1.2 In the event of any cancellation or other termination of this Agreement, Customer shall permit Provider to remove its Mobiles (as such term is hereinafter defined in Section 1.6 from the Delivery Area (as such term is hereinafter defined in Section 2) as provided for in this Agreement.
- 1.3 Treated water ("Treated Water") shall mean water which has been purified to a high degree by the substantial removal of minerals, organic compounds, or other suspended or dissolved matter.

 Unless specifically stated elsewhere in this agreement Treated Water is not intended for consumption.
- 1.4 Mobile water treatment equipment systems ("Mobiles") are herein defined to mean one or more of the following: water de-mineralizing systems, reverse osmosis systems, clarification or filtration systems capable of easy transport. Mobiles may be skid mounted or on a mobile platform.

2 CUSTOMER'S OBLIGATIONS

- 2.1 Prior to and as a condition of Provider's obligations hereunder, Customer shall, without cost to Provider, and throughout the Initial Term and any applicable Renewal, furnish and maintain in good condition, an area at or adjacent to each plant covered by this Agreement, suitable for the ingress/egress and full utilization of Mobiles (herein defined as the "Delivery Area").
- 2.2 In order for a Delivery Area to be suitable for Mobiles, Customer must:
 - (i) Prepare and/or provide a foundation sufficient to safely hold the weight of the largest Mobiles Provider anticipates may be placed in the Delivery Area,
 - (ii) Provide incoming water meeting the specifications stated in Exhibit A ("Feed Water"),
 - (iii) Provide all tankage, transfer pumps and appropriate water conduits (unless provided by Veolia Water Solutions & Technologies) ("Distribution Equipment") to deliver feed water to the Mobiles,
 - (iv) Provide Distribution Equipment to receive Treated Water from the Mobiles,
 - (v) Provide all utilities required by the Mobiles as set forth in Exhibit C,
 - (vi) Provide all security measures reasonably needed to protect the Mobiles and the Delivery Area, and
 - (vii) Obtain in writing all consents, licenses and permits required to establish and maintain the Delivery Area allowing Provider to provide the Services which are the subject of this Agreement.
 - 2.3 Customer's failure to meet the feed water requirements set forth in Exhibit A may result in additional cleaning expenses which shall be the responsibility of Customer. Any changes in feed water pretreatment that is the responsibility of Customer shall be reviewed and approved by Provider prior to implementation of the change. Customer shall be responsible for damages that occur to the Mobiles due to changes in feed water that occur without the prior written authorization of Provider.
 - 2.4 Customer is responsible for providing adequate disposal in accordance with all applicable laws and regulations for all effluent associated with normal operation of the Mobiles.
 - 2.5 Offer Provider right of first refusal to meet Customer's requirements for additional Services under this Agreement. In the event Provider is unable to meet Customer's needs for additional Service, Customer may solicit Service from any alternative source at its sole discretion. Such event shall not constitute a breach of this Agreement on the part of Provider.
 - 2.6 In the event equipment is damaged by Customer, the Customer accepts responsibility for cost of damages and to be recovered from the initial deposit. If repair costs exceed the deposit, the customer agrees to cover any overage and bears all costs associated with the damages.

3 PROVIDER'S OBLIGATIONS

- 3.1 Subject to Customer satisfying its obligations set forth in Sections 2.1 through 2.4, Provider shall:
 - (i) Furnish and supervise installation of Mobiles at the Delivery Area,
 - (ii) Supervise connection of said Mobiles to the Distribution Equipment,
 - (iii) Process the feed water through the Mobiles, and
 - (iv) Deliver Treated Water meeting the specifications set forth in Exhibit A to the Distribution Equipment.
 - (v) Provide training to run and clean Mobiles.

Page 3 of 13

- 3.2 Provider may substitute other equipment, at its option and sole cost, to meet the specifications set forth in Exhibit A.
- 3.3 Upon request by Customer, provide a Certificate of Insurance listing coverages for General Liability, Automobile Liability and Workman's Compensation.
- 3.4 Provider shall provide Services subject to the exclusions set forth in Exhibit C.

4 ACCESS AND TITLE

Authorized representatives of Provider and Customer shall have access at all times to all Delivery Areas. Customer shall use all reasonable precautions to prevent all other persons from entering the Delivery Areas and shall not permit any persons other than authorized employees or representatives of Provider to operate, use, alter, repair, relocate, regenerate, adjust or tamper with any Mobiles or other equipment installed by Provider unless agreed to in writing by Provider. While the Mobiles are in the Delivery Area or anywhere on Customer's property, Customer shall defend Provider's right, title, and interest in said Mobiles and keep them free of all liens and encumbrances. Customer shall be liable for damage to or loss of any Mobiles or other equipment of Provider located in the Delivery Area or elsewhere on Customer's property, unless said damage or loss is caused solely by the negligent acts or omissions of Provider, its employees, agents or representatives.

Before any Mobiles are installed at any Delivery Areas, Customer will execute all documents and public filings as Provider may reasonably request to evidence Provider's ownership interest.

5 EQUIPMENT RELOCATION OR CHANGE

If Customer, for any reason, requests Provider to relocate the Mobile(s) from one Delivery Area to another, or if Provider after consultation with Customer and, in order to protect its Mobiles or improve the Service to be provided hereunder, replaces Mobiles or relocates Mobiles from one Delivery Area to another, Customer shall bear all costs in connection with said replacement or relocation and the subsequent connection is to Customer's Distribution Equipment. Notwithstanding the above, in the event that the mobiles or other equipment are defective or in need of repair, the Provider shall bear all costs in connection with said replacement or repair.

6 PRICE AND PAYMENT TERMS

The prices for the furnishing of Treated Water and Mobiles are set forth in Exhibit A. Payment terms are Net 30 days. In addition, Customer shall reimburse Provider for any supplemental costs incurred by Provider in the performance of any installation or other construction work required to make a given Delivery Area suitable. Customer shall also pay to Provider, or to the appropriate authorities, all governmental taxes, including sales or use taxes, related to the Services performed by Provider under this Agreement.

In the event payment is not made in accordance with the provisions of this Section 6, Customer shall pay Provider a monthly late charge equal to one percent (1%) per month of all unpaid balances or the maximum amount permitted by law, whichever is less.

The lease period starts on the day the unit is loaded and departs the location of the Provider for delivery to the Customer (or 10 days after Customer is notified that equipment is ready to ship) and terminates when the equipment arrives back at the Provider's location.

Veolia Water Solutions & Technologies' standard rate structure attached Exhibit B.

7 WATER QUALITY DISPUTES

Any Treated Water furnished hereunder by Provider and shown by recognized standard analysis to be of purity less than specified in Exhibit A may be rejected by Customer at its discretion, provided that said failure to meet such specification is caused by the negligent acts or omissions of Provider. Provider reserves the right to check the analysis on all Treated Water rejected. Purity of the Treated Water shall be measured at the outlet connection of the Mobiles and prior to connection to Customer's Distribution Equipment.

8 WARRANTY

Provider warrants that the treated water furnished hereunder shall meet the specifications set forth in EXHIBIT B provided Customer supplies feed water meeting the specifications set forth in EXHIBIT A and meets its obligations under this agreement. The Provider makes no other warranties, expressed or implied, including without limitation, the warranties of merchantability or fitness for purpose intended. PROVIDER WARRANTS THAT THE TREATED WATER FURNISHED HEREUNDER SHALL MEET THE SPECIFICATIONS SET FORTH IN EXHIBIT B PROVIDED CUSTOMER SUPPLIES FEEDWATER MEETING THE SPECIFICATIONS SET FORTH IN EXHIBIT A AND MEETS ITS OBLIGATIONS UNDER THIS AGREEMENT. PROVIDER MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION, THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR PURPOSE INTENDED. Any Treated Water not meeting these specifications shall, at Provider's option, be replaced or reprocessed at no additional cost to Customer, unless the failure is caused by the acts or omissions of Customer.

9 LIMITATION OF LIABILITY

Neither party shall be liable to the other for any incidental, consequential, special or punitive damages, regardless of whether such damages arise under breach of contract, tort, strict liability, or other theory of law. Neither party's liability in connection with this Agreement, whether arising under breach of contract, tort, strict liability or other theory of law, will not exceed the amounts actually paid by Customer to Provider during the initial Term. All claims relating to Treated Water shall be made within sixty (60) days of the date upon which the Treated Water in question was delivered.

10 INDEMNIFICATION

Provider agrees to defend, indemnify and hold harmless Customer, it's successors and assigns, and their agents, servants, and employees from and against any and all claims, demands, damages, actions or causes of action at law or in equity, asserted by third parties for bodily injuries, death or physical property damage, to the extent caused by Provider's negligent acts or omissions or willful misconduct.

Customer agrees to defend, indemnify and hold harmless Provider, it's successors and assigns, and their agents, servants and employees from and against any and all claims, demands, damages, actions or causes of action at law or in equity, asserted by third parties for bodily injuries, death or physical property damage, to the extent caused by Customer's negligent acts or omissions or willful misconduct.

11 FORCE MAJEURE

Under no circumstances shall either party have any liability for any inability to perform hereunder as a result of floods, strikes or other labor disturbances, fires, accidents, wars, delays of carriers, inability to obtain raw materials, failure of normal sources of supply, restraints of government, or any other similar or dissimilar cause beyond Provider's reasonable control.

12 GOVERNING LAWIATTORNEYS FEES

This Agreement shall be governed by and construed in accordance with the laws of the state in which the Services contemplated hereby are to be performed. The parties irrevocably waive their right to a request trial by jury. If any action at law or in equity is necessary to enforce the terms of this Agreement, the prevailing party shall be entitled to reasonable attorney's fees, costs and necessary disbursements, in addition to any other relief to which such party may be entitled.

13 PARTIAL INVALIDITY

If any provision of this Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions shall nevertheless continue in full force without being impaired or invalidated in any way and the provision at issue shall be modified by the court to the extent necessary to be in compliance and match, as closely as possible, with the original intention. Notwithstanding the preceding sentence, if the modified provision is contrary to the original intention of the parties, Provider shall have the right to terminate this Agreement.

14 NO HIRES

Customer shall not solicit for employment any of Provider's employees during the term of this Agreement and for a period of twenty-four (24) months after the termination of this Agreement without the written consent of Provider.

15 NOTICES

Any notices to be given hereunder by either party to the other may be effected either by personal delivery in writing, overnight courier or by mail (registered or certified postage prepaid with return receipt requested). Mailed notices shall be addressed to the parties at the addresses first set forth in this Agreement, but each party may change its address by written notice in accordance with this Section. Notices delivered personally shall be deemed communicated as of actual receipt; all other notices shall be deemed communicated as of documented receipt.

16 GENERAL TERMS

This Agreement shall not be binding upon Provider until accepted by a duly authorized representative of Provider. The provisions of this Agreement constitute the entire Agreement between Provider and Customer relating to the matters covered by this Agreement and supersede any and all agreements, either oral or in writing between the parties hereto. No modifications or waivers of any provision herein shall be binding upon Provider unless set forth in writing and accepted by Provider. Each party to this Agreement acknowledges that no representations, inducements, promises, or agreements, orally or otherwise, have been made by any party or anyone acting on behalf of any party, which are not embodied herein.

17 ENTIRE AGREEMENT

The parties intend this Agreement, with the attached Exhibits, as a final expression of their agreement and a complete and exclusive statement of its terms. No course of previous dealings between the parties and no usage of trade shall be relevant or admissible to supplement, explain or vary any of its terms. No representations, understandings or agreements have been made or relied on in making this Agreement other than those expressly set forth. This Agreement may be modified only by a writing signed by the parties or their duly authorized agents.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by their duly authorized representatives as of the Effective Date. For purposes of this Agreement, signed facsimiles shall be considered the same as originally signed agreements.

Veolia Water Solutions & Technologies Bullitt Utilities, Inc.

EXHIBIT A

Proposal

Mobile Water
Actiflo Turbo Clarification Mobile Trailer
and Ancillary Equipment
For
Bullitt County, KY – Hunters Hollow
169 Octagon Ave.
Hunters Hollow, KY. 40229

Dated

May 12, 2014

Specifically for Equipment as follows:

Aquamove Actiflo™Turbo Trailer Equipment Rental One (1) Aquamove Actiflo™Turbo Trailer with: o One (1) Aquamove Actiflo™Turbo clarifler trailer rated for a nominal flow of 1,100 GPM and a peak flow of 1,500 GPM. o One (1) Dry polymer feed system

o Various instruments and controls as detailed elsewhere in this document or proposal o Rise rate 30-60 gpm/ft2 nominal o 480V/3pH/60Hz, 100 amp o Shipping weight 44,000 lbs. Operating weight 155,000 lbs.

Ancillary Support Equipment o

One (1) 1,250 GPM Dual Forwarding

Pump Skid rated @ 30 hp

o One (1) 30 cu.ft.3 Sludge Filter Press o One (1) 600 gallon, cone bottom, poly sludge settling tank o Two (2) 170 GPM air operated diaphragm transfer pumps

This agreement is for the specific equipment portal to portal, Veolia Water Solutions & Technologies, Vandalia, Ohio, USA. All fielght, taxes, clearances and logistical costs associated with transporting the equipment and its return is the responsibility of the Customer.

Notes

- 1Flow rates and pressure are as measured at the inlet connection of the Mobile.
- Temperatures of feed water of less than 40. F and / or in excess of 100. F may damage the Mobiles and requires specific written approval by Provider before delivery by Customer to the Mobiles.
- · Turbidity (ntu) based on chemical jar tests, flow rate, and total suspended solids loading
- The temporary, mobile trailer and ancillary equipment requires a flat, secure surface

EXHIBIT A

Note* No water analysis was provided in order to project effluent quality, sludge generation volumes, and the projected consumption of HYDREX waste water treatment chemistries.

EXHIBIT B

Field Service Policy (Optional Service Contract)

The current straight time service rate for a Veolia Water Solutions & Technologies Field Representative is \$60,00/hr for an eight hour shift, five days per week. The rate becomes \$90.00/hr for time and one half on Saturdays, and \$120,00/hr for double time on Sunday's and holiday's. In addition, if a field engineer/supervisor is required for oversight, system engineering, consulting, etc... that rate is \$1,600 per day + expenses @ 15% mark up. This rate applies to Veolia Water Solutions & Technologies management and engineering personnel.

The straight time rate applies to work performed for a standard 8-hour work day between the hours of 7 AM and 4 PM local time and during a normal work week. Work performed in excess of 8 hours shall be billed hourly at 1.5 times the straight time rate. Work performed on a Saturday shall be billed at 1.5 times the straight daily rate. Work performed on a Sunday or a Veolia Water Solutions & Technologies designated holiday shall be billed at 2 times the straight daily rate. Performance of overtime work shall be at the sole discretion of Veolia Water Solutions & Technologies and the Field Representative.

The above rates are daily rates, with the exception of the overtime hourly rate for normal work days, and are not subject to pro-rating, and includes up to a maximum of 10 hours per day for days worked between Monday and Saturday. In the event that Veolia Water Solutions & Technologies chooses to remove an employee from the jobsite prior to working 8 hours in a day, Veolia Water Solutions & Technologies will charge an hourly rate for that day. If through no fault of Veolia Water Solutions & Technologies, the customer removes the Veolia Water Solutions & Technologies employee from the jobsite prior to working 8 hours in a day; a full daily rate will be charged.

The Field Service Representative will submit daily time sheets for approval by the Customer. The Customer approved time sheets will be submitted with invoices and will be final and approved for payment.

The rates quoted are current as of the date of this proposal and are subject to change without notice. Except in cases where Field Services have been quoted in this proposal, all Field Services provided will be invoiced at the rates in affect when the services are performed.

The customer is billed for all travel and living expenses at cost plus 15%. In addition, the customer is billed for travel time at the straight time service rate; however, travel time excesses due to airline delays, etc will not be charged to the customer (maximum of 10 hours per day).

Where a set amount of time for field service has been quoted in the proposal, the quoted price includes the service time, travel time, travel and living expenses. If additional time beyond the quoted amount of time is required due to no fault or delay by Veolia Water Solutions & Technologies then the customer shall be billed for the additional service time, travel, and living expenses.

All equipment must be completely installed in accordance with the written instructions to be provided by Veolia Water Solutions & Technologies and ready for start up and commissioning prior to the scheduled arrival of the Field Representative. If upon arrival, the Field Representative determines that the equipment is not ready for start up and commissioning, then the customer will be billed for the on-site time, travel time, travel and living expenses and the service work will have to be rescheduled through the Start Up/Commissioning Service Manager.

The Field Representative will be equipped with their own hard hat, safety glasses, and safety shoes/boots. Any additional safety equipment required for work on site shall be provided by the customer to the Field Representative at no charge. Mandatory, site specific safety training of the Field Representative shall be billed to the customer at the straight time service rate. The Field Representative has the right to refuse to work under any conditions or in any environment that the Field Representative deems to be unsafe The Field Representative will be supplied with their own standard hand tools. Heavy machinery, where required, is to be provided by the customer at no charge.

Veolia Water Solutions & Technologies is a non-union company and its field personnel will be non-union. These personnel must be allowed to perform minor, incidental tasks that would otherwise be performed by trades (electrician, millwrights, pipe fitters, etc.). Delays due to strict adherence to union work rules on site, beyond the set amount of time guoted, where applicable, may result in a price adjustment.

EXHIBIT C

SERVICE EXCLUSIONS

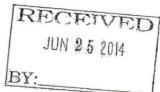

- 1. Utilization of union labor subject to prevailing wage determinations.
- 2. Soil borings, or other environmental sampling, for geotechnical evaluation.
- 3. Installation and equipment design beyond Seismic-0/1 zone standards.
- 4. Remote interface directly to Customer PLC, DCS or CAMM systems via hardwired contacts.
- 5. Painting and/or coating of any piping and conduit materials.
- All environmental and/or discharge-related applications, permits, surcharges, inspections, and associated fees.
- All building and/or installation-related applications, permits, surcharges, inspections, and associated fees.
- 8. Delays and/or incurred costs due to inclement weather.
- 9. Weekend or nationally recognized holiday work.
- 10. Off-site (outside Provider's battery limits) disposal of clearing grubbing spoil and surplus soils.
- 11. Development of temporary and/or permanent access roadways to and from Provider's battery limits.
- 12. Dewatering due to surface run-on and/or groundwater intrusion.
- 13. Hard excavation and/or blasting due to rock, boulders, or man-made obstructions.
- 14. Soil remediation (such as handling, testing, removal or disposal) due to hazardous waste and/or archaeological content.
- Supply and installation of synthetic liners and/or geo-textile materials under building structures and/or tanks.
- 16. Supply and installation of double-wall contained piping systems.
- 17. Supply of installation of permanent stand-by electrical power generator system(s).
- 18. Supply and erection of temporary or permanent building/awning components.
- 19. Coating of concrete surfaces, other than for application of curing compounds.
- 20. Finish painting and/or coating of primered building structural components.
- 21. Supply of spare parts to Customer.
- 22. Provisions for complying with ADA (Americans with Disability Act), as Provider's facility will not be open to the public.
- 23. Installation requiring cold-weather materials and methods.
- 24. Construction and/or operational delays due to design changes during the installation phase.
- 25. Operational delay due to equipment malfunctions/delays during start-up.

Note: Provider excludes all other items not specifically listed in "Provider Supplied" category.

SUBJECT: Hunters Hollow Sewers

Pump Station & Flow Monitoring Engineering Design

Bullitt County, Kentucky

Dear Rob:

After discussions with the Bullitt County Sanitation District (BCSD), and a review of the options for diversion of sanitary flow from the existing Hunters Hollow Treatment Facility to the BCSD system we have provided the following proposal for triplex pump station design and approval.

Please note this proposal is provided based on our previous discussions, as well as the following points being noted:

- Existing flow will be diverted both to the Union Tool Treatment Facility (BCSD) as well as the Pioneer Village Treatment Facility (BCSD)
- We will work directly with BCSD to determine static and dynamic head conditions for the pump station design utilizing an existing 4" force main, and a proposed 4" force main for the project.
- BCSD has indicated that we will not be responsible for designing or negotiating new easements for the force main alignments to these facilities

DETAILED SURVEY & SITE DESIGN:

\$ 2,800.00

Our team will provide a detailed survey and site design layout of exiting influent sewers and inverts, existing pump station and wet well information along with topography, access road and existing elevations to design with for the new pump station. Site layout will include extension of the existing access road to the new pump station site with turn-around.

PUMP STATION DESIGN FOR TRIPLEX STATION:

\$17,500.00

Our team will provide pump station design for the triplex station including:

- Concrete wet well sizing
- Extended wet well sizing for Inflow & Infiltration storage
- Flow monitoring design / sizing
- Bioxide tank/feeder sizing (if required)
- Variable speed pumps selection & design
- Alarm and float settings
- Emergency storage and invert elevations
- Concrete valve vault design, valve selection/switching for alternate force mains
- Electrical system controls

PUMPING MODELING AND SYSTEM HEAD DESIGN:

\$2,500.00

Our team will provide pump system modeling and system head condition design for force main alignments provided by BCSD to coordinate pumping conditions, timing, and alternating force main design.

STRUCTURAL ENGINEERING FOR WETWELL, SLABS, VAULTS:

\$7,000.00

Our team will provide detailed structural design for:

- · Wetwell including bottom slab, uplift conditions, top slab, & pump lifting chains/rails
- Valve vault including slabs
- Reinforcement details and schedules
- Concrete and steel specifications

PROJECT ADMINISTRATION & MANAGEMENT:

\$2,500.00

- File applications with Kentucky Division of Water as needed
- Coordination & Meetings with Bullitt County Sanitation District
- Coordination & Meetings with attorney/owner
- Submission to utility companies
- Coordination as required with geotechnical engineer (if required)

BIDDING/CONSTRUCTION INSPECTIONS:

\$3,350,00

- Provide bid specification package
- Answer RFI's from contractors
- Provide O&M information for pump station
- Review shop drawing submittals
- Provide bi-weekly site inspection for construction progress
- Coordinate pump station start-up and testing with BCSD/operator

EXCLUSIONS TO SCOPE OF WORK:

- Engineering design and/or testing during construction
- Construction staking
- · Agency review impact or record fees, bonds or permits
- I&I Basin storage basin design beyond additional wetwell
- Geotechnical report, investigation or issues
- Environmental Survey or environmental issues
- Any item not specifically outlined above

Services excluded from this scope of work can be provided on an "as needed" basis. The fee(s) for these services would be based upon the time expended to complete the work specifically requested by your office, and our **hourly rate schedule**.

Based on our experience and present understanding of the project requirements, Blue Stone Engineers proposes a fee in the amount of \$35,650.00 to perform the above mentioned engineering and surveying services.

We can begin the project immediately by sending our surveyor to the site to begin gathering detailed data for the influent sewers and existing pump station. We would expect to have the pump station design completed within two weeks from date of "notice to proceed", for BCSD review and submittal to KDOW for approval. You can reach me on my cell phone at 292-9288 to help answer any questions.

Sincerely,

Christopher T. Crumpton, P.E. Engineering Director/Principal

CTC/mlr

AGREEMENT BETWEEN BULLITT COUNTY SANITATION DISTRICT AND BULLITT UTILITIES, INC.

DATED 10/01/14

Come Bullitt County Sanitation District ("BCSD") and Bullitt Utilities, inc. ("Bullitt Utilities"), on this the ____day of October, 2014 and hereby enter into this Agreement.

WHEREAS, Bullitt Utilities is a privately owned wastewater utility that owns the Hunters Hollow wastewater treatment plant ("WWTP") and collection system located in Bullitt County, Kentucky. The Hunters Hollow WWTP was a 250,000 gallon per day ("gpd") WWTP providing service for approximately 696 residential and commercial customers at a residential rate of \$26.83 per month. On or about March 29, 2014, the Hunters Hollow WWTP suffered a catastrophic failure.

WHEREAS, Builitt Utilities has provided treatment for the wastewater generated by the Hunters Hollow collection system ("Collection System") since March 29, 2014 through the use of a Pecco temporary WWTP and a Veolia temporary WWTP. The cost to operate these temporary WWTPs is exorbitant, and a short term and long term solution to the failure of the Hunter's Hollow WWTP is needed in order to provide treatment for the wastewater generated by the Collection System

WHEREAS, in order to avoid an environmental emergency, BCSD is willing to provide short term emergency treatment for the wastewater generated by the Collection System until a permanent solution to the fallure of the Hunter's Hollow WWTP can be implemented which is expected to be on or before December 31, 2016.

NOW THEREFORE, in consideration of the premises set forth herein, BCSD and Buillitt Utilities hereby agree to the following terms:

- BCSD agrees to make any and all reasonable efforts to accept the wastewater flow from the
 Collection System within sixty (60) days of the execution of this Agreement. BCSD shall not be
 responsible for failure to complete the construction of the proposed facilities due to state or
 federal permitting requirements (Division of Water, Department of Transportation, etc.),
 acquisition of easements or any other delay due to causes beyond the control of BCSD.
- BCSD agrees to provide treatment for the wastewater generated by the Collection System until December 31, 2016.
- 3. Builitt Utilities will purchase and install two (2) magnetic flow meters, and BCSD shall maintain the two (2) flow meters. One meter will be provided for the Collection System's flow diverted to Union Fool (divided between Plant Three and Willabrook), and the second meter will be provided for the Collection System's flow diverted to Pioneer Village.
- 4. BCSD shall make every reasonable attempt to accept from the Collection System an average daily flow of 160,000 gallons with a maximum peak daily flow of up to 300,000 gallons. The amount of maximum peak day flow accepted shall be dependent upon performance of BCSD

- treatment facilities. BCSD shall have all authority to make adjustments to the pump rates from the Collection System.
- 5. Any overflows from the Collection System caused by flows in excess of those stated in paragraph 4 above, shall be reported to the Kentucky Division of Water by Bullitt Utilities, and shall be the responsibility of Bullitt Utilities until the Collection System is conveyed to BCSD or another entity.
- 6. BCSD shall only be responsible for the portion of the pipeline from the flow meters installed by Bullitt Utilities to the BCSD's treatment plants.
- Bullitt Utilities shall be responsible for maintaining the Hunters Hollow Collection System and for the operation and maintenance of the pumps at the site of the former Hunters Hollow WWTP.
- 8. Bullitt Utilities agrees to pay BCSD for treatment of wastewater from the Collection System an amount equal to eighty percent (80%) of the gross revenue, excluding surcharge receipts, received by Bullitt Utilities from its customers per month. Bullitt Utilities shall request the Louisville Water Company to, if possible, pay this eighty percent of monthly gross revenue, excluding surcharge receipts, directly to BCSD.
- 9: BCSD shall engineer the pipeline from BCSD's existing facilities up to the two (2) new flow meters for the Hunters Hollow Collection System and shall engineer upgrades required at BCSD pump stations to accept the increased flows from the Collection System. Bullitt Utilities shall engineer the two (2) new flow meters, and the pumping and piping systems from its existing facilities to said flow meters. BCSD shall have review authority of Bullitt Utilities' pumping system engineering design to the two (2) new flow metering points, including the flow meters, to assure that flow rates can be controlled during peak day flow events. Bullitt Utilities' pumps shall have variable rate adjustment for controlling flow rates.
- 10. BCSD shall require a contribution in aid of construction in the amount of \$125,000.00. The \$125,000 is to be paid directly to BCSD upon execution of this Agreement.
- 11. Due to the unusual situation that this customer connection is for short term emergency treatment only, the tap fee required by BCSD Resolution Number 2012-08 will be waived for connection of Bullitt Utilities to BCSD in exchange for the engineering and construction contribution provided by Bullitt Utilities.
- 12. Bullitt Utilities agrees to pledge as security for fulfilling its duties under this agreement, until December 31, 2016, its interest in any surcharge proceeds that the Public Service Commission ("PSC") may authorize; that exceeds the surcharge proceeds authorized to pay for services and/or equipment provided by Veolia, Pecco and other individuals or entities to Bullitt Utilities to respond to the failure of the Hunters Hollow WWTP.
- BCSD and Bullitt Utilities agree to work to develop a long term solution to the failure of the Hunters Hollow WWTP.
- 14. At any time during the term of this agreement, BCSD may purchase from Bullitt Utilities the Hunters Hollow Collection System, including its piping, manholes, pump stations, pumps and appurtenances for the amount of One Dollar (\$1 00), contingent upon and subject to, the PSC's authorization of the payment of a surcharge to Bullitt Utilities and the surcharge proceeds will continue to be paid to Bullitt Utilities or its assignee(s) after the sale of the Collection System. Should the PSC authorize the payment of a surcharge to Bullitt Utilities, but not the right to

continue to receive the surcharge proceeds after Bullitt Utilities' sale of the Collection System, the BCSD shall have the right to purchase the Collection System for the amount of One Dollar (\$1.00) upon the expiration of the surcharge.

15. General provisions

- 15.1 Successors and Assigns. No party shall assign, sublet or transfer its interest in this Agreement without the prior written consent of the other parties. Nothing herein shall be construed as creating any personal liability on the part of any officer or agent of any public or private body which may be a party thereto, nor shall it be construed as giving any rights or benefits hereunder to anyone other than the parties to the Agreement.
- 15.2 Mediation Claims, disputes or other matter in question between the parties to this Agreement shall be first subject to pre-suit mediation prior to the filling of any legal claims or litigation. Pre-suit mediation prior to the filling of any legal claims or litigation. Pre-suit mediation is a condition precedent to litigation. The obligation to mediate is a material and essential provision of this Agreement. Unless otherwise agreed to in writing, the parties shall continue to provide and/or make the treatment, work and payments to be performed pursuant to this Agreement during any mediation or litigation, except for payments for items or work in dispute. Either party may initiate a mediation proceeding by submitting a request in writing to the other party within a reasonable time after the claim, dispute or other matter in question has arisen, but in no event after the applicable statute of limitations has expired. The parties shall endeavor in good faith to mutually agree upon an acceptable mediator. Each party is to bear its own fees, costs and expenses of said mediation. In the event that mediation is unsuccessful, all claims, disputes, or other matters in question shall be resolved in the Circuit or District Courts of Bullitt County, Kentucky and shall be governed by the laws of the Commonwealth of Kentucky.
- 15.3 This Agreement may be executed in two or more original or facsimile counterparts, each of which shall be deemed an original and all of which shall constitute but one and the same Agreement.
- 15.4 Construction. Should any provision of this Agreement require interpretation or construction, it is agreed by the parties hereto that the Court, administrative body or other entity interpreting or construing this Agreement shall not apply the presumption that the provisions hereof shall be more strictly construed against one party than another by reason of the rule of construction that a document is to be more strictly construed against the party who itself or through its agent prepared the same. The headings of sections and subsections are for convenience only and shall not affect or control the meaning or construction of any of the provisions of this Agreement.
- 15 5 Notices. All notices, requests, demands, or other communications required under this Agreement shall be made in writing and shall be served by hand delivery or by placing such in the United States Mail, certified mail, return receipt requested and bearing adequate postage or by overnight mail. Each notice shall be effective upon receipt.
- 15.6 Waiver No waiver by any party of any default or non-performance by either party shall be considered a waiver of any subsequent default or non-performance.

- 15.7 Severability. In the event that any term, provision or covenant hereunder shall be held invalid or unenforceable by a court of competent jurisdiction, the remainder of this Agreement shall remain valid and enforceable by any party to the Agreement and the invalid unenforceable covenant shall automatically be deemed, modified and amended to provide the maximum rights available under applicable law to the party who is the beneficiary of the term, provision, or covenant in question.
- 15.8 Authority of Parties. The individuals who have executed this Agreement on behalf of the respective parties expressly represent and warrant that they are authorized to sign on behalf of such entities for the purpose of duly binding such entities to this Agreement.
- 15.9 IN THE EVENT THAT EITHER THE BCSD AND/OR BULLITT UTILITIES IS UNABLE TO NEGOTIATE AN AGREED ORDER WITH THE ENERGY AND ENVIRONMENT CABINET THAT IS NOT ACCEPTABLE TO THE PARTY TO THE AGREED ORDER, THIS AGREEMENT SHALL BECOME NULL AND VOID AND UNENFORCEABLE.
- 15.10 Entire Agreement This Agreement sets forth the entire Agreement between the parties hereto and, except as otherwise excressly provided, fully replaces, cancels and supersedes any and all prior Agreements or understandings between the parties hereto pursuant to the subject matter hereof.

IN WITNESS WHEREOF, the parties hereto have executed	this Agreement the day and
year first above written.

ENERGY AND ENVIRONMENT CABINET

PLAINTIFF

VS.

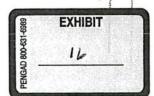

AGREED ORDER

BULLITT UTILITIES, INC.

DEFENDANT

WHEREAS, the parties to this Agreed Order, the Energy and Environment Cabinet ("Cabinet") and Bullitt Utilities, Inc. ("BUP"), state:

- The Cabinet is charged with the statutory duty of protecting human health and the
 environment by enforcing KRS Chapter 224 and the regulations promulgated pursuant thereto.
- 2. BUI is a Kentucky for-profit corporation, in good standing, that owns a sewage system, as defined in KRS 224.01-010(25), that included a residential wastewater treatment plant and collection lines located on Blue Lick Road, Hunters Hollow, Kentucky, Hunters Hollow Subdivision ("Hunters Hollow WWTP"), providing sewer service to the residents of the cities of Hunters Hollow and Hillview in Bullitt County, Kentucky.
- 3. BUI holds Kentucky Pollutant Discharge Elimination System ("KPDES") permit No. KY0038610 issued by the Cabinet's Division of Water ("DOW") which became effective on December 1, 2008. A permit renewal application was submitted in a timely manner to DOW on September 13, 2013.
- 4. The Hunters Hollow WWTP is designed to treat up to 0.250 million gallons per day of sanitary sewage before discharging the treated effluent to an unnamed tributary of Brooks Run from the Hunters Hollow WWTP.

- 5. BUI estimates the dry weather wastewater flow at the Hunters Hollow WWTP to be 160,000 gallons per day ("Dry Weather Flow"). Due to inflow and infiltration ("I&F") issues with the Hunters Hollow WWTP collection system, the wet weather wastewater flow at the Hunters Hollow WWTP increased significantly ("Wet Weather Flow"). The Wet Weather Flow can exceed the Hunters Hollow WWTP's treatment capacity and lead to bypasses of the treatment process during rain eyents.
- 6. From April 16, 2009, until October 25, 2013, Cabinet personnel inspected the Hunters Hollow WWTP and reviewed required discharge monitoring reports multiple times which resulted in the Cabinet issuing Notices of Violation ("NOVs") on April 16, 2009; January 25, 2010; September 17, 2010; March 24, 2011; December 12, 2011; February 21, 2012; July 24, 2012; July 2, 2013; and November 12, 2013, citing violations of the following regulations;
 - a. 401 KAR 5:005 Section 11 Failure to provide for proper disinfection.
 - b. 401 KAR 5:015 Section 2 Failure to report a spill. (8 Counts)
 - c. 401 KAR 5:065 Section 1(5) Failure to provide proper operation and maintenance (O&M)
 - d. 401 KAR 5:065 Section 2(1) Failure to report a spill. (13 Counts)
 - e. 401 KAR 10:031 Section 2 Degradation of the waters of the Commonwealth. (9 Counts)
 - f. KRS 224.70-110- Discharging a pollutant into the waters of the Commonwealth.
 (7 Counts)
- 7. On March 29, 2014, the Hunters Hollow WWTP suffered a catastrophic tank failure and discharged more than 250,000 gallons of untreated and undertreated wastewater into the receiving stream.

- 8. The discharge of untreated wastewater continued unabated until April 2, 2014, when BUI established an initial temporary treatment system referred to as the "Pecco WWTP". The initial temporary treatment system had capacity to provide treatment of the Dry Weather Flow, but could not abate the bypasses caused by the Wet Weather Flow.
- 9. On or about July 17, 2014, BUI established a second temporary treatment system referred to as the "Veolia WWTP", capable of treating the Dry Weather Flow and abating the bypasses caused by the Wet Weather Flow.
- 10. Since March 29, 2014, Cabinet personnel have conducted multiple inspections of the Hunters Hollow WWTP site and reviewed required discharge monitoring reports which resulted in the Cabinet issuing NOVs on April 2, 2014; May 16, 2014; June 19, 2014; and August 18, 2014, citing violations of the following regulations;
 - a. 401 KAR 10:031 Section 2 Degradation of the waters of the Commonwealth. (3
 Counts)
 - KRS 224.70-110 Discharging a pollutant into the waters of the Commonwealth.
 (11 Counts)
 - c. 401 KAR 5:065 Section 2(1) Failure to report a spill. (3 Counts)
 - d. 401 KAR 5:005 Section 11 Failure to provide for proper disinfection. (2
 Counts)
 - e. 401 KAR 5:045 Section 1 Failure to provide for secondary treatment.
 - f. 401 KAR 5:065 Section 2 Failure to comply with the terms of the KPDES Permit.
- 11. The current cash receipts generated by the Public Service Commission authorized rate associated with BUI's operation of the Hunters Hollow WWTP are insufficient to operate

and maintain the Veolia WWTP for an extended period of time.

12. BUI does not admit the alleged violations described herein, but agrees to the entry of this Agreed Order to fully and finally resolve the violations alleged, as well as any other violations that occurred prior to the date of the entry of this Agreed Order.

NOW THEREFORE, in the interest of fully and finally settling all claims and controversies involving the alleged violations described above, the parties hereby consent to the entry of this Agreed Order and agree as follows:

REMEDIAL MEASURES

- 13. At all times, BUI shall report to the Cabinet all spills, bypass discharges, upset condition discharges and other releases of substances from its WWTP and sewer collection system which would result in or contribute to the pollution of the waters of the Commonwealth, including emergency and accidental releases, in accordance with KRS 224.1-400, and 401 KAR Chapter 5. BUI shall make its initial report of the above discharges or releases by telephone to the Louisville Regional Office at 502-429-7122, or the Cabinet's 24-hour notification number, 800-928-2380 or 502-564-2380.
- 14. BUI shall immediately perform any necessary remedial actions upon discovery of a spill, discharge, bypass or upset condition.
- 15. While BUI owns the Hunters Hollow collection system, defined herein as the system of pipes, pumps, pump stations, manholes, the wet-well, flow meters and other appurtenances owned by BUI and which are used to serve the customers of the Hunters Hollow WWTP, BUI shall provide for regular operation and maintenance of the Hunters Hollow collection system including any structures which should be added to prevent solids and floatables from entering into the unnamed tributary of the Brooks Run. BUI shall also provide for the

operation and maintenance of the Veolia temporary WWTP while it is on site and prior to any connection of the Hunters Hollow collection system to the Bullitt County Sanitary District ("BCSD") sewer system.

- Hollow collection system, and, beginning January 1, 2015, BUI shall spend no less than \$30,000 per year to address this I&I until it conveys the Hunters Hollow collection system to another entity, or until the Cabinet concurs in writing that I&I into the Hunters Hollow collection system has been substantially corrected. Corrective steps shall minimally include the following:
 - a) On or before December 1, 2014, BUI shall submit to the Cabinet's Division of Enforcement (DENF) for review and acceptance the report of the I&I Study of the Hunters Hollow WWTP collection system previously completed by BUI's contract engineer;
 - b) On or before March 1, 2015, BUI shall submit to the DENF for review and acceptance, a written Corrective Action Plan (CAP) with a schedule of implementation. The CAP shall identify specific actions BUI will implement to address I&I into the Hunters Hollow WWTP collection system.
 - c) Upon reviewing the CAP submitted by BUI, DENF may, in whole or in part, (1) approve, (2) disapprove or (3) provide comments to BUI identifying any deficiencies in the CAP.
 - Upon written notification by DENF that the CAP is accepted, BUI shall immediately begin implementing the CAP.
 - ii) Upon written notification by DENF that the CAP is deficient, BUI shall have thirty (30) days from the date of written notification to submit an amended

CAP addressing DENF's comments. If any part of the CAP is disapproved after it has been submitted a second time, the Cabinet may, in its reasonable discretion, deem BUI to be out of compliance with the Agreed Order for failure to timely submit a CAP and may assess stipulated penalties pursuant to this Agreed Order.

- iii) If BUI receives no response from DENF within sixty (60) days of DENF's receipt of a CAP, such CAP shall be deemed approved effective upon the expiration of that sixty (60) day period.
- d) Beginning January 15, 2015, BUI shall submit quarterly progress reports for compliance with the Agreed Order by the fifteenth (15th) day of the first month following each quarter to DENF and the DOW Frankfort Regional Office;
- 17. Unless otherwise stated by a specific paragraph, all correspondence, documents, notices, and/or requests required to be sent or submitted to the Cabinet by this Agreed Order shall be sent to the Director, Division of Enforcement, 300 Fair Oaks Lane, Frankfort, KY 40601.

PENALTIES AND COST RECOVERY

- 18. BUI shall be liable for civil penalties in the amount of thirty thousand dollars (\$30,000) for the violations described in paragraph six (6) above. Payment shall be due fifteen (15) days after this Agreed Order is entered by the Secretary or his designee, unless BUI provides DENF written notice of its intent to implement a Supplemental Environmental Project as outlined in paragraph twenty-five (25) below.
- 19. BUI shall be liable for civil penalties in the amount of one hundred twenty-five thousand dollars (\$125,000) for the violations described in paragraph ten (10) above. Payment shall be due ninety (90) days after this Agreed Order is entered by the Secretary or his designee.

- 20. As of October 1, 2014, the Cabinet has expended thirteen thousand six hundred six dollars and fifteen cents (\$13,606.15) in oversight and response costs related to the environmental emergency following the failure of the Hunters Hollow WWTP. BUI shall reimburse the Cabinet for the full amount of the response costs as stated herein. Payment shall be due on the fifteenth (15th) day of the month after this Agreed Order is entered by the Secretary or his designee.
- 21. The Cabinet may assess against BUI a stipulated penalty of five hundred dollars (\$500) for each failure to comply with the remedial measures contained in paragraphs thirteen (13) through seventeen (17) above. The stipulated penalty shall be due and payable in full within thirty (30) days of the Cabinet issuing written notice demanding stipulated penalty. This penalty is in addition to, and not in lieu of, any other penalty that could be assessed as specifically stated in this Agreed Order.
- 22. Notwithstanding the language of paragraph twenty-one (21) above, a stipulated penalty of one hundred dollars (\$100) may be assessed for each violation of BUI's KPDES permit and each bypass, spill, discharge bypass discharge, upset condition discharge and other releases of substances originating from BUI's collection system, as "collection system" is defined in paragraph fifteen (15) of this Agreed Order, including any bypasses occurring at the former Hunters Hollow WWTP site, which results in or contributes to the pollution of the waters of the Commonwealth. This penalty is in addition to, and not in lieu of, any other penalty that could be assessed as specifically stated in this Agreed Order.
- 23. If BUI believes the demand for payment of a stipulated penalty is erroneous or contrary to law, BUI may request a hearing in accordance with KRS 224.10-420(2). The request for hearing does not excuse timely payment of the stipulated penalty. If an order is entered

pursuant to KRS 224.10-440 that excuses payment, the Cabinet will refund the payment. Failure to make timely payment shall constitute an additional violation.

24. Payment of civil penalty and stipulated penalties shall be by cashiers check, certified check, or money order, made payable to "Kentucky State Treasurer" and sent to the attention of Accounts Payable, Office of Administrative Hearings, Energy and Environment Cabinet, 35-36 Fountain Place, Frankfort, Kentucky 40601. Please note "Case No. DOW - 34022" on all instruments of payment.

SUPPLEMENTAL ENVIRONMENTAL PROJECTS

- 25. In lieu of payment of the civil penalties set forth in paragraph eighteen (18) BUI shall allocate thirty thousand dollars (\$30,000) toward the performance of a Supplemental Environmental Project ("SEP") as set forth below:
 - a) BUI shall fully implement the SEP within twelve (12) months of the Secretary executing this Agreed Order.
 - b) BUI shall develop and implement a CAP to eliminate sources of I&I within the customers' portions of the sewer lines that connect to the Hunters Hollow WWTP collection system as determined through smoke testing, dye testing, television or visual inspection;
 - c) Items scheduled for repair and/or replacement can include, but need not be limited to, defective lateral lines, illegal downspout connections, clean out traps, and illegal sump pumps; and
 - d) BUI shall notify the DOW Louisville Regional Office prior to initiating any remediation of a private source of I&I.

BUI may satisfy its obligations under this SEP by entering into an agreement with an appropriate

local government or agency requiring it to comply with the requirements of this paragraph twenty-five (25). The Cabinet shall have the right to review and accept any such agreement to perform the SEP set forth by this paragraph.

- 26. In the event that BUI fails to complete the SEP as described in paragraph twenty-five (25) above, BUI shall pay in full the civil penalties described or assessed in paragraph eighteen (18) within fifteen (15) days of written notice from the Cabinet. Payment shall be made as described in paragraph twenty-four (24) above.
- 27. In lieu of payment of the civil penalties set forth in paragraph nineteen (19) above, BUI shall perform the following SEP. No later than sixty (60) days after the date the Secretary executes this Agreed Order, BUI shall connect its collection system to the BCSD sanitary sewer system to divert the Dry Weather Flow and as much of the Wet Weather Flow as possible, under terms of an agreement negotiated between BCSD and BUI generally in the form of Attachment "A" to this Agreed Order, and disconnect the Pecco WWTP and the Veolia WWTP. BUI shall minimally comply with the provisions set forth in said Agreement, which include but are not limited to the payment of \$125,000 to BCSD and the payment of the cost to design and construct that part of the pipeline connecting the Hunters Hollow WWTP collection system to the BCSD sanitary sewer system, which part consists of the pumps, pipeline and two (2) flow meters from the Hunters Hollow WWTP site to the location where the flow meters are reasonably installed as agreed to by BUI and BCSD.
- 28. In the event that BUI fails to complete the SEP as described in paragraph twenty-seven (27) above, BUI shall pay in full the civil penalties described or assessed in paragraph nineteen (19) above within fifteen (15) days of written notice from the Cabinet. Payment shall be made as described in paragraph twenty-four (24) above.

MISCELLANEOUS PROVISIONS

- Order. Except as otherwise provided herein, nothing contained in this Agreed Order shall be construed to waive or limit any remedy or cause of action by the Cabinet based on statutes or regulations under its jurisdiction, and the Defendant reserves its defenses thereto. The Cabinet expressly reserves its right at any time to issue administrative orders and to take any other action it deems necessary, that is consistent with this Agreed Order. However, provided that the Defendant complies with all provisions of this Agreed Order, including but not limited to paying all response costs, performing all required remedial actions, paying all civil penalties or completing any SEPs, the Cabinet shall release the Defendant, and its successors and assigns, predecessors, parent companies, officers, agents, representatives and shareholders from any claims arising under KRS 224.70 and 401 KAR Chapters 5, 10, and 11or out of the matters addressed in paragraphs one (1) through twelve (12) of the Agreed Order herein, up to and through and including the effective date of this Agreed Order.
- 30. This Agreed Order shall not prevent the Cabinet from issuing, reissuing, renewing, modifying, revoking, suspending, denying, terminating, or reopening any permit to BUI. BUI reserves its rights and defenses thereto, except that BUI shall not use this Agreed Order as a defense.
- 31. BUI waives its right to any hearing on the matters admitted herein. However, failure by BUI to comply strictly with any or all of the terms of this Agreed Order shall be grounds for the Cabinet to seek enforcement of this Agreed Order in Franklin Circuit Court and to pursue any other appropriate administrative or judicial action under KRS Chapter 224, and the regulations promulgated pursuant thereto.

- 32. The Agreed Order may not be amended except by a written order of the Cabinet's Secretary or his designee. BUI may request an amendment by writing the Director of the Division of Enforcement at 300 Fair Oaks Lane, Frankfort, Kentucky 40601 and stating the reasons for the request. If granted, the amended Agreed Order shall not affect any provision of this Agreed Order unless expressly provided in the amended Agreed Order.
- 33. The Cabinet does not, by its consent to the entry of this Agreed Order, warrant or aver in any manner that BUI's complete compliance with this Agreed Order will result in compliance with the provisions of KRS Chapter 224, and the regulations promulgated pursuant thereto. Notwithstanding the Cabinet's review and approval of any plans formulated pursuant to this Agreed Order, BUI shall remain responsible for compliance with the terms of KRS Chapter 224 and the regulations promulgated pursuant thereto, this Agreed Order and any permit and compliance schedule requirements.
- 34. The Cabinet agrees to allow the performance of the above-listed remedial measures, above listed SEPs and/or payment of civil penalties by BUI to satisfy its obligations to the Cabinet generated by the violations described above.
- 35. The Cabinet and BUI agree that the remedial measures agreed to herein are facility specific and designed to comply with the statutes and regulations cited herein. This Agreed Order applies specifically and exclusively to the unique facility referenced herein and is inapplicable to any other site or facility owned and/or operated by BUI.
- 36. BUI shall give notice of this Agreed Order to any purchaser, lessee or successor in interest prior to the transfer of ownership and/or operation of any part of its now-existing facility occurring prior to termination of this Agreed Order, shall notify the Cabinet that such notice has been given, and shall follow all statutory and regulatory requirements for a transfer. Whether or

not a transfer takes place, BUI shall remain fully responsible for completing any SEP, payment of any stipulated penalties and for performance of all remedial measures identified in this Agreed Order.

- 37. Compliance with this Agreed Order is not conditional on the receipt of any federal, state, or local funds, or upon the approval of rate increases or surcharges by local or state boards, commissions, or other agencies that regulate private utilities.
- 38. This Agreed Order shall be of no force and effect unless and until it is entered by the Secretary or his designee as evidenced by his signature thereon. If this Agreed Order contains any date by which BUI is to take any action or cease any activity, and the Secretary enters the Agreed Order after that date, then BUI is nonetheless obligated to have taken the action or ceased the activity by the date contained in this Agreed Order.

TERMINATION

39. This Agreed Order shall terminate upon BUI's completion of all requirements described in this Agreed Order. BUI may submit written notice to the Cabinet when they believe all requirements have been performed. The Cabinet will notify BUI in writing of whether it intends to agree with or object to termination. The Cabinet reserves its right to enforce this Agreed Order, and BUI reserves its right to file a petition for hearing pursuant to KRS 224.10-420(2) contesting the Cabinet's determination.

Mr. Chris Cogan, AS POWER OF ANDRUEY
Bullitt Utilities, Inc. FOR CARLOU F. COGAN

ITS PRESIDENT

JUPLICATE OF No. 7

LEGAL NOTICE

Bullitt Utilities, Inc., ("Bullitt Utilities") has filed with the Public Service Commission ("PSC") to establish a surcharge in the amount of \$32.19 to recover the extraordinary emergency costs incurred from the failure of the Hunters Hollow Wastewater Treatment Plant on March 29, 2014. The proposed charges shown below have a proposed effective date of February 1, 2015.

Charge for Sewer Service:	Existing Rate	Proposed Surcharge	Combined Rate and Surcharge	\$ Change in Rate	% Change in Rate
Monthly Rate	\$26.83	\$32.19	\$59.02	\$32.19	120.0%

Any person may examine this filing at the office of the Agent for Service of Process of Bullitt Utilities located at Hazelrigg & Cox, LLP, 415 West Main Street, Frankfort, Kentucky 40601; telephone (502) 227-2271.

Any person may also examine this filing at the PSC located at 211 Sower Boulevard, Frankfort, Kentucky, Monday - Friday, 8:00 am - 4:30 pm or on the PSC website at http://psc.ky.gov; telephone (502) 564-3940.

Any person may submit comments regarding this filing by mail to the Public Service Commission, Post Office Box 615, Frankfort, KY 40602; or through its website at http://psc.ky.gov.

The rates contained in this notice are the rates proposed by the Bullitt Utilities but the PSC may order rates to be charged that differ from the proposed rates contained in this notice.

Any person may submit a timely written request for intervention by mail to the Public Service Commission, Post Office Box 615, Frankfort, KY 40602. The request for intervention must establish the grounds for the request including the status and interest of the party.

If the PSC does not receive a written request for intervention within thirty (30) days of the initial publication or mailing of notice, the PSC may take final action on the tariff filing.

RUN TIME 13:53:14

THE UNDERSIGNED, ("Maker") as of the 21st day of April, 2014 promises to pay to the order of CFA Sunnyview, LLC, a Kentucky Limited Liability Company, (the "Holder"), whose principal address is: P.O. Box 91588, Louisville, KY 40291, the principal sum of Thirty Two Thousand Dollars (\$32,000.00) together with interest according to the following terms and conditions:

- a.) The Interest shall be a fixed rate of Sixteen percent (16%) per annum
- b.) Interest on this note, as established above, shall be paid in arrears in one balloon payment together with principal. The balloon payment shall be paid at or before the Closing (the "Maturity Date") of the sale of the Wastewater Treatment Plant and sewer collection system known as Hunters Hollow located in Bullitt County, Kentucky, hereinafter referred to as the Collateral Property or by April 21st, 2015, whichever comes first.
- c.) The Holder of this Note may at any time at Holder's sole discretion take whatever steps are necessary to record this Note in the records of the appropriate Clerk of the Court having jurisdiction over the Collateral and/or this Promissory Note. Holder may also attach this Note as a lien against the Collateral and/or all of the assets of the Maker.
- d.) The Maker of this Note has the right to prepay the principal together with any and all unpaid interest at any time prior to the maturity date without penalty.
- e.) Should CFA Sunnyview, LLC, have to initiate legal action to collect any amount due on this promissory note, as well as any amounts due on the promissory notes executed by Bullitt Utilities, Inc., in favor of CFA Sunnyview, LLC, on 12/30/13, 11/18/13, 11/5/13, 5/24/13 and/or 3/3/14, CFA Sunnyview, LLC, shall be entitled to recover its reasonable attorney's fees and court cost.
- f.) This Note shall be governed by the laws of the State of Kentucky.

IN WITNESS WHEREOF, Maker has executed and delivered this instrument this day and year first written above and intends to be legally bound hereby.

Scan0313.pdf

Please find attached the revised quote from Larry Clark Construction for the lift station project at Hunters Hollow. As a result of Larry Clarks meeting with Chris Crumpton last week Larry had to make some minor changes in his original quote. The attached quote confirms that he will complete the project for \$216,600.00, which makes him the low bidder. (You should note that this quote does not include the pumps, controls and the remainder of the items that Larry Clark as listed at the bottom of page one.) Chris Crumpton is waiting on the updated quote from Keith Lipe for these items.

After reviewing the quote, Chris Crumpton and I advise that Bullitt Utilities should enter into a contract with Larry Clark Construction to complete this project as per the plans and specification. Note however, that the plans and specs have not been approved by the Division of Water. They are still in the hands of Dave Derrick and BCSD (Jerry Kennedy).

Let me know if you have any questions.

Hunters Hollow Lift Station

Larry,

Our bid from the Bid Proposal was \$ 213,800.00

After meeting with Chris Crumpton on Monday there was a few things I misinterpreted or changed from the plan. The changes amount to \$ 2,800.00 and are listed below.

Our new Bid Proposal is \$216,600.00

1) Raise the finish grade of wet well B 1 foot

- 2) Change 2 valves from 4" to 6" inside the meter vault, reducing to 4" on the outlet side instead of inlet side of the meter vault.
- 3) Install drop-inlet inside wet well B as shown in wet well A.

So we are all on the same page I am listing some of the items I bid and excluded.

Per addendum #1 both wet wells to have standard flat bottoms poured by structure provider.

We have bid a apx 15' by 15' area for placement of each wet well.

We will dial rebar into the structure base and into rock wall and pour concrete for antiflotation.

No step in wet wells A or B

No electric except for 2-4" holes in top of wet well lid.

Access hatch and ladder furnished by others, we will install the ladder inside valve vault, access hatches poured in concrete lid by structure provider with placement location approval by others.

Base ells, pumps,pump lifting cable or chain, floats, float cable holder, flow or magmeters, guide rails furnished by others.

We will install base ells, pumps, guide rails, lifting chain or cable only.

We bid assuming we could use the west side of the existing treatment plant to temporary store dirt and rock that would later be used to backfill and raise the elevation of the work area as on the plan. We can meet on site to find a suitable location.

No demo of old existing or temporary treatment plants. No improvements to any existing structures.

We can start the process of getting structure and pipping submittals or shop drawings immediately. I would assume starting construction apx April 1 with completion by May 1st. to 15th.

We can meet on site at almost anytime to address any concerns you might have. Let me know if I missed anything.

Thanks Larry Clark Larry Clark Construction Inc.

AGREEMENT BETWEEN BULLITT COUNTY SANITATION DISTRICT AND BULLITT UTILITIES, INC.

DATED 10/01/14

Come Bullitt County Sanitation District ("BCSD") and Bullitt Utilities, Inc. ("Bullitt Utilities"), on this the _____day of October, 2014 and hereby enter into this Agreement.

WHEREAS, Bullitt Utilities is a privately owned wastewater utility that owns the Hunters Hollow Wastewater treatment plant ("WWTP") and collection system located in Bullitt County, Kentucky. The Hunters Hollow WWTP was a 250,000 gallon per day ("gpd") WWTP providing service for approximately 696 residential and commercial customers at a residential rate of \$26,83 per month. On or about March 29, 2014, the Hunters Hollow WWTP suffered a catastrophic failure.

WHEREAS, Bullitt Utilities has provided treatment for the wastewater generated by the Hunters Hollow collection system ("Collection System") since March 29, 2014 through the use of a Pecco temporary WWTP and a Veolia temporary WWTP. The cost to operate these temporary WWTPs is exorbitant, and a short term and long term solution to the failure of the Hunters Hollow WWTP is needed in order to provide treatment for the wastewater generated by the Collection System

WHEREAS, In order to avoid an environmental emergency, BCSD is willing to provide short term emergency treatment for the wastewater generated by the Collection System until a permanent solution to the failure of the Hunter's Hollow WWTP can be implemented which is expected to be on or before December 31, 2016.

NOW THEREFORE, in consideration of the premises set forth herein, BCSD and Bullitt Utilities hereby agree to the following terms:

- BCSD agrees to make any and all reasonable efforts to accept the wastewater flow from the
 Collection System within sixty (60) days of the execution of this Agreement. BCSD shall not be
 responsible for failure to complete the construction of the proposed facilities due to state or
 federal permitting requirements (Division of Water, Department of Transportation, etc.),
 acquisition of easements or any other delay due to causes beyond the control of BCSD.
- BCSD agrees to provide treatment for the wastewater generated by the Collection System until December 31, 2016.
- 3. Bullitt Utilities will purchase and install two (2) magnetic flow meters, and BCSD shall maintain the two (2) flow meters. One meter will be provided for the Collection System's flow diverted to Union Fool (divided between Plant Three and Willabrook), and the second meter will be provided for the Collection System's flow diverted to Pioneer Village.
- 4. BCSD shall make every reasonable attempt to accept from the Collection System an average daily flow of 160,000 gallons with a maximum peak daily flow of up to 300,000 gallons. The amount of maximum peak day flow accepted shall be dependent upon performance of BCSD.

EXHIBIT

22

ENGAD 800-63

- treatment facilities. BCSD shall have all authority to make adjustments to the pump rates from the Collection System.
- 5. Any overflows from the Collection System caused by flows in excess of those stated in paragraph 4 above, shall be reported to the Kentucky Division of Water by Bullitt Utilities, and shall be the responsibility of Bullitt Utilities until the Collection System is conveyed to BCSD or another entity.
- BCSD shall only be responsible for the portion of the pipeline from the flow meters installed by Bullitt Utilities to the BCSD's treatment plants.
- 7. Bullitt Utilities shall be responsible for maintaining the Hunters Hollow Collection System and for the operation and maintenance of the pumps at the site of the former Hunters Hollow WWTP.
- 8. Bullitt Utilities agrees to pay BCSD for treatment of wastewater from the Collection System an amount equal to eighty percent (80%) of the gross revenue, excluding surcharge receipts, received by Bullitt Utilities from its customers per month. Bullitt Utilities shall request the Louisville Water Company to, if possible, pay this eighty percent of monthly gross revenue, excluding surcharge receipts, directly to BCSD.
- 9. BCSD shall engineer the pipeline from BCSD's existing facilities up to the two (2) new flow meters for the Hunters Hollow Collection System and shall engineer upgrades required at BCSD pump stations to accept the increased flows from the Collection System. Bullitt Utilities shall engineer the two (2) new flow meters, and the pumping and piping systems from its existing facilities to said flow meters. BCSD shall have review authority of Bullitt Utilities' pumping system engineering design to the two (2) new flow metering points, including the flow meters, to assure that flow rates can be controlled during peak day flow events. Bullitt Utilities' pumps shall have variable rate adjustment for controlling flow rates.
- 10. BCSD shall require a contribution in aid of construction in the amount of \$125,000.00. The \$125,000 is to be paid directly to BCSD upon execution of this Agreement.
- 11. Due to the unusual situation that this customer connection is for short term emergency treatment only, the tap fee required by BCSD Resolution Number 2012–08 will be waived for connection of Bullitt Utilities to BCSD in exchange for the engineering and construction contribution provided by Bullitt Utilities.
- 12. Bullitt Utilities agrees to pledge as security for fulfilling its duties under this agreement, until December 31, 2016, its interest in any surcharge proceeds that the Public Service Commission ("PSC") may authorize, that exceeds the surcharge proceeds authorized to pay for services and/or equipment provided by Veolia, Pecco and other individuals orientities to Bullitt Utilities to respond to the failure of the Hunters Hollow WWTP.
- 13. BCSD and Bullitt Utilities agree to work to develop a long term solution to the failure of the Hunters Hollow WWTP.
- 14. At any time during the term of this agreement, BCSD may purchase from Bullitt Utilities the Hunters Hollow Collection System, including its piping, manholes, purip stations, pumps and appurtenances for the amount of One Dollar (\$1.00), contingent upon and subject to, the PSC's authorization of the payment of a surcharge to Bullitt Utilities and the surcharge proceeds will continue to be paid to Bullitt Utilities or its assignee(s) after the sale of the Collection System. Should the PSC authorize the payment of a surcharge to Bullitt Utilities, but not the right to

continue to receive the surcharge proceeds after Bullitt Utilities' sale of the Collection System, the BCSD shall have the right to purchase the Collection System for the amount of One Dollar (\$1.00) upon the expiration of the surcharge.

15. General provisions

- 15.1 Successors and Assigns. No party shall assign, sublet or transferrits interest in this Agreement without the prior written consent of the other parties. Nothing herein shall be construed as creating any personal liability on the part of any officer or agent of any public or private body which may be a party thereto, nor shall it be construed as giving any rights or benefits hereunder to anyone other than the parties to the Agreement.
- 15.2 Mediation. Claims, disputes or other matter in question between the parties to this Agreement shall be first subject to pre-suit mediation prior to the filing of any legal claims or litigation. Pre-suit mediation is a condition precedent to litigation. The obligation to mediate is a material and essential provision of this Agreement. Unless otherwise agreed to in writing, the parties shall continue to provide and/or make the treatment, work and payments to be performed pursuant to this Agreement during any mediation or litigation, except for payments for items or work in dispute. Either party may initiate a mediation proceeding by submitting a request in writing to the other party within a reasonable time after the claim, dispute or other matter in question has arisen, but in no event after the applicable statute of limitations has expired. The parties shall endeavor in good faith to mutually agree upon an acceptable mediator. Each party is to bear its own fees, costs and expenses of said mediation. In the event that mediation is unsuccessful, all claims, disputes, or other matters in question shall be resolved in the Circuit or District Courts of Bullitt County, Kentucky and shall be governed by the laws of the Commonwealth of Kentucky.
- 15.3 This Agreement may be executed in two or more original or facsimile counterparts, each of which shall be deemed an original and all of which shall constitute but one and the same Agreement.
- 15.4 Construction. Should any provision of this Agreement require interpretation or construction, it is agreed by the parties hereto that the Court, administrative body or other emity interpreting or construing this Agreement shall not apply the presumption that the provisions hereof shall be more strictly construed against one party than another by reason of the rule of construction that a document is to be more strictly construed against the party who itself or through its agent prepared the same. The headings of sections and subsections are for convenience only and shall not affect or control the meaning or construction of any of the provisions of this Agreement.
- 15.5 Notices. All notices, requests, demands, or other communications required under this Agreement shall be made in writing and shall be served by hand delivery or by placing such in the United States Mail, certified mail, return receipt requested and bearing adequate postage or by overnight mail. Each notice shall be effective upon receipt.
- 15.6 Waiver. No waiver by any party of any default or non-performance by either party shall be considered a waiver of any subsequent default or non-performance.

- 15.7 Severability. In the event that any term, provision or covenant hereunder shall be held invalid or unenforceable by a court of competent jurisdiction, the remainder of this Agreement shall remain valid and enforceable by any party to the Agreement and the invalid unenforceable covenant shall automatically be deemed modified and amended to provide the maximum rights available under applicable law to the party who is the beneficiary of the term, provision, or covenant in question.
- 15.8 Authority of Parties. The individuals who have executed this Agreement on behalf of the respective parties expressly represent and warrant that they are authorized to sign on behalf of such entities for the purpose of duly binding such entities to this Agreement.
- 15.9 IN THE EVENT THAT EITHER THE BCSD AND/OR BULLITT UTILITIES IS UNABLE TO NEGOTIATE AN AGREED ORDER WITH THE ENERGY AND ENVIRONMENT CABINET THAT IS NOT ACCEPTABLE TO THE PARTY TO THE AGREED ORDER, THIS AGREEMENT SHALL BECOME NULL AND VOID AND UNENFORCEABLE.
- 15.10 Entire Agreement. This Agreement sets forth the entire Agreement between the parties hereto and, except as otherwise expressly provided, fully replaces, cancels and supersedes any and all prior Agreements or understandings between the parties hereto pursuant to the subject matter hereof.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement the day and year first above written.

Re: Agreement between Bullitt Utilities, Inc. ("Bullitt Utilities") and Bullitt County

Sanitation District ("BCSD")

Dear Scott:

JOHN B. BAUGHMAN

MARK R. BRENGELMAN

ROBERT C. MOORE

As you are aware, Paragraph 10 of the above referenced agreement between Bullitt Utilities and BCSD requires Bullitt Utilities to pay BCSD a contribution in aid of construction in the amount of \$125,000.00. Accordingly, I have enclosed a check made payable to BCSD in the amount of \$125,000.00 to satisfy this requirement. Based upon our telephone conversation of November 7, 2014, it is my understanding that you will not deliver this check to Jerry Kennedy, BCSD's representative, until the above-referenced agreement has been signed by Mr. Kennedy. It is also my understanding that you will scan or fax a copy of the signed agreement to me immediately upon Mr. Kennedy signing same.

Thank you for your attention to this matter, and please contact me immediately if my understanding is incorrect or if you would like to discuss this matter.

Yours truly,

Robert C. Moore

SECTION 10 STANDARD SPECIFICATIONS DUPLEX SEWAGE PUMP STATION HUNTERS HOLLOW

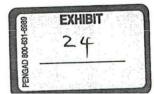

10.1 GENERAL

10.1.1. WORK INCLUDED

- A. These specifications cover the work necessary to furnish, install, and complete a duplex submersible non-clog or grinder pump station to the Bullitt County Sanitation District (BCSD) Standards. These specifications additionally utilize standard specifications as set forth by the largest regional service provider Louisville Metropolitan Sewer District (MSD) of which BCSD's Standard Specifications reference in most cases.
- B. The Work to be accomplished under this Section of the Specifications consists of furnishing all labor, materials, equipment, and services necessary for the construction of a duplex pump station and valve vault as shown on the Contract Drawings. The facility components shall include, but not necessarily be limited to, two (2) submersible raw sewage pumps; pump discharge connections; guide rails; bottom, intermediate, and upper guide rail supports; lifting cables; discharge piping, valves, and supports; aluminum access hatches; vents; liquid level sensors; electrical service and controls; flow meters; data quality telephone service; telemetry signals pre-wired in the control panel for future connection by BCSD; and any other items required to make the installation function per its design intent. All components shall be installed in, on, or near a precast concrete wet well basin and valve vault. The structures and dimensions shall be as shown on the Contract Drawings.
- C. The following major Work items are included in the Contract:
 - 1. Site work.
 - 2. Construction of new pump station, valve vault, and appurtenances.
 - Installation of new electrical service and pump control system, including prewired telemetry signals.
 - 4. Installation of new data quality telephone service.
 - Installation of Flow Meters

10.1.2. DEFINITION OF ENGINEER

- A. For the purposes of reviewing submittals and interpreting BCSD's standard drawings, specifications, policies, and procedures, the term "Engineer" shall mean the person holding the position of Director of the Engineering Division of BCSD or any person whom BCSD may designate to act in place of said Director.
- B. For matters concerning design, cost, and general professional judgment, the term "Engineer" or "Design Engineer" shall mean the Kentucky Registered Professional Engineer hired by the developer or client to design and supervise the project.

10.1.3. CONTRACTOR REQUIREMENTS

- A. The Contractor shall become familiar with all details of the Work, shall verify all dimensions in the field, and shall advise the Engineer of any discrepancies before initiating the Work.
- B. The Contractor shall use adequate numbers of skilled workmen who are thoroughly trained and experienced in the necessary crafts and who are completely familiar with the specified requirements and the methods needed for proper performance of the Work of this Section.
- C. The Contractor shall use equipment adequate in size, capacity, and numbers to accomplish the Work of this Section in a timely manner.
- D. The Contractor shall comply with the permit and code provisions contained in these specifications.
- E. The Contractor shall submit complete shop drawing packages and operation and maintenance manuals in accordance with Section 1.07 of these specifications.
- F. The Contractor shall be responsible for the factory and field tests required by Sections 3.03, 3.04, and 3.05 of these specifications and shall submit copies of the test reports to document the results.

10.1.4. PERMITS AND APPROVALS

- A. The Owner/Engineer shall obtain any permits and inspections related to or required by the Work in this Contract, including a Kentucky Division of Water Construction Permit.
- B. The Contractor shall furnish electrical inspection by an agency licensed or otherwise qualified to perform electrical inspections in the Commonwealth of Kentucky.
 - 1. All costs incidental to the electrical inspection shall be borne by the Contractor.
 - The Contractor shall provide a Certificate of Compliance with NEC after final approval by the electrical inspector. Final acceptance will be withheld until he has presented the Engineer with the aforementioned Certificate of Compliance.

10.1.5. CODES AND STANDARDS

- A. The Contractor shall comply with applicable codes and regulations of authorities having jurisdiction.
- B. The Contractor shall submit copies of inspection reports, notices, citations, and similar communications to BCSD.

C. All electrical equipment and details of installations shall comply with the requirements of the latest editions of the National Electrical Code (NFPA-70), the National Electrical Safety Code (ANSI C2), OSHA, KYOSHA, and all applicable codes.

10.1.6. SYSTEM CHARACTERISTICS

- A. Duplex Station.
- B. Submersible Non-clog or Grinder Pump (and must be variable speed compatible)
- C. Pump Motor Rating:
 - 1. 15.0 HP.
 - 2. 460 volts.
 - 3. Three-phase.
 - 4. 22.0 full load amps.
- D. Electrical Service Rating:
 - 1. 480 volts.
 - 2. Three-phase.
 - 3. 100 amps.
 - 4. 3 wire.
- E. Pump Efficiency Ratings:
 - ⇒ Pump efficiencies will be reduced for this operation
- F. Design Operating Point(s):
 - 1. 111 gpm to 208 gpm standard for each pump (up to 320 gpm peak flow)
 - 2. between 18 to 32 TDH (feet) standard (up to 49 peak TDH (feet) at 320 gpm).
 - 3. hydraulic efficiency will be reduced based on operating points.
 - 4. 15 required HP (cannot exceed 90% of motor HP rating).
- G. Shutoff head: 64' TDH (feet)
- H. Third operating point: refer to Supplier Chart
- I. Manufactured by Essco Pumps (or equal)
- J. Model: ESSCO #493, or approved equal.
- K. Maximum operating speed: 1,750 RPM.
- L. Casing size: Maximum Impeller 9-inches C (Vortex 8 Vane Curve Shroud)
- M. Impeller diameter: 9 inches.
- N. Discharge diameter: 4- inches.

- O. Solids passing size: 3-inches.
- P. Cycle time: 15 minutes; Running time: (15.7 minutes to variable)
- Q. Force main pressure rating: 125 psi.
- R. Critical elevation: 503.19 (1' below the existing wetwell and manhole)
- S. Critical Elevation Location: The pump station and sanitary sewer system shall be designed so that under a complete system failure, sanitary flows will discharge as close to the pump station as possible, avoiding discharge into a private residence. This "Critical Elevation" currently occurs at the existing pump station wet well and near-by manhole. This location and elevation shall also be included on the sanitary drawings as well as the O&M Manual

THIS SHALL ONLY OCCUR DURING A COMPLETE SYSTEM FAILURE AND EMERGENCY

10.1.7. SUBMITTALS

A. Shop Drawing Submittals

- Prior to submitting the manuals described below, the Contractor shall submit seven (7) complete sets of shop drawings to BCSD for review and approval. The shop drawings shall be tailored to the specific project details and shall include, but not necessarily be limited to, the following information:
 - a. Pump manufacturer's literature indicating model numbers, pump and motor characteristics and performance, equipment dimensions, accessory items, hardware, and published pump performance curves showing that the units meet the specified requirements for head, capacity, efficiency, and horsepower for the various conditions specified.
 - b. Installation details for the pump bases, double guide rail assemblies, accessories, and hardware.
 - c. Electrical schematics; electrical components; cut sheets; feeder, branch, and control conductors; disconnect switches; fuses, circuit breakers, and overloads; raceways and fittings; enclosure component layout; and complete motor nameplate data.
 - d. Wet well base, barrel, and top.
 - e. Vent piping.
 - f. Access hatches (wet well and valve vault).
 - g. Piping (force main and pump station), piping supports, watertight throughwall pipe connections, couplings, fittings, and scaled fabrication drawings.
 - h. Valve vault top, base, and barrel.
 - Swing check valves, gate valves, ball valve at gauge connection, PVC check valve on drain line between valve vault and wet well, and air release valve.
 - j. Air release and cleanout vaults (top, bottom, base, frame, lid, and watertight through-wall pipe connections).
 - k. Concrete and grout mix designs and mix design support history.
 - I. Flow meters (one for each force main outlet)

2. Additional information may be requested by BCSD at any time for clarification.

B. Operation and Maintenance Manual

- 1. The operation and maintenance manual (O&M Manual) shall be a thorough and useful reference source for training, educating, and assisting BCSD personnel in the operation and maintenance of the pump station facility. The information contained in the manual shall specifically address the equipment supplied and shall contain no superfluous material. Both the draft and final versions of the O&M Manual shall be bound in suitably labeled, hard cover, 3-ring binders furnished with indexes and tabbed dividers between subject matter.
- Four (4) copies of the draft version of the O&M Manual shall be delivered to BCSD for review and comments as soon as possible after approval of the shop drawings. The draft manual shall include, but not necessarily be limited to, the following information:
 - a. Approved shop drawings with pump performance curves.
 - b. Complete operating instructions including start-up, shutdown, and emergency procedures.
 - c. Complete parts list (including catalog numbers), parts catalogs, assembly drawings, and pricing information.
 - d. Recommended spare parts list including parts numbers, suppliers, availability, and costs.
 - e. Preventive maintenance schedules.
 - f. Corrective maintenance and alignment instructions.
 - g. Troubleshooting guides.
 - h. A list of complete nameplate data for each piece of equipment supplied.
 - i. The necessary figures, tables, and wording to supplement the material listed above.
 - j. Complete listing of manufacturers' and local suppliers' names; addresses; telephone numbers; fax numbers; and web site addresses for pumps, valves, alternating relays, motor starters, and where applicable, generator and transfer switch.
 - k. Workshop (rebuild) manual.
 - Copy of warranty.

Two (2) copies of the marked up draft O&M Manual will be returned to the Contractor so that any corrections, additions, or deletions can be incorporated into the final version.

3. Four (4) copies of the final O&M Manual must be delivered to and approved by BCSD prior to scheduling acceptance testing of the pump station. The final version of the document shall have been revised to satisfactorily address the draft review comments and to incorporate the certified factory pump test reports, pre-commissioning test reports, and final record drawings (as builts) of the control panel, pump station, valve vault, and appurtenances.

10.1.8. APPROVAL AND MARKING OF EQUIPMENT

Electrical devices and materials shall be listed and/or labeled by the Underwriters' Laboratories, Inc (UL).

10.1.9. PROTECTION OF ELECTRICAL EQUIPMENT

Electrical equipment shall be protected from the weather, especially from water dripping or splashing upon it, at all times during shipment, storage, and construction. Equipment shall not be stored outdoors even if its enclosure is rated as weatherproof, watertight, etc. Where equipment is installed or stored in moist areas, such as unheated buildings, etc., it shall be provided with an acceptable means of preventing moisture damage such as a uniformly distributed source of heat to prevent condensation.

10.1.10. DEFECTIVE OR DAMAGED EQUIPMENT

- A. Should it be determined by the Contractor, BCSD, or Engineer that any equipment or material has been subjected to possible damage by water, it shall be thoroughly dried and put through a dielectric test as directed by the manufacturer and at the expense of the Contractor, or it shall be replaced by the Contractor without change in contract price. Any equipment that fails to meet manufacturer's standards shall be replaced at no additional charge to the Owner.
- B. Any equipment damaged during shipment, while stored, or during construction shall be replaced at the Contractor's expense. Minor scratches on equipment cabinets, etc. may be repaired on site. Any current carrying parts, switch blades, operators, coils, contacts, etc., which are damaged, shall be replaced at no cost to the Owner.

10.1.11. ELECTRICAL SERVICE

- A. The Contractor shall obtain and install a complete electrical service with new service equipment. The new equipment connections and conduit shall be sized for the application, and the service shall meet the requirements of the National Electrical Code (NEC), latest edition, and Louisville Gas and Electric.
- B. The Contractor shall make all necessary arrangements for transfer of power by Louisville Gas and Electric.

10.2. PRODUCTS

10.2.1. GENERAL

- A. Since each pump station has its own set of characteristics based on the pump model selected in the design and since it is prohibitive to prepare design specifications and drawings for each pump model approved by BCSD, these Specifications and Standard Drawings have been prepared based on the constraints given for a particular pump model. This is not intended to prevent the use of other pump models or equipment approved by BCSD but is intended to establish the standard of quality and general configuration of the equipment desired.
- B. Should the Contractor propose to supply a different pump model or type of equipment which has previously been approved by BCSD, the Contractor shall revise the pump

station Drawing(s) and Specification(s) by red lining the revisions to detail them to meet the characteristics of the proposed pump system for BCSD's review and approval. Any changes shall first be approved by the Engineer prior to submittal to BCSD for review.

C. If approved by BCSD, all revisions shall be shown on the final record drawings and be included in the O&M Manual, which must be furnished prior to final acceptance of the pump station.

10.2.2. STANDARD PRODUCTS

Material and equipment shall be new, shall be the standard products of a manufacturer regularly engaged in the manufacture of the products, and shall essentially duplicate items that have been in satisfactory use at least three (3) years prior to the bid opening.

10.2.3. NAMEPLATES

Two stainless steel nameplates shall be supplied for each pump and motor. These nameplates shall have the manufacturer's name, address, type or style, model or serial number, catalog number, impeller diameter, design flow in gpm, total dynamic head in feet, power in horsepower, voltage, phase, rotational speed in rpm, full load current in amperes, and safety factor stamped on them. One nameplate shall be secured to the item of equipment, and the other shall be mechanically fastened to the inner door of the control panel.

10.2.4. EQUIPMENT GUARDS

Belts, pulleys, chains, gears, projecting set screws, keys, and other rotating parts, so located that any person may come in close proximity thereto, shall be enclosed or guarded per OSHA standards.

10.2.5. PADLOCKS

Upon acceptance of the pump station by BCSD, the Owner will provide and install padlocks to secure the facility.

10.2.6. PIPING

- A. The pipe inside the pump station wet well and valve vault shall be either stainless steel or ductile iron as indicated on the Contract Drawings.
 - 1. Stainless steel pipe and fittings shall conform to ASTM A167, Type 304L.
 - a. Pipe shall be Schedule 40, and fittings shall be Schedule 80.
 - b. Joints for piping 2 inches in diameter and smaller shall be threaded. All other joints shall be flanged.
 - 2. Ductile iron pipe and fittings shall be Class 53 conforming to Section 4.2.2.2. of the BCSD Standard Specifications.

- Joints shall be flanged.
- b. Pipe and fittings shall be polyurethane lined.
- c. Pipe and fittings shall be shop primed and receive two (2) finish coats in the field. The paint system shall be polyamide epoxy based.
- 3. Flanges shall be Class 125; flange bolts shall be stainless steel ASTM A193, Grade B-8, Type 304L; and flange gaskets shall be 1/8-inch ring gaskets.
- B. A detailed and scaled shop drawing of the piping, fittings, valves, etc. shall be submitted for approval.
- C. The installed discharge piping, valve system, and force main shall meet the testing requirements described in Louisville MSD's Standard Specification Section 4.3.5.4. Hydrostatic Tests for Force Mains. The Contractor will be required to perform both pressure and leakage tests to ensure conformance to the testing requirements of the preceding paragraph if the pressure test fails.

10.2.7. VENT PIPE

- A. The vent pipe shall be butt weld Schedule 40 stainless steel pipe and fittings conforming to ASTM A167, Type 304L. A stainless steel insect/bird screen shall be provided on the vent.
- B. The vent pipe shall not be painted.

10.2.8. SEWAGE PUMP GENERAL DESIGN

- A. Non-clog pumps shall be submersible, centrifugal type designed to pump raw, unscreened sewage containing solids and stringy materials.
- B. Grinder pumps shall be submersible, centrifugal type designed to macerate and pump raw, unscreened sewage containing solids and stringy materials.
 - The grinder assembly shall consist of a grinder impeller and a shredding ring and shall be mounted directly below the volute passage. The grinder impeller shall be threaded onto the stainless steel shaft and shall be locked with a screw and washer. The shredding ring shall be pressed onto an iron holding flange for easy removal. The flange shall be provided with tapped backoff holes so that screws can be used to push the shredding ring from the housing. All grinding of solids shall be from the action of the impeller against the shredding ring.
 - 2. Both the grinder impeller and the shredding ring shall be of #440 stainless steel hardened to 58-60 Rockwell C, unless otherwise approved.
 - 3. The grinder unit shall be capable of macerating all materials found in normal domestic and commercial sewage, including reasonable amounts of foreign objects such as wood, plastic, glass, rubber, sanitary napkins, disposable diapers, panty hose, and the like, to a fine slurry that will pass freely through the pump and the discharge piping.
- C. The raw sewage pumps shall be capable of continuous operation under submerged or dry motor conditions without adverse effects due to heat generation. In addition,

the pumps shall be capable of adequate cooling when they are left running with the liquid level lowered to the pump suction inlet to help clean the wet well. Pumping units which require a connection to an external cooling water source to dissipate the heat generated under the conditions specified above will not be acceptable.

- D. Each pump shall be supplied with a mating discharge stand which shall be permanently installed in the wet well along with the discharge piping. There shall be no need for personnel to enter the wet well. The pumps shall be automatically connected to their discharge stands when lowered into place and shall be easily removed for inspection and service. No portion of the pump shall bear directly on the floor of the wet well.
- E. Connection of the pump to its discharge stand shall be accomplished by a simple linear downward motion of the pump along a rail mounted installation system as specified under Section 2.16 herein.
- F. The pumps shall be certified explosion proof for installation in Class 1, Division 1, Group D environments by Factory Mutual, UL, CSA, or other appropriate governing authorities having jurisdiction.

10.2.9. PUMP CASING

- A. Pump casing shall be constructed of cast iron, ASTM A48, Class 30. The casing shall be of uniform quality and free from blow holes, porosity, hard spots, shrinkage cracks, and other injurious defects. The casing shall be capable of withstanding an operating pressure 50 percent greater than the maximum calculated operating pressure. The volute shall have smooth passages which provide unobstructed flow through the pump.
- B. Watertight mating surfaces shall be machined and fitted with nitrile rubber O-rings such that sealing is accomplished by metal-to-metal contact between the mating surfaces, resulting in proper compression of the O-rings without the requirement of specific torque limits.
- C. Exterior surfaces of the casing in contact with sewage shall be protected by a sewage resistant coating. All exposed nuts and bolts shall be AISI stainless steel, Type 304.

10.2.10. IMPELLER

- A. The pump impellers shall be dynamically balanced.
- B. Grinder pumps shall have recessed impellers designed to handle ground slurry without clogging or binding.
 - 1. Impellers shall be of 85-5-5-5 bronze, or otherwise approved.
 - 2. Impellers shall be threaded onto the pump shafts.
- C. Non-clog pumps shall have channel type impellers designed to handle solids, fibrous materials, sludge, and other items normally found in raw wastewater. Recessed vortex type impellers may be acceptable when specific circumstances warrant;

however, their use in typical installations should be avoided due to the reduced hydraulic efficiency of the equipment.

- 1. Impellers shall be of Grade 60-45-15 ductile iron, ASTM A395.
- 2. Impellers shall be slip fit and keyed to the pump shafts whereby they cannot be loosened by torque from either the forward or reverse direction.
- 3. The pumps shall be capable of passing a minimum 3-inch diameter solid sphere.

10.2.11. PUMP SHAFT

The pump shafts shall be stainless steel of the AISI type recommended by the pump manufacturer. The shafts shall be of adequate size and strength to transmit the full driver horsepower.

10.2.12. SEALS

- A. A tandem mechanical shaft seal system running in an oil bath shall be provided. Upper seals shall be carbon/ceramic with the lower seals being tungsten carbide/tungsten carbide. Each seal interface shall be held in contact by its own spring system. Conventional mechanical seals which require a constant pressure differential to effect sealing will not be allowed.
- B. A sensor shall be provided to detect water leakage into the motor housing. The sensor shall provide a discrete signal for shutting off the pump and activating an alarm pilot light on the control panel.

10.2.13. BEARINGS

Pump bearings shall be ball or roller type designed to handle all thrust loads in either direction. Pumps depending only on hydraulic balance end thrust will not be acceptable. Bearings shall have a minimum B-10 life of 50,000 hours.

10.2.14. MOTOR

- A. The watertight pump motors shall be designed for continuous duty, shall be capable of sustaining a minimum of ten (10) starts per hour, and shall be rated for Class 1, Division 1, Group D service. Additionally, for the Hunters Hollow Pump Station, pumps and motors must be supplied that provide for variable speed operation and allow for programming of control systems for different pumping conditions for each pump.
- B. The motors may be either air filled or oil filled, shall have Class F insulation, and shall be NEMA B design in accordance with NEMA MG-1. Temperature sensors shall be embedded in the windings to provide a discrete signal for shutting off the pump and activating an alarm pilot light on the control panel when the winding temperature exceeds the threshold established by the motor manufacturer. The motor shall restart automatically after cooling.
- C. Based on the pump manufacturer's standard design, especially for pump models with larger horsepower drives, water or oil jackets encircling the stator housings may be

utilized for motor cooling purposes. The configuration provided must be a closed loop system in which connections to external coolant sources are not required. Cooling systems circulating wastewater through stator housing jackets are not acceptable.

- D. Motor ratings shall be as shown in Section 1.06 "System Characteristics" of these specifications.
- E. The Contractor shall verify that the existing electrical service is compatible with the specified equipment before ordering the equipment.

10.2.15. POWER CABLE AND CABLE ENTRY

- A. The pump power cable shall comply with NFPA No. 70, Type SO, and shall be of standard construction for submersible pump applications. The cable length shall be such that no splices will be required between the pump and the control panel while providing a two (2) foot vertical sag in the cable between the control panel and cable holder.
- B. The cable entry water seal design shall insure a watertight and submersible seal.

10.2.16. INSTALLATION SYSTEM

- A. The pumps shall be easily lowered into place and removed for inspection and service without the need for personnel to enter the wet well. Connection of the pump to its discharge stand shall be accomplished by a simple linear downward motion of the pump along a rail mounted installation system.
 - For grinder applications, the pump/check valve assembly shall be hydraulically sealed to its discharge case with dual O-rings. A brace, easily removable from the top of the wet well, shall be provided to lock the parts together and to prevent line surges from breaking the seal and allowing leakage.
 - For non-clog applications, sealing shall be accomplished by the weight of the pump pressing tightly against its discharge connection elbow with a machined metal-to-metal contact. Sealing of the discharge interface by means of a diaphragm, O-ring, or other devices will not be acceptable.
- B. A rail mounted installation system incorporating two (2) guide rails; bottom, intermediate, and upper guide rail supports; sliding pump bracket; and lifting cable shall be furnished for each pump.
 - 1. The guide rails shall be non-sparking and of the size standard with the pump manufacturer.
 - The guide rails shall be Schedule 40, Type 304L stainless steel pipe, ASTM A167.
 - 3. All supports and fasteners shall be stainless steel and of a design standard with the pump manufacturer.
 - 4. Intermediate guide rail supports, if required, shall be spaced evenly between the discharge stand and upper guide rail support in order to minimize deflection of the rails. Maximum spacing for the intermediate supports shall be 10 feet.
 - 5. The guide rails shall not support any portion of the weight of the pump.

- 6. The sliding pump bracket, designed to be non-binding and to ride on the guide rails, shall be an integral part of the pumping unit.
- C. A lifting cable shall be provided to raise and lower the pump through the limits indicated on the Contract Drawings. The aircraft grade cable and all associated hardware shall be stainless steel and shall be capable of supporting the pump with a Safety Factor of two (2).
- D. The Contractor is to demonstrate, in the presence of BCSD's inspector prior to or during the start-up procedure, that pumps have proper hatch clearance, guide rail positioning, and seating. The pumps are to be raised and lowered twice to ensure proper operation. Any necessary alterations or adjustments are to be made by the Contractor, to BCSD's satisfaction, at no additional cost to BCSD.

10.2.17. WET WELL

A. The wet well shall be constructed of precast reinforced concrete as specified hereinafter and shall be sized as indicated on the Contract Drawings.

B. Precast Reinforced Concrete

The precast reinforced concrete wet well and top slab shall conform to "Specifications for Reinforced Concrete Manhole Sections," ASTM C478, latest revision. The wet well sections shall contain one or two lines of circular steel reinforcement as required by the ASTM standards. All sewer pipe connections to the precast wet well shall be made with a positive seal gasketing system conforming to ASTM C923 and Louisville MSD's Standard Drawing No. GM-01-01. All wet well joints shall be watertight as described in Louisville MSD's Standard Specification Section 5.2.7., Joint Sealants. The horizontal joints shall be made with a three-way sealing system consisting of a rubber O-ring or single offset rubber gasket, butyl mastic joint sealant, and a 6-inch wide strip of polyolefin covered with butyl mastic around the exterior. To facilitate maintenance, the wet well shall have no more than one through-wall connection for influent sewage. All sewers draining to the wet well shall converge in a single manhole adjacent to the wet well. A single pipe shall connect this manhole and the wet well. The invert of the influent line shall enter the wet well at a higher elevation than the high wet well alarm level.

C. Access Door

1. The access door(s) to the wet well shall be 1/4-inch (minimum thickness) aluminum (6061-T6 Alloy, ASTM B-221) diamond pattern plate, designed to withstand a live load of 300 pounds per square foot. The frame shall be constructed of 1/4-inch thick, one piece extruded aluminum with a continuous 1-inch (minimum) anchor flange around the perimeter. The access door(s), which shall have a 30"x 30" minimum clear opening, shall be adequately sized to allow removal of the pump(s). The actual clear opening of the frame shall allow a minimum of 3-1/2 inches clearance between the pump(s) casing(s) opposite the discharge side of the pump(s) and the inside of the frame, and a minimum of 2-1/2 inches clearance between the sides of the pump(s) casing(s) and the inside of the frame. Factory finish shall be mill finish aluminum. Installation shall be performed in accordance with the manufacturer's instructions. All

- aluminum surfaces in contact with concrete shall be coated with a bituminous paint material.
- 2. The manufacturer shall mark each door leaf, in two locations with a steel stamp using 3/8-inch lettering, with the words "Property of Bullitt Utilities, Inc." When the door(s) are in the open position, one mark shall be located approximately 3 to 4 inches from the edge on the top right corner of the underside of the door(s). The second mark shall be located approximately 3 to 4 inches from the side and above the hinge on the bottom left corner of the underside of the door(s).
- 3. The door(s) shall be equipped with stainless steel hinges, stainless steel pins, and recessed lift handle flush mounted and not protruding above the cover. Each door leaf, with a maximum of 15 lbs. of manual assistance, shall open to 90 degrees and automatically lock in that position with a stainless steel hold-open arm. The arm shall have a conveniently positioned release handle with a vinyl grip for easy and controlled closing. Door(s) shall be equipped with stainless steel spring operators designed to provide easy operation in opening and to act as a check in retarding downward motion of the door during closing. For safety purposes, should the locking mechanism fail or unauthorized entry occur, the spring operator shall be designed such that the door(s) shall remain in a fully closed position by its own weight. No item may protrude above the access cover except the heads of the carriage bolts and padlock assembly cover.
- 4. To minimize tampering and improve security, the hinges shall be bolted to the door(s) with stainless steel carriage bolts and nuts. The nuts shall be welded to the bolts on both the door(s) and frame. Door(s) shall be equipped with a recessed padlock and staple assembly which is designed to restrict bolt cutters from severing the padlock. The recess area shall be provided with weepholes to ensure drainage and shall be of adequate size to enclose a standard BCSD padlock which will be furnished and installed by the Owner upon completion of the project. Verification of this requirement shall be noted on the hatch shop drawings. All stainless steel hardware shall be type 304 (minimum) stainless steel. The manufacturer shall guarantee all components of the access doors against defects in material and workmanship for a period of five years.
- 5. When installing wet wells six feet in diameter and larger, a double leaf access door hatch shall be installed and sized to meet the ultimate pump size access demand and actual clearance as specified between the pump(s) casing(s) and inside of the frame. A large single door shall not be acceptable. The minimum leaf size shall be 30 inches by 30 inches. The maximum leaf size shall be such that the sum of the length and width of the leaf is less than or equal to 84 inches.

10.2.18. VALVE VAULT

A. The valve vault shall be constructed of precast or cast-in-place reinforced concrete as specified hereinafter and shall be sized as indicated on the Contract Drawings.

B. Cast-in-Place Concrete

All cast-in-place concrete work shall conform Louisville MSD's Standard Specification Section 5, Structures. Class AA concrete shall be used throughout the structure. All pipe connections to the vault shall be made with a positive seal gasketing system conforming to ASTM C923 and Louisville MSD's Standard Drawing No. GM-01-01.

C. Precast Reinforced Concrete

A precast reinforced concrete valve vault and top slab shall conform to "Precast Concrete Water and Wastewater Structures," ASTM C913, latest revision. All pipe connections to the precast valve vault shall be made with a positive seal gasketing system conforming to ASTM C923 and Louisville MSD's Standard Drawing No. GM-01-01. All valve vault joints shall be watertight as described in Louisville MSD's Standard Specification Section 5.2.7., Joint Sealants.

D. Confined Space Equipment

The valve vault shall be equipped with an aluminum ladder as shown on the Contract Drawings. The ladder shall comply with OSHA requirements. A minimum clear space of 30 inches by 30 inches shall be provided as a landing area at the bottom of the ladder. The ladder shall have retractable side rails or a retractable extension, such as a Bilco Ladder-Up or equal, to facilitate ingress and egress.

E. Access Door

- 1. The access door(s) to the valve vault shall be 1/4-inch (minimum thickness) aluminum (6061-T6 Alloy, ASTM B-221) diamond pattern plate, designed to withstand a live load of 300 pounds per square foot. The frame shall be constructed of 1/4-inch thick, one piece extruded aluminum with a continuous 1-inch (minimum) anchor flange around the perimeter. The access door(s), which shall have a 30"x 30" minimum clear opening, shall be adequately sized to allow removal of the valves and fittings. Factory finish shall be mill finish aluminum. Installation shall be performed in accordance with the manufacturer's instructions. All aluminum surfaces in contact with concrete shall be coated with a bituminous paint material.
- 2. The manufacturer shall mark each door leaf, in two locations with a steel stamp using 3/8-inch lettering, with the words "Property of Bullitt Utilities, Inc." When the door(s) are in the open position, one mark shall be located approximately 3 to 4 inches from the edge on the top right corner of the underside of the door(s). The second mark shall be located approximately 3 to 4 inches from the side and above the hinge on the bottom left corner of the underside of the door(s).
- 3. The door(s) shall be equipped with stainless steel hinges, stainless steel pins, and recessed lift handle flush mounted and not protruding above the cover. Each door leaf, with a maximum of 15 lbs. of manual assistance, shall open to 90 degrees and automatically lock in that position with a stainless steel hold-open arm. The arm shall have a conveniently positioned release handle with a vinyl grip for easy and controlled closing. Door(s) shall be equipped with stainless steel spring operators designed to provide easy operation in opening and to act as a check in retarding downward motion of the door during closing. For safety purposes, should the locking mechanism fail or unauthorized entry occur, the spring operator shall be designed such that the door(s) shall remain in a fully closed position by its own weight. No item may protrude above the access cover except the heads of the carriage bolts and padlock assembly cover.
- 4. To minimize tampering and improve security, the hinges shall be bolted to the door(s) with stainless steel carriage bolts and nuts. The nuts shall be welded to

the bolts on both the door(s) and frame. Door(s) shall be equipped with a recessed padlock and staple assembly which is designed to restrict bolt cutters from severing the padlock. The recess area shall be provided with weepholes to ensure drainage and shall be of adequate size to enclose a standard BCSD padlock which will be furnished and installed by the Owner, upon completion of the project. Verification of this requirement shall be noted on the hatch shop drawings. All stainless steel hardware shall be type 304 (minimum) stainless steel. The manufacturer shall guarantee all components of the access doors against defects in material and workmanship for a period of five years.

5. When installing valve vaults six feet in diameter and larger, a double leaf access door hatch shall be installed and sized to facilitate access to valves and fittings. A large single door shall not be acceptable. The minimum leaf size shall be 30 inches by 30 inches. The maximum leaf size shall be such that the sum of the length and width of the leaf is less than or equal to 84 inches.

10.2.19. CHECK VALVES

Check valves shall be lever and weight swing type with bronze-to-bronze seating. The valve design shall allow for operation when negative heads are encountered. The valves shall be designed to operate at all pressures in the sewer system. A check valve shall be installed in the discharge line of each pump as shown on the Contract Drawings. Check valves shall be installed such that the lever arm may be totally dissembled, including the removal of hinge pins, without removing the valve from the line.

10.2.20. GATE VALVES

Gate valves shall be AWWA C509, resilient wedge, rising stem suitable for use in sewage applications. Each valve shall be provided with a handwheel opening counterclockwise. The valves shall have flanged ends with 125 lb. drilling. A gate valve shall be installed in the discharge line of each pump and in the emergency pump connection line as shown on the Contract Drawings.

10.2.21. EMERGENCY PUMP CONNECTION

As shown on the Contract Drawings, a 4-inch line shall be installed in the valve vault to enable a portable pump to be connected to the force main. The end of the pipe shall protrude through the top slab of the valve vault and shall be equipped with a 4-inch stainless steel adapter designed to accommodate a positive cam-locking coupler for quick, secure connection of the portable pump discharge hose. The adapter, McMaster-Carr Part No. 53015K58 or approved equal, shall be threaded onto the pipe and shall be protected with a stainless steel locking dust cap, McMaster-Carr Part No. 53015K125 or approved equal. BCSD will provide the required padlock.

10.2.22. BALL VALVES/GAUGE TAPS

Ball valves shall be threaded and have a stainless steel body, stainless steel ball and stem, teflon seats and seals, and a regular port. The gauge tap assemblies shall be stainless steel and installed as shown on the Contract Drawings.

10.2.23. SEWAGE COMBINATION AIR VALVE

- A. The sewage combination air valve (SCAV), when required, shall be specifically designed for use in sewage applications. Its design shall prevent contact between the sewage and the sealing mechanism and shall ensure drip tight sealing. A spring-loaded joint between the sealing mechanism and the float/rod assembly shall perform without jamming under vibrations related to the surges from pump starts and stops.
- B. The SCAV shall automatically release air and gas from a filling system, shall admit air into an emptying system, and shall continuously release accumulated air and gas in a pressurized flowing system.
- C. The SCAV shall be an A.R.I. Model D-020 with attachments as manufactured by A.R.I. Flow Control Accessories, Inc. (Phone: 310-286-2220, Fax: 310-286-2221). Specific size requirements shall be determined by the Engineer.
 - 1. The carbon steel valve body shall be conical in shape and shall have a factory applied, fusion bonded epoxy coating (4 mils DFT) for hydrogen sulfide/sulfuric acid resistance.
 - All springs, washers, stems, and floats shall be constructed of 303 stainless steel.
 - 3. All O-rings and seals shall be made of Buna with pressure ratings equivalent to the overall working pressure required for the SCAV.
 - 4. The air release mechanism and seal shall be constructed of polypropylene (formed for the seal).
- D. The SCAV shall be fitted with an inlet stainless steel ball valve to isolate it from the force main for maintenance or replacement.

10.2.24. MECHANICAL COUPLINGS

Mechanical couplings shall be installed as shown on the Contract Drawings. Mechanical couplings shall be epoxy coated ductile iron with stainless steel nuts and bolts. Couplings shall be Dresser Style 38 or 138, Ford Style FC1 or FC2, or approved equal.

10.2.25. ELECTRICAL

A. General

- All materials and equipment installed shall be new and unused and shall be of the latest design of manufacturers regularly engaged in the manufacture of such products that conform with the requirements of the Contract Drawings and Specifications.
- 2. These Specifications, the associated Drawings, and other Contract Documents have been prepared with the intention of their yielding, through construction, electrical installations that are fully operable, safe, complete, and in full

compliance with the latest editions of the National Electrical Code, local codes and ordinances, and any other authority having jurisdiction over the Work.

B. Conduit

- All exposed conduit shall be rigid aluminum. All couplings, bushings, and connectors shall be of the same materials and intended for use in a rigid aluminum conduit system. Threads, whether manufactured or made on the job site, shall meet the provisions of the NEC.
- 2. Below-grade plastic conduit shall be Schedule 40 PVC or Schedule 80 PVC, rated for use with 90-degree celsius conductors and for use in direct sunlight, with chemical weld joints. This Contractor shall provide all fittings, adapters, etc. required for a complete installation as required by the Drawings. Reference Section 3.07.B.

C. Wire and Cable

- All conductors shall be of stranded softdrawn copper construction with thermoplastic type THHN/THWN 600 V insulation. Conductors shall be sized as shown on the Drawings. Power and lighting conductor sizes smaller than No. 12 AWG shall not be permitted.
- 2. Control Conductors: Conductors utilized within enclosures utilized for motor control, alarm, and signaling circuitry shall be type MTW, size #14 AWG stranded copper. Control conductors external to enclosures (not including pump and float cables) shall be type THHN/THWN, size #14 AWG stranded copper. Conductors within enclosures shall be neatly routed utilizing plastic Panduit-type wireway. Conductors shall be identified with slide-on plastic sleeves as manufactured by Grafoplast. Conductor identification numbers shall indicate the terminal number on which the conductor shall terminate.

D. Control Panel Enclosures

Main Control Panel

- a. The control system, as listed, shall be housed in a single stainless steel or aluminum, NEMA 3R enclosure suitable for outdoor installations with a stainless steel, three-point vault door closing handle and drip shield. It shall be manufactured from 14 gauge, Type 304 stainless steel. All hardware, including the hinges, latches, and provisions for a 5/8-inch diameter hasp opening for a padlock, shall be stainless steel. BCSD will provide the padlock upon completion of the project.
- b. The enclosure shall have a 12 gauge steel, formed, removable subpanel. The panel shall be degreased, cleaned, and treated with a phosphatizing process, then primed and painted with white industrial-grade baking enamel.
- c. The enclosure shall have a hinged inner door (dead front) fabricated from 5052-H32, 0.080-inch thick (minimum) marine alloy aluminum. The inner door shall be hinged on one side and held closed by two (2) hand operated, 1/4-turn fasteners or thumb screw fasteners on the other side. Operator devices are to be mounted on, or protrude through, the inner door. The hinge and inner door assembly shall be of sufficient strength to

- prevent sagging, buckling or warping of the inner door after inner door devices are installed. A mechanical catch shall be provided that will hold the door open while working inside the panel. Duplicate nameplates for the motor and pump shall be mechanically fastened to the inner door.
- d. Double stainless steel (ASTM A167, Type 304) control panel pedestals, one for pump cables and one for intrinsically safe circuits, shall be furnished, each provided with a screened, louvered vent. The pedestal shall be sized for the application (venting, wiring, and support) and anchored to the top slab with a minimum of four (4) half-inch (1/2") stainless steel anchors (AISI Type 316). Electrical cables shall be sealed with aluminum cord grips, Remke Industries type RSR or equal sized for the application, which provide a gastight seal between the pedestal and the panel. A 1/2-inch (minimum) aluminum mounting plate between the pedestal and the control panel may be required depending on the size and structural rigidity of the panel.
- e. Boxes used for mounting equipment or devices outside the control cabinet shall be stainless steel or aluminum, NEMA 4X construction.

Other Enclosures

Other enclosures shall be stainless steel or aluminum, NEMA 4X with provisions for pad locking. Enclosures larger than 12"x12" shall have a hinged door.

E. Control Panel Components

Phase Monitor

- a. Loss of voltage on any phase, undervoltage, and loss of rotational sequence shall be detected by a phase monitor suitable for the electrical service provided. The monitor shall reset automatically when measured parameters return to the normal range of operation. The phase monitor shall include a means for adjusting drop out voltage, an LED indicating normal conditions, and shall plug into an 8-pin tubular base.
- b. The phase monitor shall be Diversified Electronic Type SUA or SLA or equal.

2. Motor Controller, Overload, and Short Circuit Protection

- Motor starters shall be 600VAC, full voltage, NEMA rated, non-reversing, horsepower rated starters with solid state overload relays.
- b. Contactor shall meet the following requirements:
 - i. Silver alloy power contacts, silver auxiliary contacts.
 - ii. Saddle type, pressure type or wire clamp power terminations rated at 75 degrees Celsius.
 - iii. Operating temperature range of -13 to +131 degrees Fahrenheit.
 - iv. Corrosion resistant treatment on all metal parts.
 - v. Coil voltage operating range of 85%-110% of nominal.
 - vi. DPDT auxiliary contacts rated NEMA A600 with 7200VA make/720VA break/10 amp continuous rating. Provide Allen-Bradley Bulletin 509 or equal.

- c. Overload relay shall meet the following requirements:
 - i. Phase loss protection
 - ii. Selectable class 10, 20, 30 time current trip characteristics.
 - iii. Directly mountable on contactor.
 - iv. 120VAC remote reset solenoid.
 - v. Isolated normally open and normally closed fine silver, 360VA rated contacts.

Provide Allen Bradley Bulletin 592 SMP-1 solid state overload relay with model number 193-ER1D remote reset solenoid or equal.

- d. Short circuit protection shall be a molded case circuit breaker meeting the following requirements:
 - i. 125 amp frame size
 - ii. Fixed magnetic, adjustable thermal trip settings
 - iii. 600VAC, 6 amp SPDT auxiliary contacts to indicate breaker position.
 - iv. 600VAC, 6 amp SPDT alarm contacts to indicate breaker trip.
 - v. AIC rating of 25,000A minimum @480VAC.

 Provide Cutler Hammer E125 frame molded case circuit breaker with catalog no. AUXALRMEPK auxiliary/alarm contact kit or equal.

3. Indicator Lights

- Indicator lights shall be watertight/oiltight, NEMA 4/13, "push-to-test", full voltage type, with lens color and legend plate as indicated on the drawings.
- b. The indicator lights shall be Allen-Bradley Bulletin 800T or equal.

Push Buttons

- a. Push buttons shall be watertight/oiltight NEMA 4/13, black, flush-mounted, full voltage with legend plate as indicated on the drawings.
- b. The push buttons shall be Allen-Bradley Bulleting 800T, type QT10 or equal.

5. Alternator

- a. Alternator shall alternate the lead pump on successive pumping cycles and provide for energization of the lag pump. Four (4) normally-open float switches (high level alarm, lead, lag, and off) shall be wired directly to intrinsically-safe inputs contained within the alternator. The alternator shall contain logic for the detection of malfunctioning float switches and shall adjust the mode of operation so that both pumps may continue to be duplexed. Operation of the duplexor shall revert to normal operation automatically upon detection of proper float switch function. A built-in time delay shall prevent the simultaneous energization of both pumps. An alarm contact shall close in the event of high wet well level is detected only. Contacts shall be SPDT rated 10 A resistive, 345 VA inductive at 120 VAC.
- b. Hand-Off-Auto switches (one for each pump) and a lead selector switch for control of the pump sequence shall be included on the alternator. A

Test/Clear momentary pushbutton shall be provided that energizes the lead pump while the pushbutton is actuated. Release of this pushbutton shall de-energize the load and simultaneously alternate to the other load for testing. During fault conditions, this pushbutton shall reset the fault detection algorithm. LEDs shall indicate the status of the float switch inputs, load outputs and high wet well level/faulty alarm. The alternating relay shall be mounted within the control panel such that these operator interface devices are accessible with the inner door closed while precluding contact with the wiring terminals. The cutout in the inner door shall be framed around the accessible portion of the alternator so that sharp edges are not accessible.

c. The alternator shall be Diversified Electronics model no. ARM-120-AFE or equal.

6. Heaters

- a. The enclosure shall have a combination of three (3) brass sheath, screw-base-type spaceheaters of 100 watts each. The screw bases shall be porcelain. An electric heat thermostat for controlling the spaceheaters shall be installed behind the inner door. The thermostat is not required to be accessible through the inner door.
- b. The heaters shall be Chromalox Type SCB or equal.
- c. The thermostat shall be Dayton Model No. 2E173B or equal.

7. Legend Plates

All equipment, disconnect switches, circuit breakers, motor starters, pushbutton stations, relays, and similar devices shall be clearly labeled or function otherwise identified. Identification labels shall be engraved lamacoid plates having black background with white letters. Attach each plate with aluminum or stainless steel screws.

- 8. Rotary Instrument Switches
 - a. Instrument switches shall be multi-pole rotary switch with Cam-operated contacts. Ammeter switch operation shall ensure that current transformer current paths are maintained regardless of switch position. The switch contacts shall operated by rotation of the shaft. The switch rating shall be 600 volts, 210 (minimum) amperes continuous. The contacts shall be marked for identification following a standard system. The switch design shall be panel mounted with a molded cover. The escutcheon shall be appropriate for the type of electrical service supplied. The switch handle shall be knurled. The cam and contacts shall be silver with double break design.
 - b. The voltmeter and ammeter switches shall be Klockner Moeller Type TO or equal.

Voltmeter and Ammeters

a. Voltmeters and ammeters shall be analog, flush-mounted, switchboard type instruments with rectangular palters. The meter nameplates shall

- indicate voltage or current rating, frequency rating, full scale value and the value of any internal or external compensating resistor required.
- b. The voltmeter shall be complete with cam switch for selecting phase-tophase voltage.
- c. A current transformer shall be provided for each phase. The current transformers shall be Instrument Transformers Model 2 or equal.
- d. The meters shall be General Electric Type AB or equal.

Control Power Transformer

- a. Where utility-supplied, 120VAC electrical service is not available, 120VAC control voltage shall be supplied from the incoming power via a single phase 240 x 480 V primary transformer sized to provide a minimum of 3KVA, 120VAC, 60HZ power. The transformer shall be mounted outside the Main Control Panel Enclosure. The transformer shall be of a type listed for outdoor use and housed in a stainless steel enclosure.
- b. The transformer shall be Square D Class 7400 or equal.

11. Circuit Breakers

- a. Circuit breakers for supplying ancillary systems shall be operable from front of the control panel. The breakers shall be black, rated for the fault current available and shall have the number of poles as indicated on the drawings.
- b. Circuit breakers shall be General Electric Q Line type or equal.

12. Elapsed Time Meter

- a. Elapsed time meter shall utilize 120VAC, 60 Hz, permanent magnet motor that is accurate within plus or minus 50 milli-seconds per start or stop and operate at 100 percent when running at normal frequency. The counter wheels shall be gear and pinion type, 1-inch in diameter and have easy-to-read numbers. The elapsed time meter shall be non-resettable, capable of registering elapsed time up to 99,999.9 hours.
- b. Meter to be Cramer Model 635K or equal.

13. Control Relays

- a. Control relays shall be NEMA 300, plug-in type, with blade-type terminations, a temperature operating range of -30 degrees C to 55 degrees C, integral, mechanical on/off indicator, 10A contacts and voltage rating as required.
- b. Control relays shall be Allen Bradley Bulletin 700, Type HB or equal.

14. Duplex Receptacle

- a. The receptacle shall be 125 volt, 20 amp NEMA 5-20R GFI receptacle with "Test" and "Reset" buttons.
- b. Provide metal cover plate.
- c. The receptacle shall be Leviton 6899-I or equal.

15. Power Distribution Blocks

- a. Power distribution blocks shall be aluminum, tin plated and must be compatible with copper conductors. Each block shall be sized appropriately for the size and number of wires being terminated and shall be based on NEC ampacity tables using 75° Celsius wire.
- b. Blocks to be as manufactured by Marathon or equal.

16. Fuse Holders

- a. Fuse holders shall be 600V, 30 amp high impact thermoplastic with copper alloy, tin plated clips.
- b. Holders to be as manufactured by Marathon or equal.

F. Grounding

- The resistance value of the main grounding conductor measured between the main disconnect and a good earth ground shall not exceed five (5) ohms.
- 2. Ground Rods: Ground Rods shall be the copper clad steel type and shall be a minimum of 10 feet in length, 3/4-inch in diameter. Ground rods shall be equal to those as manufactured by Copperweld Steel Company.
- Grounding electrode conductors shall be bare copper. Equipment grounding conductor shall be copper, THHN/THWN insulated, green (or green with yellow tracer) in color, and rated at 600 volts.

G. Float Switches

- Liquid level detention shall be by sealed, mercury float switches mounted in unbreakable steel shells and encased in solid polyurethane. The float switches shall be weighted, suspended by cables which shall contain the wiring for the switches and shall be covered with a material which is highly resistant to sewage components. Floats requiring fasteners to maintain their depth in the wet well are unacceptable. The tilt bulb hanger and hardware shall be stainless steel (ASTM A167, Type 304).
- 2. The float cables shall be supplied of sufficient length to be installed without splicing.
- 3. Floats to be Consolidated Electric Bulletin B100, Model LS or equal.
- 4. Mounting Bracket to be Ohio Electric Control Model 100-6 or equal.

H. Fuses

- Unless otherwise noted, the fuses shall be dual-element, current-limiting, type RK5 rated for 200,000 amps, voltage as required by drawings. Mini fuses are not acceptable.
- 2. The fuses shall be manufactured by Bussman, Littelfuse or approved equal.

I. Disconnect Switches

- Disconnect switches shall be general duty, NEMA 4X, stainless steel, fusible, front operated, with provisions for padlocking in open or closed position; voltage; ampere rating and number of poles as noted on the drawings, fused unless noted, and rated for use as service entrance equipment. The disconnect shall utilize a quick-make, quick-break mechanism. A class R fuse kit and, where applicable, grounding kits shall be provided.
- 2. The disconnect switch shall be General Electric, Square D, Westinghouse or equal.

J. Service Pole

For overhead service, the Contractor shall provide a 25-foot long, Class 4, wood pole for up to 200 amp service or as required by LG&E. This wood pole shall be installed as a part of the Overhead Service Switch Rack detailed on the Drawings. For services over 200 amp, Contractor shall contact LG&E at 627-3265 for pole classification and requirements. Underground service shall utilize the same switch rack detail as overhead service except that a 12-foot aluminum I-beam shall be substituted for the wood pole.

K. Cord Grips

- 1. Provide standard duty, single eye, single weave, stainless steel support grips of sufficient strength for both power and control cords.
- 2. Cord grips shall be as manufactured by Hubbell or equal.

L. Auxiliary Alarm System

1. General

The station shall be provided with an auxiliary alarm system housed in a NEMA 4X, aluminum or stainless steel, padlockable enclosure. The system shall be powered by battery on constant charge from battery charger.

2. Battery

- a. The battery, when fully charged, shall power the alarm light and horn for a minimum of five hours. The battery shall be a rechargeable, sealed, maintenance-free, lead-calcium, 12 V, 25 ampere-hour (minimum).
- b. The battery shall be Eagle Picher Carefree Magnum or equal.

3. Battery Charger

- a. The battery charger, at a minimum, shall be sized to supply power for the maximum battery charging current plus the remaining demand of the alarm devices.
- b. The battery charger shall be Power Sonic SLA-type, 12 V, dual-rate charger Model No. PSC-124000A or equal.

4. Alarm Light

- a. The alarm light fixture shall be a weatherproof, wall-mounted incandescent, 60 W fixture with a red, polycarbonate globe. The incandescent lamp shall be 12 VDC, 15 W. The alarm light shall be energized through a 12 VDC, 100 W flasher capable of generating 60 flashes per minute.
- b. The globe shall be as manufactured by Major, Model BXVP-10PCR or equal.
- c. The flasher shall be a Wagner Model No. 552 or equal.

5. Alarm Horn

- a. The alarm horn shall be 12 VDC, rated for outdoor, weatherproof service and shall be capable of producing 100 dB as measured 10 feet from the horn. The horn silence pushbutton shall be housed in a NEMA 4X, stainless steel enclosure. The horn silence pushbutton shall be accessible to the general public.
- b. The alarm horn shall be Edwards Weatherproof AdaptaHorn Model 877-E1 or equal.

M. Surge Arrester

- A surge arrester shall be provided to protect equipment against energy surges due to lightning strikes. Surge arrestor shall utilize a metal oxide element inside an enclosure suitable for outdoor mounting. Arrester shall be capable of passing 900 joules of energy per pole and shall be rated for the service voltage.
- 2. Surge arrester shall be GE TRANQUELL secondary surge arrester.

10.3. EXECUTION

10.3.1. GENERAL

The Contractor shall furnish and install as detailed, at the elevations given and where shown on the Drawings, a complete duplex submersible pump station capable of handling raw, unscreened domestic sewage. The station shall include submersible grinder or non-clog sewage pumps, pump discharge connections, guide rails, guide rail supports, lifting cables, discharge piping and valves, access hatches, vents, liquid level sensors, electrical service and controls, data quality telephone service, telemetry signals pre-wired in the control panel for future connection, and a precast concrete wet well and valve vault.

10.3.2. BACKFILL AND FINISH GRADING

A. Class I (No. 9 crushed stone aggregate) backfill material shall be placed around the pump station to within 18 inches of the surface of the surrounding ground, with sufficient allowance for settlement. The remaining fill shall be earth material free of rocks in the areas of piping and excavated material in all other areas. Rock and/or shale excavation may be placed in the top 18 inches of fill but shall not be above piping or any closer than 12 inches from finished grade.

- B. All fill shall be placed so as to load structures symmetrically. Rough grading shall be held below finish grade and then topsoil which has been stockpiled shall be evenly spread over the surface.
- C. Grading shall be brought to the levels shown on the Drawings or to elevations established by the Engineer. Final dressing shall be accomplished by hand work, machine work, or a combination of these methods as may be necessary to produce a uniform and smooth finish to all parts of the regrade.

10.3.3. FACTORY PUMP TESTS

- A. Factory performance and vibration tests shall be conducted on each pump, including the unit to be furnished as a spare.
 - During each performance test, the pump shall be run at each head condition for a sufficient time to permit accurate determination of discharge, head, and power input.
 - 2. Vibration tests to determine horizontal, vertical, and axial spectrum and wave form shall be performed at each bearing location.
- B. All tests shall be run in accordance with the Standards of the Hydraulic Institute.
- C. Certified copies of the factory test reports shall be furnished to the Engineer for review and shall be included in the final O&M Manual.

10.3.4. PRE-COMMISSIONING TEST

- A. When the facility is substantially complete, the pump manufacturer's representative shall visit the job site to inspect, operate, and test the pumping equipment to ensure that it satisfies the manufacturer's installation standards, meets the prescribed performance criteria, and complies with the requirements specified herein.
- B. All adjustments necessary to place the equipment in satisfactory working order shall be made at the time of the pre-commissioning test.
- C. The Contractor shall provide all labor, equipment, materials, water, and other utilities required for testing.
- D. Copies of the pre-commissioning test report shall be furnished to the Engineer for review and shall be included in the final O&M Manual.

10.3.5. ACCEPTANCE TEST

A. After construction is complete, the pre-commissioning test has been performed, and the final O&M Manual has been submitted and approved, each pump shall be given a running test in the presence of the Engineer and other authorized BCSD representatives to determine its ability to operate without vibration or overheating and to deliver its rated capacity under the specified conditions.

- During the test, observations shall be made in regard to head, capacity, and motor input.
- 2. The limits of vibration as set forth in the 13th Edition of the Standards of the Hydraulic Institute shall govern.
- B. All defects or defective equipment revealed by or noted during the test shall be corrected or replaced promptly at the expense of the Contractor, and if necessary, the acceptance test shall be repeated until results acceptable to the Engineer are obtained.
- C. The Contractor shall provide all labor, equipment, materials, water, and other utilities required for testing.
- D. In the event that the Contractor is unable to demonstrate to the satisfaction of the Engineer and BCSD representatives that the units will satisfactorily perform the service required and that they will operate free from vibration and overheating, the pumping units may be rejected. The Contractor shall then remove and replace the equipment at his own expense, and the acceptance test shall be repeated.
- E. Copies of the acceptance test report, including all vibration readings made, shall be furnished to the Engineer for review.

10.3.6. PUMP WARRANTY

A. For <u>submersible pumps</u>, the pump manufacturer's standard warranty against defects in workmanship and material shall be provided to Bullitt Utilities, Inc. for the units being supplied. At a minimum, the warranty shall cover 100% parts and labor for five (5) years from the date of acceptance. The pump manufacturer shall repair or replace defective equipment, parts, or components within ten (10) working days of receipt of defective items shipped prepaid by Bullitt Utilities, Inc. to the manufacturer's authorized repair facility.

For <u>grinder pumps</u>, at a minimum the manufacturer's warranty shall cover 100% parts and labor for one (1) year from the date of acceptance. The pump manufacturer shall repair or replace defective equipment, parts, or components within ten (10) working days of receipt of defective items shipped prepaid by Bulllitt Utilities, Inc. to the manufacturer's authorized repair facility.

- B. Warranties and guarantees by the suppliers of various components in lieu of a single source responsibility by the manufacturer will not be accepted. The manufacturer shall assume prime responsibility for the guarantee of the station and all components.
- C. Those items normally consumed in service, such as oil, grease, etc., shall be the responsibility of BCSD and/or Bullitt Utilities, Inc.

10.3.7. ELECTRICAL INSTALLATION

- A. Excavation, Backfilling and Grading:
 - The Contractor shall perform all earth and rock excavation, backfilling and grading required for this part of the work. Rock excavation shall be made to a

- depth of 4 inches below pipe and filled to subgrade with dense graded aggregate limestone.
- 2. Trenches shall be maintained free of water until backfilling is completed.
- 3. Backfilling material in earth excavation shall be clean earth to a line at least 12 inches above the top of the conduit. From this line upward, rock not more than 6 inches in diameter may be used provided it is spaced at least 12 inches apart. Filling between rock shall be of clean earth, thoroughly tamped in 6-inch layers to the finished grade.
- 4. Depth of bury for all conduit shall be a minimum of 24 inches below finished grade.

B. Conduit:

- 1. PVC shall be concrete encased where it passes under roadways. PVC shall not be used where exposed on the exterior nor where exposed to direct sunlight. This Contractor shall plan his work so that runs of conduit miss equipment by other trades. Conduit bushings shall have insulating material which has been permanently fastened to the fittings. Bushings for conduit 1-1/2 inches trade size and larger shall be complete with grounding lug and shall be bonded to the box by means of bare copper wire. All field bends shall be made with standard tools and bending equipment manufactured especially for this purpose. Bends in metallic conduit shall be made while cold and in no case shall the conduits be heated. Conduits shall not be bent through more than 90 degrees. Size of conduits shall not be less than that required by the National Electrical Code.
- All conduit installed on concrete surfaces shall be anchored with spacer type conduit clamps preventing contact between the conduit and the concrete surface. Conduits penetrating walls shall be grouted in place to form a seal. Conduits penetrating floors shall be sleeved.
- 3. Provide an anti-oxidation compound on threads of all metallic conduit.
- 4. All conduit shall be run continuous between devices with a minimum number of bends. Back-to-back 90 degree bends (180 degree change of direction) will not be acceptable. During construction, all new conduits shall be kept dry and free of moisture and debris.
- 5. No conduit smaller than 3/4-inch trade size shall be used.
- Conduit Schedule:

Location	Sched. 40 PVC	Sched.80 PVC	Aluminum
Underground/Encas	sed X	X	
Direct Buried		X	
Exposed		>	X
Emergence from UC	3	>	X

C. Wire and Cable:

- 1. Direct Burial Cable: No cable buried directly in the earth (not in raceway) will be allowed on this project.
- Wire shall not be installed until all work of any nature that may cause injury to the wire is completed. Mechanical means shall not be used in pulling in wires No. 8 or smaller. Approved wire pulling lubricant shall be used as required to prevent insulation damage and overstressing of the wire while pulling through

- conduit. In no case shall conductors be greased or coated with any substance injurious to the conductor insulation or sheath.
- 3. All wires connected to terminal boards, terminal blocks, or to other similar terminals shall terminate by means of pressure terminals. Where terminal boards, terminal blocks, etc. are designed and manufactured to accept bare wire and have a pressure plate on each side of the wire, no pressure terminals on the wire will be required. Where the wire would have to encircle the holding screw to make a proper connection, the wire terminals are required.
- 3. Where the wire is shown larger than that required for the load, it is done so for voltage drop or other purposes and must be installed as shown. Conductors connected to the main service disconnect and to the individual pump starters shall be sized to accommodate the full capacity of the service disconnect and starters. Where the wire is stranded, the removal of strands in order to install the wire into a lug provided on any equipment will not be permitted. A larger lug shall be installed which will accept the wire size indicated.
- 4. Float switches and associated mounting hardware shall be installed such that they may remain in place during pump removal.

D. Grounding:

- Ground rods shall be driven vertically into the earth so that the top of the rod is at least 1 foot below finished grade. Where rock is encountered at a depth of less than 4 feet, rods shall buried in a trench at not less than 2 feet below finished grade.
- 2. Connections to ground rods and all other ground connections below grade shall have a minimum mechanical contact surface area between the conductor and the ground rod of not less than three square inches. All connections made below finished grade shall be exothermic. Installation of grounding conductors shall be such that they are not exposed to physical damage. All connections shall be firm and tight.
- 3. All metal electrical equipment cabinets shall be securely bonded to a grounding conductor running through any conduit terminating at the cabinet or enclosure by use of a grounding lug bushing and jumper wire to the enclosure wall. Control cabinets shall be provided with an equipment ground bus (including lugs or screw terminals) securely bonded to the enclosure. Junction boxes and other enclosures shall utilize an equipment ground bus or lug as required to securely bond the equipment grounding conductor to the enclosure. The grounding conductor shall be connected with pressure connectors at the main disconnect to the main grounding system. Where screw terminals or set screw lugs are used, sufficient lugs shall be provided such that not more than one conductor is installed into each lug or terminal.
- 4. No flexible conduit shall serve as a grounding conductor.
- 5. Where lightning arresters are furnished and installed either separately or with equipment and the grounding connections are not inherently provided, a suitable, separate grounding conductor shall connect the lightning arrester with a separate ground rod. This rod shall be bonded with any adjacent grounding system.

10.3.8. UTILITIES

A. Electricity

The Contractor shall coordinate the installation of a complete electrical service with the Louisville Gas & Electric Company (LG&E). When applying for service, the Contractor shall inform LG&E that the service is for a wastewater pumping facility. Developer's Engineer shall furnish all electrical data requested by LG&E. Raceway, conductors, and other installation details shall be in accordance with the requirements of LG&E. The Contractor shall be responsible for securing all permits, inspections, and approvals necessary for the transfer of a functional electrical service and the associated LG&E account to Bullitt Utilities, Inc., upon acceptance of the facility.

END OF SECTION

Hunters Hollow Pump Station

Contract Documents & Construction Specifications

Prepared for:

Bullitt Utilities, Inc. Blue Lick Road Hillview, Kentucky 40129

December 2014

Prepared by:

3703 Taylorsville Road, Suite 205 Louisville, Kentucky 40220

PROPOSAL FORM

TO: Bullitt Utilities, Inc. P. O. Box 91588 Louisville, Kentucky 40291

Gentlemen:

The undersigned, having carefully examined the Plans and Specifications for Hunters Hollow Pump Station and having visited the site to familiarize himself, itself or themselves with local conditions affecting the work and cost thereof, hereby certifies that he, it or they will provide all necessary labor, supervision, machinery, tools, equipment, materials and any incidentals necessary to perform the work as delineated, defined, specified, and required by the Plans and Specifications and as directed by the Engineer as defined therein for the following lump sum bid:

Total Lump Sum of
Dollars
AndCents
The undersigned also agrees to the following:
(I) Within five (5) days from the date of "Notice of Acceptance" of this Proposal, to execute the Contract, and to furnish a satisfactory contract bond.
(2) To begin work within five (5) days after Contract is executed not later than 2015, and to prosecute said work in such a manner as to complete the Project as soon as possible.
(3) The undersigned also agrees to accept as full remuneration for extra work as provided in the Specifications sums based upon the following unit prices.
The undersigned acknowledges the right of the Owner to accept or reject the Proposal submitted.
Accompanying this Proposal is a certified check or a bid bond for \$

INFORMATION FOR BIDDERS

- 1. Bid Requirements. The Bid must be submitted on the blank form of Proposal annexed to these documents. The Bid shall give the price for the items of work required as shown by the drawings and specifications in figures, in ink. The Bidder shall sign the Bid and enclose in a sealed envelope marked "Hunters Hollow Pump Station".
- 2. Inspection of the Site. Each Bidder shall visit the site of the proposed work and fully acquaint himself with the existing conditions, and should inform himself of the facilities involved, the difficulties and restrictions attending the performance of the contract. The Bidder shall thoroughly examine and familiarize himself with the drawings, specifications and all other contract documents. The Contractor by execution of the contract shall in no way be relieved of any obligation under it due to his failure to receive or examine any form or legal instrument or to visit the site and acquaint himself with the conditions there existing. THE BIDDER SHALL DETERMINE/VERIFY ALL QUANTITIES AND BID ACCORDINGLY.
- 3. Bid Security. Each Bidder must accompany his Bid with bid bond or a certified check, made payable to Bullitt Utilities, Inc., (hereinafter called Owner) for an amount equal to 5% of the amount of the Bid. No Bid will be considered unless it is accompanied by the required bid security.
- 4. Bidder's Qualifications. Each Bidder shall upon request by the Owner submit a Statement of Bidder's Qualifications. The Owner shall have the right to take such steps as necessary to determine the ability of the Bidder to perform his obligation under the contract.

The Bidder shall furnish the Owner all such information and data for this purpose as it may request. The Owner reserves the right to reject any Bid where an investigation of the available information does not satisfy the Owner that the Bidder is qualified to carry out the terms of the contract.

- 5. Opening of Bids. Sealed bids will be received by the Engineer up to______ P.M., _____, 2015 in the office of the Engineer. The Owner reserves the right to review all bids prior to a formal award. This will be a private bid opening. The Owner has the right to select the best qualified bid, not necessarily the lowest bid.
- 6. Withdrawal of Bids. Bids may be withdrawn at any time prior to the time fixed for the opening of Bids. No Bid may be withdrawn for a period of thirty (30) days after the date of the opening thereof without the consent of the Owner. The bid security of any Bidder withdrawing his Bid in accordance with the foregoing conditions will be returned promptly, if required for this project.
- 7. Award of Contract. The Contract will be awarded to the qualified Bidder submitting the lowest Bid subject to the conditions of the Invitation for Bids. The Owner reserves the right to reject any and all Bids and to waive any informality in Bids received whenever such rejection or waiver is in its interests. The Contract should be awarded ________, 2015, with a start date of ________, 2015, to insure completion by the date specified in Item 10 below.

8. Surety and Insurance. Prior to the execution of the Contract by the Owner, the successful Bidder will be required to present the name of the surety company to be offered as surety, and to execute a Performance Bond in the penal sum not less than the amount of the Contract awarded.

The Contractor must also furnish the Owner prior to the execution of the Contract a Certificate of Insurance certifying that he is covered by Workmen's Compensation in accordance with statutory requirements and by insurance against public liability and property damage sufficient to work under the proposed Contract as required by the section of the Special Provisions entitled "Insurance."

- 9. Interpretation of Plans and Specifications. If any person contemplating the submission of a Bid for the proposed Contract is in doubt as to the true meaning of any part of the plans, specifications, or other Contract Documents, he shall submit a written request for an interpretation thereof to the Engineer at least three days prior to the date fixed for the receipt of Bids. Any interpretation of the Contract documents prior to the receipt of Bids will be made only by written addenda to each person receiving a set of such documents.

The Owner, upon written request by the Contractor, shall amend the time of completion of this Contract provided that the Owner has determined that an extension of time is required and is contingent on circumstances beyond the control of the Contractor.

- 11. Contract Documents. The Contract Documents shall consist of the Information for Bidders, General Conditions, Bid Bond, Performance Bond, the Proposal, the Contract Agreement, Special Provisions (if applicable), Pump Station Technical Specifications (Section 10), the Contract Drawings and all addenda issued, if any.
- 12. Construction Observation. General construction observation will be provided by the Engineer. Full time inspection will not be provided.
- 13. Contract Documents. Each Bidder may obtain copies of the proposed Contract Documents from the Engineer (BlueStone Engineers, PLLC.) for a non-refundable payment of \$50.00 for each complete set of Plans, Specifications and Contract Documents.
- 14. Contract Concellation: The Owner has the right to cancel this contract at any time. If contract is cancelled the Owner will pay for work performed to date.

GENERAL CONDITIONS

DEFINITIONS

Whenever used in any of the Contract Documents, the following meanings shall be given to the terms herein defined:

- a. The term "Contract" means the Contract executed by the Owner and the Contractor, of which these General conditions form a part.
- b. The term "Owner" refers to the Owner, Bullitt Utilities, Inc., acting on behalf of the Owner and Owner.
- c. The "Contractor" means the person, firm, or joint venture entering into the contract with the Owner to construct and install the improvements embraced in this contract.
 - d. The term "Engineer" means BlueStone Engineers, PLLC.
- e. The term "Project Manager" means the person selected by Bullitt Utilities, Inc., acting on their behalf who will be the Owner's representative on this project. The contractor and subcontractors shall coordinate their work through the Project Manager. All payment requests, change orders and any additions, deletions and/or modifications to the Contract Documents shall be processed through the Project Manager.
- f. The term "Geotechnical Engineer" means the person or firm hired by the Contractor to supervise and test as required, pavement, sub-grade construction and pavement placement and/or soil testing and soil borings.
- g. The term "Project Area" means the site project, including extents of off-site improvements, within which are the specified contract limits of the improvements contemplated to be constructed in whole or in part under this Contract.
- h. The term "Local Government" means Kentucky Department of Transportation, the Bullitt County Engineer, and the Bullitt County Sanitation District.
- i. The term "Contract Documents" means and shall include the following: Executed Agreement, General Conditions, General Special Provisions, Detailed Technical Specifications, Drawings, Kentucky Department of Transportation Specifications and Standard Drawings, the Bullitt County Planning & Zoning regulations, the Bullitt County erosion control regulations, and Bullitt County Sanitation District and/or Louisville MSD Specifications and Standard Drawings.
- j. The term "Drawings" means the drawings listed in the Index of Drawings on the title plan sheet.
- k. The term "Technical Specifications" means that part of the Contract Documents which describes, outlines, and stipulates: the quality of the materials to be furnished, the quality of the workmanship required, and the methods to be used in carrying out the construction work to be performed under this Contract.

- I. "Written Notice" shall be deemed to have been duly served if delivered in person to the individual or to a member of the firm or to an officer of the joint venture for whom it is intended, or to an authorized representative of such an individual, firm or joint venture, or if delivered to or sent by registered mail to the last business address known to him who gives the notice with a copy sent to the central office of the Contractor.
- m. The term "Work" small mean the furnishing of all labor, materials, equipment, transportation, services and other incidentals necessary or convenient to the successful completion of the Contract and the carrying out of all the duties and obligations imposed by the Contract.
- n. The term "Extra Work" shall mean such additional labor, materials, equipment, and other incidentals as are required to complete the contract for the purpose for which it was intended but not shown on the Plans or called for in the Specifications, or is desired by the Owner in addition to that work called for in the Plans and Specifications.

SUPERINTENDENCE BY CONTRACTOR

- a. Except where the Contractor is an individual and gives his personal superintendence to the work, the Contractor shall provide a competent superintendent, satisfactory to the Owner and the Engineer, on the work at all times during working hours with full authority to act for him. The Contractor shall also provide an adequate staff for the proper coordination and expediting of this work.
- b. The Contractor shall lay out his/her own work, and he shall be responsible for all work executed by him under the Contract. He/she shall verify all figures and elevations before proceeding with the work and will be held responsible for any error resulting from his failure to do so.

OTHER CONTRACTS

The Owner reserves the right to award all or a part of this work to one or more than one contractor. If more than one contract is awarded, each Contractor shall cooperate fully with such other contractors by scheduling his own work with that to be performed under other contracts as may be directed by the Owner. The Contractor shall not commit or permit any act which will interfere with the performance of work by any other contractor as scheduled.

FITTING AND COORDINATION OF THE WORK

The Contractor shall be responsible for the proper fitting of all work and for the coordination of the operations of all trades, subcontractors, or material men engaged upon this Contract. He/she shall be prepared to guarantee to each of his Sub-contractors the locations and measurements which they may require for the fitting of their work to all surrounding work.

MUTUAL RESPONSIBILITY OF CONTRACTORS

If, through acts or neglect on the part of the Contractor, any other contractor or any Subcontractor shall suffer loss or damage on the work, the Contractor shall settle with such other contractor or Subcontractor by agreement or arbitration, if such other contractor or Subcontractor will so settle. If such other contractor or Subcontractor shall assert any claim against the Owner on account of any damage alleged to have been so sustained, the Owner

will notify this Contractor, who shall defend at his/her own expense any suit based upon such claim, and if any judgment or claim against the Owner shall be allowed, the Contractor shall pay or satisfy such judgment or claim and pay all costs and expenses in connection therewith.

PROGRESS SCHEDULE

The Contractor shall supply a project schedule to be reviewed by the Project Manager and the Engineer.

PAYMENTS TO CONTRACTOR

Initial Payment

Initial payment of 25% of the contract price will be made by the Owner to the Contractor are monies advanced for the purpose of assisting the Contractor to expedite the work of construction. The Contractor shall be responsible for the care and protection of all materials and work upon which payments have been made until final acceptance of such work and materials by the Owner. Such payments shall not constitute a waiver of the right of the Owner to require the fulfillment of all terms of the Contract and the delivery of all improvements embraced in this Contract complete and satisfactory to the Owner in all details.

Final Payment

After final inspection and acceptance by the Owner and Local Government of all work under the Contract, the Contractor shall prepare his/her requisition for final payment which shall be based upon the carefully measured or computed quantity of each item of work at the applicable lump sums stipulated in the Agreement. The total amount of the final payment due the Contractor under this Contract shall be the amount computed as described above less all previous payments. Final payment to the Contractor shall be made subject to his furnishing the Owner with a release in satisfactory form of all claims against the Owner arising under and by virtue of his Contract, other than such claims, if any, as may be specifically expected by the Contractor from the operation of the release.

The Owner, before paying the final estimate, may require the Contractor to furnish releases or receipts from all Subcontractors having performed any work and all persons having supplied materials, equipment (installed on the Project) and services to the Contractor, if the Owner deems the same necessary in order to protect its interests. The Owner, however, may if it deems such action advisable, make payment in part or in full to the Contractor without requiring the furnishing of such releases or receipts, and any payments so made shall in no way impair the obligations of any surety or sureties furnished under this Contract.

Withholding Payments

The Owner may withhold from any payment otherwise due the Contractor so much as may be necessary to protect the Owner and, if it so elects, may also withhold any amounts due from the Contractor to any Subcontractors or material dealers for work performed or material furnished by them. The foregoing provisions shall be construed solely for the benefit of the Owner and will not require the Owner to determine or adjust any claims or disputes between

the Contractor and his Subcontractors or material dealers or to withhold any monies for their protection unless the Owner elects to do so. The failure or refusal of the Owner to withhold any monies from the Contractor shall in no way impair the obligations of any surety or sureties under any bond or bonds furnished under this Contract.

Payments Subject to Submission of Certificates

Each payment to the Contractor by the Owner shall be made subject to submission by the Contractor of all written certifications required of him and his Subcontractors.

CHANGES IN THE WORK

- a. The Owner may make changes in the scope of the work required to be performed by the Contractor under the Contract or make additions thereto or omit work therefrom, without invalidating the Contract and without relieving or releasing the Contractor from any of his/her obligations under the Contract or any guarantee given by him/her pursuant to the Contract provisions, and without affecting the validity of the guaranty bonds, and without relieving or releasing the surety or sureties of said bonds. All such work shall be executed under the terms of the original Contract unless it is expressly provided otherwise.
- b. Except for the purpose of affording protection against any emergency endangering health, life, limb or property, the Contractor shall make no change in the materials used or in the specified manner of constructing and/or installing the Improvements or supply additional labor, services or materials beyond that actually required for the execution of the Contract, unless in pursuance of a written order from the Owner authorizing the Contractor to proceed with the change. No claim for an adjustment of the Contract Price will be valid unless so ordered.
- c. If applicable lump sums are contained in the Agreement (established as a result of either a lump sum bid or a Supplemental Schedule of Lump sums), the Owner may order the Contractor to proceed with desired changes in the work, the value of such changes to be determined by the measured quantities involved and the applicable lump sums specified in the Contract; provided that in case of a unit contract the net value of all changes does not increase or decrease the original total amount shown in the Agreement by more than twenty-five percent (25%).
 - d. Each change order shall include in its final form:
 - 1. A detailed description of the change in the work.
 - 2. The Contractor's proposal (if any) or a confirmed copy thereof.
 - 3. A definite statement as to the resulting change in the contract price and/or time.
 - 4. The statement that all work involved in the change shall be performed in accordance with Contract requirements except as modified by a change order.

INFORMATION NOT GUARANTEED

All information given on the Drawings or in the Contract Documents relating to soundings and borings, materials encountered, ground water, subsurface conditions, and existing pipes and other structures is from the best sources at present available to the Engineer. All such information and the drawings of existing construction are furnished only for the information and convenience of Bidders.

It is agreed and understood that the Engineer does not warrant or guarantee that the materials, conditions and pipes or other structures encountered during construction will be the same as those indicated by the boring samples or by the information given on the drawings or in the Contract Documents. The engineer has made every attempt to verify existing conditions; however the Contractor must satisfy himself regarding the character, quantities, and conditions of the various materials and the work to be done.

It is further agreed and understood that the Contractor will not use any of the information made available to him/her or obtained in any examination made by him in any manner as a basis or ground of claim or demand of any nature against the Engineer and/or Owner arising from or by reason of any variance which may exist between the information offered and the actual materials or structures encountered during the construction work, except as may otherwise be provided for in the Contract Documents.

TERMINATION: DELAYS AND LIQUIDATED DAMAGES

- a. Termination of Contract--Breach. If the Contractor refuses or fails to prosecute the work with such diligence as will insure its completion within the time specified in these Contract Documents, or as modified as provided in these Contract Documents, the Owner, by written notice to the Contractor, may terminate the Contractor's right to proceed with the work. Upon such termination, the Owner may take over the work and prosecute the same to completion, by contract or otherwise, and the Contractor and his sureties shall be liable to the Owner for any additional cost incurred by the Owner for liquidated damages for any delay in the completion of the work as provided below. If the Contractor's right to proceed is so terminated, the Owner may take possession of and utilize in completing the work such materials, tools, equipment, and plants as may be on the site of the work and necessary therefore.
- b. Liquidated Damages for Delays. If the work is not completed within the time stipulated in the Special Provisions, including any extensions of time for excusable delays as herein provided, the Contractor shall pay to the Owner as fixed, agreed, and liquidated damages (it being impossible to determine the actual damages occasioned by the delay) for each calendar day of delay, until the work is completed, the amount set forth in the Special Provisions hereof, and the Contractor and his sureties shall be liable to the Owner for the amount thereof.
- c. Excusable Delays. The right of the Contractor to proceed shall not be terminated nor shall the Contractor be charged with liquidated damages for any delays in the completion of the work due:
 - To any acts of the Government, including controls or restrictions upon or requisitioning of materials, equipment, tools, or labor by reason of war, national defense, or any other national emergency.

- 2. To any acts of the Owner.
- 3. To causes not reasonably foreseeable by the parties to this Contract at the time of the execution of the Contract which are beyond the control and without the fault or negligence of the Contractor, including, but not restricted to, acts of God or of the public enemy, acts of another contractor in the performance of some other contract with the Owner, fires, floods, epidemics, quarantine, restrictions, strikes, freight embargoes, and weather of unusual severity such as hurricanes, tornadoes, cyclones and other extreme weather conditions; and
- 4. To any delay of any Subcontractor occasioned by any of the causes specified in subparagraphs 1, 2, and 3 of this paragraph c.

Provided, however, that the Contractor promptly notify the Owner within ten (10) days in writing of the cause of the delay. Upon receipt of such notification the Owner shall ascertain the facts and the cause and extent of delay. If, upon the basis of the facts and the term of this Contract, the delay is properly excusable, the Owner shall extend the time for completing the work for a period of time commensurate with the period of excusable delay.

ASSIGNMENT OR NOVATION

The Contractor shall not assign or transfer, whether by an assignment or novation, any of its rights, duties, benefits, obligations, liabilities, or responsibilities under this Contract without the written consent of the Owner; provided, however, that assignments to banks, trust companies, or other financial institutions may be made without the consent of the Owner. No assignment or novation of this Contract shall be valid unless the assignment or novation expressly provides that the assignment of any of the Contractor's rights or benefits under the Contract is subject to a prior lien for labor performed, services rendered, and materials, tools, and equipment supplied for the performance of the work under this Contract in favor of all persons, firms, or joint venture rendering such labor or services or supplying such materials, tools, or equipment.

DISPUTES

- a. All disputes arising under this Contract or its interpretation whether involving law or fact or both or extra work, and all claims for alleged breach of contract shall within ten (10) days of commencement of the dispute be presented by the Contractor to the Owner for decision. All papers pertaining to claims shall be filed in quadruplicate. Such notice need not detail the amount of the claim but shall state the facts surrounding the claim in sufficient detail to identify the claim, together with its character and scope. In the meantime, the Contractor shall proceed with the work as directed. Any claim not presented within the time limit specified in this paragraph shall be deemed to have been waived, except that if the claim is of a continuing character and notice of the claim is not given within ten (10) days of its commencement, the claim will be considered only for a period commencing ten (10) days prior to the receipt by the Owner thereof.
- b. The Contractor shall submit in detail his/her claim and his/her proof thereof. Each decision by the Owner will be in writing and will be mailed to the Contractor by registered or certified mail, return receipt requested, directed to his/her last known address.

c. If the Contractor does not agree with any decision of the Owner, he shall in no case allow the dispute to delay the work but shall notify the Owner promptly that he is proceeding with the work under protest, and he may then except the matter in question from the final release.

TECHNICAL SPECIFICATIONS AND DRAWINGS

Anything mentioned in the Technical Specifications and not shown on the Drawings or shown on the Drawings and not mentioned in the Technical Specifications shall be of like effect as if shown on or mentioned in both. In case of difference between Drawings and Technical Specifications, the Technical Specifications shall govern. In case of any discrepancy in Drawings and/or Technical Specifications, the matter shall be immediately submitted to the Engineer, without whose decision said discrepancy shall not be adjusted by the Contractor, save only at his/her own risk and expense.

SHOP DRAWINGS

- a. All required shop drawings, machinery details, layout drawings, etc., shall be submitted to the Engineer in (3) copies for approval sufficiently in advance of requirements to afford ample time for checking, including time for correcting, resubmitting and rechecking if necessary. The Contractor may proceed, only at his/her own risk, with manufacture or installation of any equipment or work covered by said shop drawings, etc., until they are approved, and no claim by the Contractor for extension of the contract time will be granted by reason of his/her failure in this respect.
- b. If any Drawings show variations from the requirements of the Contract because of standard shop practice or other reason, the Contractor shall make specific mention of such variation in his letter of transmittal in order that, if acceptable, suitable action may be taken for proper adjustment of Contract price and/or time; otherwise the Contractor will not be relieved of the responsibility for executing the work in accordance with the Contract even though the Drawings have been approved.
- c. If a Shop Drawing is in accord with the Contract or involves only a minor adjustment in the interest of the Owner not involving a change in Contract price or time, the Engineer may approve the Drawing. The approval shall be general, shall not relieve the Contractor from his/her responsibility for adherence to the Contract or for any error in the drawing.

REQUEST FOR SUPPLEMENTARY INFORMATION

It shall be the responsibility of the Contractor to make timely requests of the Engineer for any additional information not already in his possession which should be furnished by the Engineer under the terms of this Contract, and which he will require in the planning and execution of the work. The request for supplementary information shall not constitute expansion of the Engineer's scope of work with the Owner. Any such work should be considered an extra and shall be charged to the Contractor.

MATERIALS AND WORKMANSHIP

- a. Unless otherwise specifically provided for in the Technical Specifications, all workmanship, equipment, materials and articles incorporated in the work shall be new and the best grade of the respective kinds for the purpose. Where equipment, materials, articles or workmanship are referred to in the Technical Specifications as "equal to" any particular standard, the Engineer shall decide the question of equality.
- b. The Contractor shall furnish to the Engineer for approval the manufacturer's detailed specifications for all machinery, mechanical and other special equipment, which he/she contemplates installing together with full information as to type, performance characteristics, and all other pertinent information as required, and shall likewise submit for approval as required full information concerning all other materials or articles which he/she proposes to incorporate in the work.
- c. Machinery, mechanical and other equipment, materials, or articles installed or used without such prior approval shall be at the risk of subsequent rejection.
- d. Materials specified by reference to the number or symbol of a specific standard, such as an A.S.T.M. Standard, a Federal Specification or other similar standard, shall comply with requirements in the latest revision thereof, and any amendment or supplement thereto in effect on the date of the Invitation for Bids, except as limited to type, class or grade, or modified in the Technical Specifications, shall have full force and effect as though printed therein.
- e. The Owner or the Project Manager may require the Contractor to dismiss from the work such employee or employees as the Owner or the Project Manager may deem incompetent, or careless, or insubordinate.

SAMPLES, CERTIFICATES AND TESTS

The Contractor shall submit all material or equipment samples, certificates, affidavits, etc., as called for in the Contract Documents or required by the Project Manager, promptly after award of the Contract and acceptance of the Contractor's bond. No such material or equipment shall be manufactured or delivered to the site, except at the Contractor's own risk, until the required samples or certificates have been approved in writing by the Project Manager. Any delay in the work caused by late or improper submission of samples or certificates for approval shall not be considered just cause for an extension of the Contract time.

Each sample submitted by the Contractor shall carry a label giving the name of the Contractor, the project for which it is intended, and the name of the producer. The accompanying certificate or letter from the Contractor shall state that the sample complies with Contract requirements, shall give the name and brand of the product, its place of origin, the name and address of the producer and all specifications or other detailed information which will assist the Project Manager in passing upon acceptability of the sample promptly. It shall also include the statement that all materials or equipment furnished for use in the project will comply with samples and/or certified statements.

Approval of any materials shall be general only and shall not constitute a waiver of the Owner's right to demand full compliance with Contract requirements. After actual deliveries, the Project Manager will have such check tests made as he deems necessary in each instance and may

reject materials and equipment and accessories for cause, even though such materials and articles have been given general approval. If materials, equipment or accessories which fail to meet check tests have been incorporated in the work, the Project Manager will have the right to cause their removal and replacement by proper materials or to demand and secure such reparation by the Contractor as is equitable.

PERMITS AND CODES

a. The Contractor shall give all notices required by and comply with all applicable laws, ordinances, and codes of the local government. All construction work and/or utility installations shall comply with all applicable ordinances and codes including all written waivers. Before installing any work, the Contractor shall examine the Drawings and Technical Specifications for compliance with applicable ordinances and codes and shall immediately report any discrepancy to the Owner. Where the requirements of the Drawings and Technical Specifications fail to comply with such applicable ordinances or codes, the Owner will adjust the Contract by change order to conform to such ordinances or codes (unless waivers in writing covering the difference have been granted by the governing body or department) and make appropriate adjustment in the Contract price or stipulated lump sums.

Should the Contractor fail to observe the foregoing provisions and proceed with the construction and/or install any utility at variance with any applicable ordinance or code, including any written waivers (notwithstanding the fact that such installation is in compliance with the Drawings and Technical Specifications), the Contractor shall remove such work without cost to the Owner, but a change order will be issued to cover only the excess cost the Contractor would have been entitled to receive if the change had been made before the Contractor commenced work on the items involved.

- b. The Contractor shall at his/her own expense secure and pay to the appropriate department of the local government the fees or charges for all permits for street pavements, sidewalks, shed, removal of abandoned water taps, sealing of house connection drains, pavement cuts, buildings, electrical, plumbing, water, gas and sewer permits required by the local regulatory body, utility or any agency.
- c. The Contractor shall comply with applicable local laws and ordinances governing the disposal of surplus excavation, materials, debris and rubbish on or off the Project Area and commit no trespass on any public or private property in any operation due to or connected with the Improvements embraced in this Contract.

CARE OF WORK

- a. The Contractor shall be responsible for all damages to person or property that occur as a result of his/her fault or negligence in connection with the prosecution of the work and shall be responsible for the proper care and protection of all materials delivered and work performed until completion and final acceptance, whether or not the same has been covered in whole or in part by payments made by the Owner.
- b. In an emergency affecting the safety of life, limb or property, including adjoining property, the Contractor, without special instructions or authorization from the Owner, is authorized to act at his/her discretion to prevent such threatened loss or injury, and he/she shall so act. He/she shall likewise act if instructed to do so by the Owner.

- c. The Contractor shall avoid damage as a result of his/her operations to existing sidewalks, streets, curbs, pavements, utilities (except those which are to be replaced or removed), adjoining property, etc., and he/she shall at his/her own expense completely repair any damage thereto caused by his operations.
- d. Any damage to the site, building(s), utilities, driveways, pavement, or whether stated herein or not caused by the Contractor, his employees or agents of him, shall be repaired to the satisfaction of the Engineer, at no cost to the Owner or Engineer. Any landscaping materials such as earth, sod, shrubs, trees, seed or other which may be required to be moved or removed shall be replaced in kind.
- e. The Contractor shall shore up, brace, underpin, secure and protect as may be necessary, all foundations and other parts of existing structures adjacent to, adjoining, and in the vicinity of the site, which may be in any way affected by the excavations or other operations connected with the construction of the Improvements embraced in this Contract. The Contractor shall be responsible for the giving of any and all required notices to any adjoining or adjacent property Owner or other party before the commencement of any work. The Contractor shall indemnify and save harmless the Owner, the Project Manager and the Engineer from any damages on account of settlements or the loss of lateral support of adjoining property and from all loss or expense and all damages for which the Owner, Project Manager and the Engineer may become liable in consequence of such injury or damage to adjoining and adjacent structures and their premises.
- f. Utility, access or other disturbances shall be kept to a minimum and coordinated with the Owner prior to beginning such work. Special attention should be given to maintaining resident access at all times when work is being performed in front of residences. The Contractor shall notify the residents, 24-hours in advance to prepare for any disturbance.
- g. Standard erosion control measures shall be applied to this Project. Measures shall consist of stone bags over basin inlets, stone bag inlet protection, filter fabric control fence, headwall inlet protection, stone bag velocity checks, erosion matting and stabilized construction entrances, sedimentation, erosion control as indicated on the erosion control plan.

ACCIDENT PREVENTION

- a. The Contractor shall exercise proper precaution at all times for the protection of persons and property and shall be responsible for all damages to persons or property, either on or off the site, which occur as a result of his/her prosecution of the work. The safety provisions of applicable laws and building and construction codes shall be observed, and the Contractor shall take or cause to be taken such additional safety and health measures as the Owner may determine to be reasonably necessary. Machinery, equipment and all hazards shall be guarded in accordance with the safety provisions of the "Manual of Accident Prevention in Construction" published by the Associated General Contractors of America, Inc., to the extent that such provisions are not in conflict with applicable local laws.
- b. The Contractor shall maintain an accurate record of all cases of death, occupational disease, or injury requiring medical attention or causing loss of time from work, arising out of and in the course of employment on work under the Contract. The Contractor shall promptly furnish the Owner with reports concerning these matters.

c. The Contractor shall indemnify and save harmless the Owner and the Engineer from any claims for damages resulting from property damage, personal injury, and/or death suffered or alleged to have been suffered by any person as a result of any work conducted under this Contract.

SANITARY FACILITIES

The Contractor shall furnish, install, and maintain ample sanitary facilities for the workmen. As the needs arise, a sufficient number of enclosed temporary toilets shall be conveniently placed as required by the sanitary codes of the State and local governments. Drinking water shall be provided from an approved source, so piped or transported as to keep it safe and fresh and served from single service containers or satisfactory types of sanitary drinking stands or fountains. All such facilities and services shall be furnished in strict accordance with existing and governing health regulations.

USE OF PREMISES

- a. The Contractor shall confine his equipment, storage of materials, and construction operations to the Contract limits as shown on the Drawings and as prescribed by ordinances or permits, or as may be desired by the Owner, and shall not unreasonably encumber the site or public rights-of- way with his materials and construction equipment.
- b. The Contractor shall comply with all reasonable instructions of the Owner and the ordinances and codes of the local government regarding signs, advertising, traffic, fires, explosives, danger signals, and barricades.

REMOVAL OF DEBRIS, CLEANING, ETC.

The Contractor shall clean up the work area on a daily basis, legally dispose of all surplus excavated material and debris weekly, and keep the Project Area and public rights of way reasonably clear. Upon completion of the work he shall remove all temporary construction facilities, debris and unused materials provided for the work, and put the whole site of the work and public rights of way in a neat and clean condition.

INSPECTION

- a. All materials and workmanship shall be subject to inspection, examination, or testing by the Owner and the Project Manager at any and all times during manufacture or construction and at any and all places where such manufacture or construction is carried on. The Owner and the Project Manger shall have the right to reject any and all defective material and workmanship or require its correction. Unacceptable workmanship shall be satisfactorily corrected. Rejected material shall be promptly segregated and removed from the Project Area and replaced with material of specified quality without charge therefor. If the Contractor fails to proceed at once with the correction of rejected workmanship or defective material, the Owner may by contract or otherwise have the defect remedied or rejected materials removed from the Project Area and charge the cost of the same against any monies which may be due the Contractor, without prejudice to any other rights or remedies of the Owner.
- b. The Contractor shall furnish promptly all materials reasonably necessary for any tests which may be required. All tests required by the Owner or Project Manager will be performed in

such manner as not to delay the work unnecessarily and will be made in accordance with the provisions of the Technical Specifications.

c. The Contractor shall notify the Project Manager 24 hours in advance of backfilling or concealing any facilities to permit proper inspection. If any facilities are concealed without approval or consent of the Engineer, Project Manager, Bullitt County, and Kentucky Department of Transportation, the Contractor shall uncover for inspection and recover such facilities, all at his/her own expense, when so requested by the Project Manager.

Should it be considered necessary or advisable by the Project Manager at any time before final acceptance of the entire work to make an examination of work already completed by uncovering the same, the Contractor shall on request promptly furnish all necessary facilities, labor, and materials. If such work is found to be defective in any important or essential respect due to fault of the Contractor or his Subcontractors, the Contractor shall defray all the expenses of such examination and of satisfactory reconstruction. If, however, such work is found to meet the requirements of the Contract, the actual cost of labor and material necessarily involved in the examination and replacement, plus 15 percent of such costs to cover superintendence, general expenses and profit, shall be allowed the Contractor, and he/she shall in addition, if completion of the work of the entire Contract has been delayed thereby, be granted a suitable extension of time on account of the additional work involved.

- d. Inspection of materials and appurtenances to be incorporated in the Improvements embraced in the Contract may be made at the place of production, manufacture or shipment, whenever the quality justifies it, and such inspection and acceptance, unless otherwise stated in the Technical Specifications, shall be final, except as regards (1) latent defects, (2) departures from specific requirements of Contract, (3) damage or loss in transit, or (4) fraud or gross mistakes amounting to fraud. Subject to requirements contained in the preceding sentence, the inspection of materials as a whole or in part will be made at the Project Site.
- e. Neither inspection, testing, approval nor acceptance of the work in whole or in part by the Owner or its agents shall relieve the Contractor or his/her sureties of full responsibility for materials furnished or work performed in strict accordance with the Contract.

REVIEW BY OWNER AND PROJECT MANAGER

The Owner and the Project Manager, their authorized representatives and agents shall at all times have access to and be permitted to observe and review all work, materials, equipment, payrolls, personnel records, employment conditions, material invoices and other relevant data and records pertaining to this Contract.

FINAL INSPECTION

When the Improvements embraced in this Contract are substantially completed, the Contractor shall notify the Owner and the Project Manager in writing that the work will be ready for final inspection on a definite date which shall be stated in the notice. The notice will be given at least ten (10) days prior to the date stated for final inspection and bear the signed concurrence of the representative of the Owner having charge of inspection. If the Project Manager determines that the status of the Improvements is as represented, he will make the final inspection along with any governing agencies. The inspection party will also include the representatives of each department of the local government having interest in portions of the construction by virtue of jurisdiction and authority to protect and maintain public improvements.

DEDUCTION FOR UNCORRECTED WORK

If the Owner deems it not expedient to require the Contractor to correct work not done in accordance with the Contract Documents, an equitable deduction from the Contract Price will be made by agreement between the Contractor and the Owner and subject to settlement in case of dispute as herein provided.

PATENTS

The Contractor shall hold and save the Owner, Project Manager and the Engineer, their officers and employees harmless from liability of any nature or kind, including costs and expenses for, or on account of, any patented or unpatented invention, process, article, or appliance manufactured or used in the performance of the Contract, including its use by the Owner unless otherwise specifically stipulated in the Technical Specifications.

WARRANTY OF TITLE

No material, supplies, or equipment to be installed or furnished under this Contract shall be purchased subject to any chattel mortgage or under a conditional sale, lease-purchase or other agreement by which an interest therein or in any part thereof is retained by the seller or supplier. The Contractor shall warrant good title to all materials, supplies, and equipment installed or incorporated in the work and upon completion of all work, shall deliver the same together with all improvements and appurtenances constructed or placed thereon by him to the Owner free from any claims, liens, or charges. Neither the Contractor nor any person, firm or joint venture furnishing any material or labor for any work covered by this Contract shall have any right to a lien upon any improvement or appurtenance thereon. Nothing contained in this paragraph, however, shall defeat or impair the right of persons furnishing materials or labor to recover under any bond given by the Contractor for their protection or any rights under any law permitting such persons to look to funds due the Contractor in the hands of the Owner. The provisions of this paragraph shall be inserted in all subcontracts, and notice of its provisions shall be given to all persons furnishing materials for the work when no formal contract is entered into for such materials.

BOND REQUIREMENTS

Execution of Agreements: Performance Payment Bond (The Performance Bond will be at the Owner's discretion).

- a. Subsequent to the award and within ten days after the prescribed forms are presented for signature, the successful bidder shall execute and deliver to Bulitt Utilities, Inc, an agreement in the form included in the Contract Documents.
- b. Having satisfied all conditions of award as set forth elsewhere in these Documents, the successful bidder shall, within the period specified in paragraph "A" above, furnish a separate one-hundred percent (100%) of the accepted bid as security for the faithful performance of the Contract and a one hundred percent (100%) material payment bond in an amount at least equal to fifty percent (50%) of the performance bond amount. Such bond shall be in the same form as that included in the Contract Documents and shall bear the same date as, or a date subsequent to, that of the Contract. The current power of attorney for the person who signs or any surety company shall be attached to such bond. This bond shall be

signed by a guaranty or surety company listed in the latest issue of the U.S. Treasury Circular 570, and the penal sum shall be within the maximum specified for such company in said Circular 570.

c. The Contractor shall provide a maintenance bond in the amount of \$5,000.00 to cover costs of all claims, loss or damage, and expenses or reconstruction, or additional work occurring because of settlement of backfill. The date of this bond shall extend one year from the date of acceptance of work.

GUARANTEE

In addition to all material and workmanship, all paving, sod, seeding, etc., which are placed, sowed, planted or replanted by the Contractor, shall be guaranteed for a period of one year from the date of acceptance.

TIME OF COMPLETION

The work which the Contractor is required to perform under this Contract shall be commenced at the time stipulated by the Owner and shall be fully completed by the dates stated above.

RESPONSIBILITIES OF CONTRACTOR

Except as otherwise specifically stated in the Contract Documents and Technical Specifications, the Contractor shall provide and pay for all materials, tools, labor, equipment, water, lights, heat, power, transportation, superintendence, temporary construction of every nature, charges, levies, fees or other expenses and all other services and facilities of every nature whatsoever necessary for the performance of the Contract and will deliver all Improvements embraced in this Contract complete in every respect within the specified time.

COMMUNICATIONS

- a. All notices, demands, requests, instructions, approvals, proposals, and claims must be in writing.
- b. All papers required to be delivered to the Owner shall, unless otherwise specified in writing to the Contractor, be delivered to the Project Manager.
- c. Any such notice shall be deemed to have been given as of the time of actual delivery or (in the case of mailing when the same should have been received in due course of post or in the case of telegrams, at the time of actual receipt, as the case may be).
- d. A Notice to Proceed will not be issued until all approvals have been secured and the Contractor can start on all segments of the work without interference or delay from the Government.

GENERAL SPECIAL PROVISIONS

SCOPE OF WORK

The intent of these Specifications and Plans is to provide for the construction of Hunters Hollow Pump Station as shown on the Plans, and appurtenant work, complete and accepted. More precisely, the work to be executed under this Contract consists of, but not limited to, furnishing all qualified supervision, labor, equipment, materials, and performing all work required for the site grading, rock removal, drainage, roadway improvements, sanitary sewers and pump station, and all other items delineated as part of these Plans and Specifications to complete project.

"AS BUILT" SANITARY SEWER PLANS

The Owner's Kentucky Registered Land Surveyor shall keep records of all deviations from the Contract Drawings and shall, upon completion of the project, prepare "Final Record" Drawings. The final record information on the Drawing will be provided by the Professional Land Surveyor with BlueStone Engineers, PLLC.

If site conditions vary from those indicated, the Contractor shall notify the Design Engineer immediately. The Design Engineer will investigate such conditions and, if warranted, the Design Engineer with Bullitt County Sanitation District approval shall make revisions or adjustments. The Contractor shall not proceed with that portion of the work until the investigation is complete.

"Final Record" information may be added to the original mylars rather than generating a new set of reproducible drawings.

Below are check list items for "Final Record".

- The Land Surveyor shall stamp (seal) and initial ALL SHEETS in the space provided.
- Any horizontal or vertical change in alignment that differs from the original design plans.
 - Changes in Stations on:
 - ♦ Manholes
 - Pump Station Wet Wells
 - Pump Station Valve Vaults
 - ♦ Air Releases
 - ♦ Clean-outs
 - Changes in Elevations for:
 - ◊ Inverts
 - ♦ Rims
 - ♦ Structures

- Manhole collar size.
- All revisions in pipe, sizes, lengths and slopes.
- Changes in offset distances of structures.
- Property Service Connections:
 - ♦ Size
 - ♦ Length
 - ♦ Depth
 - ♦ Station
 - ♦ End Location
- Changes in lot or unit designations
 - ♦ Lot numbers
 - ♦ Tract numbers
 - Apartment unit designation
 - ♦ Condominium unit designation
 - Patio home unit designation

STANDARD DRAWINGS AND SPECIFICATIONS

When numbered Drawings are referred to as standard drawings in the Plans and Specifications, they shall be construed to be the current standard as issued by the Kentucky Department of Transportation, Standard Specifications for Road and Bridge Construction, latest edition, and shall apply to this project, unless otherwise specified in these General Special Provisions. Additionally, standard specifications shall apply for all local regulatory agencies and utilities, including but not limited to Louisville Water Company, Louisville Gas & Electric Company, Bullitt County Sanitation District, Louisville & Jefferson County Metropolitan Sewer District, Kentucky Transportation District, etc.

INTERPRETATION OF PLANS AND SPECIFICATIONS

If the Contractor, in the course of the work, finds any discrepancy between the Plans and the physical conditions of the locality, or any errors or omissions in the Plans or in the layout as given by survey points and instructions, he/she shall immediately inform the Engineer, in writing, and the Engineer shall promptly verify the same. Any work done after such discovery, until authorized, will be done at the Contractor's risk.

Any difference between Plans and Specifications and questions as to the meaning of Plans and Specifications shall be interpreted by the Engineer, whose decision shall be final and binding on all parties concerned.

The Contractor will not be allowed to take advantage of any errors or omissions in the Plans and Specifications. The Engineer will provide full instructions when errors or omissions are discovered.

WORK IN EASEMENTS AND ON PRIVATE PROPERTY

The Contractor shall conduct his/her operations within the limits of the perpetual easements and shall not enter upon the private property outside of the perpetual easement. If the Contractor's operations within the perpetual easement do cause any damage to the private property outside the perpetual easement, it will be the responsibility of the Contractor to restore and/or replace any private property damaged to a condition as good as or better than the condition that existed prior to the Contractor's operations, at no cost to the Owner or Engineer. This statement or action of the Contractor does not relieve the Contractor from any legal liability for trespassing on private property.

Buildings wholly or partially within the perpetual easements shall not be damaged or otherwise affected by the Contractor's operations.

Trees shall be removed only with direct permission of the Project Manager and/or the Owner. Trees to be saved shall be identified by the Project Manager and/or Owner. The Contractor shall pay special attention to the preservation of all existing vegetated areas along this boundary.

All ground surfaces which are disturbed by the Contractor's operations so as to interfere with the natural drainage shall be graded by the Contractor to conform with contiguous property and shall also be sloped and ditched as necessary to permit surface water to drain to the new drainage facility as specified hereinafter, as indicated on the Plans, or as directed by the Project Manager.

Materials such as trees and debris, which are not suitable for work within the project limits shall be removed, and disposed of on-site as directed by the Owner.

RESTORATION OF GROUND SURFACES DISTRUBED BY THE CONSTRUCTION OPERATIONS

Following the excavation and fill work on this Contract, ground surfaces, both public and private, which were excavated, filled or disturbed, shall be properly graded, sloped, machine finished, seeded and fertilized as noted in the Detailed Special Provisions.

UTILITIES

The Engineer and its agents have made reasonable efforts to determine the location of all utilities and to indicate their location on the Plans. However, it shall be the duty of the Contractor to verify the location of all existing sewers, drains, pipes, conduits, gas and water lines and mains, power lines, or other underground or overhead objects or structures which might be encountered, whether shown on the Plans or not.

An attempt will be made by all utility companies with facilities which interfere with the construction to remove, relocate or adjust these facilities. In the event the Contractor should encounter any public or private sewer, drain, conduit, gas or water lines, etc., crossing or adjacent to the Improvement which interferes with the construction, the Contractor shall lower or

adjust the facility to remove the obstacle from the construction area. Said lowering or adjusting shall be as required by the utility company owning the facility and/or the property. Owner, subject also to the direction of the Project Manager. Costs for removing, relocating, etc., such facilities, as defined in this paragraph, shall be resolved between the Owner and the Contractor as described in Part I, General Conditions. Changes in the Work.

The Contractor shall not begin operations which may interfere or impair the normal service being rendered by public or private utility companies unless approved by the affected utility company.

The Contractor shall notify the utility companies of his/her intention to start construction and give them sufficient time to relocate their installations so that normal service to the customer is not interrupted.

The Contractor's attention is directed to the Utility Protection Center (Before-U-Dig) 1-800-752-6007, (or 811) which was established to provide accurate locations of below-ground utilities, i.e., cables, electric wires, and gas and water lines. The Contractor shall notify the Utility Protection Center 48 hours in advance of any construction on this project.

The following is a list of additional precautions to be observed when working near or around gas and electric facilities:

Gas and Electric Facilities

1) The gas and electric company shall be notified in writing so they will have five (5) working days' notice before work is begun. Where revamping of electric facilities will be required for the proper construction of this improvement, at least two weeks advance notice will be given to the gas and electric company to allow sufficient time for engineering work to be completed.

On major revamps or relocations, longer notice will be necessary.

- 2) In case of rock excavation under or near the gas and electric company's electric lines, blasting shall not be done unless a representative of the utility company is present.
- 3) When excavating near utility poles, the Contractor shall contact the gas and electric company to determine if the pole should be braced or the trench sheeted to prevent the pole from shifting into the open trench. In case a utility pole is in a direct route of this improvement and the gas and electric company agrees to brace the pole so the work can be installed near the pole, the Contractor shall compact backfill in accordance with the specifications or as directed by the Engineer to prevent the pole from settling.
 - 4) Cables, ropes or attachments of any sort shall not be attached to utility poles.
- 5) If damage to a main or service should occur, the appropriate utility company shall be notified immediately.
- 6) Extra precautions shall be taken during construction near gas mains. If gas pipelines require exposing as a precautionary measure, kindly advise by calling the appropriate utility, as depicted on the Plans.

7) Minimum clearance shall be strictly adhered to when gas and sewer lines cross. At no time shall clearance be less than what is shown on the Plans.

Nothing set forth above shall relieve the Contractor from determining the location of other such facilities not named, avoiding damage thereto, and/or paying for the restoration or replacement of all such facilities, named or not named, that are damaged by his operations.

SAFETY PRECAUTIONS

The Contractor shall comply with the U.S. Department of Labor Safety and Health Regulations for construction promulgated under the Occupational Safety and Health Act of I970 (PL 9I-596) and under Section I07 of the Contract Work Hours and Safety Standards Act (PL 9I-54), or latest revision. If at any time in the opinion of the Engineer the work is not properly protected and in all respects safe, both with respect to the Engineer, workmen, public or private property, and if under such circumstances the Contractor does not or cannot immediately put same into proper and approved condition, or if the Contractor or his representative is not upon the ground so that he can be immediately notified of the unsafe condition of the work or insufficiency of the safety precautions, then the Project Manager may put the work into such condition that it shall be, in his/her opinion, in all respects safe, and the Contractor shall pay all such expenses of labor and materials as may have been used for this purpose by the Project Manager. Such actions of the Project Manager shall in no way relieve the Contractor of the entire responsibility for any cost, loss or damage by any part sustained on account of the insufficiency of the safety precautions taken by him or by the Project Manager acting under the authority of this paragraph.

AIR POLLUTION CONTROL AND DUST CONTROL

Air Pollution Control: The Contractor shall obtain and conform to the air pollution control criteria of the Kentucky Department for Natural Resources, Air Pollution Division. Air pollution is likely to occur due to construction operations and shall be minimized by wetting down bare soils during windy periods, requiring the use of properly operating combustion emission control devices on construction vehicles and equipment used by contractors, and by encouraging the shutdown of motorized equipment not actually in use.

Trash burning will not be permitted on the construction site.

If temporary heating devices are necessary for protection of the work, such devices shall be of an approved type that will not cause pollution of the air.

Dust Control: The Contractor shall make such provisions as are necessary for controlling dust resulting from his operations at all times when such dust would, in any way, interfere with or cause any delay or other inconvenience to traffic, both vehicular and pedestrian, or have any detrimental effect upon the environment.

CLEANING UP

Before final acceptance of the work, the Contractor shall clean all roads, drives, walks, lawns, private property, rights-of-way, and structures, leaving them in a neat and clean condition as originally found, to the satisfaction of the Project Manager. At no time shall the roads used as haul roads be allowed to become muddy or in any other way dangerous to the public.

INDEMNITY

The Contractor shall indemnify, protect and save harmless the Owner, Project Manager and the Engineer, their officers and agents, from all suits or claims of every kind or description brought against the Owner, Project Manager and the Engineer, or its officers and/or agents, for or on account of any injuries or damages to persons or property received or sustained by any person or persons, or from the Contractor, his/her servants or agents, by or on account of work done under the Contract or extensions of, or additions thereto, whether caused by negligence or not, or in consequence of any negligence in guarding the same, or by or on account of any accident or of any acts of omission of the Contractor, his servants or agents; and the Contractor further agrees that as much of the money due to him under this agreement as shall be considered necessary by the Project Manager may be retained until all such suits or claims for damages aforesaid have been settled and evidence to that effect has been furnished to the satisfaction of the Owner.

PUBLIC LIABILITY INSURANCE

The Contractors shall include the cost of all insurance as called for in the Specifications.

The Contractor shall not commence work under this Contract until he has obtained all the insurance required hereunder and such insurance has been approved by the Owner, nor shall the Contractor allow any subcontractor to commence work on this subcontract until all similar insurance required of the subcontractor has been so obtained and approved. Approval of the insurance by the Owner shall not relieve or decrease the liability of the Contractor hereunder.

For the duration of the Contract, the Contractor shall maintain Workmen's Compensation and Employer's Liability Insurance as required by law not less than \$1,000,000.00. Contractor shall require subcontractors to provide Workmen's Compensation and Employer's Liability Insurance with the same minimum limits.

For the duration of this Contract, Contractor shall maintain: Comprehensive General Liability including Contractor's Liability, Blanket Contractual Liability, Personal Injury Liability with "C" exclusion deleted, Complete Operations and Products Liability all on the occurrence basis, and Broad Form Property Damage.

Completed Operations Liability shall be kept in force for at least two years after the date of final completion.

Bodily Injury:

Each Occurrence

\$1,000,000.00

Aggregate

\$1,000,000.00

Property Damage:

Each Occurrence

\$1,000,000.00

Aggregate

\$1,000,000.00

For the duration of this Contract, Contractor shall maintain: Comprehensive Automobile Liability including non-Ownership and hired-car coverage as well as that for owned vehicles.

Bodily Injury:

Each Occurrence

\$1,000,000.00

Each Person

\$1,000,000.00

Property Damage:

Each Occurrence

\$250,000.00

For public liability against hazards arising out of blasting and explosion and covering damages therefrom to property, \$500,000.00 on account of any one accident and \$1,000,000.00 on account of all accidents; and to persons, \$500,000.00 on account of any one accident and \$1,000,000.00 on account of all accidents.

The required insurance must be written by a company licensed to do business in the state in which the project is to be constructed. In addition, the insurers must be acceptable to the Owner. Bullitt Utilities, Inc., is to be named as an insured party in the insurance policy.

The Contractor shall not cause any insurance to be canceled or permit any insurance to lapse. All insurance policies shall include a clause to the effect that the policy shall not be cancelled or reduced, restricted or limited until 30 days after the Owner has received written notice as evidenced by return receipt of registered or certified letter. Certificates of Insurance shall contain transcripts from the proper office of the insurer, evidencing in particular those insured, the extent of the insurance, the locations, and the operations in which the insurance applies, the expiration date, and the above-mentioned notice of cancellation clause.

LIQUIDATED DAMAGES

In accordance with Section 108 of the Kentucky Department of Transportation's Standard Specifications and as amended herein, as actual damages for any delay in completion of the work which the Contractor is required to perform under this Contract are impossible to determine, the Contractor and his/her sureties shall be liable for and shall pay to the Owner the sum of \$300.00 as fixed, agreed, and liquidated damages for each calendar day of delay from the stipulated date for completion as determined by the Bid, or as modified in accordance with an approved Change Order until such work is satisfactorily completed and accepted.

DETAILED SPECIAL PROVISIONS

LAYOUT OF WORK

The construction plans will enable Contractor or his/her Surveyor to establish the control points for construction of the roadways, drainage improvements, sanitary sewer, and other site improvements as herein conveyed by these Specifications and accompanying plans. Benchmarks are marked and noted for the contractor's reference. The Engineer will not provide actual field staking for the Contractor. The Engineer will provide traverse points and benchmarks only. Any other construction staking, as required by the Contractor, will be provided by the Contractor's Land Surveyor registered in the State of Kentucky.

CLEARING AND GRUBBING

The site area is currently open and shall include moving of any debris or shrubs in order to perform the work.

UNCLASSIFIED EXCAVATION

Unclassified excavation shall consist of the removal, replacement and grading of materials taken from within the limits of the work contracted and is to be performed in conjunction with pump station construction.

Topsoil and sod shall be removed from all areas to be paved (if applicable). Topsoil shall be stockpiled nearby at a location designated by the Owner and the Project Manager.

Payment for unclassified excavation shall be included as part of the Contractor's Unit Bid Price.

INSPECTION AND ACCEPTANCE

Final inspection and acceptance will be performed by the engineer and owner's representative/operator.

SITE GRADING

Shape grades to smooth lines between contours or spot elevations. Grade within 0.25 foot of established elevation in general grading. Protect newly graded and disturbed areas against erosion.

Unless otherwise shown on the Drawings, slope the sub-grade evenly to provide drainage away from the building or walls in all directions.

Do all cutting, filling, backfilling and grading required to bring the entire project area to subgrade as follows: fifteen inches (15") below the standard pavement specification and six inches (6") below proposed landscape areas, or as otherwise required by specific surfaces being proposed by these construction plans.

At the completion of finish grading operation, spread the available topsoil to a minimum thickness of approximately six inches (6"). Topsoil shall only be applied to areas not to be paved or occupied by buildings.

Upon completion of the work, remove from the site all surplus and discarded materials, machinery, equipment and supplies and restore the site to a neat, presentable condition.

Materials for the backfill shall be clean and unfrozen. It may contain masonry or rock fragments not more than six inches (6") in maximum dimension provided. None are to be placed closer than 24-inches to any surface or unfinished grade.

Engineered fill is to be placed at 6-inch lifts to 95% Proctor Density and shall be certified by a Geotechnical Engineer.

REINFORCED CONCRETE PIPE

All reinforced concrete pipe (RCP) shall conform to ASTM Specification Designation C-76, for circular pipe and C-507 for elliptical pipe, latest revision, Class III Wall B.

Pipe shall be laid by proceeding upgrade with the spigot end of bell-and-spigot pipe, and the tongue ends of tongue-and-groove pipe pointing in the direction of flow.

All work under this item shall conform to Kentucky Department of Transportation Standard Specifications, Section 6ll.

PVC pipe is to be installed per Bullitt County Sanitation District Specifications and Ten State Standards.

PIPE JOINTS

Reinforced Concrete installation shall conform to Kentucky Department of Transportation, Standard Specifications, Section 6II.

BEDDING

Pipe shall be laid on bedding of six inches (6") of sand or #57 stone (KDOT) Kentucky Department of Transportation's classification, (per paragraph 804.07 KDOT Standard Specifications) below the outside bottom of the pipe and one-half of the outside of the pipe diameter above the bottom of the pipe outside of road right-of-way. Inside of road right-of-way, the sand or #57 stone shall be compacted to the roadway sub-grade or within twelve inches (12") of final grade outside of payement area.

PROTECTION OF INSTALLED PIPE

As the work progresses, the interior of the pipe shall be protected from and cleaned of all dirt, cement, extruded joint materials, debris, and other extraneous materials. Whenever pipe laying is stopped for any significant length of time, such as at the end of a workday, the unfinished end shall be protected from displacement, floatation, cave-in, and in-wash of soil or debris. A suitable temporary tight-fitting plug, stopper or bulkhead shall be place in the exposed bell or groove end of the pipe.

BACKFILLING TRENCH

Trenches shall be backfilled in six-inch (6") layers and each layer thoroughly tamped to pavement sub-grade for pipe laid under the proposed paving. Pipe laid outside the limits of the paving or curb and gutter shall be tamped in six-inch (6") layers to the top of the pipe where no paving or entrance drives are encountered. Where entrance drives or cross streets are encountered, tamping shall be as described in six-inch (6") layers to the pavement sub-grade. Where tamping is only required to the top of the pipe, the remainder of the ditch shall be backfilled with loose earth and earth heaped above the top of the ground over the trench and allowed to settle until towards completion of the project, after which excess earth shall be removed from the top of the trench to the level of the ground and disposed of by the Contractor.

CONCRETE ENCASEMENT

All sewers within easements or rights-of-way, where crown of pipe is less than 30-inches below ground surface at the time of installation, shall be protected with concrete encasement. Concrete encasement to be installed per Bullitt County Sanitation District and Ten State Standards Specifications.

SAND

The sand bedding and backfill as shown in the pipe trench detail shall be as specified in Section 804 of the Kentucky Department of Transportation Standard Specifications for Road and Bridge Construction.

Percent Passing the 9.5 mm (3/8") sieve 100 Percent Passing the 150mm (No. 700) sieve15 Maximum

All work performed under this item shall conform to the paragraph on "Backfilling Trench" above.

NO. 57 STONE

No. 57 stone bedding shall be placed as shown in the trench detail and compacted according to Section 303 of the Kentucky Department of Highway Specifications.

The aggregate base should be crushed limestone as required by Section 805.04.03 of the Kentucky Department of Transportation Specifications graded as to produce a final mixture in place, meeting the following percentage by weight:

1 1/2 inch square sieve	100
1 inch square sieve	95-100
½ inch square sieve	25-60
No. 4 square sieve	0-10
No. 8 inch square sieve	0-5

All work performed under this item shall conform to Paragraph above "Backfilling Trench".

MANHOLES

All pre-cast manholes and appurtenances shall be installed per Bullitt County Sanitation District specifications.

MANHOLE TESTING

An exfiltration test shall be performed on each manhole in accordance with ASTM C-969, Section 8.23. The manhole shall be filled to a minimum of two feet (2') above the crown of the largest pipe in the manhole. The test period should be 24-hours. The allowable leakage shall be 0.1 gall./(ft. of diameter)(ft. of head)(h).

HEADWALLS

Headwalls for culverts shall be constructed with Class "A" concrete (3,500 pounds per square inch @ 28 days) and as detailed on the Plans, as shown in the KDOT and Bullitt County Sanitation District's Standard Drawings. Work performed under this item shall conform to Kentucky Department of Transportation Specifications, Section 610.

CONCRETE CONSTRUCTION

Concrete shall be "ready mixed" conforming to ASTM Specifications C-94. Air entraining admixture for concrete shall conform to ASTM Specifications C-260-77.

Reinforcing steel shall be deformed steel bars conforming to ASTM Specification A6l5, Grade 60.

Welded wire fabric shall conform to ASTM Specification Al85.

Expansion Joint Filler shall be I/2" remolded asphaltic impregnated material conforming to ASTM DI75I, latest revision, unless otherwise noted on the Plans.

All concrete to be used in construction of headwalls, wingwalls, culverts, catch basins or for any other structural purposes shown on the Plans shall be 3,500 psi and delivered only in quantities for immediate use. Concrete which has set prior to placement shall be discarded.

Forms shall be constructed in accordance with ACI 347. Form ties shall be removed to a point I/2" inside the wall and the resulting holes filled with a rich cement grout.

Bending, placing, fastening and supporting of reinforcement shall be in accordance with ACI (3l8-95).

Mechanical, insertion type, internal vibrators shall be used to compact the concrete.

Concrete work shall be protected against frost and rapid drying and kept moist at least three days after placing. Concrete may not be placed when the temperature is below 35 degrees Fahrenheit, unless sufficient framework and canvas or other housing is maintained at 50 degrees Fahrenheit by the Contractor.

ROCK REMOVAL

The Contractor's unit bid price shall include all removal of mass and trench rock related to all the proposed construction work required by the Plans and Specifications.

The Contractor shall familiarize himself with the rock conditions prior to submitting a bid. The site is accessible to the Contractor for test excavating provided that the Contractor assumes liability for injury or damage incurred during the course of his testing work and that test excavations are backfilled.

Property service connections are to be constructed to the edge of easement or to 15-feet past the edge of right-of-way as directed. Property service connections to be constructed within the right-of-way shall be extended 15' past the edge of right-of-way. Rock is to be shattered to six feet (6') beyond the end of the property service connections.

BONDS

Performance Bond: The Contractor may be required to provide a Performance Bond equal to 100% of the Bid Price to assure the performance of the contract and obligations arising thereunder. This will be at the discretion of the Owner.

GUARANTY

In addition to all material and workmanship, all paving, seeding, and other replacement work, which shall be guaranteed for a period of one (1) year from the date of acceptance of the work under the Contract.

SAFETY REQUIREMENTS

Contractor's Responsibility for Safety: The Contractor shall do whatever is necessary for safety and be solely and completely responsible for conditions of the job site, including safety of all persons and property during the Contract period. This requirement shall apply continuously and not be limited to normal working hours.

Federal, State and Local Safety Requirements: The Contractor's safety provisions shall conform to the federal and state Departments of Labor Occupational Safety and Health Act (KYOSHA), and all other applicable federal, state, county and local laws, ordinances, codes, the requirements set forth herein, and any regulations that may be specified in other parts of these Contract Documents. Where any of these are in conflict, the more stringent requirements shall be followed. The Contractor's failure to thoroughly familiarize himself/herself with the aforementioned safety provisions shall not relieve him/her from compliance with the obligations and penalties set forth therein.

Safe Access to the Work: The Contractor shall, at all times, provide proper facilities for safe access to the work by the Owner, Project Manager, Engineer and authorize officials, federal, state and local agencies.

STAKES

For Line and Grade During Construction: The Contractor shall retain a registered Land Surveyor licensed in the Commonwealth of Kentucky to set stakes for the line and grade during construction of the roads, drains and sanitary sewers under this Contract. It will be the Contractor's responsibility to lay out the work from the control set by the Engineer and to transfer elevations from benchmarks.

Should horizontal and vertical survey control be disturbed, the Contractor's Land Surveyor shall relocate the disturbed points, at the Contractor's expense.

If any site conditions vary from those indicated, the Contractor shall notify the Design Engineer, and the Project Manager will investigate such conditions and, if warranted, the Project Manager shall make revisions or adjustments. The Contractor shall not proceed with that portion of the work until the investigation is complete.

EROSION PREVENTION AND SEDIMENT CONTROL

The Contractor shall follow the approved plan for the duration of the Contract, providing supplemental erosion and sediment controls as may be needed and shall maintain and remove all temporary erosion and sediment control devices, but only when they are no longer necessary as determined by the Owner, Project Engineer and the Bullitt County Sanitation District.

The Contractor shall be responsible for the removal of any debris and sedimentation in the existing sewers, drains, catch basins, etc., which is attributed to his work under this Contract.

PROTECTION AND HANDLING FLOWS OF EXISTING SEWERS, DRAINAGE FACILITIES AND DITCHES

The Contractor shall take proper precautions to prevent damage to existing sanitary and storm sewers and drainage facilities, such as headwalls, catch basins, drains, etc.

The Contractor shall make repairs or replacements, or rebuild such damaged section or sections of the existing sewers, drains, headwalls, catch basins, etc., as directed by the Project Manager. All such repairs, replacements and rebuilding shall be paid for by the Contractor.

The Contractor shall make such provisions as are necessary for handling all flows in existing connections, drains, catch basins and ditches by pipes, flumes, or by other approved methods at all times when his operations would, in any way, interfere with normal functioning of these facilities.

The Contractor shall be responsible for the removal of any debris and sedimentation in the existing drains, catch basins, ditches, etc., which is attributable to his work under this Contract.

The Contractor shall use extreme caution when working around creeks and shall remove only the trees necessary to allow the utility crossing. No other trees within 15-feet of the top of bank are to be disturbed.

MAINTENANCE AND CONTROL OF TRAFFIC

Unless otherwise shown in the Contract Documents, all roads and streets, affected by construction, shall be kept clean from mud and debris and open to all traffic by the Contractor. Where so provided on the Drawings or as directed by the Engineer, the Contractor may route the traffic over approved detour routes. The Contractor shall keep the portion of the Project being used by public traffic in such condition that traffic will be adequately and safely accommodated.

HUNTERS HOLLOW Pump Station and Force Main Design Calculations

Prepared for: Bullitt Utilities, Inc. Blue Lick Road Louisville, KY 40129

Prepared by:

3703 Taylorsville Road, Suite 205 Louisville, Kentucky 40220

December 28, 2014

BULLITT UTILITIES, INC.

PUMP STATION & FORCE MAIN DESIGN CALCULATIONS

Background

Based on an Agreed Order for the Hunters Hollow Sanitary Sewer System, a pump station is being provided to divert wastewater flow from the existing treatment plant site located at Blue Lick Road (Bullitt Utilities) to Bullitt County Sanitation District treatment facilities nearby. The pump station will serve the Hunters Hollow Subdivision, Subdivision II. Smith Grove Addition, and areas along Blue Lick Road. This area is bounded by Jefferson County to the north, I-65 to the west, the Union Tool site to the south, and Pioneer Village to the east, located in Bullitt County. Regional planning efforts with the Bullitt County Sanitation District (BCSD) provides for diversion of wastewater flows from the Hunters Hollow system to both the Union Tool Pump Station (pumping to the Willowbrook Wastewater Treatment Facility located off Brooks Road on the west side of I-65), and also to a regional pump station south of John Harper Road (pumping into the Pioneer Village collection system to the Pioneer Village Wastewater Treatment Facility). Since neither facility can handle the full amount of flow from the Hunters Hollow system, the flow will be split between the two treatment facilities with flows ranging from 160,000 gallons to 300,000 gallons depending on which treatment facility is being pumped to.

Wastewater Flow Calculations:

The Hunters Hollow WWTP was originally designed to treat up to 300,000 gallons per day, with wet weather flows sometimes exceeding this amount and with bypasses occurring. This is most likely due to Infiltration and Inflow that exists in the system, with Wet Weather Peak flows exceeding 1 MGD. A temporary high-rate treatment facility installed onsite has supported these totals over the past 6 to 9 months. The typical average daily dry weather flow for the Hunters Hollow system is 160,000 gpd.

Hunters Hollow Average Daily Flow (ADF) = 160,000 gpd = 111 GPM

For peak flow conditions, a Peaking Factor of 3.91 will be utilized.

PF =
$$18 + (P)^{1/2} / 4 + (P)^{1/2}$$
 (P = 1.6, for approximate population of 1600 est)
PF = $18 + 1.26 / 4 + 1.26 = 3.66$

Peak Daily Flow = 160,000 GPD x 3.66 = 585,600 GPD = 407 GPM

(The pump station will be sized as a temporary facility and thus will not typically pump up to the total Peak Daily Flow to BCSD facilities. Note, that as indicated in the background summary, the maximum flow condition available at the Bullitt County Sanitation District will be limited to 300,000 gallons per day, or 208 GPM at either Wastewater Treatment Facility location. The pump station however, will provide for the ability to pump up to 320 GPM using one pump, and 432 GPM with both pumps in operation pumping to each separate BCSD facility).

Force Main Sizing

Both a 4" and 6" polyethelene force main will be utilized, splitting flow from the proposed Hunters Hollow pump station, with the 4" force main pumping 1050 feet to an influent manhole upstream of the Union Tool Pump Station (BCSD), and the 6" force main pumping 3020 feet to an influent manhole for the BCSD collection system located east of Blue Lick Road at the south end of Lee Villa Court.

Design Criteria:

- 1. Pipe velocity shall be in the range of 2 5 feet per second for wastewater pumps.
- 2. A Hazen-Williams coefficient, C, of 120 shall be used for Plastic Pipe and 100 for Metal Pipe.
- 3. Pipe size equals Design Operating Period flow divided by velocity required for design pumping rate.

Force Main Design:

Check minimum/maximum velocity allowable (2 FPS up to 5 FPS) for pipe size for the range of pumping conditions (111 GPM to 208 GPM),

Check 111 GPM MIN AND MAX PREFERRED:

A = <u>0.002228 CFS/GPM x 111 GPM</u> = 0.1236 SF 2.0 FPS (min Vel_{allow})

$$D^2 = 0.1236 \text{ SF x } 144 \text{ IN}^2/\text{SF x 4} = 22.67 \text{ IN}^2$$

3.14

D = 4.76 IN DIAMETER

 $A = 0.002228 CFS/GPM \times 111 GPM = 0.0495 SF$ 5.0 FPS (max Vel_{allow})

$$D^2 = 0.0495 \text{ SF x } 144 \text{ IN}^2/\text{SF x } 4 = 9.08 \text{ IN}^2$$

3.14

D = 3.01 IN DIAMETER

Check 208 GPM MIN AND MAX PREFERRED:

 $A = 0.002228 CFS/GPM \times 208 GPM = 0.2317 SF$ 2.0 FPS (min Vel_{allow})

$$D^2 = 0.2317 \text{ SF x } 144 \text{ IN}^2/\text{SF x 4} = 42.50 \text{ IN}^2$$

3.14

D = 6.52 IN DIAMETER

$$A = 0.002228 CFS/GPM \times 208 GPM = 0.0927 SF$$

5.0 FPS (max Vel_{allow})

$$D^2 = 0.0927 \text{ SF x } 144 \text{ IN}^2/\text{SF x } 4 = 17.00 \text{ IN}^2$$

3.14

D = 4.12 IN DIAMETER

Check velocity for use of a 6-inch force main sewer:

Vel = 1.26 FPS, 6-inch force main will need to maintain higher range of flow than the minimum 111 GPM.

Vel = 2.36 FPS, 6-inch force main will need to maintain flow close to the 208 GPM to keep velocity over 2 fps

For additional flow that may be added using the variable speed pumps the 6-inch force main could pump up to the following and still be below the 5 fps max preferred condition:

5 fps =
$$Q/A = 0.002228 CFS/GPM \times 208 GPM$$
; $Q = 439 GPM$
0.196 SF

Check velocity for use of a 4-inch force main sewer:

Vel = 2.84 FPS, 4-inch force main ok

Vel = <u>5.33 FPS, 4-inch force main slightly over preferred maximum at</u> <u>208 GPM, will be sufficient from minimum 111 GPM up to almost max</u> **208 GPM**.

Wet Well Design

Optimum wet well volume (including 3-FT drawdown):

$$V = \phi q/4$$

V = required capacity in gallons

φ = minimum time of one pumping cycle in minutes, start-to-start (ideally, 15 minutes for medium size to small size facilities)

q = pump capacity in gallons per minute

For Dry Weather Flows Design (low setting pumping to BCSD):

For Dry Weather Flows Design (high setting pumping to BCSD):

For Peak Daily Flows Design:

Calculate Storage:

Maximum Liquid Level = 503.19 (to prevent overflow/backup). Emergency response storage volume in upstream sewer system is as follows:

Existing:

- -Original 6' Diam Wetwell (503.19 494.24) * 47.12 SF/FT = 421.73 CF
- -"MH WWTP#1" (503.19 497.76) * 12.56 SF/FT = 68.20 CF
- -Influent Sewer Line (from MH WWTP#1 to Existing Pump Station Wetwell) = 11.5 LF of 12" VCP = 11.5 x 0.785 SF = 9.03 CF
- -Influent Sewer Line (from MH WWTP#! to upstream MH WWTP#2) = 230 LF of 12" $VCP = 230 \times 0.785 = 180.55 CF$
- -"MH WWTP#2" (503.19 499.46) * 12.56 SF/FT = 46.85 CF

Proposed:

- -Proposed Sewer Line 1(from MH WWTP#1 to Proposed Manhole WWTP#3) = 14 LF of 12" PVC = 14 x 0.785 SF = 10.99 CF
- -Proposed Sewer Line 2(from Ex. Pump Station Wetwell to Proposed Manhole WWTP#3) = 13.8 LF of 12" PVC = 12 x 0.785 = 9.42 CF
- -Proposed MH WWTP#3 (503.19 493.54) * 12.56 SF/FT = 121.20 CF
- -Proposed Sewer Line 3 (from MH WWTP#3 to Proposed Wetwell "B") = 15.6 LF of 12" PVC = 15.6 * 0.785 = 12.25 CF
- -Proposed Sewer Line 4 (3' stub between wetwells) = 3 * 0.785 = 2.35 CF

Total Line & Manhole Storage = 7.48 gallons/CF x 882.57 CF = 6,602 Gallons

-New 10' Diam. PS Wetwell "A" (503.19 – 488.56) * 78.53 SF/FT = 14.63 * 78.53 SF/FT = 1148.89 CF

Storage in PS Wetwell = 7.48 gallons/CF x 1148.89 CF = 8594 Gallons

-Additional 10' Diam. Wetwell "B" (503.19 – 486.50) * 78.53 SF/FT = 16.69' * 78.53 SF/FT = 1310.66 CF

Storage in Addl Wetwell = 7.48 gallons/CF x 1310.66 CF = 9804 Gallons

Total Emergency Storage in Wetwells = 18,398 Gallons

See table 3 for listings of wet well volumes and depths required. A 10' diameter wetwell/manhole will be constructed to include the storage needed for the design.

TABLE 3
WET WELL VOLUMES

Design Condition	Wet Well Volume for Optimum Operation (gal)	(1) Design Operating Period Peak Flow (gpm)	(2) 120 Min Emergency Response Storage Volume = (1) x 120 (min)	(3) Storage Volume (gal)	(4) Volume Required for Emergency Storage (2) – (3) (gal)	(5) 10' Ø Manhole Vertical Storage Needed (4) ± 587.5 (ft)
Avg Flow	416.25	111	13,320	6,602	6,718	11.43
Avg High	780.00	208	24,960*	6,602	18,358	31.25

^{*} In order to provide for additional storage for an hourly peak flow, the peak flow identified at 407 gpm provides 24,420 gallons. The storage provided will additionally meet this requirement.

Float Setting Calculations

Elevation settings for pump station level control switches to be set in the 10' diameter wet well are provided in Table 4.

TABLE 4
LEVEL CONTROL SWITCH SETTINGS

Reference Point	Description	Design Elevations
Wet Well Top	3-feet above finish grade	505.50
Finish Grade	Provide 4" edge above finish grade	505.17
Maximum Liquid Level	Set to avoid overflows/backups	503.19
Influent Sewer	Influent line to Main PS Wetwell	486.50
High Level Alarm	Begin Emergency Storage Depth	488.56
Pump On	12-inches below High Level Alarm	487.56
Pumps Off	12-inches drawdown depth from Pump On	486.56
Minimum Submergence	12-inches below Pump Off	485.56
Wet Well Bottom	24-inches below Minimum Submergence	483.56

Hydraulic Calculations

The 4-inch force main will discharge to an existing 8-inch gravity sewer that runs parallel to Blue Lick Road approximately 1050 feet south to the Union Tool Pump Station. The invert elevation of the force main at the proposed manhole tie-in is 501.00. The high point in the profile, which occurs at station 7+50, is 504.90.

The 6-inch force main will discharge directly to an existing 8-inch gravity sewer that runs southeast of the Union Tool Pump Station on the east side of Blue Lick Road, approximately 3025 feet and directs flow to the Pioneer Village Collection System. The invert elevation of the force main at the proposed manhole tie-in is 486.00. The high point in the profile, which occurs at station 7+50, is 504.90.

Design Static Head (4-inch FM) = I.E. Force Main @ High Point Elevation — "Average of Pump ON/OFF" Elevation

 $H_s = 504.90 - 488.20 = 16.70 \text{ FT}$

TABLE 5A
EQUIVALENT LENGTH PUMP STATION LOSSES (4-INCH FORCE MAIN):

Pump Selection

Specific pump type and other information for each of the design conditions documented above are provided in Table 7 below. The pumps were selected based on specific needs and comparison to pump curves using Table 6A and 6B as shown on the following pages.

For the design, each pump will be operating between 111 and 208 GPM and between 18' and 32' TDH, with a scouring velocity of 2.04 up to 5.30 FPS. For maximum flow conditions one pump can operate up to 320 GPM at 49' of TDH. Refer to attached pump curves as Appendix 1 of this report.

TABLE 7

Buoyancy Calculations (see Figure 3 for dimensions)

Compute buoyancy force:

Buoyancy Force (displaced volume) (unit weight of water)

Displaced Volume = Volume barrel + Volume bottom slab

 $(\pi (5.92 \text{ FT})^2 (23.67 \text{ FT})) + (\pi (8.66)^2) (0.67 \text{ FT})$ 2,606.1 FT³ + 157.9 FT³

2,764 FT³

(2,764 FT³) (62.4 LB/FT³) **Buoyancy Force** =

172,473.6 LBS

Compute opposing force:

weight of barrel + weight of bottom slab + weight of Opposing Force =

top slab + weight of saturated soil over bottom slab

extension

 $((\pi r_e^2) - (\pi r_i^2)$ (height) (unit weight concrete) Barrel Weight

 $((\pi (5.92 \text{ FT})^2) - (\pi (5 \text{ FT})^2)) (23.67 \text{ FT}) (150 \text{ LB/FT}^3)$

= 112,059.8 LB

 (πr^2) (thickness) (unit weight concrete) Bottom Slab

 $(\pi (8.67 \text{ FT})^2)(0.67 \text{ FT}) (150 \text{ LB/FT}^3)$

23,753.1 LB

Top Slab Weight = (Volume top slab - Volume opening) (unit weight

concrete)

 $(\pi (5.92 \text{ FT})^2 - (3 \text{ FT x 2 FT})) (0.67) (150 \text{ LB/FT}^3)$

10,462.2 LB

Saturated

Soil Weight (Volume soil over slab) (unit wt. soil - unit wt. water)

 $[((\pi (8.67 \text{ FT})^2 - \pi (5.92 \text{ FT})^2) (23.51 \text{ FT})]$

(120 LB/FT³ - 62.4 LB/FT³)

170,691.9 LB

Opposing Force 112,059.8 LB + 23,753.1 LB + 10,462.2 LB +

170,691.9 LB 316,967 LB

Factor of Safety 316,967 / 172,473.6

1.84 (> 1.5) OK

Force Main Pressure and Water Hammer Calculations

From the <u>UNI-BELL Handbook of Pipe</u>, <u>Design and Construction</u>, <u>1986</u>, water hammer is an increase in pressure in a pipe caused by a sudden change in velocity. The velocity change usually results from closing of a valve. The maximum surge pressure encountered related to the wave velocity is defined as follows:

$$a = 4660/(1 + (k/E)(DR-2))^{1/2}$$

Where:

a = Wave velocity (FPS)

k = Fluid bulk modulus, 300,000 psi for water

DR = dimension ratio

= (OD (in)/(wall thickness (IN)))

= 21 for pressure class rating of 200 psi

E = Modulus of Elasticity of pipe

= 400,000 psi for PVC

 $a = 4660/((1+((300,000 psi)/(400,000 psi))(21-2))^{1/2}$

a = 808 FPS

And the maximum pressure surge equals:

P = aV/2.31g

Where:

V = Maximum change in velocity

g = Acceleration due to gravity (32.2 FT/S^2)

P = Pressure Surge, (psi)

Determine maximum change in velocity:

The worst case scenario for maximum velocity in the 6" would occur if the pump station shut down while both pumps were running at the minimum static head condition in the 6" pipe:

V = q/A = (433 GPM) (0.002228 CFS/GPM) / (0.196 FT²) = 4.92 FPS By assuming velocity goes to 0 FPS when the station is shut down, ΔV becomes 4.92 FPS, and the maximum pressure surge is as follows:

$$P = (808)(4.92)/(2.31)(32.2)$$

= 53.4 psi

Check total Pressure:

Since rated pipe pressure = 150 psi Selection OK

Cyclic Surge (Fatigue) Analysis:

$$C = (5.05 \times 10^{21}) S^{-4.906}$$

Where

S = peak hoop stress, psi

C = average number of cycles to failure

In estimating the "worst case" conditions:

 $C = (10 \text{ cycles/hr}) \times (24 \text{ hr/day}) \times (365 \text{ day/yr}) \times (80 \text{ yr/lifetime})$ $C = 7.01 \times 10^6 \text{ cycles/lifetime}$

Calculate peak hoop stress

$$S = (5.05 \times 10^{21}/C)^{0.204}$$

 $S = 1,067.7 \text{ psi}$

From "water hammer" analysis

$$P_{max} = 82.7 \text{ psi}$$

From ISO formula;

Therefore, a PVC should be selected with DR < 26.82. The proposed force main has a DR of 17. Selection is OK.

Bullitt County Sanitation District Hunters Hollow Pump Station Plans and Specifications Review Comments

- Sheet C2 needs to show location of flow meter on existing by-pass line.
 The flow meter for the by-pass line will be installed inside of the existing pump house. Please confirm if this is a part of the agreement with Bullitt County Sanitation District and we will include this in the specification.
- Sheer C3 shows flow meter vault, but no flow meters in vault.
 Flows meters are identified in the vault. Note has been corrected accordingly.
- 3. On Sheet C3 change the 4" emergency pump connection to indicate 6". This has been corrected.
- 4. On Sheet C3 note that valves and nipples on air release valves to be stainless steel.

 This has been corrected.
- On Sheet C4 note that service pole and support post to be treated lumber.This has been corrected.
- 6. Add to the specifications variable frequency drives for both pumps. The variable frequency drive specifications are included in the specifications provided to Bullitt County Sanitation District. These variable frequency drives are provided by the pump supplier and are included at the end of the specifications.
- 7. Add to the specifications three magnetic flow meters.

 The magnetic flow meter specifications are provided in the packet to Bullitt County Sanitation District. Two (2) flow meters are identified. Please confirm if we are including a third flow meter on the by-pass line.
- Add to the specifications Rayco dialer to advise of pump failure, high wet well level, and power failure.
 This has been added to the specifications.
- Indicate in specifications that one spare pump is to be provided.
 This has been corrected.
- 10. Provide information from pump manufacturer confirming that each pump can operate between 55 gallons per minute and 00 gallons per minute using variable frequency drive.
 See attached letter confirming operation of pumps.

RE: BULLITT CO. SANITATION

TLC CONTROL PANEL QUOTATION

REVISION 1

Chris,

We have added the RACO dialer to this quote. We will have to go with a larger cabinet to get it to fit.

Quotation for TLC control panel follows. The quotation is per the intent of the specifications. TLC does use Alan-Bradley components however some other brands may vary. Panel is set-up to operate the pumps as a dual system with the pumps discharging to 2 different force mains. Provisions are made for manual by-pass and duplex alternation if need be.

ITEM

DESCRIPTION

- 1 NEMA 3R 304 TYPE STAINLESS STEEL DUPLEX CONTROL PANEL TO OPERATE TWO 15HP MOTORS USING 2 VFD'S ON 460V 3PH SERVICE ICLUDING;
 - 1 NEMA 4X STAINLESS STEEL ENCLOSURE
 - 2 VARIABLE SPEED DRIVES ABB550-03U-023A 15HP 460V 3PH
 - 1 U/L LABEL
 - 1 COOLING SYSTEM
 - 1 DEAD FRONT /INNER DOOR
 - 1 FLUORSCENT INTERIOR LIGHT
 - 1 INTERIOR LIGHT OFF-ON SELECTOR SWITCH(ES)
 - 1 200WATT GROUND FAULT TYPE OUTLET
 - 1 HEATER WITH THERMOSTAT
 - 1 12ga. MINIMUM POWER WIRE
 - 1 14ga. CONTROL WIRE
 - 1 MAIN DISCONNECT SWITCH
 - 1 SURGE ARRESTOR
 - 1 PHASE FAILURE RELAY
 - 2 MOTOR CIRCUIT PROTECTOR(S)
 - 2 MOUNT CUSTOMER SUPPLIED VFD(S)
 - 2 NEMA SIZE 2 BYPASS MOTOR STARTER(S)

RE: BULLITT CO. SANITATION – HUNTERS HOLLOW PUMP STATION 320 GPM @ 49' TDH (PEAK) 1750 RPM ADDENDA 0 – **REVISION 4**

We are pleased to offer the following for your consideration.

Revision 4 -

- DEDUCT \$ 742.00 for 30x42 Pump Wet-Well Access Cover
- DEDUCT \$ 655.00 for 30x30 Valve Vault Access Cover

Revision 3 -

- Added for intermediate guide-rail brackets and float bracket
 – drawing shows @ 10'
 but pump manufacturer doesn't require until 20'.
- Added for 25' 304 stainless steel lifting chain for each pump.
- · Added for 5-20' Sections of 304 stainless steel 2" pipe.
- Added for pump certified hydraulic performance test.

Revision 2 -

Added for a spare pump and 50' cord for each.

Two (2) ESSCO model 493F-15-4 Torque Fluid Flanged Submersible Vortex Pumps with a 100% recessed vortex style impeller capable of passing 3 inch diameter and long length solids. Each unit shall be constructed of heavy duty engineered Cast Iron with Ductile Iron impeller, Cast Iron volute, assembled with Stainless Steel hardware. Each pump shall be painted with standard factory paint.

Each pump shall be equipped with a Cool Agivent device which shall vent the pump case, cool he motor and agitate the wet well. The Cool Agivent shall provide enough cooling to dissipate any excess heat generated by the motor in the event of prolonged operation with the motor exposed.

Each pump will be equipped with a Reliance UL Listed 15 HP, 1750 RPM, 460/3/60hz., 210TY frame, submersible motor with Buna-N O-rings, carbon/ceramic upper mechanical seal with Buna-N elastomers and tungsten/carbide lower mechanical seal with Buna-N elastomers, 416 Stainless Steel shaft, Class F insulation, oil buffer zone, moisture sensing probes, built-in thermal overload protection, **50** ft. motor leads, and ESSCO/Reliance five year warranty. The exterior

of the motor shall be coated with standard factory paint. Approximate FLA- 21 Standard motor can be operated on a VFD but will be derated to a 1.0 Service Factor.

Optional Items:

- 493 210TY- Wear Plates
- 4" Design 3 spark proof for 2" Guide Pipe Straight-thru slide rail assemblies to include Cast Iron stationary base, Bronze faced sliding flange, 2.00" Inch top guide bracket, and Bronze rail guides. The slide rail stationary base assembly shall be coated with standard factory paint.
- 4" Flanged Base 90° Elbows (Footed) 125# Cast Iron with Slotted Flanges
- Six (6) Mechanical float switch level controls with 30' cable.
- One (1) Halliday Products S1R 030042FBB 30x42 Aluminum Pump Access Cover 300 PSF.
- One (1) Halliday Products SIR 030030FBB 30x30 Aluminum Valve Vault Access Cover 300 PSF.

IOTAL COST FOR ABOVE EQUIPMENT	TOTAL	COST FOR	ABOVE EQUIPMENT:	\$ 35,186.0
--------------------------------	-------	----------	------------------	-------------

ADD: \$ 12,204.00 FOR ADDITIONAL 493F-15-4 PUMP.

TOTAL COST WITH ADDITIONAL PUMP: \$ 46,390.00

ADDS:

- INTER GUIDE-RAIL & FLOAT BRACKETS: \$ 995.00
- 4 20' SECTIONS 304 SST SCHD 40 GUIDE RAILS \$ 1,560.00
- 2 SECTIONS 25' 304 SST LIFTING CHAIN: \$ 1,600.00
- 2 Certified Hydraulic Performance Tests: \$ 1.500.00

TOTAL COST WITH ADDERS: \$ 52,045.00

Price is FOB shipping point, freight allowed to jobsite.

Price includes expedited lead-time for the pumps. They can ship FOB Los Angles CA in 2 weeks after credit approval and order release. Two (2) Reliance motors are available in Portland OR at this moment on a first come first serve basis.

Prices do not include dual VFD control panel, piping, installation, valves, wiring or any other items other than those mentioned above.

Prices are valid for 30 days. Prices are subject to DXP Enterprises terms and conditions.

Jeff Cummins, Director Department of Environmental Protection Division of Enforcement 300 Fair Oaks Lane Frankfort, KY 40601

Re: Bullitt Utilities, Inc. ("Bullitt Utilities")

Hunters Hollow Wastewater Treatment and Collection System

("Hunters Hollow")

Dear Jeff:

Pursuant to the provisions of the Agreed Order entered into between Bullitt Utilities and the Kentucky Energy and Environment Cabinet ("Cabinet"), Bullitt Utilities hereby provides notice to the Cabinet that in lieu of paying to the Cabinet the civil penalties set forth in paragraph eighteen (18) of the Agreed Order, Bullitt Utilities will perform the Supplemental Environmental Project ("SEP") specified in paragraph twenty-five (25) of the Agreed Order by allocating thirty thousand dollars (\$30,000) toward the performance of this SEP to address Inflow and Infiltration ("I & I") as set forth below:

- a) Bullitt Utilities shall develop and implement a Corrective Action Plan ("CAP") to attempt to eliminate sources of I&I within the customers' portions of the sewer lines that connect to the Hunters Hollow WWTP collection system as determined through smoke testing, dye testing, television or visual inspection;
- b) Bullitt Utilities shall fully implement the SEP within twelve (12) months of the Secretary executing this Agreed Order;
- c) Items scheduled for repair and/or replacement may include, but will not be limited to, defective lateral lines, illegal downspout connections, clean out traps, and illegal sump pumps;
- d) Bullitt Utilities shall notify the DOW Louisville Regional Office prior to initiating any remediation of a private source of I&I; and,
- e) Bullitt Utilities may choose to satisfy its obligations under this SEP by entering into an agreement with an appropriate local government or agency, subject to the Cabinet's review and acceptance.

by EXHIBIT

2.7

Please be further advised that in lieu of paying the penalty set forth in paragraph nineteen

Mr. Jeff Cummins December 17, 2014 Page two

(19) of the Agreed Order, Bullitt Utilities is performing the SEP set forth in paragraph twenty-seven (27) of the Agreed Order. Bullitt Utilities has entered into an Agreement with the Bullitt County Sanitation District ("BCSD") providing for the connection of the Hunters Hollow collection system with BCSD's sanitary sewer system, has employed Chris Crumpton with BlueStone Engineers to perform the engineering work necessary to complete the connection, has paid the amount of \$125,000.00 to BCSD and is working with BCSD to ensure the completion of the required connection.

Please contact me should you have any questions concerning this matter.

Yours truly, Loleut C. Moon

Mr. Lawrence Smither Bullitt Utilities, Inc. P. O. Box 91588 Louisville, KY 40291

SUBJECT: Hunters Hollow Pump Station Bids

Bullitt County, Kentucky

Dear Mr. Smither:

Please find below a summary of the bid amounts received on the above project. A copy of the bids are attached:

Dirt-Design Construction \$ 338,230 E-Z Construction \$ 221,354 Larry Clark Construction, Inc. \$ 213,800

These prices are slightly higher than our estimate due to higher rock removal prices and hauling expenses which have shown up in miscellaneous grading line item. This cost summary does not truly reflect the "projected" bid total for each contractor since some units were adjusted by two of the contractors. These adjustments could make a difference in the projected low bidder.

Please review this information and give me a call so we can discuss.

Sincerely,

Christopher T. Crumpton, P.E. Engineering Director/Principal

CTC/mlr

Jerry Kennedy Bullitt County Sanitation District 297 Lees Lane North Louisville, Kentucky 40229

Re:

Bullit Utilities, Inc.

Dear Jerry:

As we discussed during our telephone conversation on February 2, 2015, Bullitt Utilities would like to move forward immediately to complete a temporary connection of the Hunters Hollow collection system to the Bullitt County Sanitation District ("BCSD") sanitary sewer system. The necessary type of pumps will be leased and installed to direct the wastewater into the BCSD system. The permanent connection would be made once the construction of the lift station has been completed. During our telephone conversation on that date, you indicated that the lines being installed by BCSD to connect the two systems should be available for use the first of the week of February 16, 2015. Accordingly, please let me know if the connecting lines are available for use at this time, so that the Hunters Hollow collection system flow can be directed into BCSD's system.

During our February 2, 2015, telephone conversation, you indicated that BCSD may request Bullitt Utilities to escrow the cost to construct the lift station before it will accept the temporary flow. Bullitt Utilities hereby offers to place the amount of \$50,000 into escrow for this purpose, so that the connection can be made as soon as possible. Based on our February 18, 2015, telephone conversation, it is my understanding that BCSD will not accept a good faith escrow deposit of \$50,000, but will require the escrow of an amount equal to the total construction cost of the lift station. I will advise Bullitt Utilities of your preliminary response, but request that you discuss the offer to place \$50,000 into escrow with the BCSD Commissioners and provide me with a response to this proposal.

Thank you for your prompt response to this request.

Yours truly,

Robert C. Moore

Update for Hunters Hollow Pump Station

Attachments:

bullitt(tlc control panel quote)06feb.docx; bullitt(itt pumpsmart quotation)06feb.docx; bullitt co(essco pump quote rev2)04feb.docx; bullitt(mag meter budget bluestone)04feb.docx

Guys I just wanted to give everyone a quick update since we were finally able to get pricing from the suppliers.

- 1. We have finally been able to get some pricing and fortunately the pricing is slightly less than the budgeting being provided by DXP (the main pump supplier of the ESSCO pumps) that they were telling was originally going to be \$70,000 for the pump controls/panel. Two main suppliers of pump controls were used that provided control panels, one TLC and the other ITT. From the beginning TLC has attempted to meet the intent of the MSD specification. On the other hand ITT took exception to most of the MSD spec and provided mostly a "standard" panel for the variable speed pumps/controls. We expected these to be quite a bit different in price however TLC (meeting most of the spec) has provided a price of \$55,262, while the ITT Standard Panel has a price of \$52,105. That being said, we along with the supplier feel much more comfortable selecting TLC to provide the control panel/pump control systems for the small difference. Remember still that the selected electrical contractor would still have an install price for this package, that would additionally include getting power to the pump station.
- 2. We had previously discussed the pump package itself from ESSCO pumps, but just as a clarification the ESSCO package includes (2) pumps, a backup pump to be stored, cabling, etc.. (this is supposed to also include guiderails and lifting chains which we are clarifying with supplier). This packing price is \$46,390.
- 3. The additional flow metering quote is provided at \$11,720. There may be some add to provide for box mounting of the totalizers that read the flow.
- 4. The pump station itself as designed and approved by BCSD includes (2) 10' diameter wetwells and associated piping and manhole to connect up to the existing pump station and wetwell. This also includes the additional valves, valve vault, air release valves, pump station piping, etc.. This package will be available on Monday for the (3) site contractors to provide pricing for, each of which have already been contacted and the project discussed. This bid package will also include installation of pumps and guiderails into the pump station wetwells (even though they are supplied by the pump supplier). We would expect this bid package to cost around \$153,225 based on our attached estimate. Larry take a look at this and see if you agree.

This should give a clearer picture of where we stand. Note the lead time on the pump and control system orders as spelled out in the price quotes. Let me know if anyone has any questions. Thanks.

Re:

Bullitt Utilities, Inc. ("Bullitt Utilities")

Hunters Hollow Wastewater Treatment and Collection System

("Hunters Hollow")

Dear Jeff:

The Agreed Order entered into between Bullitt Utilities and the Kentucky Energy and Environment Cabinet ("Cabinet") requires Bullitt Utilities to connect its collection system to the sanitary sewer system owned and operated by the Bullitt County Sanitation District ("BCSD") within sixty (60) days of the execution of the Agreed Order. Bullitt Utilities and BCSD have been working diligently to complete the work needed to make the required connection, including designing the new lift station and lift station components and construct the line from BCSD's sanitary sewer system to the Hunters Hollow lift station. However, the connection is not yet complete. I have attached a copy of Bullitt Utilities' January 15, 2015, Quarterly Report which describes the work performed on this project. Because the connection of the two systems is not yet complete, Bullitt Utilities requests the amendment of Paragraph 20 of the Agreed Order to allow it an additional seventy-five (75) days to complete the connection.

Please let me know if you would like to discuss the matter, and thank you for your attention to same.

Mr. Robert C. Moore Hazelrigg & Cox, LLP 415 West Main Street P. O. Box 676 Frankfort, KY 40602-0676

SUBJECT:

Hunters Hollow Treatment Plant Field Inspection for Steel Tank Bullitt County, Kentucky

Dear Mr. Moore:

This letter serves as a summary of a structural field inspection and review of site conditions for the recent tank failure at the Hunters Hollow Treatment Plant in Bullitt County, Kentucky.

The field review noted that multiple sections of the steel aeration tank separated from both the concrete foundation and clarifier tankage spilling contents of the treatment facility across the site and parking area. A temporary treatment system has been installed on-site to currently handle treatment of as much flow as possible. Sections of the steel aeration tank were observed laying at different locations just outside the tank's original perimeter with some sections intact while others had been cut to allow sections to be stacked near each other.

Inspection of the existing welds did not identify that structural tank failure occurred at these weld Joints, as can be seen in the attached photographs. The steel tank pleces were welded to a piece of 8" channel to Join the tank that was originally set in a concrete foundation about 4" deep (on the channel). These steel tank pleces and channel were observed to have been ripped out of the concrete foundation of the tank. Additionally, large chunks of concrete foundation were scattered about the site and around the steel tank pleces that had been stacked.

Since the lower portion of the tank receives a higher structural load and based on review of the channel pulled from the concrete foundation, we have estimated that separation must have occurred at the bottom of the tank and from a possible rupture or failure directly at the concrete foundation level. This could have been caused from concrete cracking, or insufficient sub-surface conditions that allows differential settlement. It was noted from talking with the treatment plant operator that this site has typically been identified as a wet "swampy" area adjacent to this existing stream.

We were unable to inspect the tank concrete foundation in detail due to the great amount of sludge that was covering the entire foundation section. Once this material has been cleared from the site additional inspection of the concrete foundation slab is recommended. Additionally, testing by a geotechnical engineer to determine concrete foundation thickness, soil testing beneath the slab, and depth to rock is also

recommended. This could also determine if any groundwater is present underneath the slab. Additionally, once the sludge has been removed specific areas of the concrete foundation can be further inspected to identify if the exact location of the failure can be determined.

As can be expected, the portion of the exterior wall of the main aeration tank still standing was more heavily reinforced in the area connected to the digestor tank and interior clarifier tank, as well as being supported by the stairs and connecting catwalks at this location. This section is still standing and pieces of the steel tank separated from this section at the welds due to the force of the wall being pulled out of the concrete foundation.

Again, we recommend that additional inspection and testing be performed in order to identify more details of the fallure.

If you have questions please do not hesitate to give me a call at (502) 292-9288.

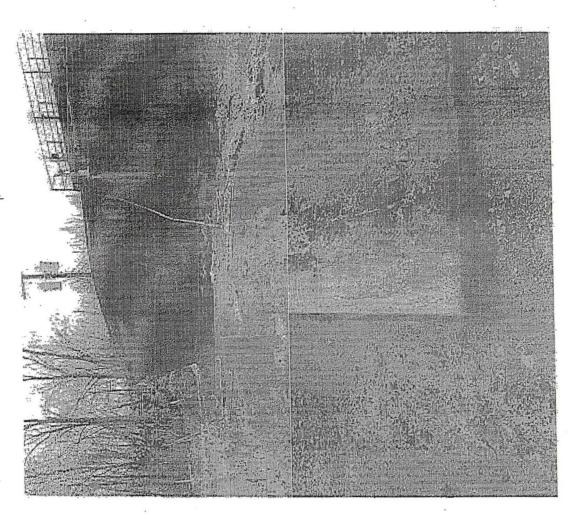

Sincerely,

Christopher T. Crumpton/Civil Engineer

Robert T. Trautwein/Structural Engineer

July 22, 2014

SUBJECT:

Hunters Hollow Treatment Plant
Field Inspection & Analysis for Structural Slab/Foundation
Bullitt County, Kentucky

Dear Mr. Moore:

Background:

This letter serves as a summary of an additional structural field inspection to review the concrete foundation and slab for the subject treatment plant, after the sludge was vacuumed out to clean the area. The purpose of the inspection was to check the remaining concrete slab under the original tank, and to inspect the foundation area where the steel tank sides (and channel) were pulled away from the foundation during the failure. Reference Exhibit "A" to Identify location of pictures taken during the review process (Exhibit "A" is an aerial view of the site prior to the failure looking east towards Blue Lick Road).

The field review noted that the "interior" concrete slab was actually in very good condition and did not show signs cracking or settlement (Exhibit "B"). A concrete scan was not performed, but the interior slab should have steel reinforcement that held the slab in place during the failure of the tank. While not all of the slab was visible due to some portions still remaining covered with sludge material and/or the remaining section of reinforced mixing tank/stairs and clarifier, Exhibit "C" shows the areas that were cleared and visable, mostly on the west side to the south and southeast (a majority of the slab that existed under the area of the aeration tank that failed).

Interior Slab Reviews

The concrete slab "edge" where the concrete abutted the steel tank channel on the interior side is in good condition as shown in Exhibit "D". Only a couple damaged locations are shown along this interior edge, from where the temporary welded steel reinforcement bars were installed in the foundation at the time of the initial concrete pour to provide a connection for the tankage while the steel channel was installed and the second concrete pour for the foundation was completed. Exhibit "D" additionally shows various locations along the exterior foundation slab indicating the variable width of concrete slab on the "exterior" portion of the foundation. These widths range from only 4 or 5 inches, all the way up to 2 feet.

The most notable area of damage is shown in the southeast quadrant of the tankage—this area looks to have received the most damage along the exterior foundation as compared to rest of the perimeter foundation—this can be seen in Exhibit "E".

Most important to note is that none of the exterior portion of the concrete foundation that held the steel channel in place includes structural steel reinforcement. Upon failure of the tank and foundation, when the steel channel was pulled from the foundation, these exterior pieces of concrete slab separated into typical 3' and smaller sections that are scattered around the site. Examples of some of these exterior foundation slab pieces are shown in Exhibit "F". These exterior slab pieces were found as far as 100 feet away from the tank foundation site.

Note from our initial inspection letter dated April 30, 2014:

"Inspection of the existing welds did not identify that structural tank failure occurred at these weld joints, as can be seen in the attached photographs. The steel tank pieces were welded to a piece of 8" channel to Join the tank that was originally set in a concrete foundation about 4" deep (on the channel). These steel tank pieces and channel were observed to have been ripped out of the concrete foundation of the tank. Additionally, large chunks of concrete foundation were scattered about the site and around the steel tank pieces that had been stacked."

Conclusion:

From inspection of the interior slab condition (very good), as well as inspection of the exterior of the foundation section (pieces that have broken off from the foundation and are scattered about the site) this is indicative of a shear failure of the concrete foundation between the interior and exterior sections of the foundation where the steel channel was installed, see Exhibit "G" for typical detail. Since the exterior portion of the concrete foundation did not include any additional steel reinforcement, the section of foundation from the steel channel outward separated along the shear plane and pulled free from the interior foundation and slab during the failure of the plant. Most likely this occurred at the exterior foundation's weakest point along the perimeter, which from the review of the perimeter damage seems to be at location "X" as seen in Exhibit "A" and "B", and as shown on Exhibit "E". Pictures of the exterior foundation pieces showing the shear plane are shown on Exhibit "F".

As discussed previously, additional testing may be performed by a geotechnical engineer to excavate the existing slab at specified locations to compare depth and thicknesses of the concrete slab and foundation, however this may not be needed since it is apparent that:

 Along the exterior of the concrete foundation that the slab and foundation thickness varies.

- The exterior portion of the concrete foundation did not include steel
 reinforcement to account for "tension" force created by the channel pulling out
 of the foundation. Thus, the many pleces of concrete foundation that separated
 from the tank foundation demonstrate this smooth "shear plane" on their
 interior side.
- 3. The interior slab looks to be in excellent condition

If you have questions please do not hesitate to give me a call at [502] 292-9288.

Sincerely,

Christopher T. Crumpton/Civil Engineer

SUBJECT:

Hunters Hollow Treatment Plant

Addendum for Field Inspection & Analysis for

Structural Slab/Foundation Bullitt County, Kentucky

Dear Mr. Moore:

As discussed in our follow-up summary letter dated June 22, 2014 for structural inspections of the Hunters Hollow Wastewater Treatment Facility, and based on the review of the concrete foundation, the lack of reinforcing steel in the outer foundation section would not have been identified from normal inspection or maintenance activities. Therefore, lack of maintenance of the facility does not appear to be a cause or contributing factor of the failure of the Hunters Hollow WWTP.

If you have questions please do not hesitate to give me a call at (502) 292-9288.

Sincerely,

Christopher T. Crumpton Project Engineer

ATTACEIVENT

LEGAL NOTICE

Bullitt Utilities, Inc., ("Bullitt Utilities") has filed with the Public Service Commission ("PSC") to establish a surcharge in the amount of \$32.19 to recover the extraordinary emergency costs incurred from the failure of the Hunters Hollow Wastewater Treatment Plant on March 29, 2014. The proposed charges shown below have a proposed effective date of February 1, 2015.

Charge for	Existing Rate	Proposed	Combined Rate	\$ Change	% Change
Sewer Service:		<u>Surcharge</u>	and Surcharge	in Rate	<u>in Rate</u>
Monthly Rate	\$26.83	\$32.19	\$59.02	\$32.19	120.0%

Any person may examine this filing at the office of the Agent for Service of Process of Bullitt Utilities located at Hazelrigg & Cox, LLP, 415 West Main Street, Frankfort, Kentucky 40601; telephone (502) 227-2271.

Any person may also examine this filing at the PSC located at 211 Sower Boulevard, Frankfort, Kentucky, Monday - Friday, 8:00 am - 4:30 pm or on the PSC website at http://psc.ky.gov; telephone (502) 564-3940.

Any person may submit comments regarding this filing by mail to the Public Service Commission, Post Office Box 615, Frankfort, KY 40602; or through its website at http://psc.ky.gov.

The rates contained in this notice are the rates proposed by the Bullitt Utilities but the PSC may order rates to be charged that differ from the proposed rates contained in this notice.

Any person may submit a timely written request for intervention by mail to the Public Service Commission, Post Office Box 615, Frankfort, KY 40602. The request for intervention must establish the grounds for the request including the status and interest of the party.

If the PSC does not receive a written request for intervention within thirty (30) days of the initial publication or mailing of notice, the PSC may take final action on the tariff filing.

BULLITT CIRCUIT COURT DIVISION I CIVIL ACTION NO. 13-CI-00026

US BANK, NATIONAL ASSOCIATION, AS TRUSTEE FOR GSAMP TRUST 2005-HE6,
MORTGAGE PASS-THROUGH CERTIFICATES, SERIES 2005-HE6 PLAINTIFF
VS. EARL GAULT, ET AL. DEFENDANTS

By virtue of the judgment in the above-styled case entered on the 18th day of November, 2014,
I will sell at public auction on Tuesday, the 30th day of December, 2014, at 9:00 a. m. at the Bullit
County Judicial Center located at 250 Frank E. Simon Ave., Shepherdsville, Kentucky, the following
described real property located in Builtit County, Kentucky, to-wit:
16S SOUTH WESTERN ROAD, LOUISVILLE, KY 40229
BEING LO 298, in Maryille Subdivision, Section "P", revised, as shown on the plat of said
subdivision, and recorded in Plat Book 3, Page 52, in the Office of the Clerk of the County Court of
Builtit County, Kentucky,
BEING the same property conveyed to Earl Gault, a single man, by Deed dated July 27, 2005,
and recorded on August 4, 2005, in Deed Book 646, Page 441, filled in the Office of the Clerk of
Builtit County, Kentucky.
That the Plaintiff shall recover from the Defendant(s) the sum of \$72,852.66 with interest at the
rate of 2.00000% per annum from August 1, 2011, until paid, plus its costs and fees therein expend-

rate of 2.0000% per annum from August 1, 2011, until paid, plus its costs and fees therein expend-

ed. That in order to secure payment of the above sums, I will sell at public auction to the highest and best bidder the above-described real estate, terms to be 1/4 down at the time of bid with the balance due in 90 days, bearing interest at the rate of 12% per annum until paid. Successful purchaser(s) shall be required to secure insurance with a loss payable clause in favor of the Master Commissioner or the Plaintiff.

Commissioner or the Plaintiff.

The purchaser shall take the property free and clear of all liens and encumbrances except:

(a) All state, county, and school taxes for the year 2014 and thereafter for which the purchaser shall take no credit.

(b) Easements, restrictions, and stipulations of record and agreements of record.

(c) All matters disclosed by an accurate survey or inspection of the property.

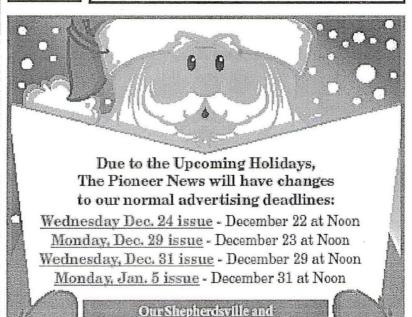

(d) Zoning regulations of Bullit County Planning and Zoning Commission.

(e) Assessment for public improvements assessed against the property.

For further information, see report on file in the Bullitt Circuit Clerk's Office.

John A. Schmidt, Master Commissioner, Bullitt Circuit Court

INDEPENDENT AUDITOR'S REPORT

Honorable Mayor and City Council City of Hillview, Kentucky

We have audited the accompanying financial statements of the governmental activities, business-type activities and the major fund information of City of Allivies, Mentucy as of and for the year ended June 10, 2014, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as little in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, inplementation, and maintenance of internal control relevant to the preparation and fair presentation of Thinnical Statements that are free from material misstatement, whether does to fraid of effort.

Our responsibility is to express opinions on these financial statements based on our swift. We conducted our swift in accordance with swifting standards operarily soccepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comproller General of the United States. Those standards require that we plan and perform the swifting the same about whether the financial statements are free from material misstatement.

statements are free from natural misstatement.

An audit involves performing processrs to obtain audit evidence about the amounts and discipures in the financial statement. The procedures relected amounts are discipured in the financial statement of the procedure relected naturals misstatement of the financial statement, whether due to fraud or error. In making those pits assessment, the unifor considers internal control retards to the statement of the financial statements are considered to the statements in order to design audit procedures that are appropriate in the effectiveness of the entity's internal control. Accordingly, we appears so such conformations of the statement of the statement of the statement of the statement of the statement of the statement of the statement of the statement of the financial statement.

We believe that the audit evidence we have obtained is suffice appropriate to provide a basis for our audit opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governments activities, subsines-type activities and the major fund information of the City of Millylew, Rentucky, as of June 30, 2014, and the respective changes in financial position, and, where applicable, oash flows thereof for the year the enosed in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter Regarding Going Concern

The accompanying financial statements have been prepared assuming that the City of Alliview, Mentucky will continue as a poing concern. As disclosed in Note of Sil, 432, 529, 54 that is accommissing interest at 127 per anome. This amount acceeds the City's capacity to pay. This condition raises substantial doubt macked the City's capacity to pay. This condition raises substantial doubt this matter along is described in Note 4. The financial statements do not include any adjustments that might result from the outcome of this uncertainty. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles querily accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information on pages 33 and 50 be presented to supplement the basic financial information on pages 35 and 50 be presented to supplement the basic financial statements, is required by the Governmental Accounting Standards Board, who basic financial statements is an appropriate operational, economic, or the basic financial statements is an appropriate operational, economic, or supplementary information in accordance with auditing standards querielly accepted in the United States of America, which consisted of inquiries of information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our switch to basic financial statements, We do not suppress an opinion or provide any with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by Government Auditing Standards

Other Reporting Required by Government Auditing Standards and the Company of the City of Nilview, to our consideration of the City of Nilview, compliance with covernment Auditing Standards, we have also issued our report dated becember 15, 2014, on our consideration of the City of Nilview, compliance with certain provisions of laws, regulations, contracts, and grant agreements and other natures. The purpose of that report is to describe the and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an interpal part of an audit performed in accordance with Government Auditing Standards in reporting, and compliance.

LEGAL NOTICE Bullist Utilities, Inc., (Bullist Utilities) has filed with the Public Service Commission ("PSC") to establish a surcharge in the amount of \$32,19 to recover the extraordinary emergency costs incurred from the failure of the Hunters Hollow Wastewater Treatment Plant on March 29, 2014. The proposed charges shown below have a proposed effective date of February 1, 2015.

Charge for	Existing	Proposed	Combined Rate	\$ Change	% Change
Sewer Service:	Rate	Surcharge	and Surcharge	in Rate	in Rate
March L. Plants	*20.00	*22.10	*50.00	e22 10	

Any person may examine this filing at the office of the Agent for Service of Process of Bullitt Utiliocated at Hazelrigg & Cox, LUP, 415 West Main Street, Frankfort, Kentucky 40601; telephone (5 227-2271.

Any person may also examine this filing at the PSC located at 211 Sower Boulevard, Frankfort, Kentucky, Monday - Friday, 8:00 am - 4:30 pm or on the PSC website at http://psc.ky.gov; telephone (502) 564-394.

Any person may submit comments regarding this filing by mail to the Public Service Commission, Post Office Box 615, Frankfort, KY 40602; or through its website at http://psc.ky.gov.

The rates contained in this notice are the rates proposed by the Bullitt Utilities but the PSC may order rates to be charged that differ from the proposed rates contained in this notice. Any person may submit a timely written request for intervention by mail to the Public Service Commission, Post Office Box 615, Frankfort, KY 40502. The request for intervention must establish the grounds for the request including the status and interest of the party.

If the PSC does not receive a written request for intervention within thirty (30) days of the initial publication or mailing of notice, the PSC may take final action on the tariff filling.

PSC Case No. 2014-00255

In the Matter of: An Investigation of Existing and Future Service of Bullitt Utilities, Inc. ("Bullitt Utilities") - PSC Case No. 2014-00163

Dear Ms. Ramser:

Please be advised that the temporary connection between the Hunters Hollow collection system and the Bullitt County Sanitation District ("BCSD") system was completed on Thursday, May 27, 2015. This connection was made in accordance with the First Amendment to the Agreement Between the Bullitt County Sanitation District and Bullitt Utilities, Inc., dated November 11, 2014. BCSD began accepting flow on May 27, 2015.

Thank you for your attention to this matter, and please contact me should you wish to discuss same.

Sincerely

Robert C Moore

Mobile Water Service Agreement – Reminder Notice of Termination

Dear Rob:

Re:

Veolia Water Solutions & Technologies North America, Inc., the predecessor to Veolia Water Technologies, Inc. (collectively, "Veolia") provides this Reminder Notice of Termination to Bullitt Utilities, Inc. ("Bullitt") to reinforce Veolia's previous May 4, 2015 Notice of Termination. Veolia is terminating the Mobile Water Service Agreement effective June 3, 2015 because of Bullitt's material breach of the Agreement.

To date, Bullitt has not contacted Veolia to discuss the May 4, 2015 Notice of Termination and still has not made any payment to Veolia since January 2015.

Veolia read with interest the May 21, 2015 Answer filed by Bullitt in Response to the Commission's May 7, 2015 Order *In the Matter of: an Investigation of Existing and Future Service of Bullitt Utilities, Inc.*, Case No. 2014-00163, advising the Commission that the connection between Bullitt and the Bullitt County Sanitation District ("BCSD") "should be completed by Friday, May 22, 2015, and BCSD is anticipated to accept the flow from the Hunters Hollow collection system at that time." You provided similar information to me in a call we had earlier last week.

Veolia was advised that the connection between Bullitt and the BCSD was completed sometime on Wednesday afternoon, May 27, 2015 and BCSD began accepting some flow of wastewater from the Hunters Hollow collection system at about that time.

As Veolia advised on May 4, 2015, Veolia intends to remove its facilities from the Bullitt site as soon after June 3, 2015 as practical.

Please e-mail or call me if you would like to discuss this matter in more detail or Bullitt may contact Veolia directly.
