RE: Case No. 2014-00267 – Surcharge Activity Report

Mr. Derouen,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to further gain control of its water loss.

CWD is continuing to monitor the data received from the 8 flow meters in use at this time. According to flow records, CWD has two areas that are showing a substantial amount of loss. Attempts to locate visually have been unsuccessful due to the number of main and service line creek and stream crossing. CWD has purchased a portable flow monitor and digital leak detector to aid in finding leaks that have not surfaced. The portable flow monitor was delivered on 2/13/17 and the digital leak detector has a first week of March delivery timeframe. During normal working hours, CWD will have crews in the field with the portable monitor narrowing areas of loss. Once areas are determined, we will shift a crew over to late night and early morning detection to verify for repairs.

On 2/13/17, CWD meet with staff from the PSC for an informal conference. This meeting was very informative and productive for both parties. As discussed, CWD will be developing a Capital Improvement Plan over the coming months with a large amount of this planning specifically targeting water loss improvements. During this time, we look forward to working more closely with the PSC staff on a regular basis. Also, you will find, attached to this report requested samples of the monitoring system in place at this point in time.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in blue ink that reads "Tim Webb".

Tim Webb  
General Manager
