RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Mathews,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to further gain control of its water loss.

CWD is continuing to monitor the data received from the 8 flow meters in use at this time, in addition to visual inspections by walking meter routes to check for leaks and inactive usage meters. These methods, along with the use of leak detection devices, has enabled us to find some minor leaks. With the repair of these leaks and the leaks discovered and repaired in the month prior, CWD's water loss is continuing to improve.

July 14th, CI Thornburg was on site to repair the 2 flow meters that have been inoperable. Both meters seem to be working well in test mode. If the test mode continues to function properly, this will give us all 10 meters to monitor with.

CWD is continuing its efforts, with the guidance of the PSC, in planning a water loss and detection project to further capture and reduce water loss. At this time CWD is awaiting a date for an Informal Conference to complete some of the planning steps.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tim Webb".

Tim Webb
General Manager
