RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Mathews,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to further gain control of its water loss.

CWD is continuing its efforts, with the guidance of the PSC, in planning a water loss and detection project to further capture and reduce water loss. At this time, CWD is obtaining pricing for such a project. Once a project estimate is obtained and locations of further detection set, a motion will be filed to revise the water loss detection plan. In the meantime, we will continue our efforts in leak detection with all available means.

As a status up date to the existing zone meters, the 2 zone meters that have been running in test mode have been removed and sent back to Siemens. The meters have not been functioning properly in regular read and transmit mode. At this time, we are awaiting an answer from Siemens on replacements. We continue to monitor the existing meters and detecting for leaks. For the current month of October, we are on pace to have our lowest purchase month of the year.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

Tim Webb  
General Manager
