Re: Proposed Construction Wireless
Telecommunications Facility
Case # 2014-00337

Dear Mr. Briggs,

As a landowner that doesn't have a cell phone I am against placing this tower on or near my property. We built our home on this property to have as a future income for our family. I understand the need for the construction but we are in our 80's and realize that this will decrease the value of our property. Several years ago the Sanitation District in our area also went through our back yard with the sewer system also decreasing our home value. Please consider another alternative. Surely there is a remote place to put this tower besides a residential area that's going to be surrounded by homes.

In checking on the computer about this issue the website said there are risks of fire or collapse.

We would like to know of what other locations that have been considered and would like a reason to why this area was chosen.

Sincerely,

Manuel & Mary Moore
