Case No. 2015 - 00404

RECEIVED

TO

MAY 23 2016

Public Service Commission
ATTN: Executive DirectorPUBLIC SERVICE
COMMISSION

ENClosed is A list of land owners who live Near the proposed Cell Phone Tower Site At 395 Miller Ridge Road Pine Ridge Wolfe County Ky. who Do Not want A Cell phone Tower built At that location

NOT ONLY do they have Heath CONCERNS But ALSO It would decrease the value of their land. I urge the public service commission to ASK AMERICAN TOWER to FIND A more suitable location For the tower. It is possible that there Are Other land owners nearby with large tracts of land who would be very Happy to Lease land For A tower site

Page 2

Without Gambling with the Health And Safety of the people. They Could Advertise with the local News paper, The Wolfe County News At 606-668-3595 FAX 668-6001 For A tower Site.

If the tower is built at the proposed Site we will be forced to ABANDON our property.

The present Cell phone Tower at approx 800 ft. to the East of this proposed site has been IN operation for approx 30 years which at the same time several people living nearby have died of Cancer. Also many more have serious health problems. I believe it would be AN INSULT AND A SHAME to build another Cell phone Tower IN this community.

Thank you

CAMPBELL, KY 41311

If you live within a quarter mile of a cell phone antenna or tower, you may be at risk of serious harm to your health, according to a German study cited at www.EMF-Health.com, a site devoted to exposing hazards associated with electromagnetic frequencies from cell phone towers and other sources.

Cancer rates more than tripled among people living within 400 meters of cell phone towers or antennas, a German study found. Those within 100 meters were exposed to radiation at 100 times normal levels. An Israeli study found risk of cancer quadrupled among people living within 350 meters (1,148 feet) of a cell phone transmitter—and seven out of eight cancer victims were women. Both studies focused only on people who had lived at the same address for many years.

Other studies have found that levels of radiation emitted from cell phone towers can damage cell tissues and DNA, causing miscarriage, suppressing immune function, and causing other health problems.

CASE NO. 2015-00404

TO:

Public Service Commission

IN THE LAST LETTER THAT I RECEIVED FROM THE FCC I UNDERSTAND THEM TO SAY THAT UNTIL THE PROPOSED TOWER IS BUILT THERE IS NO WAY TO KNOW HOW HIGH THE RADIO FREQUENCY EMISSIONS LEVELS WILL BE. THERE ARE TWO OTHER CELL PHONE TOWERS LOCATED IN THE SAME AREA. THAT COULD BE TESTED DURING A NORMAL DAY OF OPERATION, ONE IS AT APPROX. 800 FT. TO THE EAST AND ONE IS APPROX 1/2 MILE TO THE WEST. THIS SHOULD BE A SIMPLE TEST THAT WILL SHOW THE RADIATION LEVELS. THIS THIRD TOWER WILL PRODUCE EVEN HIGHER RADIATION LEVELS, I AM CONCERNED ABOUT THE HEALTH AND SAFETY OF THE PEOPLE LIVING IN THIS COMMUNITY. IT IS ALSO POSSIBLE THAT THE TOWER COULD FALL.

THANK YOU
