RE: MARTIN COUNTY WATER DISTRICT

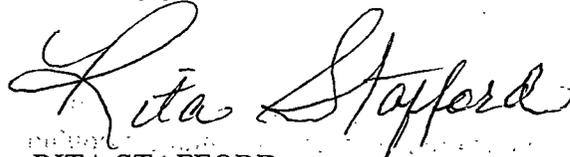

Dear Mathews:

I reside at 4130 Blacklog Road, Inez, Kentucky. For years our water has smelled just like DEAD FISH. I would love to see the people in power in Martin County come to my house and drink a glass of water from my tap.

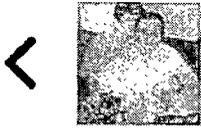

Lately we have had very low water pressure. On May 28, 2017 our water pressure was so low I asked my husband to go out and make sure we did not have a leak. After checking and advising me that there was no leak I posted a comment on Facebook asking if anyone in the Blacklog area had low water pressure. My neighbors commented that they too had low pressure and that they didn't even have enough pressure to bath their grandchildren. My friend, Annie Hammond, who is the wife of Joe Hammond (which I believe is the manager of the water company), replied to my comment and said that Joe was going to the 40 East Pump station and try to adjust to get us some help. After a short period our pressure was back up (not to full pressure but better than it had been) so I assume he turned the valve or something. My question is what gives them the authority to turn our pressure down to the point that it is ridiculous. I pay a bill like everyone else for water that I can't even drink must less turn the pressure down.

Just to throw this out there besides paying a monthly water bill I still spend the least amount of \$80.00 and up a month for drinking water. SAD!!! I would appreciate any help you could do for the citizens of Martin County.

Sincerely yours,

RITA STAFFORD

Rita Stafford, Joe is sending someone to 40 East pump station and try to adjust to get you some help. Actually he put his shoes on and going himself.
