Dear Ms. Matthews:

Re: Case #2016-00142

I am writing in regard to the problems with the Martin County Water District. Our water is unfit for human consumption. I am eighty-two years old and have to purchase all the drinking water I use. This situation is a health hazard as well as a financial burden for those of us on a fixed income. The water is off quite often and some days we have very little pressure. It is almost impossible to get a call to the water office personnel.

Nothing has been done about our situation for years and the time has come to dissolve this system and turn it over to another one. Any assistance in getting the people of Martin County safe drinking water will be appreciated.

Sincerely,

Joyce H. McBride
