Dear Ms. Matthews:

RE: Case #2016-00142

I am writing in regard to the problems with the Martin County Water District. Our water is not fit to drink. The water pressure is low and we are without water all too often. Lines keep breaking and seems we are under boil water advisory a lot. I am a senior citizen (91) and live by myself on a fixed income. It is a hardship on me and all the other elderly to have to purchase water to drink and cook with. Our officials and the water board cannot see the need to replace or upgrade our water system. Monies allocated for the upgrading in the past has been squandered and we are in the same situation.

The water board should be replaced and any money allocated for upgrading our water should be closely monitored by your office. This has gone on far too long. Your help in this matter will be appreciated by all.

Yours truly,

Juanita Justice
