Well, most of us would like a 12 percent increase this day and time in our income. So it appears that the increase is extremely large and as icing on the cake, the biggest users don't get nearly as large a percentage increase. That appears to the general user that we're getting shellacked. So if nothing else it appears like an unfair increase that places the biggest burden on the little guy. I appreciate your time and this opportunity to express my opinion.

Their rate is almost THREE TIMES greater than the nearest commercial rate increase. The majority of the increase goes directly to the cooperative in the form of member fees. I don't see how this is logical if we truly have gone the past 10 years at the current rate and now suddenly need a 12% hike.
