Dear Ms. Adams:

Thank you for your comments on the application of Louisville Gas & Electric Co. for an adjustment in rates.

Your comments in the above-referenced matter have been received and will be placed into the case file for the Commission's consideration.

As you noted, the case number in this matter is 2016-00371. It would be helpful if you would please refer to it in any further correspondence.

The application and other documents in this case are available at
http://psc.ky.gov/PSC_WebNet/ViewCaseFilings.aspx?case=2016-00371

Thank you again for your interest in this matter.

Subject: Reject LG&E's proposed rate increase (Case No 2016-00371)

Dear Public Service Commission,

I am writing you today to request that you reject LG&E's proposed rate increases (Case No 2016-00371). The jump in flat-cost service fees is bad for both for families and our environment. By seeking increased revenue through service fees as opposed to usage fees LG&E is removing the cost incentives for consumers to reduce their energy use. Working families who are looking to reduce their monthly expenses by cutting back on their energy use will see a fair drop on their utility bills for their efforts if cost increases are fixed.

This also presents a missed opportunity for Kentucky's environment as households see no motivation for reducing the amount of energy provided from coal burning power plants that harm our air and water.

For these reasons I am asking that you reject LG&E's proposed rate increases.

Working families who are looking to reduce their monthly expenses by cutting back on their energy use will see a fair drop on their utility bills for their efforts if cost increases are fixed.

I'm a customer of LG&E and I completely reject the need to charge a higher monthly fee. We need incentives, not dis-incentives, to address the need to cut energy usage.

This also presents a missed opportunity for Kentucky's environment as households see no motivation for reducing the amount of energy provided from coal burning power plants that harm our air and water.

For these reasons I am asking that you reject LG&E's proposed rate increases.

Importance: High

I am writing you today to request that you reject LG&E's proposed rate increases (Case No 2016-00371).

The proposed rate increase is insanely stupid! It takes away the motivation to conserve energy. Billing should never be flat rate based and should be based on consumption that provides motivation to conserve and more fairly assesses those that use it. And flat rates disproportionately hurt lower income families.

Please reject LG & E's proposal as it is absolutely ludicrous!

Jim Denny

Dear Public Service Commission,

I am writing you today to request that you reject LG&E's proposed rate increases (Case No 2016-00371). The jump in flat-cost service fees is bad for families and our environment. By seeking increased revenue through service fees as opposed to usage fees LG&E is removing the cost incentives for consumers to reduce their energy use.

This sends the wrong market signals and is the wrong direction to take. Cutting energy use is important to reducing environmental pollution and global climate change, and working families who are looking to reduce their monthly expenses by cutting back on their energy use will not see a fair drop on their utility bills for their efforts if cost increases are fixed.

This presents a missed opportunity for Kentucky's environment as households see no motivation for reducing the amount of energy provided from coal burning power plants that harm our air and water.

For these reasons I am asking that you reject LG&E's proposed rate increases.

Subject: Why the rate increases

I just opened the mail from one of my shops, and saw the suggested rate increases.

To say I am puzzled would be quite the understatement. Natural Gas costs dropped almost 36% from 2014 to 2015....how much of a decrease did we see then?

So far this year, the average delivered costs looks about the same as last year....what is the justification for a rate increase.....

Ditto for electricity.....unsure the basis for this.

Please advise, but not with public utility speak, just tell me the truth.

This seems way high.
