Dear Ms. Banta:

Thank you for your comments on the application of Louisville Gas & Electric Co. for an adjustment in rates.

Your comments in the above-referenced matter have been received and will be placed into the case file for the Commission's consideration.

As you noted, the case number in this matter is 2016-00371. It would be helpful if you would please refer to it in any further correspondence.

The application and other documents in this case are available at
http://psc.ky.gov/PSC_WebNet/ViewCaseFilings.aspx?case=2016-00371

Thank you again for your interest in this matter.

I feel the proposed rate increases on customer service charges would unfairly affect lower income and small home and business owners. The needed revenue should be raised as a percentage of energy usage rather than a flat fee. Those who strive to conserve energy and resources should not pay the same rates as those in large or multiunit properties or those with frivolous, wasteful energy usage.

I have received two different amounts that LG&E wants to raise the base monthly meter charge. One says almost \$20 per month another said \$3.50 per month. I could live either with the lower figure, but not the larger figure.

Subject: LG&E Case #2016-00371 & KU Case #2016-00370.

It is time to STOP treating corporations as though they belong in the neonatal intensive care unit and stop acquiescing to their EVERY request for more money. They are not infants at the endless milk bottle to be supplied with their every more money request.

ENOUGH is ENOUGH!

I agree with KFTC regarding proposed rate increases:

" These proposals will hurt many customers, especially low and fixed income people, apartment dwellers and people who attempt to conserve energy.

They will limit people's ability to save money by reducing their energy use. And they will discourage many from installing rooftop solar or energy efficient systems,

steps which are needed to lower harmful pollution and protect our health and climate."

Thanks for taking the time to read my concerns to call for EFFECTIVE accountability.

Sincerely,

Emily Boone

Subject: LG&E Case #2016-00371 & KU Case #2016-00370
Importance: High

The current proposed rate hike is criminal – there are many families in our area who are barely able to even afford the current cost of the utility. Doubling the rate will force many families beyond their means. Furthermore, the actual service doesn't warrant any of the additional money – they have not provided adequate service for the money we are paying.

The majority of our bill goes to taxes and fees -- NOT to actual service. Until I see evidence that the rate increase will not just line the pockets of the fat cats at the top I will not commit one more cent to this measure.

Do not punish us because LG&E didn't adequately budget.

From: [REDACTED]
Sent: Wednesday, April 19, 2017 5:03 PM
To: PSC - Public Information Officer <PSC.Info@ky.gov>
Subject: Re LG&E rate/service charge hike

To Whom It May Concern:

I would like to speak to the proposed LG&E rate hike. As I understand it, the rate hike would not be based on actual usage, but instead would be an increase in the service charge.

I would like to voice my strong opposition to this proposed hike. I am almost 65 yrs old and am unable to work due to health reasons, and I literally have no income. I am on Section 8 and receive a utility check for which I am grateful, but it does not cover my monthly water and electric bills, so I'm already having to depend on Liheap and the local community ministry to help with my utility bills at least 2-3 times each year.

I try to keep my utilities as low as I possibly can, and it's the service charges that

are killing me. For example, before the water ever comes out of my tap, I already am being charged almost \$80.00 in service charges. (My actual water usage and drainage charges are only abt \$22.00).

If LG&E raise the service charge, it will place an even bigger burden on me to pay my utilities and keep them turned on. I currently live on less than \$170 per month, and I know what it means to go without, to be cold because I can't afford to turn the heat up, and to be so warm in the summer that I get sick because I can't afford to turn on the air-conditioning. I don't know how I would be able to compensate for this increase.

While LG&E might consider \$10.00-\$13.00 a month a "slight increase", to me it may as well be \$100.00. Even an \$8.00 increase would place a burden on my already precarious financial situation.

If I were in good financial shape I might not mind, but because this rate hike is based on service charges instead of actual usage, I believe it unduly affects people like me - a senior citizen on a very limited income - as well as disabled and other low-income individuals. It is far more difficult for those of us who are already vulnerable to come up with this extra money, than it would be for someone who is more financially able and might not miss those extra dollars.

For people like me, there are no "extra dollars". If LG&E wants a rate hike, then I believe it should be based on usage. I try to keep my usage low, and I do not think it is fair to ask me and those in a similar situation, to pay more when there are people who are less thrifty with their electricity and gas usage, and use so much more of both these utilities.

I realize that an agreement has been negotiated at the local level over the objections of people like myself and several non-profit agencies who advocate on behalf of the poor, elderly, and disabled. But the final decision to grant or deny this hike will be made by the KY PSC.

I am asking, literally begging, you to say, "NO." If rates need adjusting, let it be on usage, which is a far more fair and equitable and reasonable solution.

Thank you for listening.

Sincerely,

Sandra J. Limpert

This suggested increase comes at a time when Trump is trying to get American and the working class on their feet again. Adding more spending by the homeowner for a necessity such as gas and electric is outrageous, given what you already make as a profit. I am adamantly opposed to such a rate hike and I agree with KFTC regarding proposed rate increases:

" These proposals will hurt many customers, especially low and fixed income people, apartment dwellers and people who attempt to conserve energy. They will limit people's ability to save money by reducing their energy use. And they will discourage many from installing rooftop solar or energy efficient systems, steps which are needed to lower harmful pollution and protect our health and climate."

Subject: LG&E Case #2016-00371

I am writing in opposition to the above referenced proposal which disproportionately impacts customers who are low income and those (like me) who take pride in cutting energy usage to save money. If LG&E wishes to raise more money then they should increase rates versus raising fees. Let those who use more energy pay a proportionate share of the increased costs versus forcing everyone to unfairly pay more regardless of usage.
