RE: Case No. 2017-00048

My sister and brother in law received a letter from East Kentucky Network concerning the above case number. My sister and her husband are prior owners of property where a proposed tower is being construction. My sister responded to this letter favorably due to fact that we have no cell service in our area. My sister does not live in the Roxana Kentucky area and she does not own this property. I am the owner of this property and I also am in favor of having a tower but I am concerned where the location is. I am the owner and I have not been contacted by East Kentucky Network or anyone else. By viewing the enclosed map the proposed tower could be on my property or on the property line. The map is a google earth map and extremely difficult to see where

the top of the mountain is. My property line runs up a ridge to the top of the mountain and by viewing the map it looks as if the Roxana site is or could be on my property.

Evidently a title search nor a survey was not conducted or someone would have known that I am the owner of this property. My deed is filed in the Letcher County Court Clerk's Office. I am concerned about the placement of this tower on my property and also very concerned about not being contacted. If the company is relying on some type of old mining map or another property owner's say so and not a survey then in my opinion this is not only wrong but legally liable.

Again I am requesting some type of intervention due to the fact as a property owner of this property I have not been notified. I have no access to my property which has two cemeteries located on my property due to a gate being installed and locked on the only road to the property. There is another cemetery located past my property which has graves of civil war veterans but no one has access to due to the property owner where the road is keeping the gate locked and refusing to let anyone have access.

I am concerned about this matter due to fact of the google map that my sister received it looks like the proposed site could be on my property or on the property line.

I would appreciate any assistance in this matter that your office may provide.

Sincerely,

A handwritten signature in black ink that reads "Michael Watts". The signature is written in a cursive style with a large initial "M" and a long, sweeping underline.

Michael Watts
