ORDER

On April 27, 2018, New Cingular Wireless PCS, LLC, a Delaware limited liability company, d/b/a AT&T Mobility, ("AT&T Mobility") filed an application seeking a Certificate of Public Convenience and Necessity ("CPCN") to construct and operate a wireless communications facility ("WCF"). The proposed WCF consists of a self-supporting antenna tower not to exceed 199 feet in height, with attached antenna, to be located at 2157 Frames Branch, Clay City, Kentucky. The coordinates for the proposed facility are 37°48'23.07" North latitude, 83°57'09.14" West longitude.

AT&T Mobility has provided information regarding the structure of the tower, safety measures, and antenna design criteria for the proposed facility. Based upon the application, the design of the tower and foundation conforms to applicable nationally recognized building standards, and a licensed professional engineer has certified the plans.

Pursuant to 807 KAR 5:063, AT&T Mobility filed statements of having provided the required notifications regarding the proposed construction. Pursuant to 807 KAR 5:063,

AT&T Mobility filed evidence that the county judge/executive and all property owners within 500 feet and contiguous to the cell site have been notified of the proposed construction. The notices solicited any comments and informed the recipients of their right to request intervention. To date, no public comments have been filed with the Commission.

AT&T Mobility has provided documentation from the Federal Aviation Administration ("FAA") stating that notice to the FAA is not required at the analyzed location and height for slope, height, or straight-in procedures. AT&T Mobility has also provided documentation from the Kentucky Airport Zoning Commission ("KAZC") stating that a permit is not required from the KAZC for the construction and operation of the proposed facility.

The Commission, having considered the evidence of record and being otherwise sufficiently advised, finds that AT&T Mobility has demonstrated that a facility is necessary to provide adequate utility service and, therefore, a CPCN to construct the proposed facility should be granted.

Pursuant to KRS 278.280, the Commission is required to determine proper practices to be observed when it finds, upon complaint or on its own motion, that the facilities of any utility subject to its jurisdiction are unreasonable, unsafe, improper, or insufficient. To assist the Commission in its efforts to comply with this mandate, AT&T Mobility should notify the Commission if this antenna tower is not used to provide service in the manner set out in the application and this Order. Upon receipt of such notice, the Commission may, on its own motion, institute proceedings to consider the proper

practices, including removal of the unused antenna tower, which should be observed by AT&T Mobility.

IT IS THEREFORE ORDERED that:

1. AT&T Mobility is granted a CPCN to construct a wireless telecommunications facility. The proposed facility consists of a self-supporting antenna tower not to exceed 199 feet in height, with attached antenna, and is to be located at 2157 Frames Branch, Clay City, Kentucky. The coordinates for the proposed facility are 37°48'23.07" North latitude, 83°57'09.14" West longitude.

2. AT&T Mobility shall immediately notify the Commission in writing, if, after the antenna tower is built and utility service is commenced, the tower is not used for a period of three months in the manner authorized by this Order.

3. Documents filed, if any, in the future pursuant to ordering paragraph 2 herein shall reference this case number and shall be retained in the utility's general correspondence file.

By the Commission
