PUBLIC SERVICE  
COMMISSION

Dear Public Service Commission,

I am writing for intervention on the purposed increase for LG&E and KU utilities. I feel very strongly regarding this matter. I saw in the paper that residential customers will be the ones to bear this increase. I need your commission to understand that there are several citizens that are aged and on fixed income that can't afford this increase or at least such a large increase in the bill. I would like to also emphasize there are an increasing number of single mothers who also are on fixed income not to mention the ones that are low income. The program that offers help with bills in the winter time has not increased however the ones that need it has. I can understand that improvements need to be made but why not increase the usage bills to companies as well as residents. I personally am tired of every few months that an increase in requested by LG&E/KU and the "residents" are the ones to have to pay for the increase. I know there has to be a better way than to drain all the folks on fixed income and basically that is taking food from the mouths of the citizens and most of all the seniors. Thank you for taking the time to consider my and many other opinions in this matter and hopefully when you go to vote on this increase you will consider the above opinion.

Warm regards,  
Teresa V Miller
