Dear Mr. Schmitt :

I am writing in reference to the proposed natural gas pipeline which would cross a section of Bernheim Forest, destroying eight acres of pristine woods and creeks.

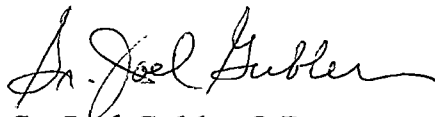

The undertaking would be an ecological disaster to this beautiful land admired and respected by those who live in the area, and the thousands who visit it annually.

It would also destroy the habitat of many forms of wildlife that, for many years, have depended on its protection and food for survival.

Please do all that you can to prevent this destruction of beauty and habitation God has given to this area, which has been carefully preserved for almost one hundred years.

Thank you for taking time to read this, and for your serious consideration.

God bless you,

Sr. Joel Gubler O.P.
St. Catharine, KY
