Re: Sworn Affidavit certifying completion of utility workshops associated with case number:
2019-00144

Dear Mr. Chandler:

This is to certify that the Kentucky Water Resources Research Institute completed a training workshop associated with the series of approved workshop associated with case number 2019-00144 on October 31, 2019 at the Estill County water utility (for 4.25 hours of instruction) in support of KRS 74.020(6) and KRS 74.020(7). This workshop was conducted in place of a similar workshop that was originally scheduled for Whitesburg, KY on June 18, 2019 but was subsequently cancelled. However, the specific program offered at Estill County corresponded to the program approved for the West Liberty workshop under the same case number for 4.25 hour which as originally approved by the PSC on June 11, 2019. Board members in attendance at the workshop in Estill County on October 31, 2019 who participated in 4.25 hours of training included:

Blain Click: Water Commissioner
Skip Johnson: Water Commissioner
Jack Stickney: Water Commissioner

Because of the current emergency conditions, I am not able to obtain a notarized "sworn" statement.

If you have any other questions or require any further documentation, please do not hesitate to contact me.

Sincerely,

Lindell Ormsbee, P.E., P.H., Ph.D., D.WRE
Director, Kentucky Water Resources Research Institute
Raymond-Blythe Professor of Civil Engineering
Associate Director, UK Superfund Research Center
