RESPONSE TO ORDER OF JANUARY 3, 2020

* * * * *

Comes GREEN RIVER VALLEY WATER DISTRICT, by Counsel, and in response to the Order of January 3, 2020, states as follows:

1. WRITTEN RESPONSE TO COMPLAINANT'S COMPLAINT:

The District addressed the low pressure problem at the Complainant's address by installing a pump on the understanding that the property owner would maintain the pump thereafter. The pump was installed in August of 2017. The District has submitted for approval a tariff for rules and regulations for low pressure areas, a copy of which is attached. The District would propose the policies set forth in the proposed tariff which should take effect on February 1, 2020 as a way of addressing the Complainant's concerns.

2. FAILURE TO COMPLY WITH COMMISSION'S ORDER OF NOVEMBER 13, 2019:

The Manager did not receive notice of this Order or a prompt response would have been submitted. The Manager's email address is dsp@scrtc.com. The District proposes following the policies in the proposed tariff as a means of addressing the Complainant's concern.

3. RESPONSE AS TO WHY PENALTIES IN KRS 278.990(1) SHOULD NOT APPLY:

The Manager did not receive notice of the Order of November 13, 2019 and failure to respond was not a willful act.

This the 9th day of January, 2020.

RATES & CHARGES

AG. Rules and Regulations for Low Pressure Areas

(N)

1. New Customers:

The water district will not set a meter for any new customer where the utility cannot maintain at or above 30 PSI at the water meter. The only exception will be if the prospective customer agrees to install and maintain a pump at their own expense that will provide them with the minimum pressure required by the Public Service Commission (PSC).

2. Existing Customers:

For all customers that had a meter installed by the water district prior to February 1, 2020, where the system pressure was below the required 30 PSI, the water district will install an individual pressure pump and maintain for a period of no more than a year.
