John,

Good morning. Attached for your review are the photos and narrative from LG&E's Damage Investigator for the damage that occurred at 3105 Wyndbrooke Circle, Louisville, KY, on 10/31/2018. Please let me know if you need any additional information.

Kind regards,  
Joe

**Narrative:**

A contractor (Blue Jay Communications) was boring in new Spectrum TV duct when they hit the bottom of a 2" plastic gas pipeline. The contractor stated that they spotted the top of the main to measure the depth before boring but still did not give enough room for the bore. The LG&E Damage Investigator explained to the contractor that they need to hand expose the facility at a minimum of 18" around and both sides so they see clearly and have enough time to adjust if there bore head location is off as this would give them time to react before a damage is caused. The 2" gas pipeline was located accurately and marks were visible.
