To: PSC Consumer Web Inquiry <PSC.Consumer.Inquiry@ky.gov>
Subject: Case # 2020-00350

While the PSC may permit some form of rate increase for PPL within Kentucky to account for inflation, 11% on average and approximately 18% to fixed charges is egregious in the current environment of job loss and economic uncertainty. PPL has raised and then maintained its dividend rate throughout the pandemic, most likely because they enjoy monopoly status as an essential utility. Perhaps if PPL needs to fund long-overdue upgrades despite previous increases intended to do the same, they should first look in-house. Surely their investors would be more comfortable if their investment is sound going into the future rather than depending on alternating annual rate increases at the mercy of the PSC? If that isn't manageable, then perhaps it is finally time they be relegated to generation/maintenance only and the market opened to wholesale competition among independent providers as is done in many other areas of the country.

Damon

Below is the result of your feedback form. It was submitted by [REDACTED] on Sunday, January 24, 2021 at 2:53 PM

Name: Wilma Lockery
Address: 1904 Hoke Road
City: Louisville
State: KY
Zip Code: 40220
Phone number where you can be reached:
Home phone: [REDACTED]
Utility Name: Louisville Gas and Electric

State the nature of your concern: A tax increase during these trying times is totally unwarranted. Unemployed and those living on fixed income are currently budgeted so thinly that is a question of medicine, food, utilities or rent. I couldn't agree more that it's time for companies to tighten their belts and trim from the top, I.e. cut executive salaries, do away with

unwarranted bonuses and increase efficiency.

Have you contacted the utility about the problem: No

Subject: LG&E Rate Hike in Louisville.

My name is Derrick Pedolzky and I'm a resident of Old Louisville and the current Chair of the Old Louisville Neighborhood Council.

I oppose the rate hike for LG&E as it has been proposed. A 12% rate increase is more than extreme and will make it difficult for many in the Old Louisville area who are already struggling to support themselves.

I see no increase in service to our area and do not see why Old Louisville residents would be required to pay for LG&E installations and upgrades in suburban areas.

Please strike down this unethical rate increase for the good of all Louisvillians.

Thank You,
Derrick Pedolzky
Chair - Old Louisville Neighborhood Council

Subject: LG&E Rate Hike

To whom it may concern,

I am a Louisville resident of 7 years. My newly-wed wife and I have been homeowners for the last two of those years.

We strongly oppose the proposed LG&E rate increase.

We are young professionals with well-paying careers in a small home and we still struggle with the high bills received from LG&E. Many of our friends that are new homeowners have lost their jobs or are in less lucrative positions, and we know that this rate increase would severely affect their already strained financial stability.

A rate increase of this magnitude would almost certainly ensure that we need move out of Louisville when we look to grow our family in the coming years.

I request any proposals for rate increases be revoked until early 2022 at soonest.

Best,
Collie Crawford

Case # 2020-00350

Now is not the time for a predatory LG&e hike.

I'm a member of a Facebook group for food service workers and it is absolutely heartbreaking to see how many of them are so far behind on their bills due to the pandemic. Their rent their LG&e and water bills all behind and being paid by strangers out of kindness.

And they are not alone. Many small business owners and their employees are closing down and out of work as are so many in the entertainment and arts industries.

Every industry I know is impacted right now and laying people off while some corporations in greed that are making tons of money are trying to use the pandemic as an excuse to work on skeleton crews.

So many are on the brink of homelessness as it is and this could be one of the dominoes that knocks them all down, leading to more homelessness than our city can handle.

Please consider this and consider the inflation nor salaries has nowhere near matched the hikes the LG&e is asking for.

Thank you.

Subject: LGE rate increase

Hello, I am writing to oppose the LGE rate increase. This rate increase would negatively impact us and the community. It also decreases the likelihood people will use solar power which is much needed in this time or climate crisis. We've spent many dollars preparing our home for solar and this would decrease the return rate by 3 fold per kWh! What's the point? Only an insensitive company would raise rates and decrease what they allot for solar this much during a pandemic and for what reason? If they can't manager their money, they at least need to explain this to its customers.... 12 percent???

Thank you for listening to my concern.

1304 Lexington rd resident

Amanda

I know the proposed price hike doesn't seem like a lot but with covid, employment being what it is and the general state of the country right now it seems that a rate hike is just going to make matters worse. A lot of people are not able to get by at this time and higher energy bills are the last thing they need.

Just saw on the news in Louisville they are starting up a program to help people pay their heating bills and then they want to raise rates? Seems like that will only make the problem worse. Thank you for your time, Rex Carter

Please do not allow LG&E to increase their rates. The country is still in the middle of a pandemic with so many people without jobs. This is cruel to increase rates during a time where our country needs unity and support. It baffles me that anyone would allow this, especially during winter when bills are already higher just to keep warm. I know there isn't much I can do, but I hope this helps in some way.

I am not in favor of any rate increase, especially during these times. It has already been raised recently by 11 percent. Others should not have to pay for others that can not. Lge/KU has had a monopoly for forever and a day ...I find it to asking or actually demanding a bit much and unkind to fellow citizens.

I just want to express my disdain for LG&E requesting a very LARGE % increase. If everyone in this area was subject to the kind of increase that LG&E is requesting, we would all be ok with the idea.... HOWEVER, there are more people who are unemployed due to the pandemic and cannot afford what they are already paying, and asking for governmental assistance to keep the heat and lights on.

I would like to suggest that utility companies should not be able to raise their rates anymore than the average (and maybe a little under) percentage increase in local wages.

I know that everyone says "It's only '\$(fill in amount)'" but the overall total of what these 'small' increases is more than many can afford. The PSC should consider the overall effect of rate increases and quit allowing utilities from deciding what THEY want. Bills are already outrageous!

Case # 2020-00350

It seriously absurd & I can't fathom why the increase is happening now? There are people who are struggling to pay their utility bills however throw in loss of job, delay in unemployment, the Covid illness itself, unexpected funerals often several in a family, missing work, unpaid quarantine time, medical bills need I go on. "We" meaning one another need to realize that it's imperative to hold off raising utility rates. It really leaves a bleak outlook & a sense of helplessness.

The increase in our LG&E bill was

shocking! I'd hate to see what the bill would be if we had a typical winter.

The typical family is living paycheck to paycheck, lives in a rental, drives a 9-10 year old car. Utilities should not be a luxury.

It's a reality of job loss (I suppose it's safe to assume that all LG&E employees are still working)

There is a domino effect in reality one business relies on another to conduct business, however most of those connects rely on one another.

Obviously the past year has been a nightmare, let's stop the cycle.

The entire country is in a situation & they say "we are in this together" however I question how much truth to that statement when the entire city, state & country is a serious crisis. This needs to be evaluated "until our city, state & country" can conduct business as usual & it's not anytime soon.

We cannot "get through this together"
if "we" can't help care for one another & unite.

Good Morning,

I'm requesting that the Public Service Commission does not approve the rate increase requested by LG&E.

There's never a right time to request rate increases, but this time period is especially hard for people. Over the years

my family has done all it can to reduce our energy usage. Updated windows, new appliances (HVAC, stove, washing machine),

recommended light bulbs, etc. However, our attempts to lower our usage and obtain lower prices are always offset by LG&E's

rate increases. The same could be said for MSD. I'm asking that you take people like me into consideration when the time comes

for the decision to made and rule against their request. Thank you.

To whom this may concern,

I am writing to voice my objection to the price increase to our accounts this year. It's obscene and outrageous during a pandemic when so many are struggling just to keep their homes and not drown from lose of jobs and cut backs on job shifts. So many people have had to take off of work due to being sick and have been out of work. We already had an increase in 2020. I have had to quit my job to stay home with three of my children because JCPS is only doing online schooling and I can not afford childcare for all four of my children. You all should be ashamed of yourselves! I am requesting that this increase in rates not be approved.

Subject: Case 2020-00350

To whom it may concern,

Regarding case number 2020-00350, I, James Coke, a resident of Oldham County adamantly oppose the rate/fee increases currently proposed by LG and E. I understand that fees may need to be incrementally changed as dictated by current economics, but can not understand the desire that LGE wants to switch from usage based charges to standard fee charges as reported in the Courier Journal. A LGE employee was quoted in the article saying "LG&E and KU say the current structure – in which they get most of their revenue from charges that are based on usage – isn't fair to customers who use a lot of energy." I'm not sure how anyone can honestly say that they think someone who uses more shouldn't pay more than those who use less. I would love to hear their justification for charging someone living in a modest dwelling, doing everything they can to be energy efficient, a higher percentage than someone living in a 10,000 square foot house a couple miles away. It is as simple as this, those who choose to use more should pay more. Energy efficiency and modest living should not be punished. I have no problem "subsidizing" (as they stated in the CJ article) those in smaller homes, especially if the alternative being proposed in this fee change would have me subsidizing those who live in larger homes and use more. Thank you for time and consideration.

To Whom it May Concern,

I am writing this letter because I am outraged and completely confused at why Louisville, Gas and Electric would think it feasible to increase its rates on its customers IN THE MIDDLE OF A PANDEMIC, with thousands of people out of work right now; with so many people struggling to keep a roof over their heads and food on the table. The rates were just increased last year and here we are again, just one year later facing a significant increase again. This level of greed and callousness is not acceptable. People are literally lining up in bread lines and food pantries, unable to pay rent and mortgages, and financially stretched to their limits. Why on Earth would your company think to add a significant increase? I HIGHLY object to such an increase, and hope that your company will show compassion and consideration to its consumers in this tumultuous time. I trust that you will respond to my email in kind.

Regards,

Amanda Brown

And I would like to address the recent rate increase for lg&e.

We have rate increases from MSD,
JCPS and now LG and E.

The rate request is beyond the inflation rate and it's timing it horrible... especially during a pandemic.

Even my health insurance does not equal this rate increase.

Do not raise the rates again. There are always cost reductions that can be made.

1/26

Dear Members of the Public Service Commission:

This is to inform you of my dissatisfaction with the proposed increase in the fixed price of electricity and gas for LG&E customers. First and foremost, the tax hikes we are experiencing with respect to MSD and JCPS have been excessive especially during the pandemic. I think it is extremely poor judgement for LG&E to ask for the level of increase being requested on top of those mentioned above.

I had to retire totally from the workplace back in May due to the Covid 19 virus and extra income has come to a halt. My husband and I have been able to meet our budget from our social security but with some budgetary restrictions. We have dropped cable, changed cell phone providers, reduced our driving habits, and, of course, stopped any outside entertainment.

Please take into consideration the financial strain everyone is experiencing to some degree. Even with conservation efforts, with the increase to fixed rate, it will do little to adjust thermostats. Thank you. Melinda Cecil, 2904 Six Mile Ln, Louisville, KY 40220.

**BREAKING NEWS:**

U.S. Proved Oil Reserves Remain Flat, Natural Gas Reserves Decline

[Was Saudi Arabia's Surprise Production Cut A Good Idea?](#)

[Home / Latest Energy News](#)

U.S. Proved Oil Reserves Remain Flat, Natural Gas Reserves Decline

By [Charles Kennedy](#) - Jan 22, 2021, 4:30 PM CST

Lower crude oil and natural gas prices reversed in 2019 a two-year trend of record high proved reserves in the United States as operators revised down their total proved reserves estimates, the Energy Information Administration (EIA) [said](#) on Friday.

The annual report from the EIA showed that proved reserves of crude oil and lease condensate remained basically the same in 2019 as in 2018, with a very slight increase of 0.1 percent. Proved reserves of

natural gas, on the other hand, dropped by 1.0

In that year, crude oil prices were [generally lower](#) than oil prices in 2018, with the price of the U.S. benchmark, West Texas Intermediate (WTI) crude oil, averaging \$57 per barrel, down by \$7 a barrel compared to 2018.

“Lower crude oil prices in 2019 caused many operators to revise their total proved reserves estimates downward even though proved reserves from extensions and discoveries increased slightly,” the EIA said.

To compare, higher oil and natural gas prices in 2018 raised the proved reserves of oil and gas in the United States [to new all-time highs](#). Oil and natural gas proved reserves beat the previous record from the previous year, when rising prices and continued shale resource development in 2017 helped push U.S. reserves to what was then record-high volumes. In 2018, U.S. proved reserves of crude oil jumped by 12 percent.

In 2019, U.S. proved reserves of oil, at 47.1 billion barrels, remain at the record level set in 2018, the EIA said in its [report](#). Producers in Alaska added 259 million barrels of proved reserves of crude oil and lease condensate in 2019, the largest net increase in all states.

In natural gas reserves, proved reserves recorded in 2019 the first annual decrease in the United States since 2015, with Texas posting the biggest decline with drops in large shale gas areas like the Eagle

Subject: Case # 2020-00350

I oppose the recent request for rate increase by LG&E. Citizens in Kentucky are suffering from the pandemic, joblessness, homelessness, hunger and many other tragedies. What they do not need right now is additional bills at all, especially at a time when heating and electrical bills are at the highest due to being home and the winter. If LGE were a compassionate corporate citizen they would at a minimum be proposing a rate decrease to do its part in this pandemic to help out all Kentuckians. Federal, state, and city governments are all doing what they can to help out people financially. LGE should do the same. We're barely golfing on; don't push us over the edge. From what I understand Kroger and Walmart stores have both filed motions to intervene pending their need to raise their prices on food and merchandise to cover the rate increase. Corporate LGE on PA needs to decrease rates. Thank You.

Subject: Case # 2020-00350. Reject LG&E Electric and Gas Increases

Case # 2020-00350
Todd Lowery
3046 Fallen Wood Lane, La Grange, KY 40031

The 2021 rate increases proposed by LG&E on electric and natural gas are unfair to Kentucky residents at a time when many are without employment.

As others have commented, these substantial increases will have a trickle down effect to residents in purchasing groceries, gas, homegoods, etc. This level of increase needs to be further evaluated and if warranted completed on a multi-year, tiered program. Why not alternate increases between electric and gas every other year? Or divide the increases over the next 3 years?

I am requesting KPSC reject this rate increase and recommend LG&E go to their

parent company PPL for some of these funds. As a publicly traded company, PPL, can raise income or divert assets to the infrastructure improvements and not place the burden on Kentucky residents during a pandemic.

I appreciate the opportunity to voice my objection and concerns. I hope KPSC considers KY residents' needs during this difficult time and informs LG&E they need to come up with a new plan for increasing rates.

Thank you,
Todd Lowery

Dear
PSC,
1-4-21

I recently received a letter from LG&E in Louisville, KY explaining that they are seeking an increase of roughly 20% to my monthly bill! I cannot believe my eyes! I, and many of my family and friends are struggling to pay the exceedingly high utility costs already. Many of us have lost jobs and decreased wages. Certainly no one I know has received any type of cost-of-living increase. In good years that increase may be 3 or 4 %. So, the very thought of LG&E getting a 20% increase is ridiculous and infuriating!. During this time the cost should be immediately lowered!!!

Please help us fight this ludicrous rate increase. I have not heard yet of any legal action to fight this measure, but I will be actively advocating and supporting any class action that needs to be launched!

Thank you for hearing our plea of help.

Sincerely,
David Mattingly

Phone number where you can be reached: [REDACTED]
Home phone: [REDACTED]
Utility Name: L,G&E

State the nature of your concern: I am very concerned with the L,G&E application to increase rates at this tim. Especially an increase of 12% for electric service. Such an increase is out of touch with the present reality, outside of not being excessively higher than the current inflation rate. We are fighting a national pandemic, which we still have to get under control. People are

losing their jobs left and right. Whatever there is for unemployment, if there is any, already does not cover monthly living expenses. People are struggling to keep food on the table. And - 25% of Americans are going hungry every day. Many of those, who have lost jobs may have to take early retirement, thus applying for Social Security, if eligible. At this point, we cannot know how our economic, financial and/or political infrastructure develops. There for I ask that you reject L,G&E rquest to increase any rates at this time. Sincerely Michael F. Diedenhofen
Have you contacted the utility about the problem: No

Subject: Case #2020-00350 DO NOT APPROVE

Hello,

I am writing to ask you *not* to approve LG&E's proposal to increase electric and gas rates for Louisville residents and businesses by almost 12% and 10%, respectively (Case #2020-00350).

Even with the addition of the economic 12-month relief surcredit program, the proposed rate increase would be incredibly damaging. Our community is already struggling from an economic downturn, unprecedented job losses, and an ongoing global pandemic—and all without substantial State and Federal relief efforts.

The future is already uncertain; there is no need to exacerbate that uncertainty with an additional financial burden. Please consider these consequences in your review of LG&E's proposal. Now is *not* the time for a rate increase in essential utilities. Please, our electric bill for December was already \$100 higher than November. We can not afford more than this!

I'm looking forward to hearing from you. Thank you.

I don't agree with the increased rates for LGE. They are constantly doing unnecessary things. Our rates increased this month totaling an extra \$80. They have also just charged us extra on our bill many times when the weather was "too temperate." Apparently that's legal? Ridiculous

They get away with highway robbery way too often. This needs to stop. They need to be Held to the same standards as the rest of us and figure out how to decrease costs and focus their funds on what's important instead of, for example, cutting down all the trees that were a sound barrier to the highway in my neighborhood of Warwick park — for no reason!

Please do not allow this.

I oppose the rate increase. Not only for myself, but everyone. We are in the middle of a pandemic. More than half the state/city is unemployed or underemployed. People are already playing the game of do I pay LG&E or do I eat, do I get to feed my family? Can I pay for medicine? 9% and 12% add up fast. That significantly cuts into people's income. It may not seem like much money to whomever came up with the increase, but to more than half the city, that's too much money.

This city was struggling financially before the pandemic, and now you want to raise rates. Read the room.

Thank you!

As a resident of Louisville, I am already struggling to pay my electric bill. My latest gas & electric bill was over \$200.00 for service. We have a house payment, we have to pay for water and trash service (our area does not offer city-paid refuse service) in addition to supporting 2 children. To add insult to injury, LG&E is seeking a rate increase of 10+ percent at a time when employers are not required, and do not provide paid leave for COVID related reasons. To many people that might be pocket change, but to us that's over \$20 a month if the current winter weather trend continues. Because of these high rates, we barely have enough money to pay our bills and feed our children, let alone make improvements to our house like installing more insulation to lower our energy usage. Please do not approve any LG&E rate increases this year.

R.E. LG&E rate increase per Case No. 2020-00350

As a private citizen living in Louisville at 10116 Hornbeam Blvd, I would like to state my objections to LG&E proposed rate increase per the fore mentioned case number.

I am a senior citizen, living on Social Security along with other supplemented income, and I believe the proposed rate increase is excessive and not in the best interest of our community. I also know there many people who are served by LG&E, who are experiencing financial hardships in these days, who will be further impaired by this act of greed on LG&E's part. In addition, many small businesses as well as nonprofit organizations will suffer catastrophic financial hardships if this proposed rate increase is allowed to be implemented.

On another issue, LG&E is spending millions of their customer's dollars on so called "Green Energy" that is not profitable and quite frankly a waist of our money. If they chose to invest is such things, they need to find other ways to finance them!

So, please do the right thing and reject this proposed rate increase.

Thanks,

Dale Hartman

Re. CASE NUMBER: 2020-00350

Hello,

Please do your duty to the citizens of Kentucky and reject the proposals in case number 2020-00350. LGE and KU monopolize the market and we rely on you to regulate and control these rates. This will negatively impact lower income households and discourage people and companies from taking measures to become more environmentally friendly.

This over a 10% increase may be nothing to the rich and powerful but to the low-income communities this will be the extra hour they have to stay late at work, the bread and milk their kids needed for lunch that day, the notepad and coloring pencils a small child can't have anymore, the elderly or disabled individual on a fixed income who has to pay a delivery fee for groceries and essentials during a deadly pandemic, all because money hungry corporations and investors won't

stand to lose a dime. If this proposal passes it will show the lack of empathy our state officials have for its citizens, especially during a pandemic when people are suffering and dying. We can do better, please do what is right!

Subject: Case Related Question- 2020-00350

To Whom it May Concern,

My name is Lucas W. Adams, residing at 2437 Shippen Avenue, Louisville, KY 40206. I would like to register my opposition to proposed rate hikes at LG&E. LG&E customers, who are already struggling to pay current LG&E bills, will find new rates even more impossible to pay. The city is already having to set aside millions of dollars in utility assistance in order to help our most vulnerable citizens. How can new rates be justified at this moment?

This increase would include "fixed daily service charges, meaning that people would not be able to simply "reduce my use" to reduce the bill. These increases are being designed so that we have no choice but to pay them. These charges disproportionately affect high-density, multi-family housing where there are more meters present. These proposed changes are regressive.

While I understand that LG&E wishes to make improvements to its services and with environmental protection comes costs, we have been asked to eat far too many increases in our bills recently and this city and region are being "nickel and dimed" to death. I may be able to eat the cost increase but between this, the water company increases, and a new property tax assessment heading my way, I'm about to see my cost of living in Jefferson county go way up. If I lose my job or pay due to the pandemic, I will be forced to add my name to the growing

list of LG&E customers who very simply cannot pay the bill.

LG&E has stated they are "sensitive" to concerns, but this rate increase, in the midst of a pandemic and global recession of historic proportions is rather ill-timed and feels anything but "sensitive."

Thank you for your time and consideration,

Lucas W. Adams

To whom it may concern:

I am writing to share my disagreement with the proposed rate hikes for LG&E. The COVID-19 pandemic has wreaked havoc on our country and our region. There is simply no justification for LG&E to be able to raise rates during a time when many Kentuckians are struggling to pay rent and buy groceries. A rate raise is a greedy cash grab for a company in the energy industry that is doing quite well.

My name is William Bradley Cronin. I live in Louisville, KY 40206 and I oppose any increase in rates for LG&E.

Brad Cronin

Subject: Lge rate increase

Please do not allow another increase to our LGE bills! We are always told to use less energy, but then we are charged more! Please do not allow this increase right now when so many are already struggling!

Subject: No rate raise!

LG&E,

Are you guys a bunch of monsters or what!?

Like we all haven't been punished enough financially this year! Don't you dare raise our rates....it's not necessary and you know it!

Reva Campana
