**Subject:** Case #2020-00350/ Case#2020-00349

Hello-

I live at 8605 Wayfield Court in Louisville, Ky, 40299.

I just read that the PSC made a fair and forward-looking ruling in the net metering case regarding Kentucky Power.

I hope the PSC will do the same regarding above cases involving LG&E/KU.

We as a state and country need to do whatever is possible to move from fossil fuels to renewable/sustainable clean energy to impact climate change.

It is obvious the utilities want a one-way street when it comes to net metering and the benefits

of solar- as they continue to build out large solar panel installs. Good for them for doing so- just let the consumer benefit as well for 'doing the right thing'.

Thanks again for making the correct judgment regarding Kentucky Power and I hope you will do the same regarding the above noted cases.

Take care!!

Mark Clark

Sent from [Mail](#) for Windows 10

**Attention:** Kentucky Public Services Commission Reviewers of LG&E Case # 2020-00350.

**Topic:** LG&E proposal for 80% reduction in credit paid for rooftop solar power.

**Summary:** Do not approve the LG&E proposal. Maintain the current pricing of LG&E net metering.

**Rationale for rejecting the LG&E proposal:**

- This LG&E proposal is a breach of contract by LG&E and against existing KY enacted law; it negates the good faith efforts of current and future owners of rooftop solar panel systems.
- In our situation, we used funds from our retirement savings to purchase our rooftop solar system, with the promise of it paying for itself over the long term.
- And very importantly, we purchased our system as a major part of our commitment to reducing reliance on non-renewal energy sources and to protecting the environment for us and for future generations.
- Further, we are helping sustain and grow the solar industry and create many stable and well-paying jobs in Kentucky.
- Also, the LG&E proposal appears to violate existing law that protects customer choice.
- The LG&E proposal demonstrates LG&E's lack of respect for Kentuckians and for the environment. It showcases LG&E arrogance and corporate greed and lack of fairness, and community responsibility.

Throughout these PSC proceedings, additional compelling reasons for rejecting LG&E's proposal have and will be presented. We all are placing our trust in the PSC's wisdom, experience, objectivity, and fairness to arrive at the correct solution to this issue, as you have done already in the associated KU Case # 2020-00349.

**Recommendation:** We ask that the PSC reject the LG&E proposal described in Case #2020-00350.

(Respectfully, William Deines, 4318 St. Regis Lane, Louisville KY 40220,  
[REDACTED].)

**Subject:** Re: Recall: dont raise rates

Please make LGE give more credit to the solar array owners. At 2 cents instead of 10 cents paying solar energy owners. It takes 39 years to recoup the cost of a solar array. So, people are not motivated to pay for solar even though the costs have gone down. Another reason for giving more credit to solar energy owners is because people's solar arrays reduce the energy you produce in peak times, their transmission equipment lasts longer. Why did LGE cancel their energy Efficient program? LGE shouldn't have monopoly power as a private company.

Please help the people lower our carbon footprint while lowering our cost.  
Thank you.

**Subject:** 2020-00350 LG&E net metering

Dear PSC Public Information Officer:

My name is Agnes Coveney and I live at 126 N. Peterson Ave. #9, Louisville KY 40206. Please do right by Kentucky's LG&E and KU customers by dealing with these two utilities in the same way that you ruled in the Kentucky Power net metering case. It is hard times for many Kentucky families and a bad time to raise rates and fees. The new flat fee that is proposed is unfair to people who use less energy for economic or environmental reasons. I try to really minimize my energy use for the good of the earth.

The Public Service Commission needs to treat the LG&E-KU customers who are the locally-owned rooftop solar users fairly. Please use the same reasoning and rulings that you did for Kentucky Power. Your ruling for Kentucky Power and net metering is enlightened, and forward-looking for the future of rooftop solar and other customer-installed renewable energy resources..

Finally, please open your hearings to the public.

Thank you.

**To:** PSC Public Information Officer <[PSC.Info@ky.gov](mailto:PSC.Info@ky.gov)>  
**Subject:** case number (2020-00350 for LG& E

Dear PSC Public Information Officer,

I am advocating that the net metering rules currently in place with LG&E should remain the same. I believe people need to be given an incentive to make changes to the energy production sector of our country in order to keep energy costs low and help lower our overall carbon foot print that so many scientist claim is important to the environmental health of our world. We are only just beginning to see real world changes to the capability of solar production with our current rules. Any lessening of the rewards given to consumers will lessen the adoption of solar energy and the scientific and manufacturing gains we are currently seeing will dramatically slow.

Also, as I understand it LG&E is already asking the public to subsidize its solar farms so it seems hypocritical to make changes to the current net metering rules until significant gains have been made in the solar energy production field. I believe the solar energy manufacturing industry needs a very long lead time in any changes to the rules. Otherwise these rule changes would negatively impact solar energy research and development as well as the solar energy business model and ultimately the consumer's.

Thanks,

Lyle Palmer
