Good evening! I am a Kenergy customer located in Henderson County Kentucky. I am in full support of high speed broadband internet services for Kenergy members.

We live in a technology based world, so it is hard to believe that rural areas of our community are unable to receive internet services at our homes in the year 2022. My family and I have resided at our address for over 10 years. Each of those ten years we have spent time exploring internet possibilities for our area to hear the same response after each attempt. "We're sorry but internet services are not available at your address."

The lack of internet services puts a hindering on our lives. We have three school aged children, all of which require internet services for some of their school assignments. To complete their school work we literally have to go to the library or a family member's home, which is ridiculous. NTI school days are nearly impossible. We run into the same issues with our jobs. Work from home is nearly impossible due to internet barriers, and has caused us to turn down lucrative jobs opportunities due to lack of internet capabilities at home.

Aside from necessary reasons, there are the "fun" needs like video streaming, etc. We could save lots of money on tv services if internet were an option, yet we pay overpriced satellite tv services to have something to watch occasionally for enjoyment since we cannot utilize Netflix, Hulu, etc.

The year is 2022. The point is simple. All areas should be provided opportunities for internet services to advance with the rest of the world. We shouldn't be detoured from living in rural areas

due to lack of internet capabilities. I strongly support the broadband internet services for our area.

Our future generation needs it.

Thank you,

Rachel Trout

Please consider providing high-speed broadband internet for Henderson County. We are not offered high speed internet service except by using a hot spot with our phones. My son attends Henderson County High School and will be attending Henderson Community College in the Fall. With NTI days with being out of school, a high speed internet will be beneficial when participating and submitting school assignments. I also would have an opportunity to work from home with my current employer with this service. I look forward to hearing the progress of this project.

Thank you,
Doug and Amy Simpson

Subject: Kenergy Internet

Hello, my name is Michelle Green and I live at 18809 Middle Delaware Rd, Henderson, KY 42420. We currently do not have an acceptable internet provider. I am using my ATT hotpot for data. We really need an upgraded service in the county especially if our children are expected to do online learning. Also, not having reliable internet interferes with people having the option to work from home. With technology rapidly advancing and more jobs becoming stay at home jobs, there is no reason why rural or city shouldn't have the availability for fast internet services.
