Case Number 2023-00296

September 27, 2023

Dear Executive Director.

of the Cloverfork Wireless Communication Facility by New Cingular Wireless PCS, LLC doing business as AT&T Mobility and Tillman Infrastructure LLC, Case Number 2023-0029 The address of the site is 227 Industrial Park Road, Harlan, Kentucky 40831. I have several concerns about the tower.

My understanding is this facility is to improve the cell signal in the area around downtown Harlan. Now, the proposed site will not help in its current location due to mountainous terrain. The Public Service Commission is tasked with looking at "the general area concerned and the likely effects of the installation on nearby land uses and values." KY Public Service Commission, Case No. 2022-00010, May 19, 2023. The proposed sight is close to the Sunshine Community of Harlan County

The Fairview section of Harlan will continue to be a dead zone after construction of this tower. The signal from the new facility will be blocked by a mountain and will not reach this area. The proposed tower should be placed to utilize the best signal for the area the tower is serving. Which should be high on a mountain away from any residential community.

4-

While the U. S. Federal Communication Commission (I-LC) claims that which facilities are safe, the U.S. Department of the Interior Markes that while electromagnetic radiation standards used by the FCC confinence to be based on thermal heating, a criterion now 30 years out of date and inapplicable loaling land https://wireless2.fcc.gov/UlsEntry/attachments/ottachmenty/www.kikispallifeENTS= HPm37w1xh8ngZg8MimLp2TMB1P070-1P2Pns54uKahwUkVkikispallife

Other countries now limit public exposure to the lower than the FCC standards. If exposure isn't safe for whether, have the laborate for residents of Sunshine?

Studies have shown that even at low levels of radiation, there is audience of biological damage, Brain tumors, cancer, Weakened Immune function, childhood leukemia, and ovarian follicles.

In May of 2011 the World Health Organization (WHO) classified the type of carbindary from cell towers as Class 2B carcinogenic, which means possible carriequent to Humans, the same category as lead and DDT.

An article published by the American Association of Pediatrica reasons containing the children may be more vulnerable than adults "because of the published in public susceptibility of their developing nervous system. In adults in published in the published in t

Finally, the health hazards and the unsightliness of these installations will decrease property values. The perceived threat of construction alone would lower property values. Which in turn, means less tax dollars for an already economically distributed county. The U.S. Department of Housing and Urban Development (**!tital mindelicate categorize cell towers with "hazard and nuisances," and HUD requires its catedled

appraisers to take the presence of nearby cell towers into combidies when determining the value of single-family residential preparties. Stockies when the proximity to a cell tower can lower property values from the fin time https://archives.hud.gov/offices/hsg/sfh/ref/sfh1-18f.cfm

This tower should be donstructed away from residential areas pict with the scommunity.

Sincerely,

Sunshine Resident and Concerned Citizen
