Subject: Comment on Case # 202400326

Dear Kentucky Public Service Commission,

When LGE&E-KU plans for future electricity needs, they should be proposing solutions that prioritize the wellbeing of customers instead of their own corporate interests. [REDACTED] LG&E/KU customers have struggled with paying our energy bills while their health is negatively affected by the air pollution from fossil fuel power plants.

It is illogical and a losing game to continue investing in finite, harmful energy sources. They are becoming more difficult to obtain as we have burned through them and we move closer to having no choice but to use other options. You can be ahead of the game by choosing to invest your customers' money in the long-term option.

Please encourage LG&E-KU to invest in energy efficiency and local distributed energy resources, like rooftop solar and advanced batteries. These options are cheaper in the long run and will help lower the overall demand for energy while helping keep energy affordable for us Kentuckians.

Sincerely,

Ms. Robin Kunkel

Winchester, KY 40391-1829

When do we wake up? As time passes. things get worse and worse. We have a federal government incapable of understanding the writing on the wall and if we, the real people and our chosen local leaders, don't stop our headlong rush over the abiss, the abiss will take us and much sooner than any of us think. This isn't way off in the future somewhere, we are destroying that future daily just as fast as we can while

pretending not to know or that some billionaire has a magic trick. Or do we actually not care?

You trusted commissioners stand between capitalism gone bad and the future of our children and all children everywhere as well as our own lives right here in Kentucky. We have to consume less, not more. The call to action is a daunting one, one you probably didn't anticipate when you accepted the assignment as PSC commissioners, fact is you are where you are and the calls are hard and thankless.

Please face up to the challenge. Less generation, not more. Clean wind, solar, wave, fission... whatever it takes. Conservation. There is no way out, what's real is real.

Thank you for the opportunity to speak.

Sincerely,
Mr. Guy Schuler

Dear Kentucky Public Service Commission,

I am an advocate for increased solar power in our state. My wife and I have solar panels on our roof that provide approximately 1/3 of our electric power. When LGE&E-KU plans for future electricity needs, they should be proposing solutions that prioritize the wellbeing of customers instead of their own corporate interests. [LSEP] LG&E/KU customers have struggled with paying energy bills while their health is negatively affected by the air pollution from fossil fuel power plants.

Please encourage LG&E-KU to invest in energy efficiency and local distributed energy resources, like rooftop solar and advanced batteries. These options are cheaper in the long run and will help lower the overall demand for energy while helping keep energy affordable for us Kentuckians.

Sincerely,
Mr. Chet Sygiel
