Re: Case #2024-00406

Dear Board,

The view from our house will be forever changed if the solar farm is built in the Penrod/Dunmor community. I don't know anyone who would want to buy my place if the view is changed from a field that has been planted in corn to a field of black solar panels. And worse yet, we don't want to look at it every day from our front porch and yard.

Please stop this project. The traffic from the two construction entrances on HWY 949 will certainly make getting to and from our home dangerous. Once at home, the noise from construction will change our place of rest to one where noisy machines clear the fields, drive pilings into the ground to support solar arrays, and lay underground electrical cables. As close as we are located to the construction, there will be no peace and quiet, no relaxing in our home.

In a recent study submitted to the PSC by Lost City Renewables LLC, our house was one of the worst for visibility. This is sickening. We love our home, the view, the quiet setting. We should be able to enjoy it.

Thank you,  
Lee Spurlock

Mary Ann Spurlock
