Comments: It is with great concern that myself and community members are against this water rate increase for the residents of Ledbetter Kentucky. People are barely passing by, with some not at all. This increase is uncalled for and ruthless. There are many complaints on the water quality and if anything, those should be addressed before a rate increase. We should be able to drink the water safely before we pay more. I'm urging you to please reconsider and think about your community members of Ledbetter Kentucky, and how this will affect them cooking meals for their children, cleaning themselves or their children, etc. Please understand that people can barely afford their bill as it is. I haven't even used water this month due to the water

company not fixing the meter within a timely matter and our bill is already \$50, using nothing. Please do not do this to the community, we are begging at this point. This will force some to leave Ledbetter. Please reconsider this action. Thank you.

Comments: Please deny this application for rate increase. The people of Ledbetter pay some of the highest water bills in the area already. I think this is a problem of mismanagement of money rather than a problem with need to increase rates. My family has lived here for 3 years and if we had known about the water and sewage rates here, we would have never chosen Ledbetter as our home. I warn everyone that thinks about buying here about our water and sewage rates. It's a shame that we are already charged outrageous amounts for these utilities, yet they are still requesting increases. People cannot afford to live here as is because of the water and sewage rates.
