Subject: Comment on Case # 2025-00186

Dear Kentucky Public Service Commission,

Nuclear power is not a solution to the climate crisis or our ever-rising electric bills; it is too dirty, too dangerous, too expensive and too slow.

Supposed "new nuclear technology" is untested, unproven at scale, and has all of the same issues as "old" nuclear. It's expensive, it takes 10+ years to be built, it has the same health impacts, and we still don't know what to do with the waste.

We want our utilities to invest in energy efficiency, virtual power plants, rooftop solar and batteries -- these are all proven solutions that can lower our electric bills RIGHT NOW at a much lower investment than the costs associated with building out nuclear infrastructure. We don't need to pilot unproven technology, we already have the technology we need that is safe, affordable, and quick.

Sincerely,
Ms. Riley Gardner
