Subject: Case Number 2025-00257, Opposition to Kentucky Power Company's Proposed 15% Rate Increase

Dear Kentucky Public Service Commission,

I am writing to formally express my opposition to Kentucky Power Company's proposed 15% rate increase under Case No. 2025-00257. As a resident and ratepayer in Eastern Kentucky, I am deeply concerned about the severe impact this increase would have on families, small businesses, and fixed-income residents who are already struggling under rising costs of living.

This proposal comes at a time when our region is facing high poverty rates, stagnant wages, and limited economic opportunities. A 15% increase in utility bills would only deepen financial hardship for thousands of Kentuckians. Many households already make difficult choices between paying for electricity, groceries, or medications. Such an increase risks pushing even more families into energy insecurity and debt.

Furthermore, Kentucky Power's customers have faced repeated rate hikes in recent years, with little visible improvement in service reliability or infrastructure investment. Ratepayers should not be asked to shoulder additional financial burdens while the company's executives and shareholders continue to benefit.

I urge the Public Service Commission to reject this proposed increase and instead require Kentucky Power Company to explore alternative solutions, such as operational efficiency improvements, reduced executive compensation, or renewable and community-based energy

investments, that would strengthen our grid without placing further strain on the people of Eastern Kentucky.

Thank you for your attention to this matter and for your continued service to the Commonwealth. I respectfully ask that my comments be included in the public record for Case No. 2025-00257.

Sincerely,

I am writing to formally express my opposition to Kentucky Power Company's proposed 15% rate increase under Case No. 2025-00257. As a resident and ratepayer in Eastern Kentucky, I am deeply concerned about the severe impact this increase would have on families, small businesses, and fixed-income residents who are already struggling under rising costs of living.

This proposal comes at a time when our region is facing high poverty rates, stagnant wages, and limited economic opportunities. A 15% increase in utility bills would only deepen financial hardship for thousands of Kentuckians. Many households already make difficult choices between paying for electricity, groceries, or medications. Such an increase risks pushing even more families into energy insecurity and debt.

Furthermore, Kentucky Power's customers have faced repeated rate hikes in recent years, with little visible improvement in service reliability or infrastructure investment. Ratepayers should not be asked to shoulder additional financial burdens while the company's executives and shareholders continue to benefit.

I urge the Public Service Commission to reject this proposed increase and instead require Kentucky Power Company to explore alternative solutions, such as operational efficiency improvements, reduced executive compensation, or renewable and community-based energy

investments, that would strengthen our grid without placing further strain on the people of Eastern Kentucky.

Thank you for your attention to this matter and for your continued service to the Commonwealth. I respectfully ask that my comments be included in the public record for Case No. 2025-00257.

Sincerely,

I am writing to formally express my opposition to Kentucky Power Company's proposed 15% rate increase under Case No. 2025-00257. As a resident and ratepayer in Eastern Kentucky, I am deeply concerned about the severe impact this increase would have on families, small businesses, and fixed-income residents who are already struggling under rising costs of living.

This proposal comes at a time when our region is facing high poverty rates, stagnant wages, and limited economic opportunities. A 15% increase in utility bills would only deepen financial hardship for thousands of Kentuckians. Many households already make difficult choices between paying for electricity, groceries, or medications. Such an increase risks pushing even more families into energy insecurity and debt.

Furthermore, Kentucky Power's customers have faced repeated rate hikes in recent years, with little visible improvement in service reliability or infrastructure investment. Ratepayers should not be asked to shoulder additional financial burdens while the company's executives and shareholders continue to benefit.

I urge the Public Service Commission to reject this proposed increase and instead require Kentucky Power Company to explore alternative solutions, such as operational efficiency improvements, reduced executive compensation, or renewable and community-based energy

investments, that would strengthen our grid without placing further strain on the people of Eastern Kentucky.

Thank you for your attention to this matter and for your continued service to the Commonwealth. I respectfully ask that my comments be included in the public record for Case No. 2025-00257.

Sincerely,

I am writing to formally express my opposition to Kentucky Power Company's proposed 15% rate increase under Case No. 2025-00257. As a resident and ratepayer in Eastern Kentucky, I am deeply concerned about the severe impact this increase would have on families, small businesses, and fixed-income residents who are already struggling under rising costs of living.

This proposal comes at a time when our region is facing high poverty rates, stagnant wages, and limited economic opportunities. A 15% increase in utility bills would only deepen financial hardship for thousands of Kentuckians. Many households already make difficult choices between paying for electricity, groceries, or medications. Such an increase risks pushing even more families into energy insecurity and debt.

Furthermore, Kentucky Power's customers have faced repeated rate hikes in recent years, with little visible improvement in service reliability or infrastructure investment. Ratepayers should not be asked to shoulder additional financial burdens while the company's executives and shareholders continue to benefit.

I urge the Public Service Commission to reject this proposed increase and instead require Kentucky Power Company to explore alternative solutions, such as operational efficiency improvements, reduced executive compensation, or renewable and community-based energy

investments, that would strengthen our grid without placing further strain on the people of Eastern Kentucky.

Thank you for your attention to this matter and for your continued service to the Commonwealth. I respectfully ask that my comments be included in the public record for Case No. 2025-00257.

Sincerely,

I am writing to formally express my opposition to Kentucky Power Company's proposed 15% rate increase under Case No. 2025-00257. As a resident and ratepayer in Eastern Kentucky, I am deeply concerned about the severe impact this increase would have on families, small businesses, and fixed-income residents who are already struggling under rising costs of living.

This proposal comes at a time when our region is facing high poverty rates, stagnant wages, and limited economic opportunities. A 15% increase in utility bills would only deepen financial hardship for thousands of Kentuckians. Many households already make difficult choices between paying for electricity, groceries, or medications. Such an increase risks pushing even more families into energy insecurity and debt.

Furthermore, Kentucky Power's customers have faced repeated rate hikes in recent years, with little visible improvement in service reliability or infrastructure investment. Ratepayers should not be asked to shoulder additional financial burdens while the company's executives and shareholders continue to benefit.

I urge the Public Service Commission to reject this proposed increase and instead require Kentucky Power Company to explore alternative solutions, such as operational efficiency improvements, reduced executive compensation, or renewable and community-based energy

investments, that would strengthen our grid without placing further strain on the people of Eastern Kentucky.

Thank you for your attention to this matter and for your continued service to the Commonwealth. I respectfully ask that my comments be included in the public record for Case No. 2025-00257.

Sincerely,

I am writing to formally express my opposition to Kentucky Power Company's proposed 15% rate increase under Case No. 2025-00257. As a resident and ratepayer in Eastern Kentucky, I am deeply concerned about the severe impact this increase would have on families, small businesses, and fixed-income residents who are already struggling under rising costs of living.

This proposal comes at a time when our region is facing high poverty rates, stagnant wages, and limited economic opportunities. A 15% increase in utility bills would only deepen financial hardship for thousands of Kentuckians. Many households already make difficult choices between paying for electricity, groceries, or medications. Such an increase risks pushing even more families into energy insecurity and debt.

Furthermore, Kentucky Power's customers have faced repeated rate hikes in recent years, with little visible improvement in service reliability or infrastructure investment. Ratepayers should not be asked to shoulder additional financial burdens while the company's executives and shareholders continue to benefit.

I urge the Public Service Commission to reject this proposed increase and instead require Kentucky Power Company to explore alternative solutions, such as operational efficiency improvements, reduced executive compensation, or renewable and community-based energy

investments, that would strengthen our grid without placing further strain on the people of Eastern Kentucky.

Thank you for your attention to this matter and for your continued service to the Commonwealth. I respectfully ask that my comments be included in the public record for Case No. 2025-00257.

Sincerely,

I am writing to formally express my opposition to Kentucky Power Company's proposed 15% rate increase under Case No. 2025-00257. As a resident and ratepayer in Eastern Kentucky, I am deeply concerned about the severe impact this increase would have on families, small businesses, and fixed-income residents who are already struggling under rising costs of living.

This proposal comes at a time when our region is facing high poverty rates, stagnant wages, and limited economic opportunities. A 15% increase in utility bills would only deepen financial hardship for thousands of Kentuckians. Many households already make difficult choices between paying for electricity, groceries, or medications. Such an increase risks pushing even more families into energy insecurity and debt.

Furthermore, Kentucky Power's customers have faced repeated rate hikes in recent years, with little visible improvement in service reliability or infrastructure investment. Ratepayers should not be asked to shoulder additional financial burdens while the company's executives and shareholders continue to benefit.

I urge the Public Service Commission to reject this proposed increase and instead require Kentucky Power Company to explore alternative solutions, such as operational efficiency improvements, reduced executive compensation, or renewable and community-based energy

investments, that would strengthen our grid without placing further strain on the people of Eastern Kentucky.

Thank you for your attention to this matter and for your continued service to the Commonwealth. I respectfully ask that my comments be included in the public record for Case No. 2025-00257.

Sincerely,

Dear Kentucky Public Service Commission,

I am writing to formally express my opposition to Kentucky Power Company's proposed 15% rate increase under Case No. 2025-00257. As a resident and ratepayer in Eastern Kentucky, I am deeply concerned about the severe impact this increase would have on families, small businesses, and fixed-income residents who are already struggling under rising costs of living.

This proposal comes at a time when our region is facing high poverty rates, stagnant wages, and limited economic opportunities. A 15% increase in utility bills would only deepen financial hardship for thousands of Kentuckians. Many households already make difficult choices between paying for electricity, groceries, or medications. Such an increase risks pushing even more families into energy insecurity and debt.

Furthermore, Kentucky Power's customers have faced repeated rate hikes in recent years, with little visible improvement in service reliability or infrastructure investment. Ratepayers should not be asked to shoulder additional financial burdens while the company's executives and shareholders continue to benefit.

I urge the Public Service Commission to reject this proposed increase and instead require Kentucky Power Company to explore alternative solutions, such as operational efficiency improvements, reduced executive compensation, or renewable and community-based energy

investments, that would strengthen our grid without placing further strain on the people of Eastern Kentucky.

Thank you for your attention to this matter and for your continued service to the Commonwealth. I respectfully ask that my comments be included in the public record for Case No. 2025-00257.

Sincerely,

Dear Kentucky Public Service Commission,

I am writing to formally express my opposition to Kentucky Power Company's proposed 15% rate increase under Case No. 2025-00257. As a resident and ratepayer in Eastern Kentucky, I am deeply concerned about the severe impact this increase would have on families, small businesses, and fixed-income residents who are already struggling under rising costs of living.

This proposal comes at a time when our region is facing high poverty rates, stagnant wages, and limited economic opportunities. A 15% increase in utility bills would only deepen financial hardship for thousands of Kentuckians. Many households already make difficult choices between paying for electricity, groceries, or medications. Such an increase risks pushing even more families into energy insecurity and debt.

Furthermore, Kentucky Power's customers have faced repeated rate hikes in recent years, with little visible improvement in service reliability or infrastructure investment. Ratepayers should not be asked to shoulder additional financial burdens while the company's executives and shareholders continue to benefit.

I urge the Public Service Commission to reject this proposed increase and instead require Kentucky Power Company to explore alternative solutions, such as operational efficiency improvements, reduced executive compensation, or renewable and community-based energy

investments, that would strengthen our grid without placing further strain on the people of Eastern Kentucky.

Thank you for your attention to this matter and for your continued service to the Commonwealth. I respectfully ask that my comments be included in the public record for Case No. 2025-00257.

Sincerely,

Dear Kentucky Public Service Commission,

I am writing to formally express my opposition to Kentucky Power Company's proposed 15% rate increase under Case No. 2025-00257. As a resident and ratepayer in Eastern Kentucky, I am deeply concerned about the severe impact this increase would have on families, small businesses, and fixed-income residents who are already struggling under rising costs of living.

This proposal comes at a time when our region is facing high poverty rates, stagnant wages, and limited economic opportunities. A 15% increase in utility bills would only deepen financial hardship for thousands of Kentuckians. Many households already make difficult choices between paying for electricity, groceries, or medications. Such an increase risks pushing even more families into energy insecurity and debt.

Furthermore, Kentucky Power's customers have faced repeated rate hikes in recent years, with little visible improvement in service reliability or infrastructure investment. Ratepayers should not be asked to shoulder additional financial burdens while the company's executives and shareholders continue to benefit.

I urge the Public Service Commission to reject this proposed increase and instead require Kentucky Power Company to explore alternative solutions, such as operational efficiency improvements, reduced executive compensation, or renewable and community-based energy

investments, that would strengthen our grid without placing further strain on the people of Eastern Kentucky.

Thank you for your attention to this matter and for your continued service to the Commonwealth. I respectfully ask that my comments be included in the public record for Case No. 2025-00257.

Sincerely,
