Comments:

Dearest Commissioner,

Concerning Case Number 2025-00293. I strongly oppose the Meade County Water District's requested 27% plus rate increase for water services. This is an outrageous requested rate increase compared to today's average inflation rate. Many households are already struggling to pay necessary bills. Water is a necessity and considered to be one of the cornerstones of human health and dignity—it was recognized as a fundamental human right by the United Nations in 2010. Furthermore, this proposal is not only excessive but also unfairly designed to place the heaviest burden on everyday residential customers. Meade County Water District is asking for a 27% plus increase in the fixed "customer charge", which means even if the customers do everything they can to conserve water usage their bill will still go up significantly. This additional burden of a 27% plus rate increase is unacceptable and to many already low income families unfair. This high rate increase will affect families such as mine to cut extra spending which will negatively impact the broader economy. In closing, I respectfully urge you to conduct a thorough due diligence on this matter and give it the proper consideration it deserves to serve the residential community.

Sincerely,
Keri Thompson
