COMMISSION

Dear PSC:

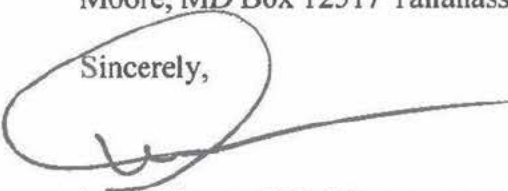

I trust you have had good holidays, with more ahead this month. This request for intervention is in regards to the above noted case and property in Johnson County, Kentucky.

We have received notice that the Presetonsburg-Thelma Transmission line rebuild may affect our property, and have the following concerns:

1. Will this new proposed route cross our property or be close enough to be within visual sight of our property. This is a request for an accurate and detailed map of the transmission route including the boundaries of our property estate at 238 Oaklawn Estate Hager Hill, KY 41222.
2. Will the construction of towering electric poles, if close or in line of sight, destroy the pristine view from our property, a good parcel (50ac m.o.l. in our hollow), that from its high points on our ridge has had a clean unobstructed view that is unchanged since the time of Daniel Boone, who traversed these ridgelines in eastern Kentucky.
3. Will these electric poles and lines, if close to our estate, create potential dangers, hazards, and financial loss from Electromagnetic Radiation proximity, loss of practical use of land or future use of land and development, devaluations of adjacent land, sound disturbances from buzzing/humming electric lines, changes in wildlife abundance and biodiversity on the property, and increase risk for fires and other risks that may affect us, our property and our insurance.
4. Why is the line being moved from the current locations/and easements, to create an entirely new path through properties previous unaffected.

I understand this project is under review, so please contact me as soon as possible to discuss by phone at [REDACTED], and forward a detailed map at your earliest convenience to: Mark Moore, MD Box 12517 Tallahassee, FL 32317. Thank you for your time and consideration.

Sincerely,

Mark Moore, MD, Homeowner
